CHILDREN'S LIVES SAVED FOR FIFTY

CENTS.—Thousands of children die annu-

ally of Croup. Now, mothers, if you would

spend fifty cents, and always have a bottle

of Dr. Todd's Ventriol Liniment in the house,

you never need fear losing your little one

when attacked with this complaint. It is

The Child's Corner.

THE CHILD ANGEL.

Little angels that chatter, chatter,
Little feet that patter, patter
With a careless footstep all the day,
Little eyes that softly lighten,
Little cheeks that flush and brighten,
Little voices singing at their play—

In my memory awaken
Thoughts of one who has been taken,
Of a little heart that beats no more,
Of a little voice that's ringing,
Mid the angels sweetly singing
Songs of gladness on a distant shore.

—Chambers' Journal.

Mission of a Stray Geography and Stray Bible.

A correspondent of the *Christian Observer* furnishes a sketch of the life and conversion of Joseph Nee Sima, a Japanese young man who is studying at Amherst, Massachusetts, by the help of Alpheus Hardy, Esq., of Boston. We make the following selections from the narrative:

"One day when he was attending school in Yeddo, and was hardly more than a boy in age, being about fifteen years old, he went into the streets, and happened to see a 'Geography of the United States,' printed in the Chinese language. He took it up and read it, and then for the first time understood the form of the earth, what nations inhabit it, and the difference between their government and institutions and those of the Japanese. A sudden flood of light fell upon his mind and fairly overpowered him. Instantly all his purposes were changed, and his future career decided. 'The geography did not teach religion,' it said nothing of Christ and Christianity; it was purely scientific and secular, but from the moment it was opened and read the youth resolved he must and would see such a wonderful country as the United States; nor did he rest till his purpose was accomplished. 'God was not in all his thoughts,' still less Christ in the way of salvation. His impulses were all intellectual; his aims all secular; but, overruled by God, they resulted in his conversion.

"This geography was the work of the Rev. Dr. Bridgman, an American missionary, who had resided above thirty years in China, and wrote the geography in the Chinese language for Chinese readers, to enlighten them in regard to our country and its institutions, and thereby secure their respect and good will, as he once stated to the writer at his own house in Shanghai. But the better educated classes in Japan read and write the Chinese language, besides their own. Little did Dr. Bridgman dream that a copy would stray away to Japan, and falling into the hands of the youth, would impel him on to his own country and his own native State.

"If the hand of God is seen in the stray geography which by some unknown means made its way from Shanghai, in China, to Yeddo, the capital of Japan, much more conspicuous is it in the copy of the Bible which traveled the same distance of above one thousand miles, and reached the same destination. The geography met the eye of the youth in the streets of the city; the Bible he chanced to see in the library of a companion, on whom one day he made a call. He was not in search of it; he knew not of its existence; he had never seen one; yet it came into his hands. Yeddo contained at that time a population of three millions. Some of the streets are ten or twelve miles long, and crowded with stores and houses on each side. Perhaps there was not another copy of the Bible in Yeddo; certainly the writer of this communication could not hear of one in all Japan during the three years he was there, immediately upon the opening of the country to foreign intercourse; yet this copy, perhaps a solitary copy, which could hardly have been hunted up by a band of detectives, fell mysteriously into the hands of this youth! He had been enlightened as to this world by the geography; he was now enlightened; as by the lightning's flash, as to another. What a testimony to the divinity and power of the Bible were his first impressions upon reading it! He borrowed the book; he carried it to his room; he read it by night and concealed it by day, lest, being detected in owning and reading it, he and all his family should be crucified, according to an old edict against the Jesuits. The same individual who wrote the geography translated the Bible into the Chinese; and both volumes found their way into another country, and reached the same individual, who was prepared to appreciate and use them. Instantly the Bible was 'the power of God,' scattering the gross darkness brooding over a heathen mind, touching the moral sensibilities of the heart, and calling forth prayer to the Christian's God in terms almost provoking a smile, and yet evidently fervent and sincere. Glorious mission of a stray geography and a stray Bible in a heathen land! 'Nor can we fail to admire the courage, the large grasp of mind,

the self-denial, the indomitable will, and calm trust in Providence the youth displayed at this period. He was forbidden by both his parents and his prince to entertain the thought of leaving his country, and by both was severely and repeatedly beaten, as well as ridiculed. He had no friends to advise or aid him; he had no means to meet his expenses, and hardly clothes sufficient to cover his body. He knew no masters of foreign vessels, nor the services required on board, or even the language Americans speak. More than all, he had parents and brothers and sisters whom he loved, while his prince promised him office and ample compensation. But the Bible had told him that God was greater than his parents, and must first be obeyed. Therefore, periling everything, he rose in the dark hour of midnight. He collected his few articles of clothing and his few shillings of money, and, walking the long distance of more than a dozen miles to the port, found an American vessel bound to Shanghai, in China, the captain of which kindly gave him a passage for his services on board. There he met with another American vessel bound to Boston, on board of which he served eight months in the Chinese seas before the vessel left for home. But his purpose was unalterable; and praying that 'God would please let him reach his aim,' he sailed over the Sea of China, the Indian Ocean, and the great Atlantic, simply 'to be educated by the Bible,' as he explained his motive. Who ever traveled so far for such an object, or made such sacrifices, or met such perils, simply to be able to read and understand the Bible?

"Other circumstances are remarkable. He had never seen a missionary; he had never heard a sermon; he had never read a Christian book or even tract; he had never conversed with a Christian; he had never seen one; and yet some influence reached his mind and touched his heart the moment he read the geography, and impelled him to strive to reach this wonderful land; and when he met with the copy of the Bible in China, and read it by the aid of his candle in his chamber, the determination became unconquerable. God helped him to attain his aim; he stood upon our shores a youth, a mere stripling. Unknown friends stood there also, ready to receive and aid him. At once he was clothed and sent to school, and soon showed that he had been led all the long way by the Spirit of God."

Scientific.

THE STORY OF POMPEII.

Most people know that Pompeii was buried by a volcanic eruption, A. D. 79, and that long centuries after certain excavations were made leading to archaeological discoveries surpassing in interest any of which the modern world has record. But comparatively few are aware that since the Italian revolution of 1860 more has been learned of the unfortunate city than perhaps had accumulated during all the preceding years since the catastrophe. Light follows liberty, and one of the first acts of the new government was that of appointing Signor Fiorelli inspector of the excavations, with facilities no similar official had before enjoyed. This gentleman, who has the rare fortune to unite the culture of a scholar with the practical energy of a good business man, soon had a large force busily at work. No fewer than seven hundred men have sometimes been working under his orders, and the results have been most propitious. The chronicle of previous work is brief enough, and may be mentioned by way of contrast with that of the last decade. In the year B. C. 63 a premonitory earthquake had desolated Pompeii. It had destroyed several temples, the great Basilica, the colonnade of the Forum and other important buildings, besides others of lesser note. The people fled, but subsequently returned and bent themselves to the task of restoration. Building was a slower process than now, but the temples of Venus and Jupiter, of Isis and of Fortune all went up again, and Pompeii, if somewhat debased architecturally, was more showy and luxurious than ever. The Emperor Titus seemed to have thought it a pity all this splendor should be lost, but the senators he sent to view the site and estimate the expense of digging the town free of its terrible incubus of ashes, were frightened by the magnitude of the task, and the idea was abandoned. Thus in time the very place where Pompeii had stood was forgotten.

Toward the end of the sixteenth century an aqueduct from the Sarno to Torre dell' Annunziata was carried straight through the heart of the buried city, following streets and piercing walls. Yet no one said aught of Pompeii, and it was not until 1748, under Charles the Third, after the world had been excited by the discovery of Herculaneum, that a certain prying engineer, Alcibiade by name, got the 'royal' permission

to excavate near the site of the former place, and began to find out what was hidden there. Even then neither this adventurer nor others mentioned Pompeii. They thought he was working over Stabiae. Bittle was done at this or any time under the Bourbons. The men in charge would occasionally find something, and then, for the most part, would cover it up again, so that on a visit of some royal or other distinguished personage they might flatter their visitor by pretending to make a surprising discovery in his presence. When the Bonapartes prostrated the Bourbons early in the nineteenth century, the energy of the Republic of '60 was in a manner prefigured. Caroline, Napoleon's sister and Murat's Queen, was enthusiastically interested in the works, and caused them to be energetically advanced. The Bourbons returned, and all stood still again until the cry of free Italy was heard, and with Victor Emmanuel came Fiorelli. Since then, as we have said, the ground over Pompeii has been worked with almost as much vigor and eagerness as the gold diggings of California.

Streets, houses, theaters, have one by one been exhumed, inscriptions deciphered, trinkets, coins and household utensils collected, jars of cosmetics and phials of medicine, and, lately, such ordinary perishable things as loaves of bread. Eighty-one of these have been discovered by Fiorelli in a single oven—the place having been so sealed that no ashes entered it, and the bread was found exactly in the order in which it was placed on that dreadful twenty-third of November, 79, when the fierce strife of the gladiators at the amphitheater was interrupted by the lava storm from Vesuvius. All sorts of things have been found, unthought of even at the time the admirable copies of Pompeian architecture, etc., were constructed at the Crystal Palace at Sydenham. Posters bearing entreaties to vote for such a one for *edile*, love messages written on back walls, articles of female apparel or ornament, paintings in full preservation, poor animals held fast by chains which prevented their escape from the burning destruction, and so dying where they stood, and worse still, human prisoners in the gladiators' barracks immovably riveted by the anklets to iron racks. Of course only the skeletons of these remained; but if no human form, rounded as in life, has been discovered, there has been found what is so precisely like it as to be no less mournfully impressive. We are told by M. Monnier—a French writer who has published this and other cognate information in an interesting monograph—that recently, in a small street under heaps of rubbish, the workmen perceived an empty space at the bottom of which were some bones. Signor Fiorelli, who was at once called, had a luminous idea. He made them mix plaster, and poured it into the hollow as in a cast. The operation was repeated in other instances close by. Afterward the crust of pumice-stone and hardened ashes was carefully removed. When this was done four apparently perfect human bodies lay calmly below. Their flesh had sustained their hot shroud of ashes until it had cooled and crusted, and as that flesh had withered away the spaces had been left which Fiorelli now so ingeniously filled.—*New York Times*.

THE ART OF THINKING.—One of the best modes of improving in the art of thinking is to think over some subject before you read upon it, and then to observe after what manner it has occurred to the mind of some great master. You will then observe whether you have been too rash or too timid, what you have omitted and in what you have exceeded, and by this process you will insensibly catch a great manner of viewing a question. It is right in study, not only to think whenever any extraordinary incident provokes you to think, but from time to time what has passed; to dwell upon it, and to see what trains of thought voluntarily present themselves to the mind. It is a most superior habit of some minds to refer all the particular truths which strike them to other truths more general, so that their knowledge is beautifully methodized; and the general truth at any time suggests all the particular exemplifications, or any particular exemplification at once leads to the general truth. This kind of understanding has an immense and decided superiority over those confused heads in which one fact is piled upon another without the least attempt at classification and arrangement. Some men always read with a pen in their hand, and commit to paper any new thought which strikes them; others trust to chance for its reappearance. Which of these is the best method in the conduct of the understanding, must, I suppose, depend a great deal upon the particular understanding in question. Some men can do nothing without preparation; others little with it; some are fountains, some reservoirs.

Rev. Sydney Smith.

The Importance of Learning a Trade.

Why is it that there is such a repugnance on the part of parents to putting their sons to a trade? A skilled mechanic is an independent man. Go where he will his craft will bring him support. He need ask favors of none. He has, literally, his fortune in his own hands. Yet foolish parents, ambitions that their sons should "rise in the world," as they say, are more willing that they should study for a profession, with the chances of even moderate success heavily against them, or run the risk of spending their manhood in the ignoble task of retailing dry goods or of toiling laboriously at the accountant's desk, than learn a trade which would bring them manly strength, health, and independence. In point of fact the method they choose is the one least likely to achieve the advancement aimed at; for the supply of candidates for positions as "errand boys," dry goods clerks and kindred occupations is notoriously overstocked, while, on the other hand, the demand for really skilled mechanics, of every description, is as notoriously beyond the supply. The crying need of this country to-day is for skilled labor; and that father who neglects to provide his son with a useful trade, and to see that he thoroughly masters it, does him a grievous wrong, and runs the risk of helping, by so much, to increase the stock of idle and dependent, if not vicious, members of society.

It is stated in the report of the Prison Association, lately issued, that of fourteen thousand five hundred and ninety-six prisoners confined in the penitentiaries of thirty States, in 1867, seventy-seven percent, or over ten thousand of the number, had never learned a trade. The fact conveys a lesson of profound interest to those who have in charge the training of boys, and girls too, for the active duties of life. *Manufacturer and Builder*.

THE USE OF BOTH HANDS.—A writer suggests that it would be a good thing for men and women were they taught in childhood to use their left hand equally with their right. The use of the right hand only for certain actions, such as writing and working with mechanical tools, is entirely conventional; and there does not appear to be any reason why people should not be ambidexter in every kind of manual work. Persons who have lost their right hand by accident frequently acquire great facility with the left, after some practice; but grown-up persons have not always the patience to betake themselves to the necessary practice. By children the thing would be acquired insensibly if means were taken to lead them to the practice of it. Children living in houses where two languages are spoken acquire both with great facility; and what is true of tongues would be equally so of hands.—*Manufacturer and Builder*.

The *Christian World* has an account of the progress of Protestantism in various parts of Mexico. Miss Rankin writes from Monterey that she employs fifteen men and women as evangelists, catechists and Bible readers, and could send out immediately a dozen more men, if she could provide for their families. She says wherever they go congregations of interested Mexicans are gathered and souls converted. A year ago last July two of these catechists visited Ville de Cos, a place of five thousand inhabitants in Zacatecas, with two agents of the Bible society; and, as the result of their labors, there is now a church of seventy members, and the mayor was one of the first converts. She mentions several other churches organized within a few months, and regards these converts as admirably adapted for labor among their countrymen. In central Mexico the good work has gone on very rapidly since Rev. H. C. Riley went to the capital. He says that forty native Protestant evangelical congregations now meet weekly in that part of the republic. With but little practical sympathy they could be made very efficient and multiplied. Ponce de Leon, one of the most energetic of the Mexican Protestants, has organized scores of congregations, and met great opposition, of which an example was the mob at Puebla, of which we gave an account some weeks ago, and from which he barely escaped with his life. A Roman Catholic congregation in a town near the capital lately "pronounced" in favor of the Evangelical Church, and after uproarious ringing of bells passed their church over to a Mexican Protestant missionary. The general government has recently leased the Protestants a large church building in the capital. The liberal laws are a great help to this cause, in which is bound up the future progress of Mexico. Probably in scarce any place is a small outlay of money and effort bringing larger results than in our neighboring republic.

Pleasant words are as a honey-comb—sweet to the soul and health to the bones.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD

NOW IN USE.

THE FASHION.

We call especial attention to the Stove, which has been produced at great expense, combining all the new and important improvements; also to the extra height of the oven under the fire chamber, the Patent Air Chamber, Front Doors, and Patent White Enamelled Iron Knobs, the Improvements in the covers and centre places, all of which have been covered by Letters Patent, and are used in no other stove. They are warranted to equal fire, or economy, sent free of charge in all cases. We have all sizes of this justly celebrated Stove, both

PLAIN AND EXTENDED BACKS.

The Extended Back with cast iron Enamelled Reservoir and Patent Tin Warming Cover, Gridiron Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, as in the case in most of the Stoves now used, and the heat is forced directly against the whole surface of the bottom of the Reservoir. The Reservoir, being detached from the pipe, can be removed at pleasure, thereby forming a grate stove, and is used in the same manner as the plain ones. For sale by

G. W. W. GOODWIN, 62 Camp Street.

Complete and Perfect Cooking Stove FOR BITUMINOUS COAL OR COKE

ever invented. In the estimation of all who have yet seen it. Patented in 1863.

THE MONITOR.

which can be seen at 62 Camp Street. The advantages possessed by this Stove over all the other Coal Cooking Stoves are so numerous, and so potent to every sensible observer, that it is only necessary to examine it in order to be convinced of its superiority.

All of the above Stoves are fitted with grates, oven doors lined with tin, and furnished with William Moore's Patent Air Chamber, sliding front doors, patent centre covers and White Enamelled Knobs.

The operation of every Stove guaranteed. Directions for putting up and using sent accompany each Stove.

G. W. W. GOODWIN, 62 Camp Street, Sole Agent for States of La. and Tenn.

THE TIMES.

—THE IMPROVED

LARGE OVEN COOKING STOVE

with extended Fire Chamber and Feeder—one of the best Baking and most economical Stoves made.

The Flues are constructed so as to insure the most perfect draft. The heat of the fire is so equalized that when baking there is no need for removing anything until done.

THE TIMES.

Is made of a superior quality of iron, very heavy, of neat design and fine finish. The top plate is put together in sections, to insure the greatest expansion without cracking.

We invite the attention of Housekeepers to the advantages of this Stove. Remember, we guarantee them to give entire satisfaction. Duplicate parts can be had at all times, at small cost, by which repairs can be made which will frequently save the price of a new Stove.

ZABIE & DALTON, No. 115 Poydras Street.

A large variety of MANTLE GRATES, House Furnishings, Tin and Japan Ware. Agents for the celebrated Osborn and Annual Cages.

ZABIE & DALTON, No. 115 Poydras Street.

STOVES, GRATES AND HOUSE FURNISHINGS.

THE undersigned would call the attention of city and country buyers of Cooking Stoves to the following list of Stoves manufactured by Mr. M. L. Riley:

The *Manthorpe*.

A first class Cooking stove, having all the latest improvements that have so far been invented. Has a new arrangement of building; also an Ash-pit. The casting is heavier than any Stove sold in this market. Sold under a full guarantee in every respect.

The *Diamond Rock*.

A Stove well known in this market. The same is put together in sections, and is used throughout the country, which is a very good recommendation. Sold under a full guarantee.

Besides the above named Stoves, I have on hand the celebrated Cotton Plant, Cedar Oak, True Kentuckian, Mind of Orleans Queen of the South, Dea and others, all of which I offer at a low price.

J. H. CAMPMAN, no 131 61 133 Poydras St., New Orleans.

MISCELLANEOUS.

CHURCH BELLS. CHURCH BELLS.

We are prepared to furnish Church Bells of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

Weight.	Wt. of Bell and mounting.	Price.
28-inch Bell	250 lbs	\$55 00
36-inch Bell	650 lbs	800 00
40-inch Bell	800 lbs	1000 00
48-inch Bell	1200 lbs	1500 00

These Bells are warranted for one year against breakage in ordinary use.

THOS. B. ROULEY & CO., 119 1/2 ly No. 9 Perdido St., N. Orleans.

BELL'S STEEL BELL FOUNDRY.

Established in 1837.

Church, Academy, Factory, Farm, Fire Alarm Bells, etc., made of pure Bell Metal (copper and tin) warranted in quality, tone, durability, etc., and mounted with our Patent Improved Rotating Hangers. Illustrated catalogues sent free.

YANDUZZEN & TIFF, 102 and 104 East Second Street, Cincinnati, Ohio.

BELL'S STEEL COMPOSITION.

For Churches, Schools, Etc.

BLUMER, NORTON & CO., Manufacturers, Cincinnati, Ohio.

These celebrated Bells (not Cast Iron or "Amalgam") rival in purity and volume of tone those of copper and tin, are more durable, and cost only one-third as much. Send for descriptive circular.

COLUMBUS FEMALE INSTITUTE.

COLUMBUS, MISSISSIPPI.

The Second Term of the present scholastic year begins February 14 and closes July 6, 1870.

Teachers, 10; pupils, 154. Apply to J. F. TARRANT, President, 1422 1/2 ly

The Christian Advocate.

SATURDAY, MARCH 19, 1870.

RIDLEY AND LATIMER.

The following extract, taken from Frodo's History of England, illustrates the spirit of hatred, intolerance and murder which the Church of Rome has cherished for ages toward those who renounce and oppose its errors and authority. Let it be remembered that it claims to be always the same; but, thanks be to God, its power to persecute is destroyed in every land where the word of God has free course and is glorified.

The place selected for the burning of these reformers was outside of the north wall of the town, a short distance from the southward corner of Balliol College, and about the same distance from Bocardo prison, from which Cranmer was intended to witness his friends' sufferings.

Lord Willoughby of Thane, was on the spot by the queen's order; and the city gentry were under arms to prevent disturbance. Ridley appeared first, walking between the mayor and one of the aldermen. He was dressed in a furled black gown, "such as he was wont to wear, being a bishop," a furled velvet tippet about his neck, and a velvet cap. He had trimmed his beard, and had washed himself from head to foot—a man evidently nice in his appearance, a gentleman, and likely to be known as such. They led him under the windows of Bocardo, and he looked up; but St.oto, the friar, was with the archbishop, making use of the occasion, and Ridley did not see him. In turning round, however, he saw Latimer coming up behind him in the frieze coat, with the cap and handkerchief—the work-day costume mangled, except that under his cloak, and reaching to his feet, the old man wore a long new shroud.

"O! be ye there?" Ridley exclaimed.

"Yes," Latimer answered. "Coming after as fast as I can follow."

Ridley ran to him and embraced him. "Be of good heart, brother," he said. "God will either assuage the flame or else strengthen us to abide it." They then knelt and prayed together, and then exchanged a few words in a low voice, which were not overheard.

Lord Williams, the vice-chancellor, and the doctors were seated on a form close to the stake. A sermon was preached, "a scant one, of scarce a quarter of an hour," and then Ridley begged that for Christ's sake he might say a few words.

Lord Williams looked to the doctors, one of whom started from his seat and laid his hand on Ridley's hip.

"Recant," he said, "and you may both speak and live."

"So long as the breath is in my body," Ridley answered, "I will never deny my Lord Christ and his known truth. God's will be done in me. I commit our cause," he said in a loud voice, turning to the people, "to almighty God, who shall infallibly judge us all."

The brief preparations were swiftly made. Ridley gave his gown and tippet to his brother-in-law, and distributed remembrances to those who were nearest to him. To Sir Henry Lee he gave a new coat; to others he gave handkerchiefs, nutmegs, slices of ginger, his watch, and miscellaneous trinkets; some plucked off the points of his hose; "happy," it was said, "was he that might get any rug of him."

Latimer had nothing to give. He threw off his coat, stood bolt upright in his shroud, and the friends took their places on either side of the stake.

"O heavenly Father," Ridley said, "I give thee most humble thanks for that thou hast called me to be a professor of thee even unto death. Have mercy, O Lord, on this realm of England, and deliver the same from all her enemies."

A chain was passed round their bodies and fastened to a staple.

A friend brought a bag of powder and hung it round Ridley's neck.

"I will take it to be sent of God," Ridley said. "Have you more for my brother?"

"Yes, sir," the friend answered. "Give it to him betimes, then."

Ridley replied, "lest ye be troubled. The fire was then brought. To the last moment Ridley was troubled about the lenses; and, bound as he was, he entreated Lord Williams to intercede with the queen about them.

"I will remember your suit," Lord Williams answered. The lighted torch was then applied to the logs. "Be of good comfort, Master Ridley," Latimer cried at the crackling of the flames. "Play the man; we shall on this day light such a candle, by God's grace, in England, as I trust shall never be put out."

"In manus tuas, Domine, commendo spiritum meum," cried Ridley. "Domine accipe spiritum meum."

A man is a fool to be enraged with any ill that he cannot remedy, or if he endures one that he can.

"O Father of heaven," said Latimer on the other side, "receive my soul."

Latimer died first. As the flame blazed about him he bathed his hands in it, and stroked his face. The powder exploded, and he became instantly insensible.

His companion was less fortunate. The sticks had been piled too thickly over the gurnsey that was under them; the fire smoldered round his legs, and the sensation of suffering was muscally protracted. "I cannot burn," he called. "Lord have mercy on me; let the fire come to me; I cannot burn." His brother-in-law, with awakened kindness, threw on more wood, which only kept down the flame. At last some one lifted the pile with a bill, and let in the air; the red tongues of flame shot up fiercely; Ridley wrestled himself into the middle of them, and the powder did its work.

HOUSEKEEPERS' DEPARTMENT.

POTATO DUMPLINGS.—Grate potatoes and thicken with flour; the addition of an egg is an improvement.

To MAKE nice short cake take two heaping tablespoonfuls of lard, fried meat fat or butter; two heaping teaspoonfuls of saleratus, and one of salt; rub all into one and a half quarts of flour, mix quickly with one and a half pints of sour milk (a little sour cream would greatly improve it). Roll out rather thick.

ONE of the nicest of breakfast cakes is Japanese cake. One pint of milk, one and a half pints of flour, one egg and half a teaspoonful of salt. Mix the milk by degrees into the flour; then add the beaten egg, and beat all thoroughly for a few minutes. Bake in twelve earthen tea cups, or in a French roll-pun.

A SIMPLE RECIPE FOR BLANC MANGE.—Two ounces isinglass and two quarts milk. Soak the isinglass in the milk one hour, and then set it on the back of the stove, where it will heat slowly. When nearly boiling, strain into a bowl, sweeten and flavor. Stir often, and when nearly cool, turn into molds that have been first dipped in cold water. When cold, serve with cream and sugar.

RICE BALLS.—Wash a quarter of a pound of rice well in cold water, put it into a saucepan with a quart of boiling water and a little salt, and let it simmer till quite soft and pulpy, then drain it well off, and mix it while warm with sufficient butter to moisten it. Season with half a teaspoonful of powdered mace, or of curry powder, if preferred. Flour your hands and make it into balls the size of a walnut; drop them into stewed chicken or vegetable soup, and arrange them over and around the stewed meat, pouring the gravy over all. These balls will be found very nice. They may also be broiled over with beaten yolk of egg, then dredged with grated cracker, and fried in plenty of boiling lard, to be served as a separate dish with fricassees, etc.

SOUP.—A good soup contains the nutriment most needed, for a trifling expense, and should be found on every table twice a week—once a day would be better. A few points are very essential in making a good soup. Beef is the best meat for the purpose, as it contains the most nourishment. A slank bone well cracked, will make an abundant soup for a family of half a dozen persons twice. The bones should be put to soak in cold water, allowing a full quart for every pound of meat, and by a very gradual heat, come to a slow simmer, which should be kept up five or six hours. Soup should on no account be allowed to boil, except for the last fifteen minutes, to cook the vegetables in finishing. For the first hour of simmering it should be frequently skimmed. Salt and pepper and savory should be cooked in it from the first, and rice added at last for thickening. If vegetables are desired they should be nicely sliced, and the soup strained finally through a sieve. Great care should be used to skim off the fat as it rises, which will be necessary for some hours. If soup is allowed to cool, and used the second day after making, it will be all the better, as then all grease can be entirely removed. Very delicious soups can be made in the same manner, from game, fowls, mutton or veal, and thickening them with a little arrow root or corn starch. Broths for the delicate invalid, and soups, rich and nourishing, for the children, and indeed all the household, if you would have them strong, richly and free from dyspepsia.

SOLITUDE.—It is easy in the world to live after the world's opinion; it is easy in solitude to live after our own; but the great man is he who in the midst of the crowd keeps the independence of solitude.

A MAN is a fool to be enraged with any ill that he cannot remedy, or if he endures one that he can.

MUSICAL INSTRUMENTS.

GREAT SOUTHERN MUSIC HOUSE.

PHILIP WERLEIN,

80.....BARONNE STREET.....80

NEW ORLEANS.

PRICES REDUCED.

Pianos and Organs from 10 to 20 per cent. Cheaper

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S

COMMERCIAL COLLEGE,

61 CAMP STREET,

Corner Commercial Place, N. O.

Open day and evening the entire year.

Penmanship, Book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from twelve to fifty years of age attend. The instruction is given to each student. Persons who have neglected their education can here speedily qualify themselves for good situations in business. Some from the country may obtain board in the family of the principal.

William Walker, a late graduate of the Southern University of Alabama, and son of the Rev. Dr. J. B. Walker, of New Orleans, has charge of the Mathematical Department. Terms: Ten to twenty per cent, less than other colleges in this city.

A liberal education made when three or more enter together. The principal has been a practical teacher in New Orleans since 1852. For circulars, giving terms, etc., address

J. W. BLACKMAN, New Orleans.

Ja2 1y

METHODIST FEMALE COLLEGE,

TRUSTEES, ALABAMA.

Under the Patronage of the Mobile Conference.

The regular scholastic year will begin on the first Monday in OCTOBER next, and end the last of June. It is divided into two terms of four and a half months each.

EXPENSES.

Primary department, per term.....\$20 00

College department, per term.....25 00

Latin and Modern Languages, each.....10 00

Music on Piano and Violin.....25 00

Use of Instrument.....5 00

Drawing and Painting.....\$20 to 25 00

Contingent fee.....3 00

Board, including washing, lights and fuel, per month.....22 00

Young ladies must furnish their own towels, sheets, pillow cases and table napkins.

Payments for each term in advance. Pupils entering within the first month will be charged from the beginning. Mineral waters charged no tuition in the Literary Course.

Strict attention given to the manners and morals of the young ladies, and to their habits of study.

Refer to Dr. Keener.

For information address the President, at 3m

NEW ORLEANS MARKETS.

From the N. O. Price Current.
We have no material change to notice in the general market since our last issue. Most branches of the wholesale trade are doing a fair business in filling country orders. Stocks are ample, and dealers are offering goods at prices which make it the interest of merchants from the interior to lay in their supplies here rather than at New York. The receipts of sugar and molasses have been moderate and met a limited demand, at about previous rates. We have no new feature to notice in Western produce. The supplies are ample for the local trade, but furnish little scope to buyers for export.

The accounts from the interior state that the upper Red river and the lakes are very low, with no prospect of a rise. The indications are still that if our receipts of cotton are not curtailed by an actual exhaustion of the supply, they will be by an interruption to navigation. Already they show a falling off to a sufficient extent to attract general attention.

The river remains at three feet four inches below high water mark.

COTTON.—The following are the arrivals since the eleventh instant:

Louisiana and Mississippi	bales	9622
Lake	43	
Mobile	84	
Florida	106	
Texas	331	
Total		10966

On Saturday the demand was interrupted, and prices unsettled by the decline in gold and foreign exchange, and the sales were confined to 4,300 bales, at irregular rates, with a general tendency in favor of buyers, low middling closing at 20½ to 20¾, showing a decline of ¼¢, and middling at 21½ to 21¾. On Monday, under an advance in gold, buyers came forward more freely, but the supply being limited, and factors generally much more stringent in their pretensions, the business did not exceed 6,400 bales, while prices exhibited an irregular advance of ¼ to ½¢, low middling ruling at 20½ to 20¾, and middling at 21½ to 22¢, the market closing by a decline of 1¢. In gold, which was not reported until nearly three P. M. On Tuesday the market opened with a decidedly better feeling and a more lively demand, and although the supply was only moderate, and factors materially raised their pretensions, yet 9,800 bales changed hands, at irregular prices, showing an average advance of ¼¢ in middling and the higher grades, ½ to ¾¢ in the poorer qualities. Some parties, in fact, claimed that there was an advance of fully ¾¢ in ordinary and low ordinary, these grades being in unusually good request, and, under the competition among buyers, rising disproportionately compared with the medium and better qualities.

This makes an aggregate for the past three days of 20,500 bales. The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 886,543 bales, against 693,038 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 541,955 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 260,469 bales to Great Britain, of 49,408 to France, and of 78,257 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	16½ to 17½
Good ordinary	18 to 19½
Low middling	20 to 21
Middling	21 to 22
Strict middling	22½ to —

COTTON STATEMENT.

Stock on hand Sept. 1, 1869, bales	770
Arrived past three days	10966
Arrived previously	923753—934719
Total	935489
Exported past three days	13194
Exported previously	697541—700775
Total	732735
Stock on hand and on shipboard	234514

MOLASSES.—The supplies are small and consist mostly of fermenting.

SUGAR.—The market has been very dull since our last review.

MONEY.—Gold opened on Tuesday at 111½ to 111¾ (against 111½ at New York), and closed at 111½ to 112.

The movement in silver has been of moderate extent, the sales being principally confined to small amounts to city dealers for making change, and 20,000 Mexican dollars on Monday at 2½ to 2¾ per cent. premium in gold.

The only sales of bonds reported are \$6,000 City seven on Saturday at 73. We hear, however, that about \$65,000 City ten per cents have changed hands within a week at 98½ to \$1.

CATTLE MARKET.

NEW ORLEANS, MARCH 15, 1870.

Texas cattle, choice, per head	\$4 to 60
Texas cattle, second quality, per head	30 to 40
Texas cattle, third quality, per head	18 to 25

VOL. XVI.

NEW ORLEANS, SATURDAY, MARCH 26, 1870.

NO. 10.

NEWS OF THE WEEK.

DOMESTIC.

RICHMOND, VA., March 18.—Mayor Ellison's foremenbers two hundred, with a reserve of one hundred. Two public meetings were held to-night, at which it was resolved to volunteer to the support of Mayor Ellison.

The city is quiet except around the third station house, which Cannon holds with some forty white and black adherents.

NASHVILLE, TENN., March 18.—There was a meeting of the people of all parties held here to-day. They passed resolutions protesting against Congressional interference, and denouncing the exagerrations and misrepresentations which have been made regarding the internal affairs of the State; pledging the people to maintain the laws of the State and the National governments at all hazards, and declaring that soldiers sent to sustain the civil authorities will be welcomed.

WASHINGTON, March 19.—Governor Holden, of North Carolina, writes and telegraphs to the President, asking him to suspend the habeas corpus, that troops may operate in Alamance county, in that State.

Because of Bontwell's removal of New York revenue officers, Delino threatens to resign.

NEW YORK, March 19.—The market to-day is irregular. Low middling for future delivery in any month is quoted at 22½c.—*Picayune.*

WASHINGTON, March 19.—General Canby, in obedience to orders received from the President, sent two companies into the insurrectionary districts of North Carolina to-day.

Collector Bailey, collector of internal revenue of the twenty-second (Wall street) district of New York, has disappeared.

SAN FRANCISCO, March 19.—Shanghai advices received state that the Chinese emperor is receiving mirrors and household furniture from Paris.

The French steamer *Thabor* had arrived via the Suez Canal.

Captain Eyre was allowed to take passage in the steamer *Bombay*, notwithstanding the repeated requests and final demand of Mr. Delong, the American minister, upon the British authorities for his arrest and criminal trial. The Americans are indignant, not only at the sentence of Captain Eyre, but in consequence of the intolerable English insolence to which Mr. Delong was subjected during the investigation.

Captain Roe, chief of staff of the United States steamer *Delaware*, had reached Yokohama, and would immediately hold a naval court of inquiry.

The only bodies found belonging to the *Oueda* are those of Captain Williams and the ship's carpenter.

WASHINGTON, March 21.—Governor Holden, of North Carolina, telegraphed the President to-day to suspend the habeas corpus act in that State.

Governor Holden telegraphs a Senator: "We have Federal troops, but we want power to act. Is it possible the government will abandon its loyal people to be whipped and hanged? The habeas corpus act should be suspended at once."

The Democrats voted in a body to-day for the confirmation of Bradley to the supreme bench. The vote was 42 to 9.

The Supreme Court decided that the tender of payment of taxes before a sale for taxes, under the law of 1862, was equivalent to payment, and a subsequent sale by commissioners conveyed no title.

The court disclaims any jurisdiction in the Florida claim of Commodore Meade, it having been adjudicated in the Spanish court, after the treaty of 1819.

In the House to-day Mr. Butler, from the Judiciary Committee, reported a bill to facilitate the administration of justice for the State of Texas, reciting that the district judge for the eastern district of Texas, Judge Watrous, is incapacitated by sickness and paralysis from performing the duties of the office, and providing that, on his resignation, his salary is to be continued during life.

SENATE.—The Senate remained in executive session over an hour, commencing General Pleasanton, vice collector of internal revenue of the Wall street district, New York city, and Joseph P. Bradley as associate justice of the Supreme Court.

Afterward various petitions were presented.

A bill was introduced transferring the appointment of revenue inspectors to the President.

A bill distributing arms, or their equivalent in ordnance stores, to the Southern States, due from 1861 to 1865, passed.

The Georgia bill resumed. Mr. Drake's amendment to suppress disorders and an assessment of the expense upon the people, was presented. No action taken.

The Senate then adjourned.

HOUSE.—Bills were introduced incorporating the Indian Territory and Gulf Railroad; authorizing water gauges on the Mississippi river and its tributaries to protect the alluvial lands and to improve navigation, and provides for a regular system of observations.

A bill was also introduced to promote commerce and amity between Mexico and the United States, by encouraging the citizens of the United States to aid Mexico in developing that country.

A resolution was introduced that the South and West were entitled to more circulation. The House refused to second the question, which was referred to the Banking and Currency Committee.

The rules were suspended, and a bill appropriating \$20,000 to the Sisters of Mercy, at Charleston, South Carolina, to rebuild their orphan asylum, passed.

WASHINGTON, March 22.—The Committee on Foreign Relations to-day rejected the St. Thomas treaty by a unanimous vote, and the Panama Bay treaty by a majority vote, after a protracted session.

Senator Conkling made a powerful argument in the Senate to-day against the admission of General Ames as Senator elect from Mississippi, taking the ground that he was not a resident of that State.

Sensors Rice, Howard and Thayer argued that Ames is entitled to the seat. Thurman followed, discussing the question from a legal standpoint, and declaring that Ames is ineligible under the law.

Ames was on the Senate floor during the debate.

Griston is contesting the seat of Captain Connor, Congressman elect from the second Texas district, on the ground of intimidation and fraud. Connor holds the certificate and feels sure of getting the seat.—*Times.*

The Committee on Foreign Relations have agreed to report a resolution of neutrality between Spain and Cuba, and repealing the neutrality act of 1818. The committee, in addition to their action adverse to the purchase of San Domingo and St. Thomas, have agreed to set their faces against any acquisition of territory.

Associate Justice Stron has been assigned to Judge Grier's district. Justice Bradley will be assigned to the fifth district, comprising the States of Georgia, Florida, Alabama, Mississippi, Louisiana and Texas.

The Naval Committee, by a vote of 7 to 3, favor the selling of the Brooklyn navy yard property.

Spain has eighty-nine vessels, six hundred guns and thirteen thousand seamen in Cuban waters.

MINERSVILLE, Pa., March 22.—A large boiler in the colliery exploded to-day, killing several and wounding many persons.

JEFFERSON CITY, Mo., March 22.—The Governor has signed \$1,000,000 worth of the bonds of the South Pacific Railroad, the proceeds to remain in the State Treasury, to be used as required.

KAY WEST, March 22.—The brother of the supposed murderer of Custumon barely escaped assassination at a ball last night. He was severely wounded.

FORRESTER MONROE, March 22.—Another attempt was made to-day to place the owners of the Gile Smith firm in possession, and failed. The sheriff of Elizabeth City county, with a posse of fifty men, found some two hundred armed male and female negroes in possession. The posse were compelled to retire, with the negroes following. Five or six shots fired passed close by the sheriff. The posse succeeded in reaching Hampton safely. The sheriff has called on the Governor for assistance.

WASHINGTON, March 22.—The Supreme Court, in the cotton case of Benjamin F. Landers vs. John P. Tweed, from Louisiana, the judgment below was reversed and the case remanded for a new trial.

WASHINGTON, March 23.—It is rumored that President Grant is preparing to execute a sort of coup d'etat, comprising the entire reorganization of the cabinet, with B. F. Butler in a prominent position, either Secretary of the Treasury or of State. It is certain that Fish will go overboard.

FOREIGN.

OTTAWA, C. W., March 19.—A movement will be made, championed by Sir A. T. Galt, allowing the Dominion of Canada to establish commercial relations with foreign powers, subject to the queen's approval.

St. Johns, N. B., March 19.—The bottom of the harbor, on the Carleton side, sunk twenty feet to-day. Some wharves were destroyed, and lumber carried adrift.

LONDON, March 19.—The contract for the building of the Honduras railroad has been signed. The work will be commenced within a year.

HAVANA, March 22.—Gen. Puello has returned to Puerto Principe, and will soon march toward Ciego de Avilla. General Gayeneche is fortifying at Guanajay.

The bark *Amelia* Shering, from Antwerp for New Orleans, with a cargo of iron, is reported as a total loss on Sabes Keys. The crew was saved.

PARIS, March 22.—The trial of Prince Napoleon commenced at noon to-day. The utmost solemnity pervades the court.

Paschal Grissot was so irrelevant and defiant in his answer that the court refused to hear him.

TORONTO, March 24.—Contradictory testimony has been given, to the effect that Fonville said Noir slapped Bonaparte's face. A witness heard Fonville exclaim that if his pistol had not missed fire, he would have shot the prince.

Rochefort was called. Two gens d'armes conducted him into the presence of the court. Rochefort looked pale, but was calm. After his evidence was concluded, Rochefort was seated among the journalists, many of whom shook hands with him.

Victor Noir's brother's wife testified that Noir could not have slapped the prince, because Noir's gloves were intact.

During an intermission of the court, Rochefort's friends gathered around him, but the police kept them apart.

UNIVERSITY OF LOUISIANA.—The commencement exercises of the Law and Medical Departments of the University of Louisiana took place on Saturday, at eleven A. M., at Lyceum Hall. A large audience, among whom were many ladies, was present.

After an overture by Jaeger's Silver Cornet Band, Hon. Randall Hunt, the president of the University of Louisiana, conferred, with some appropriate remarks, the degree of bachelor of laws on the following alumni of the law school:

V. G. Rozier, C. T. Soniat, G. P. Smith, N. C. Blanchard, T. E. Meredith, A. Debny and S. L. Elan.

A salutary was then delivered by Charles T. Soniat, L. L. B.; a valedictory by Vallo J. Rozier, L. L. B.; and an address to the alumni by H. E. Upton, L. L. B.

After another overture by the orchestra, Hon. Randall Hunt conferred the degree of doctor of medicine on the following seventy-four graduates of the medical department:

Graduates in Medicine.—W. P. Adkins, Tex.; Thomas C. Bryan, Miss.; S. T. Birdsong, Miss.; S. R. Blakewood, S. C.; R. B. Bennett, Tex.; C. J. Brinson, Tex.; D. A. Cook, Tex.; W. N. Cross, Miss.; R. B. Carson, Miss.; T. P. Early, Tex.; T. B. Ford, Miss.; H. D. Guidry, La.; W. H. Goodwin, Ark.; J. D. Harrell, Miss.; Kleber Jones, Tex.; V. E. Kersh, Ark.; H. M. Lanier, Miss.; H. M. Longino, La.; John L. Lane, Tex.; W. G. McInnis, Tex.; R. L. McChing, Tex.; J. M. McFarland, Miss.; R. B. Nail, Miss.; W. J. Nesmith, Miss.; A. Pettit, Jr., Miss.; R. B. Prince, Miss.; A. J. Reuse, Tex.; John S. Ragland, Tex.; J. L. Richards, La.; M. K. Sturdivant, Tex.; William Sellers, La.; F. H. Tneker, Tex.; J. D. Terrell, Miss.; J. H. Trent, La.; R. F. Wright, La.; R. G. Williams, Tex.; W. J. Arnold, La.; M. C. Brockenbrough, Tex.; James D. Beck, Tenn.; R. L. Brooks, La.; B. H. Buldwin, Tex.; George W. Bedford, Tex.; L. C. Check, Miss.; H. B. Currie, La.; P. M. Catehing, Miss.; J. P. Elliott, Ala.; W. P. Fears, Tex.; A. Grailhe, La.; J. P. Haynes, Tex.; J. M. Hooper, Miss.; S. M. Jordan, Miss.; O. M. Kyle, Tex.; A. E. Lexter, Tex.; A. L. Ledbetter, Tex.; W. C. Moody, Tex.; H. McDowell, Ala.; T. S. McIlvren, Tex.; E. J. Nicholson, Miss.; Jeff. Nailer, Miss.; E. N. Potts, La.; M. L. Price, Tex.; D. W. Ramsey, Ala.; P. B. Reed, Ky.; John J. Roilly, La.; W. E. Seale, Tex.; William P. Sneed, Tex.; J. W. Simmonson, La.; John R. Taylor, Tex.; Frank Tipton, Ala.; J. R. Watson, Miss.; Z. T. Wood-

ruff, Miss.; E. D. Yates, Miss.; M. Mannheim, Ill.

Graduates in Pharmacy.—D. Bienvenu, La.

The conferring of degrees was followed by a salutatory by Prof. S. M. Bemiss, M. D., and a valedictory by Dr. W. P. Fears.

The exercises closed with the playing of appropriate airs by the orchestra.—*Picayune, March 20.*

NEW ORLEANS DENTAL COLLEGE.—The annual commencement exercises of this institution took place on Thursday, the tenth instant, at the rooms of the college, corner of Carondelet and Perdido streets.

A large and appreciative audience was present, among which were many ladies.

After the dean had announced the order of exercises, Prof. J. S. Harrison, lecturer on Materia Medica and Therapeutics, delivered a very interesting and appropriate farewell address on behalf of the faculty.

The dean, Prof. J. S. Knapp, conferred the degree of Doctor of Dental Surgery, by virtue of the authority vested in him, accompanying the ceremony with a few excellent remarks, on five students who had conformed to the requirements for graduation.

Twenty-three honorary degrees were also awarded to dentists of long experience, eminence and merit, as skillful operators, residing in several of the Southern States.

An excellent valedictory was delivered on behalf of the graduating class by Dr. J. B. Wasson, of Memphis, Tennessee.

The exercises were varied with music from a fine band, engaged for the occasion.

This institution, though organized in 1867, is in a flourishing condition, and is well supported by a corps of able teachers.

A free Dental Dispensary will be maintained, where poor people can be operated upon gratuitously every day, from three to five o'clock, at 67 Carondelet street.

A SHARP DOG.—Dogs may be trained by rogues or honest men, and in either case they obey their training, and with equal readiness. They know nothing of the right or wrong, but only follow orders. Here is a case of a dog taught to be very cunning by brigands:

A troop of soldiers under the command of the Neapolitan government was marching, at night, toward a little wood which was supposed to be the lurking place of a horde of banditti. Just at daybreak, when the soldiers had almost reached the wood, they saw a little dog, who had been lying down and keeping watch, rise, and begin to bark at the top of his voice. The soldiers followed him, thinking that he would give the alarm; and, indeed, when they had reached the middle of the wood, they found that the brigands had fled. The officer in command, in his anger, shot the dog, who had just made him lose his prey. The animal howled fearfully, and fell to all appearance, dead.

The soldiers went on their way, but in a few minutes saw the very dog who had just been "killed," standing behind the trees, tacking like a ship, and intently watching the direction they had taken. They ran after him, caught him, and saw that he had not been in the least hurt. His instinct had taught him to feign death, that he might be able to keep at his sentinel's post. His remarkable intelligence and cunning won the love of the soldiers, who adopted him and trained him to hunt the banditti, for whom he had been so faithful a watchman.

WARM YOURSELVES.—There are many persons who, if they could, would sit by the fire and draw in its heat without exertion or trouble, and so they may, when they are so feeble as to be incapable of labor. But if one be in good health the physician says to him: "Stir abroad. Rouse the energy of your system by exercise. Work, walk, climb! Let your blood be your stove!"

There are many Christians who use meetings as lazy and dainty people use fires. They go to them to be warmed, and snuck in without exertion a certain moral stimulus, not wholesome because derived from no exertion of their own. Their pastor should say: "Go out and work! Create your own feelings! Life in earnest is the best fuel for the soul. Bring to the prayer meeting the feelings which you enjoy. Do not forever sit before the fire. Work and warm yourselves."

THE CARONDELET ST. TRAGEDY.

ACQUITTAL OF MR. CAMMACK.

At ten o'clock this morning Judge Abell resumed his seat upon the bench, the counsel appeared in their places, and the immense crowd of spectators and friends of the accused, who had been steadily growing in number day by day, in every avenue and passage-way that admitted of any opportunity of witnessing the proceedings of the court. It was with the greatest difficulty that the gates of the sub-divisions of the court room, and sufficient passage-way could be obtained to admit of the entrance of the jury from the retiring room, in which they had spent the night.

Pending the breathless interval which preceded their arrival, and the calling of names, Judge Abell inquired if there was any additional charge which counsel wished given to the jury.

Mr. Hunt, for the defense, stated that the charge of the preceding evening had been sufficiently elaborate and voluminous, and that the defense was satisfied that no additional charge was necessary.

Deputy Sheriff Peyton having called the names of the jury for the last time, and inquired if they had agreed upon their verdict, the indictment was handed to the clerk, and the verdict, written on the back of "not guilty," read in a loud voice.

The announcement was followed by a loud shout or cheer from the auditorium of the court room, which was immediately suppressed by the officers of the court.

Meanwhile the face of the accused, which had remained throughout the trial without betraying any other expression than that of attentive and watchful interest, became suffused with emotion, while several of his family and middle-aged friends could not restrain their tears. The feeling in the court room was intense, and every spectator present was occupied in asking and answering questions as to what was thought of the verdict.

Immediately after the reading of the jury verdict by Mr. Trepagnier, the clerk, Mr. Hunt promptly made motion before the court to enter the verdict upon the minutes and to order the release of Mr. Cammack.

The motion was assented to, and Judge Abell, in discharging the jury from any further service during the week, took occasion to make some reference to the introduction of Mr. Cammack's statement in evidence upon the trial.

The court stated that it would never again permit the statement of a party upon trial to be used in evidence, unless so decided by the Supreme Court. That while the law is explicit in declaring that such evidence shall be before the grand and petit jury, the danger to the public impels the court in future to refuse the admission of such evidence when offered by the accused.

Mr. Cammack and counsel here left the court room, and the business of the Criminal Court virtually ended for the day.

Up to the time of writing, the verdict remains about court rooms and in the streets generally the only subject of conversation; and the trial will long be remembered in criminal jurisprudence as remarkable for the respectability of the principal actors, the eloquence and ability by which the legal struggle was maintained upon both sides, and the intense interest which the event, from the first high words and pistol shot to the reading of the verdict, excited in the public mind.—*New Orleans Times, March 24.*

The sick room should be quiet, cleanly and well aired. Label all medicines. Poisons should be placed above the reach of children. A good nurse has a steady hand, a clear head and a kind heart; she is not talkative or nervous. Avoid arguments with the sick; do not tease them with business; do not sit or lean on the bed. If friends call on the patient their stay should be very short. The practice of visiting the sick on the Sabbath is a very poor one; that day often thus becomes the most fatiguing to all of them. As a general thing do not go into the sick room unless you go to help, and not to talk. Do not deceive the sick; deceit breeds suspicion; they will worry lest you are "keeping something from them." To persuade the dying that they will recover is treason against the interests of the soul. It soothes and cools a feverish patient to wash him with warm water in which saleratus or soda has been dissolved.

A CALIFORNIAN exhibits a gun that fires three hundred shots a minute.

ANGLICAN ORDERS.—Our Anglican friends are in a sad condition. They are yearning for a little sympathy from "Mother Church," and cannot get it. They recognize the orders of Rome, but Rome does not return the compliment, and recognize the orders of Canterbury. That does not seem to be fair. The English clergy say they get their orders direct from the apostles, through the popes and their legates, as by them, and those ordained by them, every bishop, priest and deacon in England was ordained before the Reformation. So it is a Romish succession or no succession at all. Both eismontane and ultramontane "Catholics" say that it is no succession—a bogus affair. Thus there is not a priest in England—or, for the matter of that, anywhere else—whose orders are valid, unless he is in "the obedience of Rome." This is sad, indeed—for take away the priesthood and the prelatical succession, what have the "Anglican Catholics" left? They are in as bad a plight as was Micah when the Danites took away his Levites and his gods—"What have I more?" he exclaimed, in the anguish of despair. Irreverent Dissenters, who consider prelates and priests alike grand impertinences, can smile at all this, but it is a very different business—no laughing matter—to the English Successionists. The *Weekly Register* says: "An intimate personal friend of Monsignor Dupanloup, Bishop of Orleans, states, in a letter to an acquaintance in London, that the said prelate has for some years studied the question of Anglican orders, and is quite convinced that, even historically, the English church has not a shadow of claim to the validity of orders, in either her bishops or her priests. He long ago came to the same conclusion that the rest of the church has arrived at, namely, that Anglican clergymen are mere laymen, and ought, if converted to Catholicism and entering the church as priests, to be unconditionally ordained." Our readers will bear in mind that this same prelate is the great opponent of the papal claims to infallibility—the most liberal of the Romish bishops. "If they do these things in a green tree, what shall be done in the dry?"—*Nashville Advocate.*

FIRE AT SEA.—There is a universal association of horror with the cry of fire upon a ship at sea; and yet that is the place where a fire should be manageable, because a great force may be immediately concentrated upon the point of danger. Some years ago a California steamer left the Isthmus for New York. On the afternoon of the day of sailing the captain called the passengers to the deck and made them a sensible little speech. He reminded them that they were a great multitude upon a ship, and that, as they knew, fire was one of the possible perils to which they were exposed, but that a little care would deprive that chance of its sting. He then proposed that a sufficient body of the passengers should agree to act in concert with the crew, in case of necessity. He called for a certain number of men to handle axes, who, at an alarm, were to put themselves at once under the orders of the ship's carpenter, whom he introduced. Others were to act as guards to prevent the frantic rushing of passengers, and were to be armed for the purpose and to obey certain officers whom he named; others were to protect the boats; others were to repair to certain points and serve the hose. And so a sufficient number of the passengers were simply organized, and made to understand precisely what they were to do should an alarm be raised. Suddenly the next day an alarm was given; and such was the self-possession, produced by the consciousness of intelligent and powerful organization, that every man went quietly to his post; there was no panic whatever, and the passengers learned to their great satisfaction that the cry had been raised merely to test the efficiency of the organization. There were some grumblers upon the ship, who said it was too bad in the captain to excite by such a plain appeal and system to excite the imagination of the passengers. But because some men choose to be ostriches there is no reason why others should not prefer to remain men. A lightning rod upon a house is a constant reminder of the danger of the thunderbolt. Is it, therefore, "too bad" to protect the house?

Never shrink from doing anything which it is your duty to do. The pleasure of doing your duty should be a sufficient reward.

The Christian Advocate.

SATURDAY, MARCH 26, 1870.

NOBODY THERE.

BY MADON CARRO.

I was the last new boy at school;
I must pay my initiation fee;
Twelve boys wanting a thieving tool—
The latter the reason, the former the plea.
With boast and bluster, and bullying air,
They won the consent of the "last boy"
There.

A stealthy walk 'neath a silvery moon,
Then an orchard wall, looking over so high;
Next: "Here's the plunder; climb like a
"coon."
From the biggest boy with the blackest eye,
"What a nippy you are, and how you stare!
Nobody will hurt you; nobody's there."

They knew the place for scaling well,
And pushed me up with their eager hands,
Till, trembling and weak, the victim fell
"On the broad ledge guarding the Bellair
"lands."

"A crooked tree leans down like a stair,"
They told me, and there it was—right there.
Eight there, and on that stairway swung,
I crouched like a coward amid the leaves;
To right, to left the ripe fruit hung
On that first and fairest of autumn trees;
Crimson and gold, in a silvery air,
Apple on apple, pear on pear.

Just within reach of my tempting hold,
The air astir with their fruitly breath,
Globe of crimson, pendant of gold;
What was to hinder loitering Beth?
Silent I hung on the old tree-stair;
As silent the orchard—nobody there.

High in the heavens hung the harvest moon;
"Strange—but it brought me my mother's
smile."

"Tell me all that happens, and write me
"soon."
She said through smiles and tears the while;
There were two of us only; God took one—
A sister, the sweetest under the sun.

Somewhat in that silvery hush
Came the murmur of mother's prayer,
And a little stream 'mid banks of rush
Caught the gleam of my sister's hair.
Still crimson and gold, in a silvery air,
Hung apple on apple, pear on pear.

Down in the dark some tiny thing,
Under the daisies' silken mood,
Smile the quiet with bell-like ring,
Ringing an answer out of the wood.
Two together—they made me feel,
Chiming in chorus: "Thou shalt not steal."

The twelve in waiting saw me bound
Over the wall with empty hands;
Panting breathless, they fled the ground—
Far beyond lay the tempting lands;
"Was 't' boy?" said the bully, "or old Bel-
"lair?"

"Neither," I answered—"God was there!"
In the THE REFORM IN MEXICO.

Mr. Editor: It is scarcely possible for one born and reared in the United States, where perfect freedom of religious worship is a fundamental guarantee, to realize that in Mexico, until a few years ago, a country adjoining our own, and its principal seaport within three and a half days' steam of New Orleans, no public worship of God could be practiced, but in subordination and absolute submission to the established church of the country. Until the triumph of the anti-church or anti-monarchical party, in 1859, any body of Christians, of any other denomination, attempting to worship would have been mobbed, as vile malefactors, and in many places destroyed.

Aside from the generally known corruptions of the church and its grinding tyrannies—its debaucheries and degrading contrivances toward the poor—it is not specifically known to what terrible extremes its power was carried to deter all classes from investigating religious subjects, and compel an abject submission to its dogmas and practices. The history of the priesthood, from their arrival with Cortez till some years ago, so far as known, stands almost as a night of unbroken darkness; but to illustrate the matter we will not go behind this nineteenth century. Would an American believe that within this century, on North American soil, the terrible rite of *auto de fe*, or act of faith, had been performed openly by priests professedly wearing the robes of Christ? Yet it is true.

In the year 1804, when Don Jose de Iturrigaray was viceroy and Don Francisco Javier de Lizana was archbishop of Mexico—the year in which the equestrian statue of Charles the Fourth was inaugurated in the viceregal city, and in which the great Humboldt was exploring the country—in that famous year, too, when, under the genius of Jefferson, Louisiana was formally placed under the American flag—a *curate* of the Province of Oajaca and a priest of the College of Guanojuato, both now Mexican States, un-

derwent the tortures of the Spanish-Mexican Inquisition by being burned alive! And for what, do you ask? They were condemned as authors of irreligious writings—that is to say, for entertaining and writing religious opinions differing from the mummeries and idolatries practiced to hoodwink the poor, ignorant Indians and Peones of the country.

On page 139 of the Elementary History of Mexico, by Don J. M. Roa Barceua, published in the capital, these facts are clearly stated, without a word of comment. What was done in secret places, dungeons, cells and hidden passages, may never be known, beyond the discoveries already made and to be made in exhuming the foundations and secret places of old monasteries, convents, etc., as already developed by the excavations of Santo Domingo, in the City of Mexico. The manacles, chains, skeletons, charred bones and blood-stained stones of that place reveal a silent testimony of horrors at which humanity sickens.

It is not twenty years since foreigners were murdered in the streets and in their own houses, in Mexico, because they failed to drop on their knees when the so-called host was passing in procession.

In the past year of 1869, in a town south of but not distant from Mexico, in time of drought, a native citizen was charged with being a witch and preventing rain. Despite his solemn denials, he was tried, put to cruel torture, and only saved his life by confessing his guilt and promising to make rain come. This was in a spot where the reformation had not reached, but was indignantly denounced by all the Liberal papers of the capital.

In the spring of 1843, when the celebrated Texas Mier prisoners, by order of Santa Anna, were decimated at the hacienda of Salada, in the State of San Luis Potosi, every tenth man, making seventeen in all, drew the death symbol in the shape of a black bean, drawn from a jug while each man in the lottery of life or death was blindfolded. When led out to be shot, they asked permission of the officer for one of their number to pray, which was freely granted. Among those brave men of the border, long removed from those religious surroundings to be found in older countries, two at least were members of the Methodist Church—Captain Wm. M. Eastland, whose memory is perpetuated by a county in the State he served, and Robert Dunham. There, in the very heart of that intolerant and bigoted land of superstition, surrounded by armed legions and confronting the detail for their execution, the pure and heroic Dunham made such an appeal to the God of his fathers—so earnest and solemn, so evidently the outpourings of a Christian heart, and so different from anything those misguided, semi-civilized Mexican soldiers had ever witnessed—as, although they understood only his manner and not his language, to make a profound impression upon them; indeed so much so as to unsteady their nerves, and cause several rounds to be fired before all were killed. More than one close observer has had reason to believe that that scene made a lasting impression on some of the Mexicans present, and led to investigations whose fruits are visible in the happy awakening now in progress. Yet, for granting permission to those "heretics" thus to pray on such sacred soil, the officer was grossly censured and traduced by the ministers of the church.

Among the earliest men in Mexico to become convinced of the terrible misdeeds and corruptions of the church, and its essentially unchristian inculcations, were General Manuel Gomez Pedraza—one of the earliest leaders of the Liberal party, and president of the republic in 1832 and 1833—and General Degollado, a man of acknowledged virtue. Both became friends of religious liberty and the Bible, and when they died their remains were refused interment in the "consecrated ground" where their parents reposed, and were deposited under the

British flag, in the British Cemetery, where they still remain.

Within the last few months, when the attendance and interest in the evangelical worship became so manifest as to alarm the high priests of the old order of things, their cathedral and church doors were ornamented with documents anathematizing all who should join in the movement, attend its worship, or give it aid and comfort, showing the animus of the power that had so long held the people in ignorance, misery and idolatry. But their threats and excommunications only more fully convinced the searchers after truth of the imperious necessity of their duty to themselves, their kindred, their country and their God, to redouble their efforts; and it became common to see boys delivering evangelical tracts to the people as they came out of the cathedral doors wherever were posted these anathemas.

The mob which attacked, stoned and dispersed the Protestant Mexicans while assembling for worship in Puebla, on the twenty-eighth of November, 1869, was incited and led by two priests, one of them being an Italian. Though three of the Protestants were wounded, and all narrowly escaped, their cause was greatly strengthened by the outrage. Their worship was continued regularly afterward and their number increased, while the better class of people generally became their protectors, and bitterly denounced the priests who had brought such a disgrace on their city. At the same time the government, both Federal and State, proclaimed its intention to guarantee religious liberty at all hazards. In fact, this mob was dispersed by an armed force, and the leaders arrested.

But a few months ago a little girl of thirteen, attending a female school in the City of Mexico, who was deeply interested in studying the Bible, concluded to take it to the school, so as to read it during the noon recess. Detected by her teacher in the forbidden act of reading the Bible, she was made to stand upon her knees, for two hours, for the first offense. The punishment was augmented on subsequent occasions, till the zealous little Christian—for such she was—appealed to her mother to examine with her the teachings of Christ and the apostles, and see for herself how they condemned the practices of the church and priests in Mexico. The mother yielded, and for weeks was a close student. Her decision was announced by herself and three daughters becoming unflinching attendants on the evangelical worship, and by her uniting with others to establish a female school, with a Mexican Protestant young lady as teacher. The devoted daughter, within a large circle, is a veritable little missionary, and has been the means of causing many young people to attend the church and read the Bible.

It is a remarkable fact that almost invariably when a Mexican man or woman once attends an evangelical church, and witnesses the solemn and beautiful worship, listens to the reading of two or three chapters of the Bible, and hears the vital truths of Christianity so lucidly explained by Riley, Romero, Ramirez, or one of their compeers, the desire to hear more and understand more becomes earnest, and the party comes again and again, and thus many are constantly being brought to study the Scriptures and religious books. The first impression seems to be the vast contrast between Bible religion, and the sermons delivered to their hearts and understandings as accountable beings, on the one hand, and the priestly teachings, addressed to their fear and their cultivated superstition, on the other.

It is this hopeful feature of encouragement, among others, which stimulates the evangelists to extraordinary efforts to provide the means for furnishing the people with a religious literature, and to educate, as early as possible, pious young men for the ministry, and young ladies as teachers, for they fully realize the vast importance of rightly educating those who are to

be the mothers of the land. It is largely for such exalted purposes that they call on American Christians to aid them. Shall they call in vain? ***

A HINT FOR PASTORS.

Mr. Editor: I presume that in other places, as here, many Methodists from distant circuits and stations settle down in the community without acquainting anybody of their church relations, and so gradually lapse back into the world, and are often lost to the church, visible and invisible. In a majority of cases such persons could be saved from these sad consequences by "a word in season" from the resident pastor or some of the leading members of the church; but the difficulty is, how can the pastor or leader ascertain who, among the many new-comers to the place, belong to the Methodist Church? Now, to meet this difficulty in part, would it not be well to have incorporated in our Discipline, among the duties of a pastor, that whenever he gives a certificate of membership to any applicant for same, he shall ascertain in what circuit or station that member is purposing to reside, and then at once advise the preacher in charge of said work that Brother A. or Sister B. has transferred thereto? It is true that in some cases of removal members do not ask for certificates, and in others they do not know the particular point at which they may locate; but the many do ask for certificates, and have a definite place in view at which they propose to settle. Let the pastor be able to meet such persons as soon as they arrive in his neighborhood, and gather around them the fellowship of the church, and in nearly every instance they will be preserved to the church, and their love of Methodism deepened and strengthened.

In this migratory generation, it seems to me that the faithful discharge of the duties suggested above is imperatively demanded of us, and that it would result in lasting benefit to individuals in particular and the church in general.

For one, I ask it as an especial favor from all pastors who may be called on for certificates by members about moving to Shreveport, that they acquaint me of the fact of removal in each instance; and I promise to perform a like service for them.

JOHN WILKINSON, P. C.
SHREVEPORT, LA., March 14, 1870.

MOBILE BIBLE SOCIETY.

Mr. Editor: The anniversary of this society was held on the first Sabbath night of the month, in the Government Presbyterian church. The evening was not favorable because of the rain. Addresses were delivered by Rev. J. Bancroft and the agent, Brother Bancroft's address was well digested, chaste, and delivered after the most approved style. He is one of the best readers in the church. The music, no doubt, was good; but it was far above my comprehension. The collection in all amounted to only about \$300. The officers and managers resolved to raise the amount to \$1,200.

The society had in their employ, the past year, Rev. Mr. Fleming, who canvassed about three counties, and did a fine work. They have engaged his services for the present year, and he is now in the field. The general agent has no means by which that large district of country around Mobile can be supplied but through the agency of the Mobile Bible Society and their colporteur.

The ministers of the various denominations can afford much aid to Brother Fleming in his labors, not only in assisting him to circulate the word of God, but in aiding him to raise collections, to sustain the Mobile Bible Society in their efforts to supply that large and destitute field.

Brother Fleming is now in Clark county. The Methodists, Baptists and Presbyterians are all united in this good work, and we earnestly hope they will be able to keep Bro. Fleming in the field during the present year. He is doing a great work, and ought not to stop.

The Baptist brethren were earnestly engaged in a protracted meeting. All the pastors of the Methodist churches are laboring for a revival, and the good work, I think, has already begun at the prayer meeting in Bro. Bancroft's charge. There were about fifteen who knelt for prayer. May the Lord give them a gracious season of power.

SUMMERFIELD, ALA., March 16, 1870.

LETTER FROM PENSACOLA.

Mr. Editor: When my appointment was announced at Conference, I must confess that it seemed rather a dark future for me, at least for one year. My presiding elder informed me that at Pensacola, where I was stationed, we had no church, no parsonage, had had no preacher only for a few months since the war, and only about forty names upon the old church register, in a city of more than three thousand inhabitants, where Romanism and High Churchism gloried in their strength, their power and their influence. But though the picture was dark, the eighth of January found me at my post, and after surveying the field I felt that the picture was drawn not a shade too dark. But to-day a brighter future presents itself to our view. The dry bones of the valley are being collected together, and begin to show signs of life and vitality. Yea, the Lord has caused the wind to blow upon us, and we have already, "though few in number," a living, acting, working church.

We have now in course of construction a nice house—a better church than we had before the war—and we expect to have it all finished off by the first Sabbath in May, and have it dedicated on that day; and in addition to this we have the money in hand—enough, we trust—to pay for it. We intend to have it paid for before we dedicate it to God. We have also purchased a nice bell in your city this week; and we would here acknowledge the kindness we have received from other denominations. Many from the Catholic, Episcopal and Presbyterian churches have assisted us much, and we will ever hold their acts of love in kind remembrance. So we feel to-day that the Lord has done great things for us, whereof we are glad; and we look forward to the future with bright anticipation. Yea, we expect, as soon as we get into our new church, that God will meet with us there and bless us. A rich harvest will be gathered—many souls be born unto God. In the meantime we have preaching every Sabbath; through the courtesy of the customhouse officer we have the use of the United States court room until our church is completed.

A word in reference to Pensacola, as there are some of your readers, perhaps, who are looking forward to this place with the view of making it their home some time in the future. Up to this year business of every kind has been dull here, but now everything presents a different aspect. Quite a number of vessels are now in the bay, loading with timber for foreign ports. There have been as many as one hundred vessels of different kinds in the bay at one time during the season. It is perfectly astonishing to see the amount of timber shipped from this port. But the great cause of dullness has been a want of communication with the interior. Now we have that, the cars running daily to the M. and M. Railroad from here. So we have railroad communication with Montgomery and all the up-country, and expect, ere the year is out, to have a direct line to Selma. We now say to enterprising men, to capitalists, to good men: Come on; we are ready, and will be glad to see you.

I send you five new subscribers. Think I can send you more next week. Yours,
J. A. PACE.
PENSACOLA, FLA., March 15, 1870.

TALKATIVE PERSONS seldom read. This is among the few truths which appear the more strange the more we reflect upon them. For what is reading but silent conversation?

Curiosities of Bridging Rivers.

The St. Louis Democrat gives an extended account of the work on the bridge across the Mississippi at that point, and we extract therefrom as follows:

The air chambers of the caissons are nine feet high, with their sides formed of three-quarter inch plate iron. We append a description by Colonel Eads: The air chamber is simply a huge diving bell beneath the pier, being of the full size of the latter. Its roof is required to sustain the enormous weight of the entire pier from the rock to the surface of the water, and must be of such strength as to prevent any change of form, as that would endanger the cracking of the masonry before it has been finally bedded upon the rock. As we shall have to work, in all probability, with the river not less than ten feet above low water mark, and perhaps twenty feet, the masonry resting on the roof of the air chamber in the large caisson will be nearly one hundred feet high when the bottom of the air chamber reaches the rock. The iron plates forming its roof are of one-half inch thickness.

Transversely over this are placed thirteen iron girders, which are securely riveted to it at intervals of five and a half feet. Each girder is five feet in height, and is made of half-inch plate iron, with a top cord of five by seven and a half inches. The spaces between them will be laid with masonry. Beneath the roof are placed two massive wooden girders in the opposite direction to the iron ones, and these latter divide the area of each chamber into three nearly equal parts. Communication between these three divisions will be had through openings made for this purpose through the girders. These timber girders are intended to rest upon the sand and support the roof from below, thus giving support to the iron girders at equidistant points in their length. The sides of the air chambers are strongly braced, to resist the pressure of the sand, with plate-iron brackets stiffened with angle iron. Between the brackets, near the bottom, is placed all around the chamber a course of strong timber, the bottom of which is level with the top of the girders, and which are also designed to rest upon the sand. The area of bearing surface of the course of timber, and of the girders in the larger caissons, is eight hundred and fifty square feet.

The support given by this resting upon the sand, together with the buoyant power of the compressed air in the chamber and the friction of the sand on the sides of the caisson, are the only means relied upon to sustain the pier in its gradual descent to the rock. Workmen and superintendents will see that the sand is evenly excavated, by which means the vertical position of the pier will be maintained. As in the diving bell the bottom of the chamber is entirely open, and the water is prevented from rising within it by the compressed air forced into it.

The air locks are placed within the roof of the air chamber, and access is had to them through brick wells or air shafts built up in the masonry over them.

The air locks are circular vertical chambers, about five feet in diameter, and of various heights—from six to twelve feet. They are made of half-inch plate iron; they are provided with two doors, one opening into the open air and one into the air chamber; the first door, on opening, swings into the air lock and the other into the air chamber. The fact that the air chamber is filled with compressed air, involving the necessity of one of the doors being closed, to prevent escape; either one being closed, the pressure of the air tends to keep it closed, but leaves the other free to enter the air lock through the outer door, and close it behind us. Access is then opened communicating with the air chamber, and the air lock is immediately filled with compressed air. This equalizes the pressure on both sides of the inner door, and it can at once be opened, and we then enter the air chamber.

To return to the open air—we enter the air lock, close the inner door, and then open another which allows the compressed air in the lock to escape. This releases the outer door of the pressure, and it is on it, and it can at once be opened for our exit. One door of the air is always free to open. To open both doors at once, in the case of an enormous force (about ten thousand sand pounds) to be applied to the one on which the air pressure was acting at the time. This gives security to those within the chamber against the carelessness or ignorance of others passing in or out. The sand pumps are placed on the roof of the air chamber, and their suction pipes extend in the sand.

The Christian Advocate.

SATURDAY, MARCH 26, 1870.

DARWINIAN TIME.

A very conclusive proof has been furnished of the inexpediency and unwarrantableness of some of the sweeping conclusions, as to the age of the world and similar matters, which we have of late been summoned in the name of science to make. Geologists, looking to the various strata of the globe, and considering the length of time that would probably be required to form each, by disposition from liquid matter, have been in the way of calculating that to form the whole millions upon millions of years must have been required. The supporters of the Darwinian theory of the origin of species, who suppose that the various orders of living creatures have been formed by varieties arising in the course of inconceivably lengthened periods of time, from a few primitive forms—perhaps from a single form—have maintained that these indefinite geologic periods of time furnished ample opportunity for the slow progress of the changes in which they believe. But various things have lately occurred to curtail the indefinite periods which the Darwinians and geologists have been wont to claim. One of these is the result of deep sea dredging which have lately taken place. The bottom of waters so deep that the highest of the Alps might be buried under them, has lately been explored. Dredges have brought up so much as a half ton of mud from the depth of fourteen thousand feet, and the temperature of the water has been ascertained where the pressure is so enormous as four hundred and thirty tons on any square foot of surface. Living creatures have been found to exist at the depth of two or three miles. Though dwelling in what seems to us absolute darkness, they have eyes perfectly developed—apprehending light probably, whether phosphorescent or common, by a process quite unknown to us. More than this, and more to our present purpose, it has been found that at one and the same time, deposits of quite different kinds are going on at the bottom of the sea within a few miles of each other—here a chalk deposit, and there a sandstone deposit, each with its characteristic orders of animals. If such deposits are going on contemporaneously now, they may have been going on contemporaneously at former periods of our earth's history; and thus the theory that they were all formed in successive ages, and that the sum of these ages made up a period long enough for any Darwinian changes, falls absolutely to the ground.

While Darwinian time is thus getting itself reduced by the deep sea dredging, it is undergoing the very same process, in a way still more rigid, at the hands of the mathematicians. Sir William Thomson, of Glasgow, was led some time ago to suspect the correctness of the assumption that the arrangements of the solar system have gone on, and may go on, for indefinite periods without the slightest change. It would be unsuitable in this place to go into the details of the processes by which that philosopher concludes that present arrangements are but limited, both as to the time during which they have lasted, and as to the time they are to last hereafter. Suffice it to say that he reaches this conclusion by three methods of proof. He finds, in the first place, that through the action of the tides an amount of retardation is produced on the rotation of the earth on her axis—almost inappreciable small for any period of historical time, but rising to something considerable if the enormous periods of geological time are considered. Further, he finds that when the earth was in a state of fusion she must have revolved round her axis at a different rate, and been of a different shape, from now; and, moreover, he calculates approximately what length of time the earth has taken to cool down to its present temperature. Thirdly, he finds that from the nature of the sun that body cannot go on forever diffusing heat and light throughout the system, but must get exhausted some day—or, as Addison makes Cato say, probably without knowing what it meant, the sun himself will grow dim with age. His researches and conclusions of Sir William Thomson have been somewhat snappily attacked by an anonymous writer in the *Pall Mall Gazette*; Mr. Stanley and others have also questioned them. But there is a calm force in the reasonings of the mathematician which it is not easy to shake, and which carries with it the assurance of victory. It seems likely that before Sir William Thomson is done he will have succeeded in narrowing so far the time available for organic changes on the earth, that Darwinianism will collapse through sheer want of elbow room. Besides this a demonstration will probably be given, that, as the present order of things is moving, however slowly, to an end, it cannot

have been eternal. Further, it will be shown how unsafe it is to jump to conclusions in science which rest only on probabilities, and still more how unwarranted it is, on the strength of such conclusions, to attempt to overturn the contents of Scripture. The immense periods of geological time may probably turn out to have been unwarranted assumptions. On this ground we obtain full justification for refusing to give up any part of the Scriptures on the ground of the objections of modern science. We may well crave permission to wait until science shall have become more sure of her ground; and who can tell whether, when that time arrives, everything in the Scriptures may not be satisfactorily explained?—*Sunday Magazine*.

THE INTERMEDIATE STATE.

The *Watchman and Reflector*, in answer to an inquiry of a correspondent on this subject, makes the following points. They are in refutation of the theory set forth in these words: "That the righteous dead do not at once enter heaven, but dwell in some intermediate place until Christ, having at the resurrection and the judgment fully accomplished his redemptive work, ascends to the glory of the Father and sits down at his right hand." To this it is replied:

It is important teaching. Still it is important not to be wise above what is written, and also to have our views conformed, as far as possible, to whatever the Bible has revealed. We shall briefly indicate what seem to be its teachings.

1. We regard Christ's work as having been, for all redemptive purposes, substantially consummated in his death and resurrection. It culminated on Calvary. "Now is the judgment of this world!" he exclaimed, in holy anticipation of it; "now shall the prince of this world be cast out, and I, if I be lifted up, will draw all men unto me." Hence he came forth from the grave as a conqueror, bearing the keys of death and hell, and hence, also, in Col. ii: 15, he is represented as having by his cross spoiled principalities and powers, and made a show of them openly in his triumph over them.

2. In accordance with this the Bible teaches that Christ is already at the right hand of God in heaven. "When he had by himself purged our sins, sat down on the right hand of the Majesty on high." Heb. i: 3. "Christ is not entered into the holy places made with hands, which are the figures of the true; but into heaven itself, now to appear in the presence of God for us;" ix: 24. Again, "This man, after he had offered one sacrifice for sins forever, sat down on the right hand of God; from thenceforth expecting till his enemies be made his footstool. For by one offering he hath perfected forever them that are sanctified." x: 12-14.

3. The crucified robber went with Christ directly to paradise (Luke xxiii: 43), and paradise is heaven. John says (Rev. ii: 7) that the tree of life is in the midst of the paradise of God, and again, in Rev. xxii: 1, 2, that this tree of life is by the river of life which proceeds out of the throne of God and the Lamb, and represents it as a feature of the New Jerusalem, the ultimate state of glorified believers. It was to paradise in the third heavens that Paul was caught up. 2 Cor. xii: 4.

4. Stephen, when dying, saw heaven opened and Jesus standing at the right hand of God, and prayed, "Lord Jesus, receive my spirit"—receive it to thyself, in that heavenly state. Acts vi: 55, 59.

5. As Christ is in heaven so Paul desired to depart and be with him. Phil. i: 23. He also (2 Cor. v: 6-8) expressed the same thought with reference to believers in general—"Whilst we are at home in the body we are absent from the Lord; we are confident and willing rather to be absent from the body and to be present with the Lord." We cannot see how these words can be understood as teaching anything else than, not only the conscious happy existence of departed saints, but their presence with Christ in that heaven where, as we have seen, it is so plainly taught that he now dwells and reigns.

6. In accordance with this is John's representation (no matter that it may be figurative) of the one hundred and forty and four thousand redeemed from among men, the first fruits unto God and the Lamb, singing a new song before the throne. Rev. xiv: 1-5. The period to which it is referred is long anterior to the end of the world.

Such are some of the scriptural facts which compel us to believe that saints enter heaven at death.

VALUE NO man for his opinion, but esteem him according as his life corresponds with the actions of piety and justice. A man's notions, his conceptions, render him valuable, to an end, it cannot

The Farm and Garden.

CEREALS vs. COTTON.

As the planting season again approaches, the old theme, "How shall we make our Southern country self-sustaining and prosperous?" again recurs to us. For the past four years we have lost no opportunity of arguing upon our farmer friends the necessity of producing at home, in abundance, the cereals and esculents necessary for home consumption; but the high price of cotton has, in too many instances, led the planter back into that "one crop" system, which has so long made the Southern planter a dependent laborer in the interest of those who manufactured his goods and implements of husbandry, and furnished him his supplies of pork, beef, breadstuffs, etc., in years gone by. This system has ever been and must continue to be a great impediment to the prosperity of our section, as long as it prevails. The profits arising from Southern agriculture, must be estimated according to the *cash balances* resulting from the sale of the cotton crop, after a settlement of our indebtedness for annual imports—and not in the aggregate or gross amount of sale.

The gross sales of the cotton crop of 1868 were \$290,000,000, and the sales of the cotton crop of 1869 will, perhaps, surpass this sum, and yet exchange is generally against us. Where has all this money gone to? Has it gone into the pockets of the men who produced the cotton? Nay, verily. If it had, the premium on exchange would be in favor of the South, instead of New York, Philadelphia, Boston and Chicago. It has gone largely into the pockets of those Eastern gentlemen who manufacture our cotton and woolen goods, our hats, shoes, etc., our plows, wagons, machinery, etc., and who generously pass laws for our reconstruction, taxation, etc. It has also gone freely to those Western gentlemen who furnish us with pork, bacon and lard, beef, butter and cheese, flour, corn, oats and hay, and hundreds of other things too numerous to mention.

Now all these enormous annual expenditures for supplies may be checked, or at the very least greatly reduced, as we will endeavor to show as briefly as possible:

Hay, for example, equal to that for which we pay \$30 per ton, can be raised on our Southern farms at the rate of from three to five tons per acre—say three tons. Now the cotton planter pays the proceeds of two acres of cotton for hay that he can raise on one acre, with, perhaps, one-fifth of the labor required to raise the cotton. We don't perceive the wisdom or economy of this operation. The advantages of raising our own corn are not so apparent; yet, that there is an advantage in it may be readily shown.

It is true that if we look only to the price and production of corn per acre on thin land, as compared with cotton, the advantages seem on the side of the latter. But that of itself does not test the matter entirely. In the first place, corn does not require one-half the labor for culture and harvesting that cotton does.

And when we take into consideration the fact that other crops, almost equal in value to the corn, may be grown upon the same land and at the same time, with very little additional labor, the disparity is greatly lessened.

From good corn and pea crops, result large and fat and prolific hogs; cows thrive and multiply; milk, butter and fat beef fill the larder, increase the luxuries and comforts of home, and increase the cash balances resulting from the sale of the cotton.

Healthy and prolific poultry make the farm yard ring with their happy cackle and joyous song, while they contribute liberally to the luxuries of the table, and retrench the current expenses of the household; strong horses respond readily to the requirements of the farm and road, while these requirements are lessened by the raising of the corn at home. Oats, in many portions of the South, cannot be raised successfully; but their place can be supplied with rye and rice, more cheaply and with great profit.

In the extreme South we must continue to buy our flour; but with an abundance of the cereals and esculents, that flourish with us, the consumption of this article could be reduced one-half of what it now is without detracting in the least from the luxuries of the table.

Beyond question, the true policy of the South is—first, to raise an abundant supply of corn, peas, beans, potatoes, both sweet and Irish; rye, rice, peanuts, hay, and vegetables of all kinds, and fruits, large and small; sugar cane or sorghum, according to latitude, should also be raised sufficiently for home consumption. With a bountiful supply of all these, pork, bacon and lard, beef, milk and butter, poultry and eggs spring into existence, around the home of the prudent husbandman, almost as

naturally and inevitably as light follows the rising of the sun.

With these wants provided for, the surplus of capital, lands and labor should be pressed into the service of cotton growing, with all the energy, industry and skill that can be brought to bear. Such a policy will insure an increase of home comforts; will maintain remunerative prices for cotton by preventing an over supply; will insure large cash balances to the cotton planter from the sale of his crop; and it will build up a prosperous independence for our section, that will enable us to laugh at the calamities resulting from international troubles, or from speculations of Wall street or Washington in the finances of the "best government."—*The Gulf States*.

HOUSEKEEPERS' DEPARTMENT.

How FANCY FROSTING AND ICING ARE MADE.—The best loaf sugar or No. 1 powdered sugar must be used. Loaf sugar should be rolled or pounded in a mortar and sifted. Fresh eggs, only, will beat light enough to eat. Be careful not to get a speck of the yolk into the white, and reject any white which is not of a good, clear amber color. If the eggs are laid in cold water for ten or fifteen minutes before wanted, and a sharp-pointed carving knife used to beat them, there will be no difficulty in making them light.

Always beat one way, bringing the knife toward you, in short, quick, even strokes. Trim a cake neatly and lay it inverted upon a plate just the size of a cake. Sometimes, if the surface is very rough, a little finely-powdered starch may be rubbed over it. Dip the knife in cold water, and begin in the center of the cake, covering the top well before beginning to put it on the sides. Allow two coatings at least.

Wedding cake is now covered on the top only, first with a layer of rich almond paste an inch thick, and upon that is placed half an inch of frosting.

The ornamenting is done by passing the frosting through a little funnel made of stiff letter paper, having the point cut off to leave an air aperture of half an inch in diameter, pressing the icing through with a tin cone, the same size, cut inside after the frosting is put into the paper.

The fancy pastillage ornaments of flowers, leaves and images, which we see upon handsome cake, is as follows: "Dissolve half a pound of the best gum tragacanth in orange flower water, or rose water, add to this one pound of powdered sugar, a quarter of a pound of powdered starch; mix this thoroughly and roll out the paste on a board dredged with starch. You may then cut it to please the fancy. Mold in the hands or iron molds oiled. A paste jigger may be used to cut out leaves and flowers. Pastillage ornaments can be bought in great varieties in large cities, and unless there is every convenience for domestic manufacture it is better to buy them ready for use."

Granite sugar of various colors is often sprinkled over the tops of thick frosting, and is particularly pretty for small fancy cakes. It is made of loaf sugar, rolled and sifted twice, first to free it from the powder, then in a coarser sieve to free the medium sized grains, which are the ones to be used. To color this sugar pink, mix a pinch of powdered cochineal with a few drops of rose water, put about half a pound of the prepared sugar upon a dry tin or plate and add the coloring, rubbing it thoroughly through the sugar by separating the grains with the thumb and finger. Dry gradually, and frequently pulverize it between the fingers to keep it well granulated. Other colors may be used in the same manner. The colors given for candies answer this purpose also.

The paste for rich black cake is made of one pound of sweet almonds, blanched and soaked in cold water for an hour, then pounded in a mortar with a little rose, or orange flower water, till a smooth cream, lastly adding powdered sugar sufficient to make an elastic paste. Spread the cake with the paste and set it in the heater for ten or fifteen minutes to dry before laying on the frosting.

Frosting No. 1.—Roll and sift a pound of pulverized sugar, beat the whites of two eggs to a stiff froth, and gradually stir in the sugar and the juice of half a lemon; a little powdered starch may be added if hard frosting is desired. To color frosting pink put a few bits of alkanet root in a muslin rag and steep it a moment in clear water, add this with a little rose water in sufficient quantity to color and flavor the frosting.

Shredded Frosting.—Break into a bowl the whites of two eggs and add half a pound of sifted sugar with a little orange or lemon juice; beat all together until thoroughly blended.

Transparent Lemon Icing.—Dissolve one pound of loaf sugar with one gill of water in which is half of the white of an egg well beaten (to clarify,) let it boil to the third degree, then place the same pan in a larger

one of cold water, add a gill of lemon sirup to flavor it. Stir the sugar well against the side of the pan with a silver spoon; this will make it look clear. To put it on the small cakes or loaf the cakes must be neatly trimmed; hold the cake over the pan and with a spoon carefully pour over the icing, lay the cake on a wire sieve and dry in the heater at the back of the stove for eight or ten minutes.

Pink transparent icing is made by coloring with a few drops of cochineal and flavoring with rose water; very pretty for fancy cakes. Transparent chocolate ice is made by adding a little well-flavored French chocolate in the place of the sirup. Two tablespoonfuls of very strong fruit sirup will flavor a pound of icing.—*Household*.

THE HIDDEN BIBLE.

Every one has heard of that once dreaded name, the "Bastille"—a strong prison in Paris, the scene of untold agonies, and darkest crime; and how, in the wild excitement of the French Revolution of 1789, this stronghold of despotic power was demolished by an infuriated populace. We cannot regret that, at the present time, no stone remains to mark the spot; but there are memories associated with it which should not be forgotten; and, among many individual histories, the following is a narrative furnished by a living author of established reputation and veracity. In one of the cells of the Bastille a secret recess was discovered; the access to it was gained by pushing the corner of one particular stone in the wall, which revolved on a pivot, and thus revealed the hiding-place. In this recess, a treasure was discovered; neither gold, silver nor precious stones, but a well-worn French Bible, the treasured possession of a Huguenot prisoner, who, as appeared by entries in the book itself, was the pastor of the Protestant church at Meaux, by name Louis Manriac, and one of those ejected and thrown into prison by the revocation of the Edict of Nantes. The blank pages, the margins, and even the spaces between the lines in this Bible were entirely filled up with small writing in pencil, forming the journal of the prisoner, who commences July 13, 1688, by recording his gratitude to God for the signal blessing of this Bible reaching him through the kindness of his friends outside. He had then been in prison fourteen months, and adds: "Here have I been all day turning over the leaves to see if anything were written within, and am quite sad to find nothing; as if the good word of God were not enough." So the "sad" heart commences his lonely study of God's "good word" by reading and meditation on John xiv, 18, etc.; "I will not leave you comfortless," etc. On the fifteenth of May, 1689, this entry occurs: "I have been here two years, and they tell me I may go out when I please, if I will only *abjure*! Then I will die first. O! could I only get some news of my wife, my children, my little brother. I know not even if they yet live." Then he records how he accidentally discovered a hollow place in the wall, begun by one of his predecessors in the cell, and at which he toiled for months to enlarge, so as to conceal his treasured Bible therein, for its greater safety. To continue the journal:

"November 15.—A priest (I think a bishop) came, and with much eloquence and learning urged me to abjure my faith, and submit to the church. Ten days afterward I knew that it was Bossuet, and I thanked God I did not know it at the time, as I might not have had courage to reply to him as I did.

"April 13, 1691.—The Protestant Church, it seems, is more than ever under the cross. The faithful suffer tortures, persecutions, pillage, fire and sword, or are sent to the galleys.

"May 20.—M. Bossuet came again; but thank God, I was strengthened to tell him plainly that he would have much to answer for in exciting the anger of the king against his Protestant subjects. Upon which he departed in great wrath."

In November following came another priest, whose deportment was so winning and gracious that the prisoner rightly suspected him to be M. de Fenelon, and adds: "He was pleased that I had recognized him, and so much touched by my constancy under captivity, that, on leaving, he had well nigh embraced me; though, as a Papist, he would soften none of the rigors of his church. I do not think he will come again."

Nor did he; for soon after this was recorded harsher measures were resorted to, as we find by the next entry in October, 1702, eleven years later. This writes the prisoner: "Eleven years have passed since I read or wrote anything. When they lodged me in another cell, my Book, happily, remained safe in its hiding place; but the dungeon I was removed to was so horribly unwholesome, I doubt if any one could exist in it two months. At the end of six weeks, being like to die, I was car-

ried to a dark little cell, in which I passed eleven years without once leaving it, or receiving a single visit; often in great anguish of spirit, even so that I earnestly prayed to God to remove me from the world. This was sinful; but, now that I have his word, I shall be strengthened. All this time I know nothing of my wife or my poor children. Do they sometimes think of me? as I do of them. Every time I speak of them they only reply, 'Abjure.' Alas! my children! Perhaps they have been taken from their mother's care, and educated in a religion which is the enemy of the gospel, and the persecutor of God's saints; perhaps even they have been taught to curse their father. O, my God! take from me such bitter thoughts as these; I cannot bear them.

"April, 1709.—The terrible cold of this winter has nearly killed me. I am now fifty-four years old, and have passed twenty-two years in the Bastille.

"July, 1714.—God be praised! I begin to die to the world. If they came to take me hence, I should not be much moved. I hope to see in heaven those who were my family on earth.

"September, 1715.—The king is dead. Seventy-two years has he reigned, and at this moment, perhaps, he would gladly exchange his lot with mine. This may bring changes; but peace, my poor heart! I said, I was dead to the world, yet I begin again to hope.

"March, 1717.—A young author paid me a visit, and showed me things he had written concerning the persecuted Protestants. I was astonished at the changes which have taken place in our language. They speak and write very differently to the French of my old Bible. To him I must have appeared a person of another age, and almost of another world.

"July, 1720.—I have been ill several times; but the lamp burns still, though not for long, I think. I am now so weak I can hardly turn the stone which shuts in my treasured Bible. A terrible edict has been published, and the governor had the cruelty to bring me a copy. God's will be done!

"May, 1723.—There is no more room to write, my hand trembles, and I can hardly see; yet I want to record this—that I could not have escaped this imprisonment if I could. Thirty-six years has my God sheltered me here from temptation, with nothing to do but to prepare to meet him. I heartily forgive my enemies; and pray God to forgive all my sins for his dear Son's sake." A month later—the brave old man once more takes his pencil in hand, and for the last time. He says: "I wanted to see my Bible once more, though I cannot see to read what I have written. I know not if I have strength enough left to replace it. Salutation! then, and benediction to whoever may find it. I kiss the Book! Again adieu! adieu! I shall read God's blessed word no more; but I go where I shall hear it from his own mouth." The last words were almost illegible from the tears that had fallen on them, and were written with a trembling hand.—*Christian Missionary*.

THE GREATEST JOY OF LIFE.—Dr. Chalmers said: "Unless I make religion my great and engrossing concern, I shall be a stranger to all solid peace and enjoyment. I have at times caught a glimpse of the comfort which it yields to the spirit, when I merge my will into God's will—when I resolve to have no will of my own separate from God. I feel quite assured that this renunciation of self, and entire devotion to God's service, would give a simplicity and grandeur to my existence—would throw an unclouded sunshine over all my ways—would raise me above the cares and provocations of this life—would enhance even my sensible gratifications, and surpass all those gratifications of a higher order, which constitute the main and essential blessedness of heaven. O my God, may it be thus with me! Call me out of nature's darkness into thine own marvelous light. Give me to aspire after the graces, and hold forth to my acquaintances, and, above all, to my children, the example of all righteousness. Conform me to the gospel economy under which I sit—that as Christ died for my sin, I may die to it—that as he rose again, I may rise to a newness of life, and feel it my meat and drink to do thy will."

The ancients were very skillful in their china and glass work, especially the workers of Alexandria, Egypt. They possessed the secret of making glass of different colored layers, joined imperceptibly together, which they cut into camei, like the onyx. The celebrated Barberini or Portland vase, which was found in the tomb of Alexander Severus, the lofty tumulus of Monte del Grano, near Porta Farba, about three miles from Porta San Giovanni, and which was believed to be genuine sardonyx for some time, has been found to be an artificial substance of this nature.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, MARCH 26, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—Rev. J. C. KEENER, 112 Camp Street, New Orleans, La.
AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office ORDER, DRAFT, or by EXPRESS. If this cannot be done, Remittance the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

THE SOUTHLAND.—We take pleasure in welcoming this neat and well filled journal. It is published by the Southland Company, No. 60 Camp street, New Orleans, and edited by D. Redmond. It is weekly and monthly, sixteen pages, on good book paper. It proposes to be an agricultural and literary family newspaper, for town and country. The present number and its successors are to be illuminated with beautiful wood and electrotype engravings. We cordially recommend it to the people of the South, and wish it a wide and permanent success.

THE MISSIONARY DEBT.—Brother Cunyngnam publishes the following extract from a letter received by him from Brother Allen, our missionary in China: "The *ante bellum* glacier, the missionary debt, must be something wonderful to have defied so long the climate of the sunny South. It really seems that it will never thaw. It strikes me that everybody is afraid of it, and that is the secret of the perpetual evil. But why should it be such a bugbear? One would think Mount Blanc had suddenly relieved itself in your midst. The Conferences of the Southern Church can easily remove every vestige of it. Dr. Munsey, who has skillfully taken its dimensions, tells us that nearly one-half has already disappeared, leaving only about thirty-five thousand cubic feet, and certainly five hundred thousand men, women and the children in the Sabbath schools in our church can remove that! Make the calculation, and you will find only one cubic foot for every fourteen persons, barely enough to cool a decent lemonade! When I was a college boy I read with no little zest the ordeal of the mountain and the excitement which it occasioned. I was foolish enough to think that Horace drew upon his imagination from the ridiculous mists he made of it. But I have lived to see an equally absurd thing—fourteen men afraid of one cubic foot of ice. Dr. Munsey is dealing some tremendous blows upon this glacier, and kindling fires around it that will, I trust, very soon remove all sign of it from our Southern land."

WE LEARN from the *Spectator* of San Francisco, March 3, that the issue of the week before, which we failed to receive, contains the valedictory of the editor, Rev. Dr. Fitzgerald. The reason for his retirement we have not learned, but we regret the loss of an able and genial confrere. The Publishing Committee says: "In the present interval, until we can procure an editor from the East, we assume the editorial management, and shall endeavor to afford our readers as good a paper as possible.—*Memphis Advocate*."

It is a duty which God requires of you to believe in Jesus Christ, and in the truth of his promises.

WORLDLINESS.

The baptismal covenant mentions "the vain pomp and glory of the world" as something to be distinguished from "the devil and all his works" and "the carnal desires of the flesh." The Scriptures present sin in this threefold aspect as a grand coalition in antagonism to the believer's peace and safety. All the malign and adverse elements of evil are thrown into the form of a triple alliance, having for its end the destruction of the soul. They are separate, and yet not always easily distinguished, because of the intimate union which subsists between them. The three co-operate so closely, are so blended and interwoven, and so completely mixed in the consciousness, that it is often most difficult to discern and discriminate. In the workings of the corrupt and fleshly mind the presence of "the spirit that now worketh in the children of disobedience" is not easily detected, nor is it always possible to separate the "carnal desires" of the world from the "diabolical, the carnal and the worldly" are so blended and in a state of such perfect coalescence as almost to defy analysis and detection.

The sin of worldliness is apt to escape our attention, among other forms of evil, and to come to be regarded finally as without any real existence. It is something not easily defined to the unspiritual mind, especially in its most refined and subtle phases. Gross sins of the passions and appetites, and palpable outrages against honesty and virtue, are readily recognized, and condemned even by those who indulge in them. Worldliness, because neither diabolical nor offensively sensual, is a sin most difficult to impress upon the conscience. It is a sin that may lie nearer to grace, and be in closer juxtaposition to godliness, than any other. It shades off the territory of unbelief, and approaches most nearly in appearance the frontier of religion. There are degrees in this as in other forms of wickedness, lighter and darker shades in the lines and coloring of the scene; but in the main, as popularly apprehended, worldliness is not regarded as in violent contrast with the principles and practice of piety. It requires a conscience of transcendent tenderness and purity, and whose processes are revolved in the deepest spiritual light, to fully appreciate and define it.

The worldly spirit may be very far removed from everything malignant and beastly. The vices of intemperance and licentiousness do not necessarily go with it, nor is integrity wanting. A character of unblemished morality and possessed of many admirable qualities is entirely consistent with this spirit. The tone of the mind and the general drift of the soul are, however, purely secular. The whole being is absorbed in temporal matters, and there is a corresponding lack of interest in the spiritual and the eternal. Worldliness may not be a vice in the usual sense of the term; neither is it a specific act nor always any tangible violation of a divine precept, but it is rather a *spirit* wholly or chiefly occupied with "the things which are seen."

So far from being a vice, worldliness often wears the garb of virtue. In connection with it will be found the most tireless energy and industry, and a scrupulous economy and thrift. Idleness, intemperance and enervation are shunned and detested, and the worldly spirit is disguised and worshiped under the assumed names of energy and industry. People who practice this deception upon themselves are neither sensual nor devilish, but they are imbued with the spirit of worldliness, and are careless about the salvation of their souls.

The essence of worldliness is in the love of the world. The love of money, the inordinate love of pleasure, and ambition are the usual aspects of it. The absolute incompatibility of this love with the spiritual life is emphatically declared. "Love not the world, neither the things that are in the world. If any man love the world, the love of the Father is not in him." Yet men

do love money very much, they are devoted to fashionable pleasures, they are in hot pursuit of position and fame, and are Christians! The unconverted mind cannot grasp a view of sin so much at variance with the opinions and practices of men; and, unfortunately, those who ought to have spiritual discernment fail often to perceive their guilt and danger. Believers are more liable to this sin, because worldly influences press on every side, and because it is most deceptive and most difficult to guard against. It is, indeed, the sin which doth so easily beset the church at this time. The love of the world, in the multifarious aspects of avarice, sinful amusements and conformity to the fashions of the day, is most in the way of vital piety. It is in thousands of instances undermining the spirituality of individual Christians, and sapping the strength of congregations.

Many professors of religion seem to forget that any line of demarcation exists between the church and the world. They are filled with worldliness as with an inebriating gas. The extravagances and hideous deformities of fashion are studied and followed, and worldly companies and pleasures are a continued source of reckless and godless dissipation. The form may vary with the season and circumstances. The worldliness of the country may differ in its manifestations from that which prevails in the city. There is a worldliness adapted to place, to age, to all possible conditions and surroundings. How shall the sinners in Zion be convinced, warmed, awakened, and how shall this flood of iniquity be stayed?

SPIRITUAL SATISFACTION.

"As for me, I shall be satisfied." This is the language of a man who decides for himself. The Psalmist draws a sharp contrast between himself, as the representative of spiritual men, and the men of the world. The men of the world have their portion in this life. They regard the world as their treasure—it has their hearts. They live for the world, and seek all their happiness in its possession and enjoyment. But, says the good man to his God: "I will behold thy face in righteousness." This was no "sour grape" view of the world, affecting to despise that which is beyond its reach, but the view of a man who had seen the world and estimated it at its real value—the intelligent and settled purpose of a man who had possessed and enjoyed the world beyond the common lot. David was a poet, and skilled in music; David was a warrior, victorious and illustrious; he was a king, chosen of the Lord and beloved by his people. Wealth, honor and success had crowned his life, and kingly power gave him the means of conferring upon the thousands security and happiness. He was not an ignorant man, despising knowledge, nor a poor man, affecting contempt for wealth, nor an obscure man, scorning station, nor a disappointed man, disgusted with the world. His life, as men reckon such things, was a splendid success. Yet he turns from the world's waters as too shallow to bathe his spirit, its fountains too small to slake his thirst, its banquets too scantily spread to satisfy his hunger, and its honors too mean and low to fill the measure of his loftier aspirations.

The world has never permanently satisfied any one. The man of largest and ripest learning has not been satisfied with learning. The man of greatest wealth has not felt that he had wealth enough, but insanely imagined that more would make him blest. There are old men now living who have spent a long life in the accumulation of wealth; they have been successful, have amassed millions; they have at the utmost but ten years to live; their habits are simple and inexpensive; they have more than their children need; they have no great and special philanthropies in view, and yet they are not satisfied with wealth. The mighty measure of an immortal soul has not been filled. Like the wide ocean, into which a thousand rivers pour, the soul is not full, and cannot be filled with all the rivers of the earth.

There are men whose fame as poets, statesmen, orators and soldiers has filled the earth. Every breeze has borne upon its wings the fragrance of their illustrious names; but all has failed to satisfy. But the man of faith, who reads God's word, who yields to God's spirit, and who listens with ears attent to the real voice of his soul, has learned, long ere this protracted, weary and fruitless search has been made, that his deathless spirit needs to be fed on better food than earth can give. If in circumstances of bereavement or affliction—and all, soon or late, are in such circumstances—the world has no power to reconcile us to our fate. It imparts no strength, it inspires no hope. How can it? If we lean upon it it breaks—pierces us through with sorrow—and we have nothing more. The soul, crushed with its woe and sinking to despair, finds no balm for its wounds, no hand to wipe away its tears, no light to cheer its gloom. Such a man turns to God, and must turn to him, as he has revealed himself "in the face of Jesus Christ," for where else, in all this wide universe, can he turn? Only in God can he find spiritual satisfaction.

Or when we think on eternity, as we all must some time, and inquire, what is my preparation to meet its great necessities? what are my hopes of happiness there?—to these deep and tremendous questions earth can make no response, can impart no preparation and inspire no hope. The soul must turn to God for all its instruction, for all its preparation and all its hope. The world cannot satisfy us. If it did, a few years, perhaps one more, will end it all.

We must feel that our lives and our hearts are in harmony with God. It is when we thus feel that the soul realizes that it has found at last a satisfying portion. All other than God is finite, and less than the capacity and needs of the soul. He who seeks his happiness in creature good seeks it in something less than himself; he worships a god inferior to himself, just as benighted heathens who bow down to gods of wood and stone. But God, in all the aspects in which we may contemplate him, is infinite. He is eternal, "from everlasting to everlasting." He fills immensity. He is almighty and immutable, and he is "holy, just and good." All moral excellence and loveliness is summed up in him—a boundless fullness no line can fathom, no wing survey, no duration exhaust, and no mind comprehend. Here the soul can find satisfaction—profound, unbroken repose—through all time; and when it awakes in eternity, in the likeness of God, it "shall be satisfied." W.

NEWS FROM THE CHURCHES.

WINNSBORO CIRCUIT.

Mr. Editor: The financial report of the Mallet Circuit, sent to Conference by me, is not at this time a correct statement of what was paid me. After the report was made there was a considerable amount added to that already paid. I cannot conveniently get at the figures, but suffice it to say that the total received was much larger than will appear in the Minutes. Besides this, the ladies of the church presented me with an excellent suit of clothes.

I never spent a happier year, so far as intercourse with the church was concerned, than with the people of Mallet circuit. I experienced nothing but kindness through the whole year, and when I left them I felt like one leaving home and kindred.

The severe trial of faith I experienced in leaving my home and coming here has been happily ended by the cordial reception I have met with from the people of this work. The stewards met at once, and have provided me a pleasant residence, sent for furniture and provisions, and will get me a horse. I feel at home already, and though I left dear friends behind, I find I am not altogether a stranger among strangers here. My wish and prayer is that I may be the instrument of God to do them good this year.

That such may be the case, pray, brethren, for us. F. T. R. WINNSBORO, LA., March 16, 1870.

JASPER DISTRICT, MOBILE CONFERENCE.

Mr. Editor: The revival which swept over this mountain district, last summer, has not passed away, as some predicted, like an April shower. It is true that the winter has been severe up here; so much so that if the church is ever justifiable in going into "winter quarters," this has been one of the times. But she has either kept her camp-fires steadily burning, or has taken the precaution to renew the supply of oil, so that the vestal flame has continued to burn upon her altars. So the work still goes on, and signs and wonders continue to follow.

As far as I have gone on my first round, the reports of the pastors are truly encouraging. With a very few exceptions, the churches are at peace among themselves, and signs of life and growth are visible everywhere. The young converts of last year are moving off well. On the Elyton circuit, where over two hundred joined, not one has turned aside as yet. In some places, during the Christmas holidays, the servants of sin and Satan tried to rally their forces and scatter ours in the giddy whirl of the pleasure dance; but the stratagem failed. They say it was because we did not leave them a "fiddler." Well, be it so. I would to God that all the "fiddlers" were soundly converted.

Brother T. P. Roberts will soon move into the new parsonage—a house of which the Elyton circuit may be proud. By the way, as soon as the parsonage is completed, that is going to be one of the most desirable circuits in the Mobile Conference.

The pastor's report on the Murphree's Valley circuit was cheering indeed. It has seldom been my privilege to witness a more gracious time than the first Quarterly Meeting on this work proved to be. Though the privilege cost one the fatigue and exposure of riding seventy-five miles through the cold, yet it was good to be there. These omens for good are the more significant from the fact that this circuit suffered more than any other in these parts from the benevolent work of "disintegration and absorption." Murphree's Valley has been the stronghold of Northern Methodism in all this country. It was here that Bishop Clark held a session of the so-called Alabama Conference in 1868, and it was during that Conference the Bishop proved, to the satisfaction of all present, that whatever might have been whispered in the ears of the fearful, yet the fixed policy of that church was to elevate the negro so as to make him the equal of the white man in all the social relations of life—that is, so far as their operations in the South were concerned. From that hour their cause began to wane in all this country. Until then many of their members were utterly in the dark; but now they saw that they had been imposed upon. In some places many have come back to us, and the way is now opening for many more to come. It is true that in that "national dilution" of the Northern Church the bogus Alabama Conference laid out two districts up here somewhere, but I have tried in vain to locate their boundaries. All is dark, except that two presiding elders and a dozen or more preachers are paid by the Northern Church to cultivate this field; but excepting five or six churches, over which they have no legal control, and one which they built to hold their Annual Conference in, no one can tell me where they preach or what they are doing—only they get the money quarterly.

We mention these facts in sheer justice to the cause of truth and Bible Christianity. The people are waking up to the facts in the case, and we believe that the signs portend that the time is near when this "diluted" form of Methodism will give place to that more in keeping with the gospel which saved our fathers and mothers. With the present state of things I expect to see the turbulent waters in this section, which have been so violently agitated for years, calm down; and under the blessing of God you may expect to hear good news from Bro. R. W. Coons and Murphree's Valley before this year shall have passed away.

So far as I have seen or heard, the preachers are all moving off well. May the great Head of the Church send us a gracious revival all over the land. Yours truly, J. M. BOLAND, JASPER, ALA., March 11, 1870.

tated for years, calm down; and under the blessing of God you may expect to hear good news from Bro. R. W. Coons and Murphree's Valley before this year shall have passed away.

So far as I have seen or heard, the preachers are all moving off well. May the great Head of the Church send us a gracious revival all over the land. Yours truly, J. M. BOLAND, JASPER, ALA., March 11, 1870.

MORAL SCIENCE.

Mr. Editor: I have read with great interest, in the last two numbers of the *Advocate*, an article from the *Southern Review* on moral science. It strikes me as excellent. It reveals profound and discriminating thought. I wish the author would write the book he indicates is wanted. There is a felt want of a harmonious system of ethics, setting forth the authority and relation to each other of conscience and the absolute rule of right, and the relation of each of these to the will or action. We want, too, the connection traced between the precepts and the principles of virtue; and the "art" of attaining to and maintaining a right character—we want this, trench though it should on the province of theology. (Indeed, without theology, how can moral science be complete?) To disclose the adaptation of the gospel method, or, in other words, "to discover the philosophy of Christianity, would be of great service. Responsibility involved in the right of private judgment should be elaborated, and the sanctions of law, with their propriety, should be everywhere exhibited.

By all means, let the man who wrote that article continue his work, and write the book, which, written by him, will shed much light upon moral subjects, and be a fine accession to the cause of virtue.

I will not refrain from saying, Mr. Editor, that I am more and more delighted with your paper. It is not excelled in the land. It will make any family intelligent, and will fire with godly enterprise the Christian who reads it. Alas! many of our members will not take it—often official members. J. A. E. BROWNVILLE, MISS., March 16, 1870.

CHINESE IMMIGRATION.

Mr. Editor: I have this morning read the last letter of Rev. W. G. E. Cunyngnam, contained in the *Christian Advocate* of March 12. I read the first in the paper of February 26, and was very much gratified to see that the inquiries so often made on the subject of Chinese immigration were at last likely to receive an answer from a patriot and a Christian.

From the very first inception of that scheme I shrank from it with unconquerable aversion. But I was met on every hand by declarations that the Chinese made the best servants in the world, and that they worked for the lowest wages. This material view of their value has never been satisfactory to me. Mr. Cunyngnam has well said that "we are not in a condition to take into our troubled bosom the pagan hordes of China."

We thank him for the earnest protest which he has made against an evil which seems impending; and we thank him for the information he has given us on a subject on which he is well informed and we are ignorant. His residence in China, of course, enables him to speak of what he knows, and to testify of what he has seen.

We agree with him that "a heavier curse could not rest upon our soil than such a population."

Yours truly, A. READER OF THE ADVOCATE. MARCH 17, 1870.

THE ECUMENICAL COUNCIL.—A Paris dispatch, of November 12, says: Monseigneur Daparloup, Bishop of Orleans, has issued a pastoral, expressing his approval of the proceedings of the Guilda Conference, but declaring in advance that he will abide by the decisions of the Ecumenical Council, whatever they may be. It is reported that the pastoral of the Archbishop of Paris, issued November 7, opposing the adoption of the dogma of papal infallibility, without discussion, was inspired by the emperor.

LETTER FROM WOODVILLE.

Mr. Editor: Have you ever heard of any of your readers overheard of the village of Woodville, in Mississippi? I presume some of the latter have. But perhaps a large number of persons who read the Christian Advocate are not at all aware of the existence of such a place, and of facts which give distinct individuality to it. Permit me, then, to sketch

OUR VILLAGE.

As churches first attract a stranger in entering a new place, I will mention that we have four churches, in three of which religious services are regularly held. The Episcopal and Methodist churches support each a pastor. The Presbyterian church is served monthly.

A railroad, which runs always tri-weekly, and sometimes daily, connects us with the Mississippi river and with the great commercial world. We enjoy the benefit of a post office; we boast of a jeweler's shop, of two drug stores, of various dry goods emporiums, and of provision stores. We have the other professions, which indicate refinement and cultivated taste, for we possess milliners, dress makers and tailors, who are skillful in their various arts. Nor would we omit to mention the humble, but no less important artisan, who clothes our feet. Our carriages can be repaired, and our horses shod, within the precincts of our own burg, though "the spreading chestnut tree" of the poet be not present. As the wants of the body are thus provided for, and as the ministers of the gospel are here to admonish us of the value of the soul, but one thing now is needed to complete the picture.

Happily for us, the need is met. We have schools for the young. Our daughters need not be sent either North or South to obtain mental culture.

Situated in a grove of oaks and beeches, retired from the dust and bustle of the village, our young ladies' seminary offers a pleasant retreat to the pupil. The course of study pursued here is full and thorough; the discipline kind and parental.

I know no pleasanter sight than the group of girls who compose this school, as they ramble in the grove with their teachers, or promenade the long galleries, or assemble in one of the music rooms, and add their young voices to the tones of the organ, in some sacred song, or in their class rooms are attempting to climb "the Hill of Science," guided firmly yet kindly up its oftentimes steep ascents.

Congratulate us, then, on the fact that, in spite of the war, in spite of the consequent poverty and depression, we have in our village an institution which affords a thorough education to our daughters; an institution which, built and endowed by those who love the Methodist Episcopal Church South, yet claim a true brotherhood with all "those who love our Lord Jesus." The teachings of the Saviour are the text books in religion here, and these are inculcated without sectarian bigotry.

Mr. E. H. Waites is the steward of the institution. The girls, who form a part of his family, find their comfort provided for, and a gentle consideration extended to them, such as makes this school only less loved than their own homes.

When you, Mr. Editor, are itinerating through the land, call and see us in our village, to which we shall most gladly welcome you.

CONSTANS.

MARCH 18, 1870.

THE AFRICAN LAKES.—The Chicago Tribune, after quoting a statement by the London Telegraph that lakes Tanjika and Nyanza are shown on an ancient globe in Venice, says:

Mr. A. W. Hammett, of 105 Miller street, in this city, has shown us a volume of Robert Morden's Geography, printed in 1688. This volume contains a well executed map of Africa, on which the two lakes named above are found conspicuously laid down under the names of Lake Zaire and Lake Zupani, each connecting with the Nile. The larger of the two lakes seems to be about the size of Lake Michigan, and the smaller about the size of Lake Ontario.

LETTER FROM ALABAMA.

Mr. Editor: On the twentieth of February the beautiful town of Camden was fired in two or three places at the same time. The flames leaped from roof to roof till ten houses were consumed, five of which were important business houses; one was a hotel. It was undoubtedly the work of an incendiary. There was a very destructive fire here only twelve months ago. The energetic people of this place were just recovering from the effect of the first fire, when, lo! the vile wretch reappeared with his torch, to leave the town in a mass of ruins. Yet these things may do our people good, by teaching them to be more submissive.

We hope the next fire will be the holy fire from heaven to consume sin, and revive religion in the church. Truly yours,

MILLARD J. LAW.

CAMDEN, ALA., March 14, 1870.

The Pope and the Chaldean Patriarch.
The London Times correspondent at Rome says:

I will narrate what will be pronounced by many a sensational, but which, for all that, is quite a true story. I relate it here because it seems to me to have a singular point in illustration of the real temper of those who rule in the Vatican. It is well known that there are in Rome a considerable number of Oriental bishops, and that the Court of Rome, in pursuance of its relentless spirit of despotism, is bent on stripping these representatives of ancient churches of many antinomistic privileges, preserved to them through the lapse of centuries. The day before yesterday the Chaldean Patriarch took part in the discussion on the schedule about the rights and privileges of the bishops. It was the day following the brilliant speech from Strossmayer. The Patriarch's speech, translated from Arabic into Latin, and read by a French prelate, ran in the same sense. He dwelt on the wisdom of centralization, and laid stress on the evils ensuing from systematic violation of olden customs and olden liberties. It was the speech of a bishop of an historical community who put in his protest in behalf of the ways of the fathers against the reckless symmetry sought to be imposed by one who would have all subject to his absolute word. That evening the Patriarch was summoned to the pope, but he was told to come by himself, unattended by any of his priests. He went and found himself in the pope's presence with only Monsignor Valerga, Latin Patriarch of Jerusalem. Through the medium of this Italian dignitary the pope, who was (as he can be) moved with passionate anger, upbraided the venerable Patriarch of Babylon in unmeasured terms. He went further. He told him that he must then and there sign one of two papers—either a renunciation of all he had spoken, or else a renunciation of the special privileges of independence from Roman jurisdiction enjoyed by his church. The poor man, taken utterly aback, requested to have two days to consult his priests. The request was refused. He was told he should not go home before he had signed. He did, accordingly, sign his renunciation, and there he is now, a man broken and reduced by the pope in punishment for having dared to exercise his privilege of speech in the council in a manner not according to his taste. Now, what was done in this instance to an obscure Chaldean Patriarch, ignorant of Europe and European tongues, would also be done to Bishop Strossmayer if only there were not reason to fear he would be more difficult to gag. But still, here the case has happened, and is it going to be borne by the bishop? From what I hear, it would seem as if this incident, occurring at this precise conjuncture, promises to change the whole course of the council and turn everything into a new drift. I know that bishops of great eminence and great position have taken up this outrage with becoming spirit. It is not in my power to say which course will be pursued, but unless temper should evaporate in a most marvelous manner, or the pope act humbly pie very meekly of his own accord, I am prepared to see the matter followed up with uncommon vigor. There is a difficulty about how to open the question from the limitation set on the initiative of the bishops; but this can be got over through a numerous signed petition, and then there is a precedent for the Chaldean Patriarch telling his own story and recalling his enforced renunciation in the case of Pope Pashal the Second, who, before the General Council, read the retraction of the compact into which he had been forced with violence by the Emperor Henry. I repeat that the story is one perfectly authentic.

and that this incident is calculated to entail consequences not easy to foremeasure.

The Archbishop of Bordeaux thus describes a case of somnambulism in a young priest: "He was in the habit of writing sermons when asleep, and although a card was placed between his eyes and the note book, he continued to write vigorously. After he had written a page requiring correction, a piece of blank paper of the exact size was substituted for his own manuscript, and on that he made the corrections in the precise situation which they would have occupied on the original page. A very astonishing part of this is that which relates to his writing music in his sleeping state, which, it is said, he did with perfect precision. He asked for certain things, but only such things as bore directly upon the subject of his thoughts. He detected the deceit when water was given to him in the place of brandy, which he asked for. Finally, he knew nothing of all that had transpired when he awoke, but in his next paroxysm he remembered all accurately, and so lived a sort of double life, a phenomenon which is said to be universal in all the cases of exalted somnambulism."

MADAGASCAR.—The opposition to the Christianization of Madagascar is utterly broken, and the chief question now is, where to get the necessary number of teachers for the large number who wish to learn. Rev. Mr. Ellis writes that native teachers are being sent forth to these places. About one hundred trustworthy Christian men have, we understand, been selected for this purpose, and at least £140 has already been raised by the congregation toward the expenses. These faithful men will be the bearers of copies of the Bible provided by the British and Foreign Bible Society. We are glad to learn that, alive to the greatness of the occasion, that noble institution is increasing its supplies. One thousand two hundred Malagasy Bibles and some thousands of St. Luke's gospel have recently been sent out, and twenty thousand Testaments, in preparation, will follow as speedily as possible.

The feeling against conventual establishments in Europe is meliorated by the thunders from Rome. We read in the Berlin papers a report of the committee to whom was assigned the duty of examining petitions presented to the Chamber of Deputies, in which the opinion is expressed that the government must insist upon applying to all ecclesiastical establishments the inspection and control imposed by law on all incorporated bodies; and this inspection, the conventual authorities assert, is fatal to their institutions. Three of the principal districts in Hungary have also presented a petition to the Hungarian Parliament, asking for the abolition of monasteries and convents, and the appropriation of the revenues to educational purposes.

The will of the late Bishop of Manchester exhibits in a very marked degree the "ruling passion strong in death." His connection with his diocese was marked by many unhappy quarrels, and in his last will and testament he perpetuates a family feud which one might have thought would have been healed by the lapse of time. Many years ago his eldest daughter married one of his lordship's chaplains—a man of exemplary character—without the bishop's consent. She is excluded from all interest in her father's property, who explains his act in these terms: "This I do not in anger, but because I hold it a duty not to let such conduct as hers and the person she is married to prove successful."

God loves to have us pray with earnestness. The best proof of earnestness is simplicity. Better in God's sight are the broken but heartfelt utterances of a child than the highflown utterances of some who think themselves wonderful in prayer.

The Indiana Conference, to be organized under the authority of the Methodist Episcopal Church South, it is announced by the Rev. J. Ditzler, will meet April 14, in English chapel, Shelby county, Indiana.

He that puts a Bible into the hands of a child gives him more than a kingdom, for it gives him a key to the kingdom of heaven.

Married.

On the eighth of March, at the residence of the bride's mother, near Lake Lafayette, Issaquena county, Mississippi, by Rev. J. C. Carlyle, Mr. J. F. Hovey to Miss LAURA THILMAN.

At the residence of the bride's father, in Lowndesho, Alabama, March 10, 1870, by Rev. A. A. Pilley, Rev. R. E. Cary, of the Montgomery Conference, to Miss SALLIE C. ALEXANDER.

At the Methodist church, in Whistler, Alabama, on the thirteenth of March, 1870, by the Rev. J. J. Grace, Mr. WESLEY THOMAS to Miss RACHEL MYERS, both of Whistler, Alabama. Nashville Advocate please copy.

On the seventeenth of March, 1870, at the Methodist church, in Whistler, by the Rev. J. J. Grace, Mr. BENJAMIN R. GASTON to Miss ELIZABETH F. RYAN, both of Whistler, Alabama. Nashville Advocate please copy.

Obituaries.

Died, at his residence on Pettie Prairie bayou, parish of St. Landry, Louisiana, on the twenty-fourth of February, 1870, HIRSH WINSON ROBINETT, aged sixty-eight years.

Few men in this or in any other community leave a higher standard of morality and virtue than does he whose name appears above. Notwithstanding his advanced age in life, and his obligations to the natural destiny of all men might in reason be considered as due, yet he leaves a large family and a wide circle of friends and acquaintances with many regrets and sorrows.

Mr. Robinett had been a practical and successful planter of this parish for a number of years. He was faithful in the discharge of every duty, and worked with unflinching industry and zeal in every undertaking during his useful and well-spent life. He was remarkable for his honest confessions, as also for his wise and prudent counsel and advice, ever ready and willing to contribute for any laudable purpose or to assist in any praiseworthy enterprise. And, above all, he was a devout and pious Christian. No engagements of a business character were allowed to conflict or overrule his religious duties. The church, alas! has lost one of her chief officers, ornaments and supports. The character of this truly good and pious man is worthy the imitation of all. May he rest in peace, while his immortal spirit returns to God, who gave it." O. S. S.

FRANCIS BASSETT BOLING, son of Captain R. S. and S. M. Boling, was born in Washington county, Alabama, on the twenty-ninth of February, 1851, and died on the sixth of March, 1870, aged nineteen years and nine days.

Truly, "we know not what a day may bring forth." The death of this young man was sudden, and the circumstances attending it sad, sad indeed. While riding, on Sabbath evening, his horse became frightened, left the road and threw him against a log, where he is supposed to have died immediately. At sunrise, next morning, his body was found cold in death, and the sad news borne to his bereaved parents that their dear Francis was gone from earth forever. Thus father and mother, brothers and sisters, were so unexpectedly left to mourn a loss which can never be replaced.

He was a dutiful child, an affectionate brother, a watchful nurse to a suffering father, and to his mother all that a son could be. He is the second son they have lost within seven short months. On the day of his death he attended church at eleven o'clock, seemed to be serious during the services, and at the close, in obedience to a call for penitents, bowed at his seat, thereby desiring an interest in the prayers of the people of God. May God give the bereaved ones grace to say: "Thy will be done."

Within his happy childhood home, he held, a father weeps. As many thoughts of his loved one Like a shadow o'er him sweeps.

A mother's form is bowed with grief, Like reed before the storm; She sadly pines a wild lament Above the lifeless form.

Come back, come back, my own loved one, In all thy beauty bright, In all thy youthful loveliness, To glad thy mother's sight.

Oh, can it be that never more Thy spirit can awake? From the dark land of death come back, Boy, for thy mother's sake."

A FRIEND.

Died, at Raymond, Mississippi, of pneumonia, on the twenty-seventh of February, 1870, Mrs. ANN W. PHELPS.

Sister Phelps was born near Hopkinsville, Kentucky, February 25, 1818; was married to Henry Wyche Phelps, September 1, 1835. She professed religion and joined the Methodist Church either before or very soon after her marriage, as her eldest child's first memory of her is of a devout Christian mother, and she has never known her as anything else. Her subsequent life was one of constant devotion of her talents and means to the cause of God. Her piety was of the active kind, always finding something to do, and ever ready to do good—"always abounding in the work of the Lord." She was indeed like a "tree planted in the house of the Lord"—a fruit-bearing tree, where something could always be gathered for every good work.

The object of this notice is not to

logize the departed saint, but to inform and comfort her large circle of kindred and friends, who may have been associated with her in Christian fellowship for only a few years, or even months. As they knew her during those years or months, so she ever was, through all her Christian life, the same unostentatious, faithful, useful servant of God.

During the long time she lived in the Attakapas country many of the preachers of the Louisiana Conference, and others, learned to know and love the virtues of this "elect lady," whose many Christian graces are in their minds and hearts a "living epistle."

Sister Phelps died while on a protracted visit to her sister in Raymond. From those present I learn that she died as she lived—calmly, peacefully falling asleep in Jesus, after giving specific instructions on matters of business and for the disposition of her body, which was, according to her request, conveyed to her late residence, near New Iberia, and placed in the same grave with that of her husband, who died a few years ago. She desired that there should be no public display, but that her body, followed by a few friends, might be borne as quietly as possible to the grave. These instructions are in such harmony with the general character and conduct of one who was clothed with humility, that I have felt them exerting a constant restraint upon me while penning this brief obituary, lest I should write what she would crase could her hand guide my pen.

A. E. GOODWIN.

DR. DAVIS ON DEAFNESS.

Send Forty cents, and get the NOTES ON DEAFNESS, by W. L. Davis, M. D. To be had of Steel & Co., 72 Camp street, Elyria, 130 Canal street, Ellis, opposite the Post Office; also, by mail, of the author, Glass Box 359, New Orleans.

ON-PAVE.—Dr. Davis removed to No. 14 Baronne street, where he holds himself in readiness to attend to the treatment of persons in cases of Deafness—a special branch of his profession, to which he gives his whole attention. feb11

NEW ADVERTISEMENTS.

TO OWNERS OF HORSES AND CATTLE. Tobias' Derby Condition Powders are warranted superior to any others, or no pay, for the cure of Distemper, Worms, Lice, Coughs, Hoarse, Colds, etc., in Horses, and Colds, Coughs, Loss of Milk, Black Tongue, Horn Distemper, etc., in Cattle. These Powders were formerly put up by Simpson I. Tobias, son of Dr. Tobias, and since his death the demand has been so great that Dr. Tobias has continued to manufacture them. They are perfectly safe and innocent; no need of stopping the working of your animals. They increase the appetite, give a fine coat, cleanse the stomach and urinary organs, and increase the milk of cows. Try them, and you will never be without them. Col. Philip B. Rush, of the Jerome Park Race Course, Fort Smith, New York, would not use them until he was told of what they were composed, since which time he is never without them. He has over twenty running horses in his charge, and for the last three years has used no other medicine for them. Sold by Druggists and Storekeepers throughout the United States. Price, twenty-five cents per box. Depot, 10 Park Place, New York. mh26 4tr

The Child's Corner.

THE GREAT AND LITTLE KING.

BY ALICE CARY.

The little name of the golden-crested wren is *Regulus*, which means "a little king;" and the following fable tells how it came by such a name.

One day the birds all met in a tree, but they didn't meet to sing— They met to argue politics And to choose themselves a king. There were so many overhead, Crowing and zolag back, And so many round about the tree, That the air was fairly black.

Some chirped, some cried, some screamed aloud, Some sat with slanting eye, For there were many candidates, And partly strife ran high. At last it was agreed by all To choose the bird whose wing Could soar the nearest to the sky, And crown him for their king.

The swallow tried her strength, and then The blackbird and the blue, And then the sturdy, honest quail; But none of them would do. Then all at once the eagle swooped From out the fluttering crowd, And in a minute more his head Was level with a cloud.

Then what was the astonishment Of all the birds to see? A little wren upon his tail, Who cried out: "Look at me!" So half the birds began to cry, "And half began to sing, For some reviled him for a knave, And some would have him king."

Just then an owl, who lived hard by, Within a hollow stub, Called: "Wren, come down and get your crown, Or lose it—there's the rub!" "Good again, help me," cried the wren, As he came out of breath— "I cannot fly so near the sky, And if I fall 'tis death!"

So honor such a flight as this To any bird could bring, And so they named him *Regulus*, Which means a little king. The eagle's strength was in himself, To fly up or down, And so they named him king of birds, And so he won his crown.

—The Children's Hour.

A BRAVE AND TRUE CHILD.

[We have the following incident from the pen of the Rev. Dr. Watkins, of Natchez.]

Maria Poston, the adopted daughter of Jesse and Martha Skinner, died of typhoid fever, at the residence of Dr. Bass, near Natchez, Mississippi, on the tenth of October, 1869, in the fifteenth year of her age.

Just as the war began a family, consisting of a father and mother and three children, removed from Missouri to one of the dark regions of Texas. The pioneer's cabin was built, and what of comfort lay within reach was provided, when Texas was summoned to contribute her offering to the Confederate cause. The hardships of a soldier's life soon made the mother a widow, and left her little ones an increasing care upon her failing strength. The mother only lived to realize the sad consciousness that the costly sacrifice was made in vain. Committing her friendless children to the protection of heaven, she closed her life of sorrow, and went away to be at rest.

The children, a girl of ten, and two boys younger than she, were taken to the houses of neighbors, to be employed and fed and reared according to prevailing customs. And such customs! Every vice that has a name was familiar to that lawless people, and these children, dedicated to God, and taught lessons of purity and truth and duty by pious parents, were brought into contact with vice and exposed to the corrupting influence of godless association.

Fortunately the mother's life and teachings had been molding the character of the daughter, and the grieved and offended child determined to break away from such revolting scenes and seek protection among strangers. Taking the brother four years younger than herself, she sought the public road, and, unconscious of her guide, followed on in hunger and weariness, until, exhausted, they sat down to rest. Soon a horseman appeared, to whom the modest, brave girl made her appeal. He knew that near by was a family of refugees from Mississippi, and that they were childless. Putting them into the path, he directed them toward the house.

Fatigued, hungry, tattered, dejected, the children made their condition known, and were at once re-

ceived into the kind and Christian family; for, said Sister S., "I felt that I had done little for the world, and may be God has committed these orphans to my care." In a few days the little boy was claimed by the party who had had him in charge, and Brother S. gave him up.

In the family returned to Mississippi, bringing Maria with them as an adopted daughter. They spent some months in Natchez, where Maria had the full advantage of a good day school and of the Sabbath school. She learned rapidly, and was punctual at the Sabbath school.

Last spring Brother S. had occasion to return to Texas, and Maria besought him to recover her brothers and bring them home with him. Brother S. finally determined to make the trip by land and to take Maria with him. Having transacted his business, he applied to the military authorities for these children. Maria appeared before the commandant, told her artless story, and at once received the order. "But," said an officer, "you dare not go there. I know the ruffians, and they will murder you and murder the children rather than give them up. You must have a guard."

The party set off with a detachment of soldiers, and traveled a distance of sixty miles in search of the boys. How Maria's heart leaped as she approached the house and saw her little brother in the yard! She delivered the order, and the brother leaped into the ambulance. "She soon found the other, but the husband, charged with murder, was a fugitive, and the wife would not receive the order. Nothing daunted, the brave girl called her brother, and, taking him into the ambulance, the party drove away.

It was to Maria a triumphant hour. She had rescued her brothers from destruction, and would soon see them under the guidance of a family who feared God. Soon after their return to Natchez Maria was taken sick. Her illness did not create serious fear at first, but assuming a typhoid form, it gradually dried up the fountain of life. For two months she suffered, sometimes apparently convalescent, and then passing near to the gates of death. All that medical skill could do was done; all that tenderness could prompt was applied, for she had won upon the love of these parents, and they clung to her as to their own daughter. When her condition became hopeless she desired to see her pastor, and spoke of the happy hours spent in the Sabbath school; sent messages to her father, then absent, gave expression to her grateful affection to her mother, and, committing her brothers to the kindness she had shared, with that faith in Jesus which gave composure to the soul, she passed away to the rest that remains for the children of God.

PASTOR.

To see Christian societies regarding each other with the jealousies of rival empires, each aiming to raise itself on the ruin of all others, making extravagant boasts of superior purity, generally in exact proportion to their departure from it, and scarcely deigning to acknowledge the possibility of obtaining salvation out of their pale, is the odious and disgusting spectacle which modern Christianity presents. The evils which result from this state of things are incalculable. It supplies ideals with their most plausible topics of invective. It hardens the consciences of the irreligious, weakens the hands of the good, impedes the efficiency of prayer, and is probably the principal obstruction to that ample effusion of the spirit which is essential to the renovation of the world.—Robert Hall.

THE FIRST PIANO IN JAPAN.—Letters from Yokohama state that the chief officers of the naval expedition sent by the Austrian government to the East have had an audience of the Mikado, who expressed great admiration at the presents, chiefly of Hungarian manufacture, which had been sent him by the emperor. One of them is a piano, and an attaché of the Austrian embassy having played several pieces on this instrument before the Mikado, who had never seen a piano before, the latter was so pleased that he at once directed his wife to take lessons. Her majesty will be instructed in the use of the instrument by Lady Parkes, the wife of the British minister at Yeddo.—Eastern Post.

Scientific.

THE SPRINGING OF TIMBER.

It is a consideration of great practical importance to be able to take advantage of the springing of timber. After some kinds of timber have been split into bolts they always spring in a certain direction, with respect to the grain of the wood; namely, across the concentric circles of the original trunk. When a stick of round timber is saved in two lengthwise, through the heart, if it springs at all, the ends will separate several inches, while the two sticks will remain together in the middle. Some kinds of timber never spring after being sawed or split, while other kinds will always spring so much as to be unfit for many purposes. The toughest timber usually springs the most, and sometimes the power which causes it to spring is so great that the ends of a log will crack open for several feet in length.

The cause of springing is attributable to the contraction of the outside of a log, and the expansion of the inside near the heart. But what causes the contraction and expansion is a question which has puzzled the brains of the wisest philosophers. Since we know beforehand that most timber will spring more or less, we may, by taking proper precaution, avoid inconvenient results in the practical affairs of the farm and workshop.

A skillful sawyer, in saving a log into scantling, which he knows will spring, will first mark off the ends into eights; and then, after sawing once through on one side of the log, saw a slab off the other side, and finish in the middle. By this means the lumber will be about as true as if the timber were not inclined to spring at all; whereas, were the same log sawed by working all on one side, the lumber would be much thicker at the middle than at the ends.

In sawing a long log into four square pieces of timber a good sawyer will square the log first; and if a thick slab is to be taken off on one side and a thin one on the other, the thin one should be taken off first, and the saw should be run through the middle last.

This rule holds good also in scoring and leveling timber. If a thick chip is to be taken off one side, in timber that is inclined to spring, the thinnest slab should always be cut off first. A stick of timber will always spring most when the thickest slab is removed first.

In riving out spokes for carriage wheels the rule of good workmen is to have the widest way of the spokes in the direction from the heart to the bark. The reason for this is, they retain their shape much better than if split out at random, or with the sides toward the bark and heart of the timber.

When making whiffle-trees also they will be stronger to have the front side of the whiffle-tree nearest the heart timber, and the back side toward the bark; and they will also retain their shape longer if the timber be split in this direction, across the grain of the wood.

Lever which are made of split timber will stand a greater stress when they are so made that the hardest strain comes on the side which would be nearest the bark. For this reason a fork handle should always be attached to the fork with the side upward which grew nearest the bark. A rake handle or hoe handle, on the other hand, should have the heart side upward. Axes for wagons, spring bars, bolsters, sleigh beams and such like, should always be placed with the heart side upward. It will be easy to determine which side grew nearest the heart or the bark by taking notice of the shape of the concentric circles at the ends of a stick. The heart side will be concave and the bark side convex.—Manufacturer and Builder.

EXERCISING MECHANICAL SKILL.

Very few persons exercise themselves in the use of mechanical tools as they should and might do. Many a tiller of the soil has often spent a dollar's worth of time, at a hurray season of the year, in going to and returning from some mechanic's shop, to get a small job done, which he himself could have performed in a very satisfactory manner if he had trained himself with a little practice, to handle tools with facility. As a rule no class of citizens accustom themselves to wait on themselves. Most persons seem to be satisfied with single attainments. Many a mechanic, even, consumes hours in looking up a mechanic of another profession to perform some little job about the house, which he could do with his own hands during his leisure moments. This is not the way to save money. When a person has several hours of leisure every day he should exercise his faculties to wait on himself.

Years ago our ancestors were accustomed to expend large sums of money to pay laborers for performing what their fat oxen and horses could have done, instead of standing idly in the stable. And many per-

sons do the same thing now. Every man or boy should exercise himself in the dextrous use of mechanical tools. Innumerable opportunities perpetually present themselves. For instance, if a door does not close easily and fasten properly, take it off the hinges, dress off the edges a trifle with a plane, and make every part fit neatly. If a window-pane gets broken, instead of paying fifty cents or \$1 to an itinerant glazier to put in a new pane, while you look on, procure some Spanish whiting and linseed oil, make some putty, and set the window glass. A poor man who must grind out his dollars dime by dime, may often save many dollars during the year by waiting on himself in these little ways.

Furniture often needs a little repairing, which any ingenious person may do with a dime's worth of glue and a cent's worth of trimmer's tacks. A little tin glue will be hung in a tea kettle, the glue prepared and the broken parts united, just as well as by incurring the expense of transporting the furniture to the manufactory, and paying an extortionate price for a small job.

Those persons who have plenty of money may prefer to call in a mechanic to do all little repairs at his own price. But poor men should be wiser.—Manufacturer and Builder.

RESERVE POWER.—It is not wise to work constantly up to the highest rate of which we are capable. If the engineer on the railroad were to keep the speed of his train up to the highest rate he could attain with his engine it would soon be used up. If a horse is driven at the top of his speed for any length of time he is ruined. It is well enough to try the power occasionally of a horse or an engine by putting on all the motion they will bear, but not continuously. All machinists construct their machines so that there shall be a reserve force. If the power required is four-horse, then they make a six-horse power. In this case it works easily and lasts long. A man who has strength to do twelve honest hours of labor in twenty-four and no more, should do but nine or ten hours' work. The reserve power keeps the body in good repair. It rounds out the frame to full proportions. It keeps the mind cheerful, hopeful, happy. The person with no reserve force is always incapable of taking on any more responsibility than he already has. A little extra exertion puts him out of breath. He cannot increase his work for an hour without danger of an explosion. Such are generally pale, dyspeptic, bloodless, nervous, irritable, despondent, gloomy—we all pity them. The great source of power in the individual is the blood. It runs the machinery of life, and upon it depends our health and strength.

A mill on a stream where water is scanty can be worked but a portion of the time. So a man with a little good blood can do but little work. The reserve power must be stored up in this fluid. It is an old saying among stock raisers, that "blood tells." It is equally true that blood tells in the sense in which we use the word. If it is only good blood, then the more of it the better. When the reserve power of an individual becomes low it is an indication that a change is necessary, and that it is best to stop expending and go to accumulating, just as the miller does when the water gets low in the pond. Such a course would save many a person from physical bankruptcy.—Herald of Health.

THE COLORS MOST READILY DISTINGUISHED.—Experiments made to ascertain what colors are most quickly and easily perceived by the eye, seem to show that bright yellow is the color most easily distinguished, and violet and red are the least readily recognized. After yellow, blue is the most quickly seen. These experiments may be of some value in improving our system of railway signaling. The colors most readily distinguishable at the greatest distance are obviously the best to employ for signals. Now, according to these experiments, red comes last, or last but one, and green stands but just before it. Bright yellow and blue, the colors most easily recognized, would therefore seem to be preferable for signal lights. In connection with this we may mention an interesting fact, but one of no practical importance further than showing that the perceptions of the lowest animals seem to accord with our own. When a basin of water containing some of those active little animals, the water-fleas, is surrounded with blackened paper, the animals sink into inactivity, and collect in the illuminated part of the water. Further than this, if a spectrum be projected through a slit in the paper, the greater number of animals collect in that part of the water illuminated by the orange yellow rays, and the fewest in the line of the violet, which would seem to indicate that they too most readily perceive yellow light.—*Scientific Magazine*.

IT IS AN GREAT A POINT OF WISDOM to hide ignorance as to discover knowledge.

STOVES, AND TINWARE.

THE BEST COOKING STOVE FOR WOOD NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, combining all the new and important improvements; also to the extra height of the Oven under the fire chamber, the Patent Air Chamber, Front Doors, and Patent White Enamel Iron Knobs, the improvements in the covers and centre pieces, all of which have been covered by Letters Patent, and are used in no other Stove. They are warranted to stand like, or others sent free of charge in all cases. We have all sizes of this justly celebrated Stove, both

PLAIN AND EXTENDED-BACKS,

the Extended Back with cast iron Enamel Reservoir and Funnel, Tin Ware, Griddle, Grilliron Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, as in the case of most of the Stoves now used, and the fire is forced directly against the whole surface of the bottom of the Reservoir. The Reservoir, being detached from the top, can be removed at pleasure, thereby forming a six-hole Stove—the best in use, as the back plates will heat as well or better than the middle ones. For sale by

G. W. W. GOODWYN,

62 Camp street.

ALSO, THE MOST

Complete and Perfect Cooking Stove

FOR BUTANEUMS, COAL OR COKE

ever invented, in the estimation of all who have yet seen it. Patented in 1869.

THE MONITOR.

which can be seen at 62 Camp-street. The advantages possessed by this Stove over all the other Cook Stoves are so numerous, and so patent to every sensible observer, that it is only necessary to examine it in order to be convinced of its superiority.

All of the above Stoves are fitted with extra care, Oven Doors lined with tin, and furnished with William Resor's Patent Air Chamber, sliding front doors, patent covers, covers and White Enamel Knobs.

The operation of every Stove guaranteed. Directions for putting up and using same accompany each Stove.

G. W. W. GOODWYN,

62 Camp street.

Sole Agent for States of La. and Texas.

THE TIMES.

THE IMPROVED

LARGE OVEN COOKING STOVE,

with extended Fire Chamber and Feed Top—one of the best baking and most economical Stoves made.

The Flues are constructed so as to insure the most perfect draft. The heat of the Oven is so equal that when baking there is no need for removing anything until done.

THE TIMES

Is made of a superior quality of iron, very heavy, of neat design and fine finish. The Top Plate is put together in sections, to permit of the greatest expansion without cracking.

We invite the attention of Housekeepers to the advantages of this Stove. Remember, we guarantee them to give entire satisfaction. Duplicate parts can be had at all times, at small cost, by which repairs can be made which will frequently save the price of a new Stove.

STOVES, GRATES AND HOUSE FURNISHING GOODS.

The undersigned would call the attention of city and country buyers of Cooking Stoves to the following list of Stoves manufactured by Mr. M. L. Filley:

The Philanthropist.

A first class Cooking stove, having all of the latest improvements that have so far been invented. Has a new arrangement for boiling; also an Ash-pan. The casting is heavy, the above named Stove is in the market. Sold under a full guarantee in every respect.

The Diamond Rock.

A Stove well known in this market. Thousands of this Stove are in constant use throughout the country, which is a very good recommendation. Sold under a full guarantee. Besides the above named Stoves, I have on hand the celebrated Cotton Plant, Charter Oak, True Kentucky, Maid of Orleans, Queen of the South, Delta and others, all of which I offer at a low price.

J. CAMPBELL,

no 13 6m 133 Poydras st., New Orleans.

BELLS, STEEL COMPOSITION.

For Churches, Schools, Etc.

OLYMER, NORTON & CO., Manufacturers,

Cincinnati, Ohio.

These celebrated Bells (not Cast Iron or "Aluminum") rival in purity and volume of tone those of copper and tin, are more durable, and cost only one-third as much. Send for descriptive circular. 8c 25 ly

COLUMBUS FEMALE INSTITUTE,

The Christian Advocate.

SATURDAY, MARCH 26, 1870.

The Reptiles at the Zoological Gardens.

Having been present lately on the occasion of these creatures receiving their usual allowance, we propose to give a short account, from careful observation, of the manner in which they seized and killed their prey.

If we disregard the scientific divisions of the order which comprises these animals, we may divide them into three classes: first, those which seize their prey with their teeth and crush it in their folds; second, those which seize and swallow it alive, after the manner of lizards; and third, those which bite, or rather strike it with poisonous fangs. Of the first, the finest examples are the pythons and boas, besides which there are the yellow snakes of the West Indies and others. Those of the second are fewer in number; they include the red snake of Bengal, viperine snake, English snake, etc. The present specimens of the third class include rattlesnakes, and Indian and Egyptian cobras, water vipers, etc.

These divisions are not strictly scientific, as some of the poisonous serpents have a structure closely resembling that of the boas, and are classed with them; but they will serve our present purpose better.

The constricting serpents, as we may term them, are kept in large cases, the entrance to which is either by a glass door in the front, which opens by a sliding up, or by a similar contrivance at the back, in the wooden partition. The cobra snakes are, in some of these cases generally, and indeed are so harmless that little precaution is needed. The venomous serpents have no opening but a small one in the lid of the case, about two or three inches square. Through this the food is introduced; and all necessary operations for the cleanliness and order are performed with a rod of stout wire, to the end of which the occupant, who, if new-comers, strike at it vigorously with their fangs. The first to be fed were the yellow snakes, and other species in the same case. The keeper, having unceremoniously removed the blanket, beneath which most of the occupants of the compartments were huddled together, as usual, quickly introduced under the glass door about a dozen sparrows, and one or two Guinea pigs. The former immediately retired to the darkest corners, seeking, however, to be quite unconcerned as to the presence of the snakes, as in some cases they stood on the bodies of the latter, which for the most part remained motionless. The Guinea pigs were more restless, moving about as if in search of food. They seemed to be preferred by the snakes to the sparrows; and presently one of the reptiles, waiting his opportunity, seized a Guinea pig by the neck, and, jerking it nearer, threw two or three folds round it, killing it in a few seconds.

The other snakes rapidly dispatched the sparrows in the same way, when seized; but they were apparently in no hurry, as there were a number of the birds in one corner for more than an hour, which had not been touched during that time. It may be well to remark that there is nothing revolting in the spectacle of a serpent taking its food. Its victim suffers neither the mental nor bodily torture ordinarily supposed. When seized it is killed without delay, especially if it struggles to escape; and before its seizure it is never conscious of danger. Not only is this well known to those in charge of the creatures, but we can verify it from actual and careful observation. A rabbit will approach a snake out of mere curiosity, and, after sniffing at its head, and even being touched by its tongue, will start to another part of the inclosure and resume its composure, returning again, in the course of its explorations, to the same snake without the least uneasiness, except what arises from the want of cabbage leaves, and the indigestibility of the gravel flooring. Guinea pigs show even less concern, and are not easily startled by any moving object.

The snakes which had seized the sparrows, etc., waited till their prey was quite dead before they moved and began slowly to prepare for swallowing it. The pythons, which occupy an adjoining case, and are the largest serpents in the collection, were next supplied with two or three ducks. The largest python instantly seized one, and threw one fold round it. He then remained perfectly motionless, appearing to be satisfied with having secured the bird, and did not at once kill it. The duck did not seem at first much concerned at such unusual treatment, but soon became restless, on which the python tightened the fold, and in about a minute had quite destroyed it. Having waited some minutes, as if to make sure that life was extinct, he slowly unwound his coil from the body, and

touched it with his muzzle, moving it about till he had found the head. The idea of lubrication with saliva, now quite exploded, evidently arose from this habit of feeling over the body with the mouth. Having taken the head into his mouth, he began to swallow the carcass, his jaws stretching to an immense extent to allow of its passage. When he found any difficulty he used the part of his body which lay nearest to it to push it gently, and considering the apparent difficulty, was not long in completing his meal. The supply of food is never stinted, and we believe that it is not uncommon for a python to devour six or eight ducks and rabbits on one day. Of course a full meal takes a long period to digest, as is the case in all reptiles.

The cobra snakes might with propriety be termed legless lizards, as, with the exception of the want of limbs, they are in most respects similar in structure to the saurians. A fine, lively specimen of the Bengal rat-snake was fed with half a dozen frogs, which he pursued with great speed round the inclosure, and driving them one by one into a corner, seized and swallowed them, in spite of their struggles.

We will now turn to the venomous serpents, and in particular the rattlesnakes. The keeper having put two young Guinea pigs into the case, one of the snakes instantly struck at that nearest to him. The action of a venomous serpent in wounding an animal cannot be strictly called a bite, as, though the fangs undoubtedly represent teeth, the jaws are not closed upon the object struck, which is simply punctured, the snake in most cases retiring immediately. The Guinea pig almost immediately showed signs of sickness, but its body did not appear to swell; it seemed to be thrown into violent convulsions, and in about a minute fell helplessly on its side, with no other sign of life than an occasional spasmodic motion of the jaws. A larger animal would not have been so soon killed; but as the snakes, being confined, have not often occasion to use their venom, it is probably more powerful than when they are in a wild state.

There are a large number of puff-adders in one case, and a Guinea pig being introduced, began sniffling about, as usual; but though he was touching one of the reptiles, it did not seem disposed to strike, when suddenly another puff-adder darted at full length from an opposite corner, and striking the creature, remained with its fangs apparently buried in its flesh, contrary to belief, to the usual habit of the reptile. His intention was, perhaps, to prevent any of the others from devouring it.

There are specimens of the two species of cobras, the Indian and Egyptian, perhaps the most interesting of all serpents; but, on account of their excitable nature, it has been found necessary to hide them partially from view by filling the lower half of the case front with ground glass, so that it is not easy to observe them.

The appearance of the cobra when about to give the fatal stroke is graceful, and yet terrible to see. The inflated hood, the waving motion of the head, and the peculiar expression of the eye, combine to impress the observer of its consciousness of the deadly power which it possesses, and with which it threatens any living creature that dares approach it. Venomous serpents can generally be distinguished by the broad head and stumpy tail which they possess; but this rule does not always hold good, some of them, for example, the cobras, having a structure closely resembling that of the calubrine, with the exception of the fangs and organs pertaining to them. There are in this house some young alligators, which are kept with the water tortoises. They seem to pass their time generally in sleep, but when feeding time comes, are extremely alert. On some mice being thrown into the water the alligators pursued them, swimming with the mouth raised out of the water. Having seized the unfortunate mice they held them under the surface till drowned, and then passing them into the gullet, bolted them whole. The tortoises are not fed with live animals, but with raw meat, which they tear in mouthfuls under the water. Considering the number of species which exist, the collection seems deficient in the *Chelonian*; but with regard to the *Sauria* and *Ophidia* it is probably unequalled.—*Naturalists' Note Book.*

MARRIAGE OF A BRAHMIN WIDOW.—An event occurred last summer at Bombay which demonstrates most clearly the giving way of superstition and the power of the Brahmins. A Brahmin widow was married and many young men of high caste pledged themselves to stand by the bridegroom even if thereby they lost caste. This blow at Hindooism passed unnoticed by the priests.

In Los Angeles county, California, one thousand horses were recently sold at \$5 per head.

To AGENTS.—A straight pencil mark in the above calendar indicates the date of a money letter received; a circle the amount of dollars received, and a half circle the amount of cents.

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S

COMMERCIAL COLLEGE,

61 CAMP STREET,

Corner Commercial Place, N. O.

Open day and evening the entire year.

Penmanship, Book-keeping, Mathematics and Languages, or practically taught by experienced professors. Persons from twelve to fifty years of age attend. The instruction is private to each student. Persons who have neglected their education can here speedily qualify themselves for good situations in business. Some from the country may obtain board in the family of the principal.

A liberal donation made when three or more enter together. The principal has been a practical teacher in New Orleans since 1851. For circulars, giving terms, etc., address

J. W. BLACKMAN,

New Orleans.

METHUEN FEMALE COLLEGE,

TUSCALOOSA, ALABAMA.

Under the Patronage of the Mobile Conference.

The regular scholastic year will begin on the first Monday in October next, and end the last of June. It is divided into two terms of four and a half months each.

EXPENSES.

Primary department, per term \$20 00

College department, per term 25 00

Latin and Modern Languages, each 10 00

Music on Piano and Guitar 25 00

Use of Instrument 5 00

Drawing and Painting \$20 to 25 00

Contingent fee 3 00

Board, including washing, lights and fuel, per month 22 00

Young ladies must furnish their own towels, sheets, pillow cases and table napkins.

Payments for each term in advance. Pupils entering within the first month will be charged from the beginning. Itinerant ministers charged no tuition in the Literary Course.

Strict attention given to the manners and morals of the young ladies, and to their habits of study.

Refer to Dr. Keener.

For information address the President, a 17 3m C. D. OLIVER, Principal.

TUSKEGEE FEMALE COLLEGE,

TUSKEGEE, "MACON" COUNTY, ALABAMA.

REV. GEO. W. F. PRICE, PRESIDENT.

1. Institution permanent and successful.

2. Full faculty of experienced teachers.

3. Music made a special feature.

4. Art taught thoroughly and cheaply.

5. Fine Scientific Apparatus in good order.

6. Boarding department excellently kept.

7. Pupils under control of President.

8. Attention to health, manners, morals.

9. Vocal music gratuitously to all.

10. Languages taught, ancient and modern.

11. Particular care given to Primaries.

12. Object Lesson System adopted.

13. Discipline thorough and efficient.

14. Literary culture unsurpassed.

Music Department.—Dr. S. M. Bartlett, principal.—Dr. Bartlett has been a successful teacher of vocal and instrumental music for nearly twenty years, much of the time in female colleges in Alabama. The institution has excellent instruments for instruction. Pupils practice under the professor's eye. Vocal music is a gratuitous daily exercise. Vocalization taught thoroughly.

Boarding Department.—Capt. J. H. Poole, steward; Mrs. E. B. Whitelaw, housekeeper. The gentleman in charge of this department is late of Maryland, Florida, and is of elevated character and social standing. The students reside in the college, and are in charge of the boarders. Young ladies must furnish one pair blankets, one pair sheets, towels, pillow cases, toilet soap and lights. Fees for each term in advance. Four weeks make a scholastic month.

Next year begins September 15, 1869. Two terms, each twelve weeks each.

CHARGES FOR YEAR OF FORTY WEEKS.

Primary department \$25 00

Academic department 40 00

College department 50 00

Music department 60 00

Art department \$20 to 40 00

Languages, each 20 00

Diploma fee 5 00

Board per month, without lights 20 00

No incidental charges of any kind. Fees for each term in advance. Total expense, without extras, about \$50.

REV. GEORGE W. F. PRICE,</

NEW ORLEANS MARKETS.

From the N. O. Price Current.

With the exception of an improved demand in most branches of the whole sale trade, from country merchants, or in orders from the interior, the general market has exhibited but little animation since our last issue. The receipts of sugar and molasses have been moderate, and met a rather limited demand at irregular rates. Further arrivals of Western produce have materially added to the supplies, which, especially in flour, now afford ample scope to buyers for export, but prices are still too high to admit the execution of pending orders for Great Britain. We notice, however, a further decline in freights from St. Louis, which a short time ago ruled at \$1.10 per barrel, but have since fallen to \$1, and within a few days to ninety cents.

Our accounts from the upper Red river are rather discouraging. A slight rise had come out of the Saline, but the river above, as well as the lakes and bayou, was still falling, and we can only repeat our previous remark that navigation is daily becoming more difficult, and freights are consequently advancing. The indications are that if our receipts of cotton are not curtailed by a partial exhaustion of the supply, they will soon be low water.

The river has fallen two inches since our last, and is now three feet six inches below high water mark.

Corn.—The following are the arrivals since the eighteenth instant:

Louisiana and Mississippi.....bales, 11242
Texas.....189
Total.....193

On Saturday, the heavy advance of Friday having compelled most buyers for export to withdraw, the business was confined to 1,700 bales, about 500 of which consisted of low cottons taken by one party, and the rest of trifling lots, by a number of buyers, to complete previous engagements, hardly presenting a fair basis for quotations. The general tendency, however, was toward lower rates, and a portion of the business was at a falling off of ¼c. On Monday prices ruled still more in favor of buyers, and although in many cases factors gave way ¼c. from Friday's figures, yet it failed to revive the demand, which continued slack through out the day, resulting in sales of only 2,350 bales, on the basis of 20½ to 21c. for good ordinary, 21½ to 22c. for low middling. On Tuesday the market opened with no material change, but finding that buyers would not go on unless at still lower prices, factors were compelled to make further concessions. The demand, nevertheless, continued slack throughout the day, and the business was confined to 3,250 bales, at prices showing a further decline of ¼c. to ½c., closing heavy at the subjoined quotations.

This makes an aggregate for the past three days of 7,300 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 955,749 bales, against 703,007 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 558,760 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 300,134 bales to Great Britain, of 71,941 to France, and of 89,862 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary.....17½ to 18½
Good ordinary.....19 to 20
Low middling.....21 to 21½
Middling.....22 to 22½
Strict middling.....23 to 23½

COTTON STATEMENT.

Stock on hand Sept. 1, 1869, bales.....770
Arrived past three days.....11648
Arrived previously.....943938-955598

Exported past three days.....21650
Exported previously.....729917-750807

Stock on hand and on shipboard.....205549

SOGAIN.—The market has continued dull since our last review.

MONEY.—Gold opened on Tuesday at 112½ to 112½ (against 112½ at New York), and closed at 112½ to 112½.

No sales of silver have been reported. American half dollars may be quoted at 110 to 111, and Mexican dollars nominal at 114½ to 114½ in currency, and 2½ per cent. premium in gold.

On Saturday 4,720 State coupons sold at 91½, 91½ and 92. The only sale of bonds reported is \$2,000,000 new State Levee eight per cents on Tuesday, September coupon, at 90, less interest from July to September, to equalize them with July coupon.

CATTLE MARKET.

NEW ORLEANS, March 22, 1870.
Texas cattle, choice, per head.....\$45 to 60
Texas cattle, second quality, per head 30 to 40
Texas cattle, third quality, per head 18 to 25

NEW ORLEANS, SATURDAY, APRIL 2, 1870.

NO. 11.

NEWS OF THE WEEK.

FOREIGN.

Mexico.—From the newspaper and official reports of the late battles in Mexico, between the government forces and the revolutionists, the latter appear to have suffered crushing defeats all round. The heaviest and most important engagement was that fought at La Obeja, between the revolutionary army, commanded by Cadena, and the government forces, under Rochna, on the twenty-first ultimo, resulting in a decisive victory for the supreme government. An eye-witness writes: "The battle commenced at half-past twelve o'clock and lasted until six P. M. The battle was horrible; truly horrible. There was great loss of life on both sides. A heavy piece of artillery called 'Tempest' made sad havoc among Rochna's cavalry, but by the heroic efforts of the soldiers of the Tenth Regiment of Jalisco it was taken.

At the commencement of the battle a terrific fire of musketry and artillery was opened on both sides. A terrible and incessant fire was kept up until five o'clock P. M.

The bayonet played its part in the battle in a fearful manner.

The blood ran in torrents. An immense cloud of dust and an immense cloud of smoke involved the brave and determined combatants, who gave proofs of daring valor and boldness.

The cavalry flanked the rebel troops in a terrible manner.

The sun was setting. The firing of cannon and musketry ceased. The clouds of dust and smoke began to vanish; vanquished and vanquishers saw themselves confronted in the same field. The picture was frightful. One thousand prisoners fell in possession of the government. The triumph was complete, but it cost a great deal of blood.

Another correspondent, writing the day after the battle, says: He (Rochna) lost some troops among killed and wounded, but he destroyed the enemy completely, having captured all his artillery, trains and ammunition, and taking over one thousand prisoners, among whom is a body of infantry, commanded by Mr. Guerra, who put themselves in attitude of surrender, and when Generals Rochna and Cortina attempted to harangue them, they fired a furious volley upon them, so close as to burn their clothes.

These two gentlemen were in great danger, from which they were saved by an infantry corps (the Tenth of Guadalajara), who rushed upon the deceiving foe and forced them to surrender.

Of the faithful troops we have few but sensible losses; and on the opposite side Colonel Davilla and a great many officers and a multitude of soldiers were killed.

ROME.—We copy from a letter to the New Orleans Times, dated Rome, February 23, 1870:

The schema had been distributed to the fathers to study on the twenty-fifth of January. The question was, how had these canons been disclosed, for the command of pontifical secrecy is printed on the first leaf of every schema; and although there is no oath taken, still the obligation of secrecy is admitted by all. One report is that they were copied by some one from the pamphlet which a bishop left on his library table. Others are so bold as to accuse the Archbishop of Munich or the Bishop of Augsburg of sending them to the Gazette. The papal government settled its suspicions on two persons, and punishment was administered pretty promptly. One who was suspected is a Dr. Alfred Dresel, who has been the Roman correspondent of the Augsburg Gazette for many years. This gentleman was ordered to go out of Rome instantly. He is old, blind and asthmatic, and to leave Rome would be fatal. The Prussian minister interceded in his favor. The Augsburg Gazette telegraphed to Rome that the poor old doctor was innocent, so he is allowed to stay. The other one is a Dr. Frederiek, theologian of Cardinal Hoheloe. This cardinal is brother of the Liberal minister of that fanatical per la musica, King Louis of Bavaria, the minister who has just resigned his office, having been defeated by the Ultramontane or Papal party in Bavaria. The Pope advised Cardinal Hoheloe to send his theologian out of Rome, and several other bishops have been warned. The Augsburg Gazette is not allowed to enter Rome publicly. It comes, however, through the embassy. The correspondents of La Liberte, a French journal, New Free

Press, Austrian, Cologno Gazette, and London Times are regarded as public enemies by the Roman government; and it is said that in spite of certain protections they enjoy, they will be expelled from Rome if they continue to write such offensive letters as they have already sent.

What could be the reason for any Catholic clergyman to divulge so important a secret, is a question constantly asked. The supposed reason is, that the opponents to the Ultramontane or infallibility church party in the council, though influential men—really some of the cleverest and ablest of the fathers—are in the minority as to numbers. By disclosing the contents of this bold Schema de Ecclesia in advance of discussion, the courts of Europe would have their attention drawn to it, and be forced to notice it. Thus, the opposition made by the Liberal party in the council would be rendered stronger by this outside help. If this was the reason, the end has been gained, so far as government protests are concerned. Immediately after the publishing of these canons in the Augsburg Gazette, Count de Bismarck, the Austrian minister, telegraphed to the Court of Rome that if such subjects were really to be discussed in council, the Court of Vienna would have to take notice of it officially. The Emperor of France has written to the Pope that his government has become a constitutional one, and therefore the council must not provoke it, for he, the emperor, will not have the power to protect Rome against any adverse action in the French chambers. Count Darn has communicated the same to the French ambassador and to Cardinal Antonelli. Count Darn has also written to an intimate friend staying in Rome, Count Werner de Merode, a kinsman of Mgr. de Merode, a letter, in which he has been able, from its unofficial nature, to make the warning much stronger.

The letter opens with an expression of devotion to the church and Holy See, which the count says is above suspicion. He wishes the papal court, however, to avoid imprudent acts which may render his task too difficult. The French government, he says, is a Liberal one, and the ministry is obliged to pay serious attention to public opinion. There are certain things the council may do which will be of a nature to offend the present French chambers, and in case of new elections, the ensuing chambers would be still more opposed to such acts. "Who knows," writes the count, "if a parliamentary vote may not force us to withdraw the troops from Civita Vecchia? Rome must therefore be prudent; must avoid everything that can wound public opinion or make discontented a large body of French Catholics and bishops. For example, if the decision of the council should gravely affect the relations between the bishops and the Pope, place the bishops in too close a dependence on the Court of Rome, violate the Concordat, our relations with the Holy See will be compromised."

Count Darn then counsels an adjournment of the council, and says that in the present state of things at Rome there is too much warmth, too much agitation. If the council should adjourn, the fathers would have a chance to grow calm, and adopt resolutions more in conformity with the true interests of the church and Holy See.

This proposition to adjourn meets with the most lively opposition from the Pope and the majority of the fathers. They wish to terminate the labors by the middle of 1870, so that the bishops can return to their dioceses. The Archbishop of Paris has written to his curia, in reply to the question how long the council will last: "I will tell you when the council will finish, if you can tell me when it will begin."

FAILURE OF THE ROMAN CATHOLIC SCHOOL MOVEMENT IN MISSOURI.—A few days ago the Roman Catholics and their political sympathizers in Missouri arranged a covert plan to break up the public school system in St. Louis, and eventually in the State. The plan was to put through the Legislature a bill appropriating to the Catholic schools, from the school fund, \$10 per head for all the children enrolled in those schools. This sum would give their schools about \$120,000 the present year, and a proportionate advance with their population hereafter. The bill was engineered with true Jesuitical shrewdness, but failed, a motion to indefinitely postpone being carried by a vote of 60 to 23.

DELEGATES ELECT TO THE GENERAL CONFERENCE.

We have called upon the secretaries of all the Annual Conferences to forward us the names in full of all the delegates and reserve delegates elect, clerical and lay, to the General Conference, which is to meet in Memphis, Tennessee, May 4, 1870. We have failed to receive responses to our call from many of the secretaries; but we have endeavored to complete the list by referring to files of the Advocate. It is quite likely some of the names are not given correctly; and the proper names in many instances are not reported in full. We cannot find the lists for the Indian Mission and Columbia Conferences. When we receive them, and any corrections which may be made on competent authority, we will republish our list. If we allow two clerical and two lay delegates, each to the Indian Mission and the Columbia Conferences, and if all the Conferences are fully represented, it will be seen that the General Conference will consist of one hundred and twenty-three clerical and one hundred and twenty-three lay delegates, making a total of two hundred and forty-six:

BALTIMORE.

Clerical: John S. Martin, Samuel Regester, Samuel S. Russell, A. W. Wilson, J. H. Waugh, William S. Baird, Dubney Ball. Lay: Joseph Hendrickson, E. W. Massey, T. J. Magruder, P. Conway, S. Bradley, A. L. Pitzer, T. E. Bond.

RESERVES.—Clerical: William V. Tudor, E. F. Bussey, Samuel Rodgers, James S. Gardner. Lay: J. H. Figgot, S. H. Williams, T. Berry, T. J. McCoy, J. F. Petherbridge, J. S. Carson, L. W. S. Hough.

VIRGINIA.

Clerical: Leroy M. Lee, Jas. A. Duncan, John C. Grambery, Wm. W. Bennett, Paul Whitehead, John E. Edwards, Peter A. Peterson. Lay: D'Arcy Paul, Thomas Whitehead, John R. Kilby, William M. Gill, Joseph C. Deming, Asa Snyder, Thomas W. Garrett.

RESERVES.—Clerical: Alexander G. Brown, George W. Langhorne, William B. Rowzie, Leonidas Rossier, Jefferson W. Stubbs, Jesse J. Yates. Lay: John C. Blackwell, Levi D. Travers, William D. Quesenberry, Stith M. Shepherd, Francis T. West.

WESTERN VIRGINIA.

Clerical: Stephen K. Vanght, Samuel T. Mallory. Lay: William C. Ireland, J. L. Carr.

RESERVES.—Clerical: Samuel H. Mullen. Lay: J. H. McCullough.

NORTH CAROLINA.

Clerical: N. F. Reid, B. Craven, R. S. Moran, W. H. Bobbitt, Wm. Barringer. Lay: T. M. Jones, William M. Robbins, S. D. Wallace, John W. Leah, J. C. Pinnix.

RESERVES.—Clerical: Charles F. Deans, L. S. Burkhead, William Closs. Lay: J. C. Sloenn, W. A. Darden, Jr., J. H. Selby.

SOUTH CAROLINA.

Clerical: Albert M. Shipp, Hugh A. C. Walker, Whiteford Smith, William P. Mounson, William H. Fleming, F. Milton Kennedy. Lay: William J. Montgomery, George W. Williams, A. A. Gilbert, H. T. Wright, James K. Carlisle, Simpson Bobo.

RESERVES.—Clerical: S. H. Browne, Abel M. Christberg, John W. Kelly. Lay: John S. Moore, Benjamin Stokes, E. T. Renbert, R. F. Simpson, Thomas S. Moorman, Donald R. Barton.

SOUTH GEORGIA.

Clerical: Lovick Pierce, Samuel Anthony, James E. Evans, Edward H. Myers, Joseph S. Key. Lay: James Jackson, Alfred H. Colquitt, William L. Green, John J. Jones, Robert H. Lovett.

RESERVES.—Clerical: James W. Hinton, John B. McGhee, Osborne L. Smith. Lay: Michael Woodruff, Henry S. Winberly, Timothy M. Farlow.

NORTH GEORGIA.

Clerical: Jesse Boring, William J. Parks, Weyman H. Potter, Wm. P. Harrison, Atticus G. Haygood, Alfred T. Mann. Lay: George N. Lester, Ignatius P. Garvin, James E. Godfrey, Thomas N. Meriwether, Henry R. Harris, Louis D. Palmer.

RESERVES.—Clerical: Walter R. Branham, Hubersham G. Adams, G. Jefferson Pearce. Lay: Wm. A. Turner, Charles H. Johnson, Luther N. Smith, William S. Thompson, John J. Floyd, Frank L. Little.

FLORIDA.

Clerical: Josephus Anderson, E. L. T. Blake. Lay: George W. Taylor, C. P. Crawford.

RESERVES.—Clerical: W. Moore, Sam. Woodberry. Lay: A. J. Perkins, S. L. Kniblauch.

MONTGOMERY.

Clerical: O. R. Blue, Mark S. Andrews, John Matthews, W. A. McCarty, William Shapard, J. B. Cottrell. Lay: William H. Chambers, William Garrett, J. E. Grace, R. H. Powell, J. P. Ralls, William Lowther.

RESERVES.—Clerical: S. K. Cox, W. M. Motley, William H. Ellison. Lay: J. R. Rogers, C. M. Howard, Dawson.

MOBILE.

Clerical: Jeff. Hamilton, Thomas O. Summers, Allen S. Andrews, Alex. H. Mitchell. Lay: William M. Byrd, William L. Lipscomb, A. W. Lampkin, J. R. John.

RESERVES.—Clerical: J. T. Heard, Thomas C. Wier, Simon P. Richardson. Lay: W. Bailey, S. A. Brown.

LOUISIANA.

Clerical: John C. Keenor, Nehemiah A. Cravens, Joseph D. Adams. Lay: William F. Moreland, William H. Foster, J. M. Ford.

RESERVES.—Clerical: Linus Parker, Samuel Armstrong. Lay: J. Harvey Brigham, John L. Seales, Henry G. Hall.

MISSISSIPPI.

Clerical: Henderson H. Montgomery, William H. Watkins, Charles K. Marshall, William P. Barton, Richard Abbey. Lay: Thomas Reed, O. J. Moore, M. L. Maguire, Stephen Johnson, James E. Watts.

RESERVES.—Clerical: Harvey F. Johnson, C. Green Andrews, John G. Jones. Lay: Edwin G. Cook, Robert D. Howe, William L. Nugent, Leonard K. Barber, J. C. Kittrell.

MEMPHIS.

Clerical: Thomas L. Boswell, Geo. W. D. Harris, Guilford Jones, Smith W. Moore, A. B. Fly, Joseph H. Brooks, Findley Bynum, William C. Johnson. Lay: Milton Brown, Landon C. Garland, A. R. Boone, A. T. Seruggs, R. J. Morgan, W. H. Kilpatrick, W. D. Senter, David Whitaker.

RESERVES.—Clerical: A. C. Allen, John Moss, J. H. Witt. Lay: M. Mask, E. P. Randle, R. C. Clark.

TENNESSEE.

Clerical: John B. McFerrin, A. L. P. Green, John W. Hanner, R. A. Young, Simon P. Whitten, R. P. Runson, Fountain E. Pitts, Adam S. Riggs. Lay: John F. House, William B. Wood, Thomas M. N. Jones, William F. Holder, Joseph B. Palmer, George G. Dibrell, Watson M. Cooke, J. W. Harris.

RESERVES.—Clerical: Thomas Maddin, Joseph B. West, John F. Hughes. Lay: A. S. Colyar, M. C. Baldrige, W. L. J. Wilkes, J. J. Dement, T. B. Miles.

HOLSTON.

Clerical: Carrol Long, David Sullins, Ephraim E. Wiley, J. M. McTeer, William G. E. Cummyngham. Lay: Vance, T. P. Thomas, F. W. Earnest, David Clegg, W. B. Aston.

RESERVES.—Clerical: R. N. Price, William Hicks. Lay: G. A. Long, H. S. Bowen.

KENTUCKY.

Clerical: Charles W. Miller, C. Taylor, Seneca X. Hall, Hiram P. Walker. Lay: J. A. Dawson, W. M. Leathers, Joshua Barnes, David Thornton.

RESERVES.—Clerical: George W. Merritt, Robert Hiner, Drummond Welburn, H. A. M. Henderson. Lay: J. M. Tipton, T. J. Overstreet, J. R. Beckley, J. Cochran.

LOUISVILLE.

Clerical: Albert H. Redford, N. H. Lee, Edmund W. Sehon, David Morton. Lay: J. S. Lithgow, W. B. Machen, John C. Walker, Benjamin F. Biggs.

RESERVES.—Clerical: William H. Henderson, T. C. Frogge. Lay: W. P. Fowler, S. T. Scott, C. F. Harvey, J. J. Barnett.

ST. LOUIS.

Clerical: David R. McAnally, W. M. Prottman, Thomas M. Finney, M. H. Pugh, W. M. Pitts. Lay: Truett Polk, R. A. Hatcher, B. L. Riggins, J. M. Johnson, A. C. Mitchell.

RESERVES.—Clerical: J. A. Murphy, J. W. Lewis. Lay: M. M. Robinson, D. N. Burgoyne.

MISSOURI.

Clerical: William M. Rush, C. I. Vandeventer, William M. Leftwich, B. H. Spencer, Andrew Monroe. Lay: T. E. Thompson, J. O. Swinney, D. K. Pittman, Charles D. Epperson, James H. Burch.

RESERVES.—Clerical: J. H. Pritchett, J. D. Vineil. Lay: Allen Voories, James L. Davis.

ARKANSAS.

Clerical: John M. Steel, George A. Dannelly, James McKay. Lay: James Wickersham, Charles F. Harvey, Littlebury L. Mack.

RESERVES.—Clerical: J. J. Roberts,

Mortimer B. Pierson, William M. Mathis. Lay: G. W. Featherston, B. B. Keyte, Jerome Haroldson.

LITTLE ROCK.

Clerical: Andrew Hunter, Horace Jewell, Augustus R. Winfield. Lay: W. T. Cronch, J. L. De Yampert, William W. Leake.

RESERVES.—Clerical: Robert S. Hunter, Marshall H. Wells. Lay: S. N. Marshall, Samuel E. Cole.

INDIAN MISSION.

No returns.

TEXAS.

Clerical: R. Alexander, Isaac G. John, J. W. Whipple. Lay: J. D. Giddings, J. S. Tahaferro, W. W. Browning.

RESERVES.—Clerical: B. T. Kavanaugh, H. V. Philpott. Lay: W. G. Webb, L. W. Moore.

EAST TEXAS.

Clerical: L. P. Lively, Jeff. Shook. Lay: J. F. Taylor, M. H. Bonner.

RESERVES.—Clerical: N. W. Burks. Lay: L. P. Green.

TRINITY.

Clerical: R. Lane, J. M. Binkley. Lay: Asa Holt, W. J. Clark.

RESERVES.—Clerical: J. W. P. McKenzie, J. T. P. Irvine. Lay: J. R. Cole, W. H. Christian.

NORTHWEST TEXAS.

Clerical: Thomas Stanford, L. B. Whipple. Lay: J. R. Henry, R. Q. Mills.

RESERVES.—Clerical: J. S. McCarver, J. M. Jones. Lay: N. T. Sneed, P. A. Philpott.

WEST TEXAS.

Clerical: R. H. Belvin, O. A. Fisher. Lay: W. Headen, D. A. T. Woods.

RESERVES.—Clerical: A. T. Thornberry. Lay: H. E. McCulloch.

COLUMBIA.

No returns.

PACIFIC.

Clerical: Oreneth Fisher, Thos. C. Barton, E. K. Miller. Lay: W. T. Racker, W. E. Cooke, William R. Baue.

RESERVES.—Clerical: George S. Lay. Lay: John Swinford.

ILLINOIS.

Clerical: Middleton R. Jones, Ramsey Smithson. Lay: John Allison, William J. Ballard.

RESERVES.—Clerical: John W. Westcott, Daniel T. Sherman. Lay: James M. Charlton, J. M. A. Drake.

MASON & HAMLIN ORGANS.

The Mason & Hamlin Organ Company have just issued what they term a Testimony Circular, which is certainly remarkable as presenting such an amount of testimony to the excellence of their instruments. It contains six large newspaper pages, closely printed, and thus includes as much matter as an ordinary duodecimo volume. Nearly one thousand persons, most of them experts in the matter, testify to the rare excellence of the cabinet organs made by this company. The character of the testimony is indeed quite as remarkable as its quantity. Nearly all the most prominent musicians in the country are quoted; the principal organists, pianists and teachers of chief American cities are among those who say that these are the best among instruments of the class. A number of well known European artists testify to the same effect. Extracts are given from Paris and London papers which admit that these organs are superior to those of European make. American newspapers are equally emphatic. But what is, perhaps, even more satisfactory is the testimony of hundreds, who have these organs in use, as to their working qualities. After looking over such a mass of testimony one cannot well doubt that the reputation of this company is richly deserved. By sending his address to the Mason & Hamlin Organ Company, 154 Tremont street, or 596 Broadway, New York, any one can have a copy of this circular sent him gratuitously, postage paid.—New York Evangelist.

In England it has been decided that coal will never be cheaper, but the supply will hardly affect values during this generation. Deeper working will ultimately render coal more expensive there. The coal fields of this country occupy about two hundred thousand square miles. These contain, it is estimated, three trillion five hundred million tons of coal.

When Providence has good will toward a man, it appears to him the likeness of a faithful friend.

Six has a great many tools, but a lie is the handle which fits them all.

To the Members of the Montgomery Conference.

DEAR BRETHREN: At the last session of our Annual Conference you obligated yourselves to preach, in the month of April, a sermon at each church in your work on the subject of education, and to endeavor to collect an average of fifty cents per member for liquidating the remaining debt of the East Alabama Male College. This debt has been so reduced that a moderate effort by all the preachers will complete the release of this institution from all embarrassments, and set it afloat on its mission of good to the church, and to the country. It would certainly be a disappointment, and might be a calamity, if any preacher should ignore the resolution above referred to.

We beg you, do what you can! The amounts you may obtain, please remit per express or in post office money order, or in registered letter, to the agent,

T. J. RUTLEDGE,
Montgomery, Ala.

MARCH 26, 1870.

THE GREAT FRENCH TRIAL.

It will be seen that the trial of Prince Pierre Napoleon, before a high court specially convened at Tours, for the murder of Victor Noir, resulted, in acquittal by the jury, after an absence of only one hour. This verdict is reported to have created intense excitement at Paris, and as Noir belonged to a set of demagogues who possess great influence over what the French publicists justly call "dangerous classes," made up of idlers, dissipated work people, and men who like disturbances for the chance which they offer for plunder, it is not "improbable" that serious disorders may follow, which will require the use of military force for their suppression, and a wise policy on the part of the imperial government in treating an excited public sentiment. It is fortunate that the authorities have ample means to put down any disturbance; got up merely by the classes above alluded to, for it would be frightful if they should enjoy even a day's power in Paris, as their acts would revive the horrors and atrocities of the worst days of the first and the second French revolutions.

The trial by jury in French courts is somewhat different from that among us, the jury being selected by lot from lists previously prepared, and it is needless to add that they are generally composed of a far better class of individuals than those who are intrusted with such functions in most States in this country, having more intelligence and a higher sense of public responsibility. The details of the trial, so far as they have come to hand by telegraph, show that there was no lack of energy and zeal on the part of the Procureur General in conducting the prosecution, and that in his speeches he was no respecter of titles or high political position, for he was so severe in his denunciations, on more than one occasion, as to bring the prisoner to his feet in emphatic remonstrances against his language. The court continued its session on Sunday, in another thing differing from American usage.

The prisoner, instead of being discharged immediately after the verdict, was held under a claim for one hundred thousand francs damages, in a civil suit brought by Noir's family; that is another difference from the way things are done in this country, which, under all the circumstances attending trials for homicides, in all quarters of this land, commands itself to the thoughtful consideration of law-makers, with the view of securing such an action to the families of those who have been killed, or maimed under such circumstances, as to subject the offender to indictment and trial by jury; the finding of the jury to be no bar to the action, but admissible, though not conclusive evidence, on the hearing of the cause.

The verdict of acquittal will cause no little excitement among all classes in France and throughout Europe. It would not seem to be clearly justified by the evidence already published, but the respectable character of the jurors may weigh a great deal in their favor. Right or wrong, it would, by no means, justify an attempt to overthrow the government of Louis Napoleon.—New Orleans Picayune.

The Christian Advocate.

SATURDAY, APRIL 2, 1870.

THE LOGIC OF GIVING.

We take from the Richmond Christian Advocate the wise words that follow, on a subject that has received no little attention in these columns. We are happy to get aid from so able a pen as has produced this article.

The Rev. Dr. Brooks, pastor of a Presbyterian church in St. Louis, gives in the Missouri Presbyterian a brief, but very interesting account of important changes made in the character and management of the church, and of the practical working of a new system of measures for meeting its current expenses. It was a pewed church, the pews sold or rented, as is usual in such churches, and then assessed at so much per annum. It is now free, to this extent; the owner or renter retaining the right of occupancy, but left to his own moral sense as to what he pays, or whether he will pay anything to support the church. Persons wishing to become regular members of the congregation have seats assigned them, on the same principle of voluntarily paying, or not paying for the privilege. "Order and regularity are thus secured on the one hand, and all the advantages of free pews on the other." "The change from the old to the new plan was produced without a jar."

The refreshing feature of the case, that which spreads a glory over the whole, is to be found in the substantial and scriptural relations in which grace and giving, giving and regeneration, giving and worship, giving as an act of worship, giving as worship, giving as a grace and proof of the new birth, are joined together in complete and indissoluble spiritual unity and identity. There is an unobscured simplicity and saintliness in the plan and its workings, that, in reading it, one almost feels as if he were sitting on a quiet Sabbath morning among the elders and brethren in Corinth, listening to the reading of Paul's letters to the church, "by Titus and Lucas."

It may blanch the face of "the inner man of the heart" in some selfish spirits, or he as vitriol in the consciences of some lovers of money or pleaders of inability, but it will be as "the holy anointing oil," diffusing a "sweet-smelling savor" over the blessed memories of the ready and cheerful givers, giving as God hath prospered them, or it may be "as water spilled on the ground," to the many who "munch receive, but nothing give;" still, if only for the sake of reading, or for the pleasure of curiously inspecting the deeds and motives of a body of earnest Christians, who neither blush to believe the word of God, nor hesitate to obey it, read it, and then—what?

Here it is—not a new way to pay old debts, but an old way to meet new and positive obligations, obligations ever multiplying, always abiding, that selfishness may postpone, but conscience does not forget, and justice will not remit. Dr. Brooks says of the church money question:

"Our people are first instructed that giving is a grace communicated to every soul that is really born again by the Holy Ghost, who never leaves the believer for a moment. They are led to regard it as an act of worship acceptable through Jesus Christ to our heavenly Father, for if it is not an act of worship it surely has no place in the sanctuary on the Lord's day."

"The amount they contribute is left wholly to themselves, and no man knows what it is. It is enough that God knows it, and they must answer to him for the manner in which they discharge the duty. They are told that one-tenth is the lowest proportion of our means mentioned anywhere in the Bible as a suitable offering, and although they are cautioned to keep away from the law of which Christ made an end on Calvary, both as a rule of justification and a rule of life, they are urged to let the dictates of grace lead them to more generous sacrifices than the demands of law."

"If, for example, a man spends upon himself \$1,000 a year, or in round numbers \$20 a week, he is asked, in view of all Christ has done for him in the past, and in view of what he will do for him at his second coming, whether he ought not to make the effort at least to live on \$18 a week and thus have \$2 left to give to the loving Jesus every Lord's day? If he says yes, we are glad; if he says no, we leave him with One who shall judge every man according to his works."

"Just at the close of the second hymn, in the morning's service, we continue the worship of God, Father, Son and Holy Ghost, by sending the deacons through the congregation to gather up the offerings of the people. The amount thus collected is placed in the hands of the session, who first take out of it a sufficient sum to meet the necessary

expenses of our own church, and the balance they appropriate to the advancement of Christ's cause elsewhere, as in their judgment it can be most wisely expended, and is most urgently needed."

"How forcible are right words!" In these brief utterances we are brought into contact with a living illustration of the simplicity and efficiency of God's plan of supporting his cause in the world through the agency of the love and voluntary liberality of his own people. The capital stock of the kingdom of God on the earth is the principle that giving is a grace, or the grace of giving. Fidelity to this law of spiritual life and love will meet all the demands, maintain all the interests, promote all the objects of the church of the living God. A thoughtful Christian will see, feel, confess its conformity with true godliness, in all its relations, quantities and obligations; its Bible-ness—accept the word for its comprehensibility and fullness—is complete, positive and permeating; he may pause or hesitate only, and then but for a moment, over the avowed, and—through the unbelief of the church in these covetous times—seemingly, the strange doctrine that giving is a grace communicated to every soul that is really born again by the Holy Ghost, and that giving is an act of worship. Selfishness is natural to man; it is inhuman and anti-spiritual; it does not love to give, gives little, and gives grudgingly. The church is full of such givers; and, instead of the grace of giving, we often see "giving with a very bad grace." These will not accept the doctrine that "giving is a grace" born in the soul when the soul is born of the Holy Ghost. Selfishness must confess "judgment unto condemnation" if it admit that giving is a born grace—born within the soul by the Holy Ghost, as blood is born in the body and life is born in the blood.

Regeneration is the enemy of selfishness, and the redemption from "covetousness, which is idolatry." Whosoever is born of the Spirit is born of love, born in love, born for love, born into love and good works. The true life is a loving life, and a giving life as well. Not to love, not to do good, not to do good in giving, not to worship God with gifts, is the paralysis of spiritual life. The old law was brutal of offerings, divinely prescribed and rigidly exacted. The new law—a law of life and love—equally demands gifts, accepts them, in quality, amount and object, as free will offerings, the evidence and expression of love and newness of life. The first offering ever presented to Christ, in the first act of worship, was gold. It symbolized all true religious adoration. It was a part of worship—an act of worship—worship itself, in its essential idea, and in its living and loving spirit. Many are very ready to say prayers and offer praise, to lay soul and body on the altar, but the substance, property, the gold in the pocket, that is reserved! Take the "frankincense and myrrh," but leave the money, for real or imaginary personal need. "Corinthus, thy prayers and thine alms have come up as a memorial before God." If any Christian who may read this article entertains the opinion that an angel from heaven, entering his closet, would greet him with such words of compliment and assurance, we congratulate him, and would be happy to make his acquaintance. Such specimens of love and liberality are rare, if they are found at all in the church of these times. We do not express this opinion in a spirit of fault finding, nor with any wish to show our zeal for the law. We have been unfortunate in the possession and use of our own senses, if we have not heard enough of "the cursed love of money" in the church; and of its pernicious effects on personal character and Christian interests, to sadden the heart, and fill the month with fiery words of reproof and warning. Covetousness, the crime of crimes, the cream of the conglomeration of sin, like Naaman in "the house of Rimmon," bends and bows to Mammon in the house of God.

There are facts and suggestions in the record that induces these reflections worthy of the grave consideration of pastors and people in all our churches. The doctrine and argument for the consecration and gift of a tenth, "as the lowest proportion" of our means mentioned anywhere in the Bible as a suitable offering—the argument drawn from "the grace of our Lord Jesus Christ, who, though he was rich, yet for our sakes became poor, that we through his poverty might be made rich," superadded and multiplied by all we hope he will do for us at his second coming—these appeal to our hopes with a persuasive force and eloquence that love will find it impossible to resist. But the contrast between the joy of success from these rules of giving, and the porturbation and depression of regular spasmodic baring of an unwilling and resisting congregation, is the consummating excellence and glory of the doctrine that giving is a

grace, and worship a giving. Happy will it be for all our churches when under the laws of Christ, for such cases made and provided, the ordinary and usual contributions of the Lord's day shall be found adequate to meet current expenses, and to send the gospel into the regions beyond. There is scarcely a congregation, even in our impoverished Southern land, that might not rid itself of anxiety on the subject of its expenditures, if, with sincere heart and united effort, it gathered its income, little by little, it may be, but yet certain and sufficient, if each would "of even a little would give a little," and give with spiritual willingness and systematic regularity. If every one had the grace of giving, and would give as God had prospered him, there would be no lack; then stewards would be less worried, and the pastors less depressed, churches would be unembarrassed and jubilant, and even the avaricious and covetous would take heart and praise the congregation that ceased to extort money by begging.

HOW CORAL ISLANDS GROW.

The story of the little builders who lay the foundation of great islands under the waters of the ocean has often been told. But how do the islands grow after their walls rise to the water's surface? Good Words for the Young tells how this is done, and about one of the curious helpers:

Of course the coral polypies cannot build above the high tide mark; but the surf which beats upon them piles up their broken fragments just as a sea beach is piled up, and accumulates them together with that water hammer which is heavier and stronger than any you have ever seen in a smith's forge. And then, as is the fashion of lime, the whole mass sets and becomes hard, as you may see mortar set; and so you have a low island a few feet above the sea. The sea birds come to it, and rest and build; and seeds are floated thither from far lands; and among them almost always the cocoanut, which loves to grow by the sea shore, and groves of cocoanut palms grow up from the lonely isle. Then, perhaps, trees or bushes are drifted thither before the trade wind; and entangled in their roots are the seeds of other plants, and eggs or cocoons of insects; and so a few flowers and a few butterflies and beetles set up for themselves upon the new land. And then a bird or two, caught in a storm and blown away to sea, finds shelter in the cocoanut grove; and so a little new world is set up, in which you must remember always, there are no four-footed beasts, nor snakes, nor lizards, frogs, nor any animals that cannot cross the sea. And on some of these islands they may live (indeed there is reason to believe they have lived) so long that some of them have changed their forms, according to the laws of Madame How, who sooner or later fits each thing exactly for the place in which it is meant to live, till upon some of them you may find such strange and unique forms as the famous cocoanut tree, which learned men call *hurgus luro*. A great crab he is, and walks upon the tips of his toes a foot high above the ground. And because he has often nothing to eat but cocoanuts he has learned to eat, and after a fashion which it would puzzle you to imitate. The sailors used to say that he climbed up the stems of the cocoanut trees, and pulled the fruit down for himself; but that, it seems, is not quite true. What he really does is this: when he finds a fallen cocoanut, he begins tearing away the thick husk and fiber with his strong claws; and he knows perfectly well which end to tear it from, namely, from the end where the three eye-holes are, which you call the monkey's face, out of one of which you know the young cocoanut tree would burst forth. And when he has got to the eye-holes he hammers through one of them with the point of his heavy claw. So far so good; but how is our friend to get the meat out? He cannot put his claw in. He has no proboscis like a butterfly to insert and suck with. He is as far off from his dinner as the fox was when the stork offered him a feast in the long-necked jar. What, then, do you think he does? He turns himself round, he puts in a pair of his hind pinces, which are very thin, and with them scoops the meat of the cocoanut, and so puts his dinner into his mouth with his hind feet. And even the cocoanut husk he does not waste; for he lives in deep hollows which he makes like a rabbit, and being a luxurious crab, and liking to sleep soft in spite of his hard shell, he lines them with a quantity of cocoanut fiber, picked out clean and fine, just as if he was going to make cocoanut writhing of it. And being also a clean crab, as I hope you are a clean little boy, he goes down to the sea every night to have his bath, and moisten his gills, and so lives happy all his days, and gets so fat in his old age that he carries about his body nearly a quart of pure oil.

Scientific.

Framing Buildings by the Scribe or Square Rule.

Only a few decades of years ago every framed building was put together according to the "scribe rule." If the framed timber of many of the old barns and dwelling houses is examined it will be seen that, wherever two sticks of timber of any size were united by tenon and mortise, there are corresponding marks cut with a chisel near the joints on the face side of the timber to indicate that those two sticks were to come together in the frame. When a building was framed according to the "scribe rule" every tenon—even the tenon of a brace—was put into the mortise for which it had been prepared; and posts, beams, braces and girts were all put together for the purpose of ascertaining whether every part would fit in a neat and workmanlike manner. The pin-holes were previously bored in the beams and posts, so that the exact place might be indicated with a pencil on the tenon, by marking on the side of the tenon around the edge of each hole. Then more or less allowance could be made for "drawing" the tenons. When rafters were to be framed the lower ends of a single pair were fitted to their respective plates, while the other ends were crossed, and the joint marked on the side of one rafter by means of a plumb line. Then, after the end was sawed off, the other rafter was marked by the first, as the upper ends were placed together. By this means neat joints were made, sufficiently accurate for a pattern for the remaining rafters.

Whenever timbers were to be framed together at any other than right angles, as in framing trusses, for example, the top chord and the bottom chord were spread out on their sides, in the desired position, so that the joints for the shoulders could be marked off with satisfactory accuracy. Then, after every part was framed, the timbers were put together to ascertain whether the joints would fit as they should. (See the word *truss* in Webster's Unabridged Dictionary.) These remarks will convey briefly a fair idea of the *modus operandi* when framing a building according to the "scribe rule."

The difference between framing a structure according to the "scribe rule" and according to the "square rule" is simply this: When a building is framed according to the "square rule" none of the parts are put together to be fitted before the structure is raised. The timber is all squared, the mortises and tenons laid out, and the framing done in the same manner, when working by the "scribe rule," as when timber is framed by the "square rule," except that, in the latter case, the work is laid out by drafts on a small scale; and the length of braces, rafters and other diagonal timbers is determined by figures, which is a more easy way than to spread out a number of large sticks of heavy timber, and move them little by little—measuring and moving alternately—until the various pieces cross each other at the desired angles.

In order to convey a fair idea of the manner of framing a barn, for example, after the plan has been adopted, make a draft of one end, on a smooth board, using a correct steel square, so that the lines which represent the posts and sills may be exactly at right angles. Make the draft on such a scale that every inch of line on the board may represent one foot in length of the sill or post. Draw a fine pencil mark across the diagram, from the top of one plate to the other, in order to get the correct pitch of the roof. We will suppose, for example, that the building is to be thirty feet wide, and that the ridge of the roof is to rise ten feet above the plates, which will give a roof of one-third pitch. Now, place the corner of the steel square at the middle of the line extending from the top of one plate to the other, and strike a perpendicular line upward ten inches, to indicate the ridge of the roof. By measuring from this point to the outer and upper corner of the plates, we find the distance to be about eighteen feet and one inch, which will be sufficiently accurate for cutting the length of rafters, provided there are no purlin plates. But as figures are always more correct, the length of rafters and braces should be worked out to the fraction of an inch, by the rule for calculating the hypotenuse of a right-angled triangle. In order to get the correct bevel for laying out the shoulders of tenons, adjust a bevel square to correspond exactly with the lines of the diagram. It is thus possible to make a mark at the required angle, and to cut and frame the pieces of the desired length, with the assurance that every joint will fit neatly, without "cutting and trying," before putting the entire frame together. The builder, while laying out a frame, needs to set up a regular "air castle" before his imagination, so that he can perceive how every piece of timber, when he is laying it out or framing it, will ap-

pear after the structure is raised and every part is in its proper place. A master mechanic must be so familiar with marking for tenons and mortises that, when a tenon has been made for a given mortise, he will feel assured, without a trial, that every part will fit together like clock work.

It would be no difficult task for a carpenter in each of the States to forward each a stick of timber to New York city for a large structure, with the confident assurance that every joint would fit neatly, provided each man would lay out his respective stick accurately, as directed, and would then cut to the marks.—*Manufacturer and Builder.*

Suggestions About Green and Seasoned Timber.

Most persons who deal in timber and firewood, who work both green and dry timber all their lives, and who cut, handle and burn wood, more or less, nearly every day of the year, have no adequate conception of the great weight of green timber, nor of the large percentage of water in both green timber and unseasoned firewood. And even teamsters who have carted or sleighed hundreds of cords of both green and seasoned firewood and timber are seldom aware that from one-fourth to one-half the weight of a green tree is water, which will evaporate in a few months after the timber has been sawed out or split into billets for fuel or staves, or for other purposes.

Maple, beech, hickory, tough oak and many other kinds of green timber will weigh from fifty to sixty pounds per cubic foot. If the timber is of second growth and of fine grain a cubic foot will always weigh more than fifty pounds; so that, as a rule, it will be safe to compute the weight of most kinds of green timber at fifty pounds per cubic foot. As there are one hundred and twenty-eight cubic feet in one cord of wood, it follows that a solid cord would weigh six thousand four hundred pounds, or more than three tons. By deducting about one-fifth this weight for the interstices between the sticks, we have five thousand one hundred and twenty pounds as the weight of a cord of green wood, cut four feet long, and piled four feet high and eight feet in length.

The practical considerations brought to light in this computation may be advantageous to every person who handles or burns wood. Nearly one-half of the weight of green wood consists of water. Therefore, he who handles and hauls twenty cords of green wood must necessarily handle, and compel his heavily loaded team to draw more than one ton, and often one and a half tons of water for every cord of wood. These facts suggest the eminent importance of splitting firewood into small billets, and allowing it to season several months before it is carted or sleighed.

The facts disclosed show also how much more expensive and unsatisfactory it is in every respect to employ green wood for fuel than that which was cut and split out soon after the trees were felled, so that the larger proportion of water could have time to evaporate. It is said that "a pint is a pound the world around." Allowing, then, that there be only one ton of water in a cord of green wood, two thousand pints—or pounds—will make two hundred and fifty gallons, or about four hog-headers of water, all to be discharged into the fire. Of course one barrel of water in the wood that is being burned in a stove will convey away in a latent and useless state just as much heat as would be absorbed by a harrel of water when sprinkled on the fire. Every one understands how a leaky kettle puts out the fire, even when the heat of dry wood is furnished for fuel, as the heat generated by the burning wood will be carried away in the vapor, instead of being imparted to the oven or to the objects in the room. Taking another practical view of this matter, it will be safe to calculate that two and a half cords of sound, dry wood will furnish quite as much heat as four cords of the same kind of fuel, burned before it has had opportunity to become seasoned through and through.

These considerations reveal the startling fact that the family which consumes twenty-four cords of green wood in one year might save the price of nine or more cords by putting their green wood beneath a shelter for six months previous to using it for fuel. Almost any school-boy, according to this computation, may figure the number of dollars that may be saved in only one year by burning dry wood instead of green. Besides all pecuniary considerations there will be the advantage incident to having fuel that will impart a desirable amount of heat, when heat is needed most, without any loss or perplexity arising from a poor fire.

Intelligent teamsters may take a useful hint when they have green lumber to cart or to sleigh any considerable distance, and stick it up for a few months, so that the team may haul a ton more of timber instead of a ton of water. Many kinds of green lumber, if stacked up in an

airy place, will dry out forty and even fifty per cent. in the gross weight. *Manufacturer and Builder.*

THE DRESSING OF BABIES.

A lady correspondent of the *West-ern Rural* gives some excellent advice concerning the dressing of infants, from which we take these hints:

A tiny, shivering baby comes into this unhappy world in February—some day when the thermometer stands fifteen degrees below zero. Do we wrap the little tender creature in warm flannels for a day or two, until it gets a little strength, and then dress it in flannel or merino dresses with long sleeves, lined with soft cotton to prevent chafing its delicate skin, and put worsted socks upon its pink feet? And when we lay it in the crib are we careful to set the head of the crib away from the doors, and to tuck a flannel blanket down round its bare head, to keep off the possible draft of cold air? In short, do we keep it as warm as a toast? Indeed we do no such thing.

Do you suppose any mother, who has a correct idea of how things ought to be done is going to have her "little tonty wonty sing" all fuddled up in flannel, when she has worked for months, day after day, and far into the night too, sometimes, not allowing herself a moment to walk or ride, or get a breath of fresh air—say, do you suppose, when she has done all this ruffling and frilling, and embroidering of her baby's clothes, that she is not to have the pleasure and privilege of seeing it dressed in them? All motherhood forbid! We begin by putting on a linen shirt, cold and polished as ice; next a band, made also of linen, lest it should yield a little and allow the child's lungs and abdomen fair play; then a pinning blanket; then a flannel skirt with silk embroidery; then a cotton one with a lace ruffle at the bottom; and these have bands of cotton, and are all drawn snugly, so that the baby need not injure itself crying—so the old ladies say. Perhaps if the poor dears were not thus tortured they would not cry, and so there would be no danger.

Wonder how it is with the pap-pooes, born in the forest wilds, and who don't have four bands pinned around them! Do they cry and do themselves a fatal injury? I have never heard that they did; on the contrary, it is said that very few of them die.

The dress-skirt of our civilized baby is a yard and a quarter long, and most elaborately embroidered and tucked. The waist is six inches deep, and no sleeves to speak of; so its neck, arms and bosom are bare, while its body is wrapped in so many hands it cannot be bent, any more than you can bend a stick of wood; and its tiny legs are swathed in yards of worse than useless material.

How should they be dressed? is the question. In the first place you must have a merino shirt, and put it on with the seams outside; then a flannel band with broad hems, so it will pin easily; then a flannel skirt and a merino dress, of moderate length in skirt, high neck and long sleeves; then, with soft worsted socks, the baby is dressed for comfort and health.

Set the head of the crib where there can be no draft of cold air, and when you put the baby to sleep just throw something over the crib-head to insure air as warm as need be. Babies need warmth as well as kittens, and cold is their deadly enemy.

A MONSTROUS PRETENSION.—The Holy Father would seem to out-Bourbon the Bourbons in the capacity to learn nothing and forget nothing. The bull enunciated to the Ecumenical Council was startling enough in refusing to acknowledge that the world moves—the very matter upon which the church was at issue with Galileo as to the physical fact—but the speech recently made to some Prussian Knights of Malta, in an audience at the Vatican, was more extraordinary still. "The task of one order," said his holiness, "is to fight for the church against the modern State." "The modern State" here means progress, civilization, the spread of knowledge, the enlargement of men's minds.

"The church" means the Pope, personally infallible, and of divine right the disposer of all temporal affairs. It is in vain, to all seeming, that many earnest and sincere laymen of the Roman Catholic Church unite in remonstrating against the obstinacy of its head. It is apparently to no purpose that the great scholar, Dr. Dollinger, protests that the dogma of personal infallibility will miscell the faith of millions of believers. The modern State must go down. Very well. The contest will be somewhat unequal, but the end it is not difficult to foresee. The papal bull, opposing civilization, recalls the bull and the locomotive; the dogma of personal infallibility suggests King Canute, and also Mrs. Partington.

Editorial move.—N. Y. Evening Post.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, APRIL 2, 1870.

Office—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—Rev. J. C. KEENER, 112 Camp street, New Orleans, La.
AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

CONVENTION.

The New Orleans Sabbath School Union of the Methodist Episcopal Church South has resolved to hold a Sunday School Convention, embracing April 28, 29, 30, and May 1. It is expected that a number of ministers and laymen, delegates to the General Conference, will be here en route for Memphis, and it is hoped the convention will be of more than usual interest. Programme will be published next week.

EXPENSES OF DELEGATES.

The several Conferences have ordered collections to be taken up for paying the way of their delegates to the General Conference. This is the precise time. Are the preachers in charge attending to this important matter?

CHURCH AT WASHINGTON, D. C.

Dr. P. O. Dannelly, a well known minister, and highly accredited agent for this church, is now in the city on his important mission. Bishop Marvin, in a recent letter to the St. Louis Christian Advocate, says of this house:

The Sabbath after the Conference closed I spent in Washington City. Brother Tudor has combined economy, commodiousness and elegance in his new church in a most remarkable degree. It comes as near being the right thing for the place where it is located as I could imagine. I cannot but feel that our people there, scattered and peeled during the war, and up to this good hour under persecution, ought to receive aid from the whole church in paying their heavy debt. I am told that even up to this day, in some of the departments, clerks are turned out of employment if they go to Tudor's church.

Dr. D. proposes to go into Texas from this point. The fame of the liberal views of the "Giant State" in regard to all true Southern interests has reached Maryland, and we doubt not will be fully vindicated by its hearty response to the Washington church.

PERSONAL.—The Rev. W. C. Haislip, pastor of the Opelousas church, is in the city on business in connection with his charge.

TO GREENVILLE, MISSISSIPPI.

Being summoned by the presiding elder of the Greenville district, the Rev. Winans Drake, to be present at the dedication of a church, we took an up-country steamer, and on the third day after we were in sight of the thrifty town of Greenville, situated on the left bank of the Mississippi, one hundred and fifty miles north of Vicksburg. It was a Saturday-afternoon when we scanned this fresh looking village from the boiler deck, to see which was probably the church. There was only one very noticeable one, and that we could hardly suppose to be it. Having had some experience that way, we felt capable of recognizing any Southern Methodist structure at a glance. But at the wharf the pastor, Brother Sullivan, met us, and we learned directly that for once our people had fairly escaped their ancient infirmity of building barns for churches, and that the Sylvan Gothic chapel with the tasteful ritualistic tower was actually our own! It was the color that a village church among the trees should be—white. The blinds were hung, the lot neatly inclosed, and the bell was already in the tower. We just took it all in outwardly, and then waited for the fuller developments of the morrow, when the treasures of this precious casket should be brought to view. Its dimensions are thirty-three by sixty-two.

So far everything had gone well—no fog on the river—in full time, though not much to spare. The countenance of the presiding elder already expressed that unmistakable relief which one feels who gives up the oars for the tiller. We were presently inducted into the parsonage, near by the church, and soon at home in the delightful family of the pastor. This parsonage was made out of the chapel that had been temporarily used, by the addition of rooms, porch, etc., and stands upon a roomy lot, neatly fenced. The lot and the church lot were the gift of a lady, a member of our church who is full of generous deeds and devotion to the Master's cause. Now without a parsonage a circuit or station is in a fragmentary condition—not unlike that of a widower confessedly in search of a home. It is an unsettled state of the work, that is to both Bishop and preachers a sore perplexity. But here these good people have begun right; they have a dwelling house for the man of God sent them of which they need not be ashamed. The permanency of a work can only be secured by providing once for all for this large part of the annual expenses of a circuit.

During the evening we learned many other things indicating the enterprise of the place. It is three years old, and has thirty-five stores. Houses are springing up, and people are coming in from the South and West to take advantage of the wealth that grows in these fertile alluvial regions, where gold can be picked off of bushes. The Deer Creek country is near and is tributary to Greenville—one of the finest planting districts of the State. The site of the town, though directly on the river, is above overflow. The former town was entirely destroyed during the war, and was a mile from the present one, but was never half its size. All that is wanted here to make this a city is the establishment of factories, machine shops and mills. It has every facility for obtaining coal, iron, or any kind of freight which is possessed by any town on this great highway of the West. In the heart of the cotton region, with its present start, we doubt not it will continue to grow rapidly. The presiding elder was also the stationed preacher last year, and he has done well to seize the earliest occasion for building up our church with the place. Other churches are also at work, getting ready to secure buildings, and have already secured eligible church lots.

The Sabbath came clear and hopeful; the bell rang forth its silvery tones, and the people began to gather in the church. The ladies had moved on so rapidly and quietly that no one knew how perfectly they

had finished the inside until this morning. The seats, the damask curtains, the pulpit, the stoves, everything was fit and tasteful. It was an affair to be proud of if one only lived in the town. But before going in we had learned a few facts that give the true and only suitable expression to a new church—that is, the title deeds were already secured, and the amount due on the house was already arranged for. So there was nothing to do but pray the acceptance of the gift, and make an offering to the Lord—no collection—and the dedication might be made, as it ought to be, in the opening prayer of the service. This financial completeness is exemplary in all such enterprises, but is seldom attained. The house was well filled, and after the sermon the sacrament of the Lord's Supper was administered. We were glad to see such a goodly number of communicants, and among them not a few young men. Surely "the Lord is in this place," and to many this will, indeed, prove to be the house of God and the gate of heaven. Long after the noble men and women who have mainly contributed to this sanctuary may have passed away, shall the Spirit of God be waiting upon its services and comforting the people! Preaching continued until Wednesday. The weather was unfavorable, and the roads and walking were impracticable for large attendance. We made some of the most delightful acquaintance during our short stay in Greenville that we have made in several years past; and this visit will remain to us an abiding pleasure.

CENTENARY COLLEGE.

Among many other excellent things which transpired while we were in Greenville, Mississippi, one especially worthy of notice is that Col. W. Ngent contributed \$500 toward putting Centenary again in working condition. All the way up there, and for some months past, having attempted the role of a college agent, we were greatly troubled with reflecting upon the condition of our noble Centenary, and hoped and prayed that some way would be opened—somebody's heart enlarged in that direction. Indeed, we believe no man walks less by sight nor more by faith than one who collects for the cause of Christian education. Upon our return home we found the following letter from Mr. E. J. Gay, a member of our church in Plaquemine, which speaks for itself, not only in the contribution of \$2,500 in the same direction, but gives some admirable suggestions as to how the work of restoration should proceed. We did not intend to publish, yet awhile, anything of what has been raised for the purpose, because the amount was as yet too small to announce. But it occurs to us that such examples may spring some of the hundreds of our laymen in the Southwest to give a substantial evidence of their appreciation of this great interest of Methodism in Mississippi and Louisiana. Centenary is not an experiment. It has already done wonderful work for the church and the public. Its site is not an experiment. It had an average of two hundred students in constant attendance during the ten years preceding the war. There is no such opening in the Church South for the establishment and endowment of a college. It has contributed many valuable ministers to our Conferences and valuable laymen to our churches. It is surrounded by a fertile region, by a prosperous community of small planters, and by a thoroughly American and Protestant atmosphere. Methodism, we know, will not consent to take a low place in scholarship. She always has maintained in the South a front rank, and she has done it by her scholarship. Nor will our people consent to send their boys away to the schools of either the Middle or Northern States. Much less will they consent to deny their sons such training as will fit them to know, to discuss and to maintain their rights in the forum of public opinion. Since our college has been palsied we have had but few young men entering the ministry, and will

deserve to have fewer if we do not come forward with our means, largely and liberally, to the help of the Lord by trying to secure an educated ministry—a ministry educated with other youths, who are to become the teachers, lawyers, doctors, farmers and politicians of society, and not segregated in their training, lest they become incapable of sympathizing with the views and wants of their fellow-countrymen.

We ask that some of those treasures hoarded for children by their parents be now brought forth and used in establishing an institution for the training and development of our youth in intelligence and Methodism. Are there no Methodists now making their wills? Why is it that almost daily we read of immense sums being left to Harvard, Yale, Dartmouth, and old institutions already plethoric with endowment, and never one word of money left by our people to the cause of education in the South? We charge you to leave to the "Centenary College of Louisiana" some of these thousands you have made under Southern skies, that our land may have intelligent as well as brave sons, and that our church may hold its present power for doing good, and preaching the doctrines which have been the chief comfort of your lives, and are your only support in view of a dying hour. We need now \$20,000 to repair the college, and start it, and then we should have an endowment fund of \$100,000 invested in property in the heart of this city. We yet have a little over one-third of the sum needed for repairs, etc. Our people are able, and we believe they are willing to do this work. We shall never consent to believe otherwise until we have heard them say with our own ears: "I will not." We shall be glad to receive letters from the laymen and noble women of our church. If they will give, let them state on what terms they can now afford to give. Who will give \$500 in cash, in three or in six months, to this great Methodist necessity?

PLANTATION, March 18, 1870.

REV. J. C. KEENER—Dear Sir: Having accompanied you by special appointment to visit Jackson, Louisiana, to examine the condition of the college buildings, you may be expecting me to give you the result of my reflections on the subject of the repairs necessary to be done, before that establishment can again resume its important educational work. Your earnest zeal for the welfare of this good work is of itself enough to enlist in any one a desire to aid the cause, and, in my case, this disposition is increased by this visit, for the first time, to the beautiful grounds and stately buildings, now looking so quiet and desolate for the lack of renovation, and of the life-giving influence of hundreds of pupils and a faculty of professors, now missing from their wonted places, and which, under other circumstances, might find so much there to attract.

The repairs necessary ought to be made without delay, and this college ought certainly to be restored to life and usefulness, as of yore.

There are thousands in Louisiana and Mississippi directly interested in this work, and if they are properly approached, surely they will not hold back their aid.

And now for the practical. Let your Board of Trustees go to work, and I would suggest that you begin first upon the extensive wings of the college, and put them in good repair. These of themselves contain immense capacity for both recitations and residence, and would accommodate a large number of students to begin with. Then the repairs of the main college edifice should follow as rapidly as the means are supplied.

Now for the funds. I will contribute to the work, if practically and economically managed, \$2,500, if you will go on and realize the funds already subscribed, and obtain all the further aid you can, until the work shall be completed, and the college again put into the full tide of successful operation.

The work should be paid for as it is done, and no laborer allowed to suffer or be delayed.

This will require money, and without that in sight the work cannot go on. Very truly,

EDWARD J. GAY.

INFANTS count by minutes; children by days; men by revolutions of ages; nations by revolutions of systems; the eternal is in a perpetual present.

He is the safest who is the farthest from temptation.

STEAMBOATING ON THE MISSISSIPPI.

It has been our fortune to spend many days and nights, during the last twenty years, upon the Mississippi river, in the cabin of a steamer. And notwithstanding the proverbial superstition of boatmen in regard to "preachers" and "white horses," we have never met with the slightest accident while traveling on water craft, nor has any boat ever suffered any serious injury that we have witnessed. On the other hand, we have for the most part avoided being a "deadhead," and are satisfied when charged no higher fare than other people. We have therefore not only the right to speak freely about boats and steamboatmen, but some cause to admire the qualities and skill of those who have so steadily done us a good service. We know of no class of men who work harder and who receive a more moderate return for exposure and toil.

This great river is an inland sea, and its navigation, like that of the ocean, seems to necessitate work on the Sabbath. The crew of a boat cannot often enjoy the privileges of public worship, and so, for a greater part of the time, are outside of those holy associations which are the great support of a religious life. It does not take long for the habit of desecrating God's day to become confirmed; and the neglect of the Sabbath carries with it a train of evils difficult to avoid. It is not surprising then if, as a class, seamen and rivermen are irreligious. Men thrown together by themselves, either in camps or boats, for any considerable period, seem to be more oppressed with leisure than with the greatest amount of work. Time hangs heavily, and unless the mind is well fortified in its own resources, or defended by well grounded Christian principles, the inclination to seek relief in artificial stimulus, either of gaming or drinking, is very powerful. Unfortunately too many yield to it, and thus levy a tax upon their means of support and health

which no one can afford to pay, and which no one can continue to pay very long. Premature disease, moral, mental, physical, too often hurries the man who lives upon the sea or the river into an untimely grave.

During the last twenty-five years the boats on the Mississippi have greatly improved in their accommodations and in the general excellence of their machinery. But with many precautions against the dangers of navigation, fire and explosion, there seems to be but little falling off in the number of fatal river accidents. What is the cause? We think it is, first, a greater incompetency in the skill, and, second, a greater recklessness in the disposition of boatmen. Young men cannot be detained long enough in an apprenticeship to learn thoroughly their business; and the tendency of the times is to dissipation and a low estimate of the value of human life. Good workmen are hard to find. This evil extends to the very manufacturing of the iron out of which boilers are made and to the strength of machinery. It often also determines the fate of the boat in a critical moment. The pilot is incompetent, or the engineer does not know exactly what ought to be done, or the captain has lost the command of both boat and crew. Recklessness is a vice which has in it a certain fascination for its victim. He feels as if he were the braver for risking his life, and he reasons that if willing to risk himself, no one has a right to complain who may by the same act be put in peril. The world has long since discovered that it will not do to leave the safety of many lives merely to the instinct of self-preservation in any one. In Europe the love of life which is supposed to control the public carrier is strengthened by laws and penalties, in case of disaster, which carry with them much weight. This we greatly need here.

Mr. Wesley has a sermon on "The Cure and Cause of Earthquakes." The same "cure and cause" will apply to steamboat disasters. The public requires, beside good laws, some check upon drinking. No public servant, whether on railways or

on streams, whether by land or water, ought to be permitted to drink whisky or to gamble; either will unfit, and equally unfit, the mind for service. And if some one, in the multitude of improvements for saving steam, heat, fuel, etc., would invent some way by which a boat could be run upon one-tenth the amount of steaming, it would add greatly to the safety as well as convenience of river navigation. We were recently on a boat where oaths and obscene language could be heard day and night, with scarcely any intermission. The swearing about the cabin from below sounded like pandemonium—the firemen, deck hands, mate, engineers, all seemed possessed with the spirit of an unclean devil. That such a state of things is incompatible with the discipline necessary to the safety of a vessel no one can doubt. And the time must come when the public will learn that there is a wide margin in favor of a boat where the passions and words of a crew are under control over a craft handled by one that obeys not man because it fears not God. It is in boating as in everything else—good principle and the fear of God are essential to the highest skill and the greatest success.

CLASS MEETINGS.

The abolition of all laws on the statute book that are not operative, has been held by some to be good legislation. But our church has proved, by the experience of the past four years, in regard to class meetings, that such is not the case. A law is not always dead, that is not administered to the letter. There may be good sense in leaving the full letter in the Book of Discipline, that our people may work up to its true spirit, if not fully yet in a fair degree. The action of the last General Conference was not wise upon this part of our economy. It has effected what the Conference had no intention of doing: the impression has been made that the design of the action was to give up this valuable social meeting; such was not the case. It was intended only to remove the condition of membership which had been attached to a class meeting, and nothing more. It should be made positively the duty of preachers in charge to form the society into classes, and appoint leaders. It ought to be divided off into classes, and each leader ought to be in some sort responsible for the financial and spiritual training of those placed in his care.

We get masses of untrained and uninformed people into our church, and without their division into small squads, and much personal attention, they fall off in Christian force and intelligence. Something much more minute and individual in their treatment than anything the pulpit can do, or any one pastor, is absolutely demanded, if we would save them to Christ and the church. We extract some remarks on this subject from an excellent editorial in the St. Louis Christian Advocate:

Fellowship is a law of Christian life. Love of the brethren is a test fact, because the inevitable and invariable fruit of an experience of grace. It is the peculiarity of Methodism, in its synthesis of Christian doctrine, that it reduces this principle to practice, and incorporates in its economy both requirement and scope for the sympathy and the anxieties of Christian love. Its piety is, therefore, accretive. "It maketh increase of the body, unto the edifying of itself in love. Nor is it ever satisfied with conservatism. It contemplates aggression. It would bring the world to the communion of joy and the fellowship of praise. This sentiment of universal fellowship is both a bond of cohesion and the tender which lays hold of the world which 'lieth in the arms of the wicked one.' In the class room, who does not know that it finds both the nutriment of church life and the most constraining impulse of holy zeal for God and love of souls.

The abolition of the class meeting, or what is the same, its general neglect, would disorganize Methodist economy. The office of class leader is a necessity to Methodist itinerancy. It is an assistant pastorate. Without question it is perfectly obvious that without this auxiliary agency no Methodist preacher could perform his work or acquit himself of solemn responsibility to the Chief Shepherd when he shall appear."

The Child's Corner.

THE WASP AND THE BEE.

A wasp met a bee that was just buzzing by,
And he said: "Little cousin, can you tell me
why
You are loved so much better by people
than I?"

"My back shines as bright and as yellow as
gold,
And my shape is most elegant, too, to be
bold,
And yet no one likes me for that, I am told."

"Ah, cousin," the bee said, "this all very
true,
But were I ten half as much mischief to do,
Then I'm sure they would love me no better
than you."

"You have a fine shape and a delicate wing,
And they say you are handsome; but then
there's one thing
They cannot put up with, and that is your
sting."

"My coat is quite homely and plain, as you
see,
But no one is fretful or angry at me,
Because I'm a useful and innocent bee."
—The Children's Hour.

You are by the fire, little children,
Your cheeks that are rosy and warm,
But out in the cold of the winter
Is many a shivering form.

There are mothers that wander for shelter,
And babes that are pining for bread;
Oh! thank the dear Lord, little children,
From whose tender hand you are fed.

Johnny Ray, the Little Newspaper Boy.

A cold, drizzling sleet, and a biting
east wind, had almost cleared the
streets of passers-by. But poor
Johnny Ray had wandered far that
evening, trying to find a few cus-
tomers for some of the penny papers
which were hidden from the rain
under his jacket. He had crept
slowly through some of the grand
squares; and, as he looked up at
the windows, the rosy light that
glittered through the curtains
made him feel more cold than ever.
Once the curtains had been flung
aside by a boy about his own age,
and Johnny got a peep into what
seemed to him quite another world:
a happy family gathered round a
richly covered tea table. Home,
friends, love, rest, food, fire—just
everything Johnny wanted—were
there. But the laughing little face
withdrew, the curtains heavy folds
closed again, and Johnny painfully
felt that he was outside.

Then he tried a poorer part of
the city. At the top of his voice he
called out his newspapers for sale,
until a hollow cough made him stop;
but no one came to buy.

Tired from walking, and hopeless
of success, Johnny rested on a door
step, and gazed into an opposite
window. There were no blinds
here. Johnny could see all that
was passing within. A group of
children sat round the hearth watch-
ing a cake that was toasting before
the fire. A teapot costily toasted its
brown sides on the hob, and the
cups seemed to invite it to come to
the table. Then the father came
home, and the children sprang to
meet him. Johnny thought he could
almost hear the kisses, taste the
cake, and feel the fire. But his
father and mother were dead, and
he was himself out in the cold.

Johnny got up and moved slowly
on, and scarcely knew where. At
the furthest end of the court a door
stood ajar, and a bright stream
of light came through it. He resolved
to go and see. Stepping up to the
door, he peeped in. A fire roared
up the chimney. There were desks
and forms and books and slates and
ragged boys like himself. There
was also a kind looking gentleman,
too, who seemed to have a good
word for each of these rough fel-
lows. Johnny waited until all the
scholars came out, and then he went
in. He knew that this must be a
school, though he had never been at
one, and hoped the master might
buy a paper; so lifting off his cap,
and giving a pull to the little red
lock that hung over his forehead, he
held out a newspaper, crying, in his
shrill voice: "Second edition, only
one penny."

Mr. Egan turned round, and with
a look of tender pity and kindness
he drew the dripping boy to a seat
near the fire, and, having bought a
paper, set down beside him. "Do
you sell many papers?" asked Mr.
Egan.

"Sometimes; not many of an
evening like this," answered Johnny.
"And where do you live, my boy?"
"I don't live anywhere now, sir;
mother's dead—and father too."

"But where do you sleep at
night?"

"In any place, sir, just as the
season is. This weather, door steps
are not very good, and the police-
men wake one up with their 'move
on.' But I earn my bread honestly
and don't steal. Mother would not
like that, and I'll never do it while
my name is Johnny."

"Can you read?"

"No, sir; though 'twould be very
useful in the newspaper line, you
know," he added with a nod. "I
know all the newspapers by their
look, and make a guess at what is
in them, too, by listening to other
boys talking; but I wish I could

spell the words. Mother used to
read. She had a big book, with a
nice cover; it was on the bed near
her when she died; but father sold
it, and her ring too. We never had
one nice thing since."

"Then, Johnny, if you come here
to me every evening I will teach
you to read; and when you can
read I will give you a book like your
mother's, which, I am sure, was the
Bible. Do you ever hear the Bible
read in God's house?"

"Oh! sir, I never go there. These
ragged clothes would not look nice
to a gentleman like you. A long
while ago, when we lived in the
country, I used to go to church with
mother; the singing was very sweet,
almost like the birds. Mother used
to tell me about the good place she
was going to; but I did not learn
the way right then, and I have had
no one to teach me since."

"Johnny, I think I can tell you
the way to the happy land—where
your mother is gone."

"Oh! sir, can you?" cried the
little boy, with a look of joy that
made even his plain, pinched fea-
tures lose their harshness.

"Johnny, there is one friend,
and only one, who is able to take
you to your mother's home. His
name is the Lord Jesus Christ, the
Son of God. Jesus means Saviour,
for he came to seek and save the
lost—lost like travelers who have
missed their way, or poor prisoners
condemned to die. But God, in his
great love and pity, sent his only
Son to die for us; and Jesus died."

"I'm sorry for that," said Johnny,
as the old sad look crept over his
face again. "I thought you told
me he could show me the way to
mother. I wanted to go to him this
very night."

"And so you can, my boy. The
Lord Jesus lives again, and will hear
you if you pray. He has gone up
to heaven, and is willing to take you
there. Trust him alone."

Then Mr. Egan drew a little Tes-
tament from his pocket, and read
the Saviour's own sweet words about
the lost sheep and the good shep-
herd. Clasp Johnny's thin hand
in his, they knelt down together.
An earnest prayer that God would,
for Christ's sake, show them the way
to heaven, and enable them to walk
in it, was simply offered. It was
the first time that Johnny had tried
to pray.

The fire burned low. It was time
to close the school room and go
home. But where was Johnny's
home? Some doorway or bridge-
arch. Mr. Egan resolved it should
be so no longer. He remembered a
poor couple whose only child had
died lately; he thought they might
give Johnny a bed in the corner of
the room. Of course, he would pay
the orphan's small rent; so, leading
the weary boy down one or two
streets, he knocked at a broken
door. The old people, though much
startled at so late a visit from the
ragged school teacher, consented to
let Johnny share the shelter of their
room, and promised to be kind to
him for their own little Jim's sake.

Here Johnny lived for several
months. He spent his days in selling
newspapers about the streets, as
usual, and his evenings most happily
at the ragged school; but he never
failed to repeat to his landlady,
whom he now called grandmother,
the Bible stories he learned there,
or the good news about the open
way to heaven through faith in the
death and risen life of our Lord
Jesus; and he never forgot to pray:
"Show me thy way, O Lord!" and
through his simple teaching a
blessing came to that house. But,
day by day, Johnny grew weaker,
and his cough made the old gar-
ret echo all night. The poor woman
and her husband nursed him with
the gentlest care, refusing any pay-
ment for kindness, which they said
was all for the sake of their poor
little Jim. At length he could not
walk even to the ragged school, and
his teacher, alarmed at his absence,
went one evening to see him. John-
ny lay on a heap of straw in the
garret corner. He was dozing, but
the voice of his friend aroused him,
and stretching out both his worn
hands, to welcome him, he cried:
"Oh, sir, I see the way now! 'tis
very plain and very short. But the
good Shepherd is coming to carry
me home, like the lost sheep, you
know; for I'm sick and tired. Yes,
mother, I am coming. Good night.
You must all come soon. Granny,
don't forget the way."

It was death, not sleep, that folded
Johnny in his arms.

THE town of Berkeley, Bristol
county, Massachusetts, has not a
store of any kind, neither has it a
gambling house, or den of harlots
and wicked men; no rum hole; no
habitué drunkards, young or old;
no lawyer, and but one physician,
two churches, two Sabbath and six
day schools. There is not a family
in town but has a comfortable home,
and comfortable food and clothing.

Do good to thy friend, that he
may be more thy friend; your
enemy, that he may become thy
friend. Be a friend to virtue, a
stranger to vice. Govern thy tongue,
and learn to bear misfortune.

The Farm and Garden.

BROOM CORN CULTURE.

A writer in Schenectady, New
York, gives the following history of
broom corn cultivation in that State:

Previous to 1827 the culture and
manufacture of broom corn in this
State were monopolized by the Unit-
ed Brethren of Shakers, at Mis-
kayna, in this county. In 1827
they induced Mr. Benjamin Wil-
lard, of this city, to plant a few
acres on one of the islands in the
Mohawk river, agreeing to take the
brush at a fixed price per pound,
and furnishing him with a rude im-
plement for scraping the seed by
hand, each head separate. Mr. Wil-
lard prepared the brush, and notifi-
ed them when it was ready for de-
livery. Two of their number came
to weigh and receive it, but when
they saw the great length of the
brush they were amazed, and refus-
ed to ratify their engagement, thus
leaving Mr. Willard with what was
supposed to be useless stock on hand.
Mr. Willard thereupon determined
to make it up into brooms. Deem-
ing the mode then in vogue, of hold-
ing the twine by the feet and wind-
ing with the handle in hand, too
slow a process, he invented the
broom-winder now in use, and made
better brooms in much less time,
thereby working an entire change
in the broom corn culture and the
manufacture of brooms. The cause
of the excellence of broom corn in
this vicinity is the uniformly dry
and warm nights during the sum-
mer months, owing to the absence
of dew until near midnight—prob-
ably attributable to the sand plains
on the hills surrounding this valley.

CULTURE.—The ground is care-
fully plowed, harrowed and rolled,
and between the first of May and
the middle of June planted in rows
by a horse-power seed planter.—
When the plant is about two inches
high it is thoroughly weeded; when
about six inches up the earth is re-
moved from the sides of the rows
with a scarifier, and the space be-
tween the rows made friable; and
when the plant is about two feet
high the earth is thrown to the
rows with a double mold-board
plow, and it is then left for the
brush to develop. In sixty days
from planting the brush is fully out,
and it is then broken about two feet
from the lowest branches, and after
one day it is cut with a stem of six
or eight inches, and taken to the
comber or threshing—two revolving
spiked cylinders, driven by power—
and the seed removed; thence it is
carried to the dry house and placed
on slats or poles, in tiers with one
foot space. After being dried it is
sized and packed into bundles, ready
for manufacturing into brooms.

Broom corn farmers prefer cut-
ting when the brush is green, as
the green broom is more salable in
the New York market than the red
(ripe) brush. Experiments have
shown that they are equally dura-
ble. Red or ripe brush exhausts
the soil more than when harvested
early. The first scrapings of seed
are only fit for manure; the second
is half as good as oats, and the third
makes an excellent feed for horses
and cattle, and is found to be a su-
perior feed for milch cows in the
winter months. The haulm, when
properly cured and housed, makes
a good fodder. One bushel of good
seed will plant ten acres of bottom
land.

The brooms in use in 1827 sold
for \$2.50 per dozen; in 1830 the
Schenectady brooms brought \$2.50;
and now the best brooms sell at
\$1.75 to \$2 per dozen. Ripe seed
is now selling here for \$7 per bushel.
Brooms are daily sent from this city
to all the States, West Indies and
Europe, and the demand is increas-
ing. A quantity of brush manufac-
tured here is grown in the States of
Illinois and Indiana. In most of
the Western States and in Penn-
sylvania the plant will not flourish.—
Agricultural Report for September.

BREAKING, CUTTING AND THRESHING
BROOM CORN.—I never break any
brush down that does not lay all
the wisps one way. I think it is
best to break the stalks of the crook-
ed brush between the second or
third joint from the top, as short
as it can be without breaking it off.
The rest I leave standing till a few
days before it is fit to cut. Then I
break the stalks toward the rising
sun, so that the dew will dry off in
the morning. When cutting the
brush, take the stalk in one hand
close to the brush, and cut it off
with a butcher-knife that is not very
sharp. A knife with a keen edge
will cut the leaf off, which bothers.
I take all the leaves off the stalk,
holding the brush in my hand until
I have a handful, laying the brush
of three or four rows between the
two rows in gables, ready to put on
a wagon to go to the drying shed.

Brush will not grow in length
after it is broken down; yet it will
become coarser, and continue to
ripen if it is not broken entirely off.
Every time the brush is handled
keep it as straight as you can con-
veniently, as it is a slow job to
straighten when it is tangled like
hay. The stalks of each brush

should be not less than four nor
more than six inches long, as six
inches is the convenient length
when making brooms. If the stalks
are much longer they only increase
the bulk of the broom corn, and
often require extra labor to cut them
of convenient length before they
are worked up.

HOW TO THRESH BROOM CORN.—To
thresh it with a flail, lay the brush
in a row on the barn floor, two or
three stalks deep, and place a plank
on the stalks, with one edge even
with the lower end of the brush.
Stand on the plank while using the
flail. The object of the plank is to
protect the stalks from being crush-
ed, as smashing spoils them for
brooms.

Another way of removing the seed
is with a broom corn hatchel, or
comb, the teeth of which are made
of iron, three-eighths by one-half
square, and about eight inches long;
six inches of one end should be
drawn to a point; about two inches
of the lower end should be left full
size. The points should be beveled
on both sides, leaving the back side
the widest. The points of the teeth
should be about half an inch apart.
The teeth are fastened on the back
side of the end of a plank two feet
three inches high and one foot wide,
with two bolts and a cross-piece, or
they may be set firmly in holes at
the end of the plank. This upright
plank is then spiked to another
plank resting flatly on the floor. The
broom corn brush is drawn
through these teeth, which strips off
the seeds.

Another way is to thresh the corn
with a cylinder driven by horse or
other power. A cylinder for such
a purpose should be about two feet
long, ten inches in diameter, driven
by a pulley six and a half inches
in diameter. The spikes should be
three inches long and one-fourth
inch in diameter, driven one inch
into the wood. Make marks around
the cylinder, three-eighths of an
inch apart, and set the spikes in
seven different rows, lengthwise of
the cylinder, so that a whisk may
pass between two teeth. The teeth
should be beveled, so that they will
not fly out. The cylinder is over-
shot, with a screw. Two men
hold the handles, and two others
prepare them for threshing.—*A.
Stokes, of New York.*

PROGRESS OF WESLEYAN METHODISM
IN GREAT BRITAIN.—During the last
ten years the British Wesleyan Con-
ference reports an increase in min-
isters of three hundred and forty-
nine, or thirty-two per cent., and an
increase in members of fifty-two
thousand seven hundred and thirty-
one, or eighteen per cent.; while
additional church accommodation
has been provided for probably
three hundred thousand persons,
and the actual increase in the regu-
lar congregations may be estimated
at two hundred thousand. The
Methodist Recorder, London, of De-
cember 31, in an editorial article
referring to these figures, concludes:
"It will thus be seen that, adopting
the Connexionist test of member-
ship, our church has gained consi-
derably upon the population, and
that if the test be adopted of regular
attendance on public worship, the
gain is in a yet higher proportion.
The period has been one of general
concord, not unvisited by occasional
showers of blessing, but unmarked
by any extensive and extraordinary
manifestation of religious power.
For this let us wait and pray, not in
the spirit of contented indifference,
but in the spirit of those night-
weary ones, described by the Hebrew
bard, who 'watch for the morning.'"

IS THE WORLD BECOMING BETTER?
Rev. R. Snowden delivered a ser-
mon on Thanksgiving day in Hon-
olulu, in which he contended that
the world is growing better, and thanked
God for the times we live in, not as
an absolute good, but as better than
any period of the past, and full of
promise that better days still are
drawing on. He said that the pres-
ent is an age when moral ideas hold
the center in society, and an era of
wide views, of concentrated and
united action, of great things and
of great expectations. Finally, he
urged: "Let us not lose the en-
thusiasm of hope, but rather enlarge
our expectations, for the hand of
him who is saving the world is
opening wide to pour down un-
stinted benefactions. Go up with
gladness, on this festive day, into
the watch-tower of faith, for the
white-winged fleet of a world's full
salvation is even now in the offing,
loaded down with all the treasures
for which the suffering millions of
our globe have pined so long."

THERE is not a grace that can
adorn the Christian character but
you will have need to appear in it
at some time or other; therefore seek
the whole, that you may stand per-
fect and complete in all the will of
God.

The perfume of a thousand roses
soon dies, but the pain caused by
one of their thorns remains long
after; a sudden remembrance in
the midst of mirth is like that thorn
among the roses.

BOOKS AND STATIONERY.

NEW ORLEANS, LA.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD
NOW IN USE.

THE FASHION.

We call special attention to this Stove,
which has been produced at great expense,
combining all the new and important im-
provements; also to the extra height of the
oven under the fire chamber, the Patent Air
Chamber, Front Doors, and Patent White
Enamel Iron Knobs, the improvements in
the covers and entire pieces, all of which
have been covered by Letters Patent, and
are used in no other Stove. They are
wanted to stand fire, or others sold free of
charge in all cases. We have all sizes of this
justly celebrated Stove, built

PLAIN AND EXTENDED BACKS.

The Extended Back with cast iron Enamel-
Reservoir and Panel, Tin Ware, Cast Iron
Gridiron Cover, etc. The part of the top
supporting the Reservoir is raised so that the fire
is above the top plate, instead of below it,
the case in most of the Stoves now used, and
the heat is also directly against the whole
surface of the bottom of the Reservoir. The
Reservoir, being detached from the plate, can
be removed at pleasure, thereby forming a
six-hole Stove—the best in use, as the back
holes will heat as well or better than the
middle ones. For sale by G. W. W. GOODWIN,
62 Camp Street.

ALSO, THE MOST

Complete and Perfect Cooking Stove
FOR BITUMINOUS COAL OR COKE

ever invented. In the estimation of all who
have yet seen it. Patented in 1869.

THE MONITOR.

which can be seen at 62 Camp Street. The
advantages possessed by this Stove over all
the other Coal Cooking Stoves are so nume-
rous, and so patent to every sensible observer,
that it is only necessary to examine it in or-
der to be convinced of its superiority.

All of the above Stoves are fitted with ex-
tra care, Oven Doors lined with tin, and fi-
nished with William Rosser's Patent Air Cham-
ber, sliding front doors, patent centres, cov-
ers and White Enamel Knobs.

The operation of every Stove guaranteed.
Directions for putting up and using same
accompany each Stove.

G. W. W. GOODWIN,
62 Camp Street,
221 1/2 ft.

THE TIMES.

THE IMPROVED

LARGE OVEN COOKING STOVE,
with extended Fire Chamber and Feeder To-
—one of the best baking and most com-
plete Stoves made.

The Flues are constructed so as to insure
the most perfect draft. The heat of the Oven
is so equal that when baking there is no need
for removing anything until done.

THE TIMES.

is made of a superior quality of Iron, very
heavy, of neat design and fine finish. The
Top Plate is put together in sections, to per-
mit of the greatest expansion without crack-
ing.

We invite the attention of Housekeepers
to the advantages of this Stove. Remember,
we guarantee them to give entire satisfac-
tion. Duplicate parts can be had

The Christian Advocate.

SATURDAY, APRIL 2, 1870.

RELIGION IN BUSINESS.

One very important department of life where religion is to hold pre-eminence, is that of business. As the golden sunlight tints the flower, and colors the rock; as it sparkles in the dewdrop, and shines in the broad, magnificent ocean, so should religion permeate every transaction with our fellow-men. It should go with its possessor into the counting room, the store, the market, the factory; and its influence should be felt in all places. Some have asserted that a man cannot be a good Christian and a successful merchant. But, happily, a cloud of living witnesses can attest the contrary of such an allegation. Although in this age of speculation and fierce competition, trade in numerous instances is an unclouded, and business transactions a tissue of deception; yet, thanks be to God, and to the honor of religion, it is proclaimed, there are still to be found successful Christian merchants, who hold on to their integrity; who will never descend to any transaction of an equivocal character, even though it be sanctioned by the laws of custom and the tricks of trade. The upright, professional man, the honest trader, the pious and industrious artisan, yet live, and steadily pursue their noble course; being "not slothful in business, but fervent in spirit, serving the Lord." These men bear testimony, before the world, that godliness is profitable unto all things, having promises of the life that now is, as well as "that which is to come." May God increase their number a thousand fold.

But it must ever be kept in view by Christian men engrossed in business, (especially in large cities,) that more than ordinary watchfulness is necessary to retain their spirituality, and to maintain their Christian character unimpaired, amid all the temptations, excitement and anxiety incident to their callings. They must ever dare to be singular, and stem the current of popular opinion and custom. They must be resolved, in the night of Omnipotence, never to turn aside, to the right hand or to the left. And in order to arm themselves for every day's temptations and trials, they must obtain power from above. The "man after God's own heart" was a father, a master, a ruler, a warrior, and had to attend to numerous duties connected with each of these callings; but he always found a parenthesis for prayer, and set times for secret devotion. And this way only can the flame of religion be kept alive in the soul, and illumine all life's avocations.

How many are there whose powers are so exhausted by business as to have neither time, inclination nor energy to seek after their own spiritual interests, much less those of their families. But who does not perceive that the life of such a man is the life of an idiot? There is, after all, something higher, and nobler, and better, than merely "to buy and sell, and get gain." "For what is a man profited if he shall gain the whole world and lose his own soul?"—Rev. John Berry.

JOHN WESLEY AND HIS WIFE.—Mr. George Dawson, in a late lecture on the great founder of Methodism, gave the following details. When Wesley settled, he said, "It would be more useful to marry." There is nothing like giving that sort of pretty fancy to your wishes. I have known a friend, when he was going to move from a little living to a large one, say that it was because he was going to "a large sphere of usefulness." A certain witty man used to say that whenever a clergyman went from a little living to a large one, he did so because he had got a call, but that he would want a "good loud holla to take him from a large to a small living." Wesley married a widow, who, through her jealousy, led him a life of wretchedness and misery. At last his spirit was up, and he wrote her, "Know me and know yourself. Suspect me no more; provoke me no more; do not any longer contend for mastery, for power, money or praise; be content to be a private, insignificant person, known and loved by God and me." It was not likely that a woman would be pleased at being recommended to be an insignificant person. After twenty years of discontent she one day left him. He bore it philosophically. He went even beyond it—he took his diary, and put the most pithy entry into it ever met with in a diary: *Non am reliqui; non denisi, non revocato, which may be translated thus: "I did not leave her; I did not send her away; I shall not send her back."* And so ended the marriage of John Wesley.

DETECTION OF THEFT BY CLARIVOLANCE.—The *Saratogian* vouches for the truthfulness of a very singular occurrence. The residence of John Dunning, a reputable farmer near

Jonesville, was entered and robbed of \$40 on Christmas eve. Mr. Dunning had been unsuccessful in obtaining any clue to the thief until quite recently, when, from some cause, he was led to consult a fortune teller at Ballston Spa. He told the old woman he had come to test her powers, and meant business. She prepared herself and went into a trance to consult the spirit of the Indian woman, and while in that state Dunning asked her if he had lost anything.

She described the robbery, the amount, the thief, how he looked and how he dressed. She told him how to ascertain where the man lived, to send for him, to charge him with the theft—that the man would deny it, but he must persist and threaten him with the law, when the man would acknowledge it. Dunning was convinced—it was the exact description of one he knew. He returned home, sent for the man, charged him with the theft—the man denied it—he persisted and threatened him—the man confessed he had taken the money, had spent it for drink and other things, but he would repay it as soon as he could earn the money.

EASTERN CHURCHES.—The best news that has for a long time been received from the Eastern churches is the progress of the Bible circulation. The holy synod of the Russian-Greek Church is disseminating copies of the Scriptures very extensively, and has been doing so for several years. And still another step in advance has been taken in the formal authorization by the government of the Russian Bible Society to resume its operations. The New Testament has only been translated in Modern Russian, while the Old Testament is in process of translation.

The Bible used in Russia is the old Slavonic, which is the ecclesiastical language, not read nor understood by the mass of the people, who have only the New Testament at present in Modern Russian. The holy synod has its printing establishment pretty fully occupied in preparing editions of the Scriptures. These are sent forth in such variety of form and type as to meet all requirements of popular taste and preference. From this source the agency of the British and Foreign Bible Society procures books. The circulation by that agency amounted, in 1868, to sixty-four thousand eight hundred and thirty volumes! They were in various languages, as Modern Russian, Slavonic, Lithuanian, Polish, Swedish and many others. Our own Bible Society has printed an edition of ten thousand Testaments in the Revel Esthonian language, spoken in one of the provinces of Russia, and a considerable portion of the books issued. It is now making efforts to extend the work into Siberia.

LET US HELP ONE ANOTHER.—This little sentence should be written on every heart and stamped on every memory. It should be the golden rule practiced not only in every household, but throughout the entire world. By helping one another we not only remove thorns from the pathway and anxiety from the mind, but we feel a sense of pleasure in our own hearts, knowing we are doing a duty to a fellow-creature. A helping hand or an encouraging word is no loss to us, yet it is a benefit to others. Who has not felt the power of this little sentence? Who has not needed the encouragement and aid of a kind friend? How soothing, when perplexed with some task that is mysterious and burdensome, to feel a gentle hand on the shoulder and to hear a kind voice whispering: "Do not feel discouraged; I see your trouble; let me help you." What strength is inspired, what hope created, what sweet gratitude is felt, and the great difficulty is dissolved as dew beneath the sunshine. Yes, let us help one another by endeavoring to strengthen and encourage the weak, and lifting the burden of care from the weary and oppressed, that life may glide smoothly on, and the fount of bitterness yield sweet waters; and He whose willing hand is ever ready to aid us will reward our humble endeavors, and every good deed will be as "bread cast upon the waters, to return after many days," if not to us, to those we love.

A MAN on the day he became one hundred years old went to have a pair of shoes made, remarking that he wanted them built substantial, with plenty of hob-nails. The storekeeper suggested that he might not live to wear such a pair of shoes out, when the old man retorted that he commenced this one hundred years a good deal stronger than the last one!

You may find it very difficult to get away from bad company; but you need not on that account throw yourself away.

ENVY pursues its victims through life; it ceases to know only when the grave-worm, its brother reptile, begins.

MUSICAL INSTRUMENTS.

GREAT SOUTHERN MUSIC HOUSE.

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S

COMMERCIAL COLLEGE,

61 CAMP STREET,

Open day and evening the entire year.

Penmanship, Book-keeping, Mathematics

and Languages are practically taught by ex-

perienced professors. Persons from twelve

to fifty years of age attend. The instruction

is private to each student. Persons who

have neglected their education can here

speedily qualify themselves for good situa-

tions in business. Some from the country

may obtain board in the family of the principal.

William Walker, a late graduate of the

Southern University of Alabama, and son of

the Rev. Dr. J. B. Walker, of New Orleans,

has charge of the Mathematical department.

Teams—Ten to twenty per cent. less than

other colleges in this city.

A liberal deduction made when three or

more enter together. The principal has been

a practical teacher in New Orleans since

1851. For circulars, giving terms, etc., ad-

dress J. W. BLACKMAN,

sell ly New Orleans.

METHODIST FEMALE COLLEGE,

TUSCALOOSA, ALABAMA.

Under the Patronage of the Mobile Conference.

The regular scholastic year will begin on

the first Monday in OCTOBER next, and end

the last of June. It is divided into two terms

of four and a half months each.

8. Attention to health, manners, morals.

9. Vocal music gratuitously to all.

10. Language taught, ancient and modern.

11. Particular care given to Primaries.

12. Object Lesson System adopted.

NEW ORLEANS MARKETS.

NEW ORLEANS PRICE CURRENT.
The wholesale trade has exhibited increased animation since our last issue. Country merchants have continued to buy freely, and found ample stocks of sugar at reasonable prices, quite as low, in fact, as transportation, etc., considered. New York rates. The receipts of sugar have been moderate, and not a slack demand, without any marked change in prices. Molasses has continued extremely dull. We have no new feature to notice in Western produce, the demand for which, excepting some orders for Gulf ports, has been mostly confined to the local trade.

The accounts from the interior are more encouraging. We hear less complaint of backwardness of the crop or want of labor, and infer that planters are busily engaged preparing for cultivation of a wider area. Our receipts of cotton have continued liberal, and show some excess over the corresponding time last week. The Red river and tributaries are still falling.

The river is now three feet six inches below high water mark, having fallen three inches since our last.

CORROX.—The following are the arrivals since the twenty-fifth instant:

Louisiana and Mississippi bales.....	9347
Arkansas.....	4668
Mobile.....	345
Florida.....	227
Texas.....	148
Total.....	14735

On Saturday the demand fell off, and continued slack throughout the day, clean white cottons commanding previous rates, but average lists ruling a shade more in favor of buyers, good ordinary closing at 19½ to 19¾, low middling at 20½ to 20¾, and middling at 21½ to 22c. The sales amounted 4,000 bales. On Monday buyers came forward with still less spirit, and with a moderate supply, poorly assorted, the business was confined to 8,000 bales, at more irregular and easier prices, good ordinary closing at 19½ to 19¾, low middling at 20½ to 20¾, and middling at 21½ to 22c. In fact some sales were made at even less than inside figures—say as low as 19c. for good ordinary, and 20½c. for low middling. On Tuesday the market opened with only a limited inquiry, and the demand continued slack throughout the day, 3,000 bales again changing hands at the wide range of Monday. If anything, even running lists and clean white cottons commanded stiffer rates, but average lists of the ordinary run could be bought at prices leaning to inside figures, and, on the whole, there was no notable variation. The supply was light and poorly assorted.

This makes an aggregate for the past three days of 10,000 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 934,700 bales, against 713,545 bales for the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 581,373 bales. In the exports from the United States to foreign countries, as compared with the same date last year, there is an increase of 321,287 bales to Great Britain, of 80,785 to France, and of 99,415 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary.....	17½ to 18½
Good ordinary.....	19 to 19½
Low middling.....	20 to 21
Middling.....	21½ to 22
Strict middling.....	22½ to 23

COTTON STATEMENT.

Exported past three days.....	25300
Exported previously.....	766409
Shipped.....	1192-792901
Stock on hand and on shipboard.....	19285

SUGAR.—The market has again continued dull since our last review, not about previous prices.

MOLASSES.—The supplies are small, and consist mostly of fermenting. The demand is limited, however, and is met at 25 to 45c. per gallon for fermenting, and in quality; 40 to 55c. for plantation reboiled.

FLOUR.—The market has been dull since our last review.

MONEY.—Gold opened on Tuesday at 111½ to 112½ (against 111½ at New York), and closed at 111½ to 111¾. No sales of silver have been reported. American half dollars may be quoted at 114½ to 114¾ in currency, and 2½ per cent. premium in gold.

City Treasury notes, 20 to 22.

CATTLE MARKET.

New Orleans, March 23, 1870.	
Texas cattle, choice, per head.....	\$45 to 60
Texas cattle, second quality, per head 30 to 40	
Texas cattle, third quality, per head 10 to 25	
Wagon per lb. gross.....	10 to 12
Sheep, first quality, per head.....	\$4 to 6
Sheep, second quality, per head.....	3 to 4
Sheep, third quality, per head.....	2 to 3

The Christian Advocate.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, APRIL 9, 1870.

NO. 12.

NEWS OF THE WEEK.

DOMESTIC.

SAN FRANCISCO, March 31.—The remains of General Thomas, under the escort of Colonel Willard and a commissioned officer and thirteen men, were forwarded East this morning. Minute guns were fired from the Albatross on departure of the body for Oakland.

WASHINGTON, April 1.—There has been considerable comment and speculation over the announcement made in the Supreme Court this morning, that it had been decided to hear the argument again in the cases involving the direct question of the constitutionality of the legal tender act, which cases were fully argued at the last term of the court. The decisions heretofore made, so far as they were applied to the legal tender act, have covered the ground that all contracts made before the act was passed are payable in coin. The cases which it is now proposed to have reargued include the naked question as to whether Congress had the constitutional power to make United States Treasury notes a legal tender, and it is quite freely claimed, that although the court in February leaved its decision on the operations of the act on debts contracted before 1862 toward the unconstitutionality of the law, it will now, owing to the addition of two justices to the bench, have a majority the other way, and thus render a decision sustaining the validity of the legal tender act. This is, of course, based on the way the court is known to have stood before the recent addition, and on the reported views of Messrs. Strong and Bradley on the question before they became members of the court. Counsel in the cases already decided declare that it will be unprecedented if the court should go so far as to reverse its recent decision, and to say that Treasury notes can satisfy debts incurred before the passage of the legal tender act, though, if the court does decide to sustain the law as constitutional, it will be a substantial reversal of the previous decision.

MEMPHIS, April 5.—The contract for building the remainder of the Mississippi River Railroad will be let in a few days, and the work pushed forward to completion. Freight to New York have been reduced sixty cents.

CLEVELAND, Ohio, April 5.—The Republican majority of the city ticket is about eleven hundred. The Democrats gain one councilman, giving the Republicans two majority on the full vote. The prohibition ticket received two hundred votes.

CINCINNATI, April 5.—Complete returns received late last night give further Republican gains. The Republican clerk of the Probate Court received four thousand and sixty-nine majority. The Republican majority in the entire city ticket averages over three thousand. The new board of aldermen will stand fifteen Republicans, sixteen Democrats, two Independents and a tie in one ward. The City Council, with members holding over—Republicans twenty-eight, Democrats sixteen, Independent four. The school board stands twenty-six for Bible schools and twenty-two against.

St. Louis, April 5.—The colored citizens of Jefferson City, Missouri, celebrated the ratification of the fifteenth amendment yesterday with a procession, music, firing cannon, etc. Among the speakers were Governor McChesney and General Shepherd, adjutant general. The State election here to-day is passing off quietly.

HARTFORD, Conn., April 5.—The twentieth senatorial district, which was counted last night as Republican, is ascertained to be Democratic by ninety-seven majority, and the third district Democratic by three or four majority. This gives the Senate to the Democrats by one majority, unless the sixteenth district, which should be Republican, goes Democratic—this would give the Republicans a majority of one. The House is Republican by a small majority, probably not more than six, perhaps ten. Governor English's majority will, from present appearances, be about six hundred.

THE FIFTEENTH AMENDMENT.—The President's special message and Secretary Fish's proclamation on the ratification of the fifteenth amendment are still on the Speaker's table in the House, but a motion will be made this week to refer them both to the Judiciary Committee, with instructions to send for persons and papers to ascertain if the ratification by Indiana was legal

and proper, and to investigate the question of the right of the State of New York to withdraw its ratification. Notwithstanding that the Secretary of State of Indiana has certified to the State Department here that the ratification of that Legislature was proper, it is asserted by the Indiana members that the Republican Governor of Indiana looks upon it as illegal, and declares that it was done by less than a quorum of the Legislature. Although a Republican member made the motion of reference the other day, it is understood that new tactics have been agreed on and that the Radicals in the House will oppose an investigation.

The election of Governor English, of Connecticut, by about six hundred majority, seems to be conceded. A later count may reduce or increase the majority, but taking the figures reported, we find that the Connecticut Democracy have made a gain of about one thousand votes over their poll last year. Jewell, the Republican candidate for Governor in 1869, having been elected by over four hundred majority.

The Inman steamer City of Boston, now so long missing, had on board fifty-five cabin and fifty-two steerage passengers. If the steamer is lost one hundred and ninety-one persons have perished, and it is probable that there may have been one or more stowaways on board whose names will never be known. Several officers of the Royal Artillery, and of other British regiments, were included in the list of passengers, who were returning to England from Canada.

FOREIGN.

PARIS, March 20.—The Constitution publishes Cardinal Antonelli's reply in relation to the admission of a lay French representative to the sittings of the Ecumenical Council. Cardinal Antonelli trusts the French cabinet will not abandon its attitude of abstention toward the council, and that it will not persist in the demand made by Count Daru.

PARIS, March 27.—It is believed at Rome that the French government is engaged in discussing with the English government the political aspects of the question of papal infallibility. The publication of Bishop Strossmeyer's protest against the proclamation of the dogma is hourly expected. A manifesto on the subject from Count Daru is also looked for.

PARIS, March 31.—Pero Hyacinthe's new religious paper appeared to-day.

Nearly all the parties arrested in connection with the alleged conspiracy to murder the Emperor Napoleon are workmen.

MAMON, March 31.—The government officially announces that it will not interfere with the Ecumenical Council.

ROME, March 31.—Schema de fide was promulgated to-day. A major excommunication will be pronounced against Armenians who refuse to accept the Schema.

PARIS, March 31.—It is asserted here that the council will immediately commence to discuss the Schema of infallibility. If it be true, the French ambassador will not return to Rome.

The cable last night brought, in brief words, the not altogether unexpected intelligence of the resignation of the Austrian ministry. The burden was getting too heavy for Count Beust and the "Citizens' Ministry"—as the Austrian ministry was surmised by its opponents, on account of the majority of the ministers not being scions of some aristocratic house whose pedigree dates back to the dark ages—and they have, at last, yielded to the pressure which, for some time past, was brought to bear upon them. The hostile attitude of the Czechs and other Slavonic races, their clamorous demands and often insolent bearing; the fruitless efforts to harmonize the conflicting interests of the several races which constitute the population of the Austrian empire; the proverbial financial and other internal troubles; the never-ending intrigues of the clerical party against Count Beust, who is a Protestant—intrigues which, of late, were renewed with increased force, because of the count's protest against the proceedings of the Ecumenical Council—these and other causes account for the resignation of the Beust ministry.

Though a stranger in a stranger's land, the former Premier of Saxony has zealously worked for the recuperation of Austria from the

effects of Sadowa and the Prussian needle gun, and has discharged his arduous duties in a most creditable manner, so much more so on account of the many obstacles which had to be overcome.

The emperor has accepted the resignation of his ministers, and, as the brief dispatch states, "has summoned Count Patocko to form a new ministry." Of what elements the latter will be composed remains to be seen.—*Picayune, April 6.*

THE ONEIDA DISASTER.

The San Francisco Bulletin, of March 21, copies from the Japan Gazette the following interesting synopsis of the result of the court of inquiry in the Oneida disaster case: THE FACTS ELICITED BEFORE THE COURT.

The vessels saw each other a considerable distance before they met. The Bombay was under steam alone; the Oneida was under full sail and steam, going before a strong breeze and with the tide. The speed of the Bombay was about eight knots; that of the Oneida probably nine. The Bombay, adopting the rule of the road, as laid down for all English vessels, ported her helm, and would have cleared the Oneida had not the latter immediately starboarded her helm, and thus brought herself almost directly across the Bombay's bow. When it was evident that a collision must take place, the Bombay's engines were stopped, and at the last moment her helm was starboarded, and so in the collision which followed she struck the Oneida obliquely on her starboard quarter, carrying a great part of her stern, her rudder, her steering gear, one binnacle, a portion of the mizen rigging, and crushing one of the boats. The two vessels then parted so quickly that, as one witness said, the Oneida was out of sight in the darkness "in no time." The captain of the Bombay is acquitted of all blame up to this point. No one can read the evidence without being quite of the court's opinion, that he did everything in his power to avoid the collision, and acted correctly in all he did.

AFTER THE COLLISION—STATEMENT OF THE ENGLISH CAPTAIN.

After the collision it was found that the Bombay's bows were damaged, and that a spar or plank had penetrated them below the water line, so that she was making much water in the fore compartment. Fortunately for all on board of her, she was built in compartments. The captain waited a short time, looking out for signals of distress from the other ship, which, as yet, of course, he knew not the name of. He says the time he waited was about ten minutes; the log of the engineers does not make it above four or five; and then seeing no signals of any kind, and apprehensive of his own ship with his passengers, crew and the mails, he hastened on by the advice of the pilot, an American, to Yokohama. He declares, and his assertion seems fully borne out by all the witnesses who had been on board of the Bombay at the time, that he had no idea of any such serious damage having been done as it turned out there was, and merely thought that she would probably have to return to port to repair the effects of what, to all on board of his ship, seemed only a slight graze.

WHAT HAPPENED ON THE ONEIDA—THE CATASTROPHE.

On the Oneida, however, a very different and painful state of things existed. Captain Williams, who was ill, was assisted on deck, and all his executive officers, who had been at their dinner down below, with the exception of those on duty, also made their appearance. Lieutenant Commander Stewart, seeing at once how serious the damage was, is stated to have shouted to the Bombay: "Steamer ahoy; stay by us; you've cut us down." But so quickly did the ships pass that the hail was only heard as "steamer ahoy." The reply from the Bombay, which the third and fourth officers and a quartermaster assert they made, was unheard on board the Oneida. The requisite signals, usually kept handy for giving alarm, were carried away, so that fresh ones had to be obtained from below; and five minutes, at least, elapsed, according to the statements of the survivors, before any gun could be fired. At length one of the leeward guns was fired, and that four times—but captain, officers and passengers in the Bombay all declare that, although they watched for signals, they neither saw nor heard them. The Oneida had only two boats, and these having been got out, Dr. Sud-

dard, the boatswain and twelve men got into one, and, believing he saw a junk passing, Dr. Suddard ordered the men to row to her for assistance, but she was going too fast for them, and they gave up pursuit in a couple of minutes. But turning to go back to the ship, they could neither see her nor any trace of her. They then rowed to the shore, a distance of about five miles. The only other remaining boat had just been lowered as the ship went down. A number of men were lowered in her, and they managed to get several more on board out of the water, including Mr. Yates, the executive officer in charge of the Oneida at the time of the collision, and Mr. Crowninshield, the captain's clerk. They stayed by the ship as long as they could see any of their comrades' heads above the water, and then, their boat being half full of water, and already having upward of forty men on board, made for the shore. On the morning of the twenty-fifth of January they walked as far as Yokoska, to the Franco-Japanese dockyard, and were there well taken care of until the steamer Bombay, which had gone down to the scene of the disaster, took them on board, and ultimately transferred them to the American steamer Yangtze, which brought them to Yokohama.

A distinguished Swedish chemist, Dr. Grusselbach, a professor of the University of Upsal, has come to the conclusion that those Egyptian mummies which are found in the ancient tombs on the Nile in a complete state—that is to say, without having been deprived of their brains and entrails, like most mummies—are not embalmed at all, but "are really the bodies of individuals whose life has been momentarily suspended, with the intention of restoring them at some future time, only the secret of preservation was lost. Prof. Grusselbach addresses many proofs in support of his idea—among others, his experiments during the last ten years, which, he says, have always proved successful. He took a snake and treated it in such a manner as to benumb it as though it had been carved in marble, and it was so brittle that, had he allowed it to fall, it would have broken into fragments. In this state he kept it several years, and then restored it to life by sprinkling it with a stimulating fluid, the composition of which is a secret. For fifteen years the snake has been undergoing an existence composed of successive deaths and resurrections, apparently without sustaining harm. The professor is reported to have sent a petition to his government, requesting that a criminal, who has been condemned to death, may be given to him to be treated in the same manner as the snake, promising to restore him to life again in two years. It is understood that the man undergoing this experiment is to be pardoned." Of course, if a man can be kept in a state of suspended animation for two years, he may be kept for two thousand years, and if the professor succeeds, we may lay up a few specimens of our contemporaries for exhibition in the thirty-ninth century.—*Appleton's Journal.*

In Japan marriage is the universal habit. Almost the only exceptions are to be found in the case of certain monastic orders and among the ladies in attendance upon the empress. Men marry at about twenty and women at fifteen years of age, but except in the Buddhist sects the act is marked by no religious ceremony. Among the presents displayed is always to be seen a double-lipped vase. At a given moment one of the bridesmaids advances, fills it with sake, and presents it alternately to the bridegroom and bride until the goblet is emptied. Under this symbol the idea is conveyed that together the husband and wife must drink the cup of life to the dregs, whether it be filled with ambrosia or with gall.

The Pneumatic Propelling Company made another successful trial with their experimental car last night, between the hours of eleven o'clock and midnight.

The car, loaded with passengers, ran at a good speed from the foundry down to Canal street and back, without the slightest hitch or accident of any kind, every one present seeming to be fully convinced that the new motive power is practically a success.—*Picayune, April 7.*

Always endeavor to learn something from the information of those thou conversest with, and to put thy company upon those subjects they are best able to speak of.

AN HONEST STATEMENT.

The Rev. L. C. Matlack, a presiding elder of the Northern Methodistists in New Orleans, writes for the organ of that church in St. Louis, (the *Central Christian Advocate*), March 16, and makes some admissions that are refreshing for their candor. Would that his brethren could see it as he does. We quote the conclusion of his article:

Up to the time of the war for nationality, the two Methodisms were on equal grounds, relatively. Each encroached on the "border territory." Both had ignored the "Plan of Separation," practically. But, with the humiliation of the South, the evacuation of their churches, the flight of her ministers, our church, by national authority, occupied and held many pulpits of the Methodist Episcopal Church South.

No other denomination did just as we did in that matter. Temporary occupancy of pulpits, in some instances, occurred with others; but our ministers stood in the attitude of conquerors. They differed little in appearance from the relation of invaders. It did not so appear to them now. They may stigmatize it with unwarranted severity, we may think; but their ox is gored by our bull, and we do not feel the pain. We should remember that.

If our occupancy of the pulpits of the Church South had been only for the purpose of suffering the preaching of the word to deserted congregations, and, on the return of their pastors and the restoration of peace, had been yielded up gracefully, it would have been better for the peace of the Methodist family. But such was not the case. Claims were set up to the property on questionable grounds. Possession was retained until compelled to relinquish by civil authority.

If this statement be correct, then our ecclesiastical relations with the Southern Methodistists are, in this aspect, most unfortunate. How much of wrong, in purpose or practice, is involved, will not now be measured. But did we not wrong our brethren in this thing? Is not confession of wrong far better than defense of wrong? Can we ignore our duty, and be guiltless before God and the church of Christ? Or can we sustain true dignity of character without making the *amende honorable*, wherever it is due?

To the Southern community outside of the church we sustain a very equivocal relation. As well-pro-nounced Union men, the relation of all our ministers to Southern society generally is right, yet very unpopular; but the action of some, as politicians, has been unfortunate, and has given the church a false position. The right of every man to act politically is understood; but for Methodist missionaries, who are sustained by church funds, to become partisan politicians—advocating on the stump Republican nominations, and even taking nominations to office—which in some cases were accepted, and the ministry forsaken therefor, is not right. Our opponents, Churchmen and others, know well that such action does not increase piety. They know, also, that the salary of office is double that of a preacher. This manifest selfishness is a damage to Christianity. The effect of this in affixing stigma of self-seeking and office-hunting preachers to our ministry, is a constant and pressing evil. They are suffering from it, who ignore and condemn it. And all our Southern Conferences should be as united in their sentiments against that, as they are a unit in favor of lay delegation. Some of them have pronounced against it most emphatically, and others doubtless will do the same.

We then resume by saying that our attitude as a church toward the South, both ecclesiastically and politically, needs to be carefully examined. It will be found to be offensive in three respects: 1. Our loyalty to the national government. 2. Our occupancy and claim to Southern Church property. 3. The partisan political action of some of our ministers.

The offense of our loyalty is inevitable and cannot be removed by us. The action in relation to church property is of very questionable propriety. And the political phase of the case is unquestionably wrong. Such are the conclusions naturally reached.

He who never changes any of his opinions, never corrects any of his mistakes.

For the Advocate.

SONS OF TEMPERANCE.

Although drunkenness with its attendant evils, poverty, wretchedness, crime, disease and death, has fearfully increased in our midst since the war, there has been but little systematic effort made to check its devastating course. A renewed interest is now, however, being displayed by many who formerly were actively engaged in the temperance reformation; their dormant zeal is aroused; many professing Christians are also awakening to a sense of the solemn duty incumbent on them, as the Master's stewards, to take a more decided part in some organized temperance movement. To such persons we briefly present the claims of the order of the Sons of Temperance.

This society was established in the city of New York, in 1842, by a few temperance men, who saw the necessity for a temperance organization of a more permanent character than the old Washingtonian or teetotal societies; an association that should bind its members to total abstinence, elevate their characters as men, and afford mutual assistance in adversity and distress. This order soon spread all over the United States and the British Provinces, Great Britain and Australia. The first division of the "Sons" was organized in New Orleans in 1844, and in a short time afterward divisions were instituted in all the principal cities in Louisiana, Mississippi, Alabama and Texas. Like all kindred associations in the South, it suffered during the war, but it is again in active and successful operation. It is based on the principles of love, purity and fidelity. Its pledge is neither to make, buy, sell or use as a beverage any intoxicating liquors. Persons, male or female, from fourteen years of age upward may be admitted into this fraternity. Its expenses are paid by members paying a small fee when initiated, and small weekly dues. This order has its subordinate divisions, which meet weekly; its grand or State divisions, which hold quarterly and yearly sessions, and a national division holding a yearly congress of representatives of grand divisions.

We earnestly ask, and we think we have a right to the sympathy and support of Christian men and women.

This frightful curse, intemperance, consigns every week in these United States, more than one thousand of our fellow-creatures to a drunkard's grave and a drunkard's hell. We do not put our society in place of the church, but we claim that we have been instrumental in reclaiming thousands of inebriates who never entered the house of God until they became Sons of Temperance. We claim that we found homes wretched, miserable and in want, but we left cheerfulness, comfort and plenty; we found hearts sad and desolate, but we inspired joy and hope, and aspirations after a higher life; and we know that we have saved many thousands of our youths from the evils and perils of forming drinking habits.

We again entreat the active co-operation of all who wish to see temperance progress. We propose to organize divisions of the Sons of Temperance in every town and village in the land.

Applications for charters or information about the order can be made to John Crebbin, grand worthy patriarch, care of Dr. Doernum, Bible House, New Orleans, or Thomas H. Jones, grand scribe. C.

The Jews in Jerusalem are again in a starving condition, and appeal to Sir Moses Montefiore for assistance. The money distributed among them does not improve their condition. They live in idleness upon it, and are on the verge of starvation whenever the funds distributed among them are eaten up.

The Christian Advocate.

OUTSIDE THE CATHEDRAL.

BY JOHN K. STANTON.

What temple can compare
With this blue dome of air,
Which the Almighty Hand hath shaped and
rounded?

What organ-pipes can blow
The tones that come and go,
When storms rush by, and thunder's trumpet
bath sounded?

The finest human wit
Can only miniature it,
And hint to us, in small, the vastly greater;
By wall and trembling spire,
We climb and point up higher,
And symbolize the work of the Creator.

Upon the organ's note
We rise and softly float,
And lift our souls above the clouds and thun-
der:

We gather strength to wing
A heavenward flight, and sing;
Or worship best when lost in silent wonder.

LOCAL PREACHERS.

Mr. Editor: In your paper of March 19 I read an article from the pen of "W." on "Local Preachers." Much that he says I fully indorse, and was pleased to see the question agitated in advance of the session of the General Conference. Much that he said, I think, will apply with equal force to the itinerancy. Certainly the local ministry ought to be made more efficient; but is there not danger that in the repairs you may destroy it entirely?

Methodism is peculiar and distinctive—"a wheel within a wheel," and then two or three more wheels, and every wheel necessary to the machine. Destroy the local ministry, and you cut off one of the strong arms of our power.

Many districts are too poor to support a pastor. The missionary funds are not sufficient to send missionaries everywhere, and yet these people need the gospel. The local ministry is the only chance to supply such districts.

Some of our circuits are so large that the pastor cannot meet all its demands. People will marry and have to die; on these and other occasions they require a minister. Who will they get? The pastor may be thirty miles off and engaged, or he may not reside even in the bounds of his work. They must have a local preacher, or a preacher of some other church. But "W." admits all these facts, and wants them to do more. Now, sir, I want "W." to demonstrate, if his criticisms be correct, just how these brethren are to live. They receive no support from the church, the pastors can barely subsist in more than half the charges, and still "W." blames these ministers, who receive nothing at all from the church, because they "sell goods," make cotton, practice law and medicine, and carry on various manufactures. What would he have them do? live on air, water, or be fed by the ravens? These are legitimate occupations. Their zeal in these things he objects to, and yet Paul said: "Be diligent in business." I suppose he thinks they are all rich, and have annuities to draw upon. I think it would be a poor evidence of their usefulness and influence as ministers if they were not diligent in business.

That they do not study enough is too true. But in this does not the toe of the peasant tread on the heel of the courtier? Are they at all behind itinerants, considering that there is a necessity that they should be secular?

They, in many cases, may not preach often enough, but as a class I think they preach as often as there is a demand that they should. A majority of them fill from one to four Sabbaths in each month of the year. The truth is, many itinerants never invite them to preach, or take much notice of them any way until the examination of their character.

He intimates that they should enter the itinerancy. I ask if the man is not the best judge of that himself? It does not suit their circumstances. Many of them you would not receive in your Conferences, and yet they can be useful as local preachers. Apply your rule and you will force into other churches many conscientious, good men, with their families and influence, where they can preach the truth as it is in Jesus,

and accommodate their circumstances and condition of life.

I think the action of the last General Conference timely and sufficient on the subject, and that the only thing now requisite to make it work is for the pastors and church to give them that respect their office and service so justly merit.

Keep them on the track. Do not push them off. Do this and the local preachers will be whole shod, and God will, as he has heretofore, honor their ministry.

Wm. A. EDWARDS.

ACTONVILLE, ALA., March 25, 1870.

NEWS FROM THE CHURCHES.

A letter from Rev. W. H. Wild, of Opelika, under date of March 28, says: "I am glad to report our church in Opelika large and flourishing. The membership is steadily increasing; congregations large. Our church is not large enough to accommodate all who would come. We hope soon to build a new one. The Sunday school numbers over two hundred pupils and thirty teachers. A better superintendent than Rev. E. D. Pitts is not to be found in the whole Conference. Everything in connection with the school is full of life, and such a corps of teachers as we have is hard to find."

Mr. Editor: The Brandon district extends from the town of Brandon eastward, along the line of the Vicksburg and Meridian railroad, to the western boundary of the Mobile Conference. Most of the circuits are contiguous to the railroad. Three or four of them are distant perhaps a day's ride, over some of the worst road anybody except a Methodist preacher ever traveled.

At all the most important business points along the line of this railroad the Methodist Church is well represented, except in the matter of church buildings. We have not a house of our own to worship in, from Jackson, for sixty or seventy miles, until we reach Newton station. Here, through the energy and perseverance of a few brethren, there has been erected a very respectable and comfortable frame church. At Lake station and at Morton we worship in houses that are common property for all the "sects," as Bishop Green would say. At Forest we are indebted to the uniform courtesy of our Presbyterian brethren for the privilege of using their house, which is not yet completed, but which, when finished, will be a monument to the liberality of one man chiefly, I am told, who loves his church.

Our people in Brandon are engaged in building a new church. General Sherman's army, not having the fear of the Lord before their eyes, "sacked and destroyed" the only temple of worship in the place, which was an old frame church, in which I had the privilege of preaching nearly thirty years ago. The citizens of this thriving city of the East are making desperate efforts to regain what they lost, and even more, in the way of church edifices. The Presbyterians have built and nearly completed a new frame church. The Methodists have begun and laid the foundation of a brick church. They are founding it upon rocks. May it prove to be founded upon "the Rock." "The Church" people have just about completed a handsome Gothic frame structure, with stained glass in the windows, variegated, with steeple reaching far up toward heaven, surmounted with the cross. These worthy enterprises all being undertaken about the same time, some think, is rather "too much of a good thing." Not so. No investment will pay better. Good schools and good churches pay large dividends to any community. And then, if I am rightly informed, the Lord has raised up friends in other parts to help the membership of the Presbyterian and Episcopal churches—foreign aid has been successfully invoked in their behalf. As yet no special effort has been made to obtain help from abroad for the Methodist church. We have the promise of help from New Orleans, and hope to realize it. But we have sent no one abroad specially on that

business. Others have, and have been successful. Perhaps you are ready to say: "Don't come here." Well, perhaps we may not. But there are many in New Orleans who are growing rich from the labor of the country people, who might invest a little in this way without detriment to their interest. There are still a greater number in the North and East who should lend us a helping hand. Not a few have responded when the call was made, and if the necessity should arrive I hope our brethren will feel bound to afford them the opportunity of lending a little more to the Lord.

The preachers are all at their posts, working away, as they have opportunity from the rain and mud and cold. The people, I think, are generally well pleased with their pastors; and a very large number of comfort to the poor presiding elder is that we succeeded in having a larger attendance at the district stewards' meeting than I have seen during a ministry of nearly thirty years. A spirit of great liberality characterized their deliberations. I will not say how many were present, nor what they did, but reiterate the former statement.

Now we want houses of worship of our own. The Methodist Church is the pioneer church in this country, and it is a shame that she should be behind in this matter. To succeed in this respect we need earnest, zealous, faithful preaching to the people. We need prayer and faith, and love for God, among the people. Then the means will be found when all hearts are made right. We need "more grace." God give it to us abundantly!

I believe the preachers of the district are all good men and true, willing to work; and if encouraged as they should be, by the prayers and offerings of the church, they will come up at last, bringing their sheaves with them.

We have a great variety, in the ministry on the district, of talent, trades and professions.

Your brother,

H. J. HARRIS.

FOREST, MISS., Feb. 23, 1870.

Northwestern Louisiana Correspondence.

Mr. Editor: The community, and especially the inmates of the college, were made sad, on Wednesday, the ninth instant, by the sudden and unexpected death of Lucy M. Stuart, daughter of Rev. C. B. Stuart. Lucy was ten years old, and the pride of the family. Her clothes took fire the day before and she was badly burned, which proved fatal.

We have just returned from a tour on the district. We found the preachers at their posts, and in the main in good spirits, with the prospect of having a prosperous year for the church.

The salaries of the preachers being fixed by the first Quarterly Conference, we hope and insist that the circuit stewards make it a matter of conscience to collect one-half the amount during the spring time, while the people have money, and when the preachers need it more than at any other time.

The great difficulty in circulating the Advocate in these lands is the want of mail facilities, it being in many instances twenty-five and thirty miles to the nearest office.

So far as we can discover, the planters of these parishes are preparing for another tremendous cotton crop. What a pity they don't plant more corn and less cotton. They are now paying \$2 per bushel for corn, and in proportion for pork to feed freedom, to make cotton to buy more corn and pork. Nobody admits that to be wisdom, yet everybody does it.

The temperance question is agitated now and then, and here and there. Public opinion evidently favors the traffic in alcohol, and public taste favors the practice of using it as a beverage. We are at war with both. Our parish temperance society still exists, and is doing good. We keep up monthly meetings at Mansfield, and harangue the public upon the subject. We boast more than two hundred persons who have pledged themselves to total abstinence.

By the by, when you get to Gen-

eral Conference, look on page 126 of the Discipline, and add, as a further sample of imprudent conduct, "Drinking intoxicating liquors as a beverage," that the church may know how to deal with habitual tipplers. [Say "habitual tippling."—Ed.]

While on the subject of changes, we hope that all that part of the Discipline which relates to church meetings, included between pages 93 and 100, will be stricken out. We think that experience has shown that church meetings, as there recommended, are impracticable.

If there is nothing better proposed, we hope the creed will be appended to the present form of receiving members into the church, that when a candidate for membership is to be baptized, we won't have to hunt out another place to read.

Again, who ever heard of a presiding elder on a large district having his district represented in a district stewards' meeting? Instead of electing stewards every year to such meetings, and never getting them there, we propose that the circuit stewards where the presiding elder lives be authorized to estimate his salary, and then let each circuit and station pay a pro rata percentage on the claims of their respective preachers—a per centage equal to the salary of the presiding elder. This would be less troublesome and equally satisfactory.

We are not much in favor of changes, but we have suggested these for convenience' sake.

J. PIPES.

MANSFIELD, LA., March 22, 1870.

History of Celebrated Women of China.

TRANSLATED BY REV. J. W. LAMBUTH.

HISTORY OF TSOONGTSE, THE WIFE OF LING, DUKE OF THE TSEE COUNTRY.

Tsoongtse was the daughter of the Duke of the Lung country, and she became the wife of Ling, Duke Ling had married, previous to this, a woman of the Lu country, whose name was Lingke. Her first son was named Kwong, and was the lawful heir to the throne. Tsoongtse and her sister Dsoongtse were both married to the duke as well, and were much beloved by him.

Tsoongtse's first son was called Ya. Her sister plead with the duke to acknowledge him as the lawful heir to the throne, instead of Kwong, the first-born, and he gave his consent. But Tsoongtse opposed it, and said: "It cannot be so. It is not right to set aside the law and custom of past ages, and it is impossible to conceal this from the knowledge of the ministers of State. To do this without sufficient cause will only bring trouble upon the country. I trust you will repent of the step you have taken before it is too late."

But the duke said: "I am here and will see to it." Tsoongtse said: "I am opposed to it, and unwilling that it should be so. If you still persist in having it thus, it will be the beginning of trouble." Finding she could avail nothing, she destroyed her own life. But the duke cared for none of these things, and immediately drove out Kwong from his presence, and appointed Ya to be the lawful heir to the throne, and Kauru to be his teacher and adviser.

When the duke was taken ill the prime minister went in disguise and secretly brought back Kwong into the palace, and when the king died he was again proclaimed the lawful heir, and Kauru was slain. All this trouble was brought on by the duke's not listening to the advice of Tsoongtse, and for this she is deservedly praised by all the literati for her wisdom and understanding. The Book of Odes says: "Whoever will hear and act according to her advice will not in the end have cause to repent."

The prime minister of the Tsing country saw that Kauru and Kwong, of the Tsee country, were not men of good character. Kwong was a lewd character, and his mother was not of an illustrious family, and it was just that he should not be the successor to his father. But aside from this, all the officials of state had a right to inquire the reason of his father's actions. Tsaytsé, being the prime minister at the time of the duke's illness, went in disguise and

brought Kwong back to the palace, and at once, as soon as the death of Kwong's father was announced, slew Dsoongtse, the younger sister of Tsoongtse, and cast her body out in front of the palace. Ya, the son of Tsoongtse, with one of his officers named Ku, had made their escape, but were arrested at Kutok. Kauru, the teacher of the young prince Ya, was also arrested, and his head was severed from his body. The brother of Sing, the duke, hearing of the death of his brother, and of the disturbed state of the country, came with a force and drove out Kwong, the lawful heir to the throne, slew Ya, the young prince, and took the reins of government. All agree that Tsoongtse was a woman with a good understanding of the ancient laws of the country, and saw at once what the result would be by placing her son in the place of Kwong, the lawful heir to the government of his father. This happened about four hundred years before the Christian era, at the time when Wayle was Emperor of China, shortly after the death of the great scholar and sage, Mencius.

HISTORY OF NUKE, WIFE OF KING WAY, OF THE TSEE COUNTRY.

When Way became king the government of the country was given up to one of his high officers for nine years. There was, at this time, a wicked officer, named Tser-puoo, who took to himself great power, and opposed all men of learning and ability. There was an officer at a place called Tsihnik, who was faithful in the discharge of all the duties of his office, but Puoo daily misrepresented him before the king. The officer of a place called Ootar was a rebellious and wicked man, but Puoo daily represented him before the king as a good officer. Nuke, the queen, said to the king: "Puoo is a man of bad character, and it would be well to dismiss him from the service of the country. There is a literary graduate in the northern part of the kingdom who is a wise and prudent man, in whom you can trust." Puoo heard of the queen's statement to the king, and he hated her. He also reported that "when she was young and at her father's house she was too intimate with this literary graduate to whom she referred." The king, hearing this report from Puoo, was quite angry, and caused Nuke, the queen, to be shut up in the ninth story of the palace, and sent to see if it was true. Puoo then secretly sent presents to all the princes and those holding office in the kingdom to speak evil of the queen, with the design of having her executed. When the presents were received then they spoke evil of Queen Nuke, and it came to the king's ears. King Way finding, on investigation, that their accounts did not agree, called for Nuke, the queen, to come into his presence, and he asked her of the matter. She replied: "I inherited from my ancestors nothing but this body, and I was born in an obscure place, and an humble cottage, and my people were poor, but I was raised to the position I now fill, to be one with you and to serve you. With joy I have done all to please you, and have desired to have everything according to your taste, and for more than ten years I have had great affection for you. But today my character has been ruined, and I am stamped with eternal shame. But I esteem it a privilege that I am again permitted to see your face and to speak with you. I have heard that where precious stones and pearls fall into filth and mire it does not injure them, for it can be brushed away, and for this reason no one has any doubt or fear about its quality. One of the classics says: 'When in a field of melons you should not stoop to adjust your shoes, and in passing through the plum orchard you should not raise your hand to adjust your hat, lest you be suspected of theft!' How can I then escape censure? For my acknowledgment of the talent and learning of this literary man I have done wrong. Having already had the appearance of evil, there were many who received presents and listened to the wicked devices of a man of bad character, hoping that I might not be able to clear myself

SHANGHAI, CHINA, Feb. 8, 1870.

THE OLD WOMAN AT ROME.

Mr. Editor: Romanism is in our view adapted to 90 per cent. of mankind—as a mere infidel machine it lives on trinkets, toys, candies, tin whistles, baby drums, diversions, paregoric, pain-killing nostrums, kites and curses. It takes old graven-headed babies and rocks them to sleep, or amuses them, or dominates over them like a fretful old wet nurse. Protestantism was made for men. Evangelical religion can only be comprehended by grown-up souls, and some such souls are, grown up very early in life, and need no toys, cat no more chalk-water milk, are so to speak, born men and women. But Romanism has bred only pining infants, paupers and parasites, and they never leave their hoop, marbles and wet nurses. They never think—that is a sin; they are everywhere crying for rattles, ribbons and rituals. Ritualism feels at home among old octogenarian infants. Manly piety could never be divined too infantile at forty, at fifty, and at seventy; and sham, superficiality and ritualistic whitewash are accepted as a demonstration that they never rose to the height of manly worship, or saw in the mission of eternal truth the central principle of the scheme of human redemption.

One reason that the world is not reformed is because everybody who has others make a beginning, and thinks not of himself.

The Christian Advocate.

SATURDAY, APRIL 9, 1870.

TEN YEARS IN ROME.—NO. I.

THE PROPAGANDA.

As the traveler enters the Piazza di Spagna—that little colony of great foreigners, and round which cluster all sorts of dealers in coins, *objets de vertu*, statuary, antiques, etc., from the artistic Castellani downward—he perceives, at the rear of the column erected to commemorate the definition of the immaculate Conception in 1854, a plain, unpretentious edifice, near which flaunts the French tricolor, and the arms of Great Britain adorn a large and stately palazzo. This is the college of the Congregation of Propaganda Fide. A stone over the entrance informs him that in the year of our Lord 1662 Gregory the Fifteenth, Pontifex Maximus, erected this edifice for the diffusion of Christian knowledge throughout the world. Here, as from a center, radiates all the missionary enterprise of Roman Catholicism. From the furthest shores of the Pacific to the heights of the Himalayas its influence is felt; felt too by the haughtiest prelate that ever wielded a crozier and the humblest pupil teacher in a day school. It penetrates to the councils of monarchs and the senates of nations, as well as the family closet and the secrets of the closet. When the pontiff on Easter day gives his benediction to the city and to the world, *urbis et orbis*, it is no vain boast. From Rome one astute brain manages the Catholic world.

I have already recorded my experiences on becoming acquainted with this functionary for the first time, as well as a general description of the building. Let us now endeavor to epitomize in this paper some of the vast plans of action which the propaganda lays down for itself; plans which each successive prefect augments according to his ability and zeal for the good of the church. The venerable white-haired prelate, Cardinal Frauzoni, who presided over this college when I first knew it, has passed away. His whom secretary—since created a cardinal—Barnabo, rules in his stead. He is a man of thorough devotion to the ultramontane cause, suitable obstinacy, not too much learning, and with a keen eye to business, and marvelous administrative talent. Never calculated to win deep affection; a person with whom it is impossible for the most imaginative to associate a love passage or a romance; an astute lawyer, a zealous plodder, seeing only one object in life for which he will make any sacrifice, he seems the fit man for the place. Cardinal Barnabo is assisted by a secretary of his own choice, Monsignor Jacobini, in every way a counterpart of his master, whose successor he will be. Looking at both the prefect and his aid you recall the astonishment of Goldsmith's rustics: "Still the wonder grew that one small head could carry all he knew." This I think will be obvious when we consider the multifarious ramifications of the society.

Its principal objects as narrated in its charter are, education of missionaries for foreign countries, maintenance of recent converts, the publication of books in various languages, and "all things whatsoever conducive to the propagation of the doctrines of the Holy Roman Church." It has a body of students, distinguished by their scarlet sashes, who are trained for missions to the most remote countries. At their recreation time you may hear a perfect babel of conversation. There is a negro talking to a Mexican, a Maronite from Lebanon with a Capt. English, Irish, Scotch and Americans, all have their national colleges, and yet are found here. China, India, in fact almost every nation under heaven has here a representative. On Epiphany there is a speech-making in the hall, and in the days of the late Cardinal Mezzanotte there was one listener who understood nearly all he heard; but it will be long ere such another arises.

Surprise is often expressed at the lack of culture in Roman missionaries. This is only too means strange. A boy who has never wandered beyond the enchanted circle of the Hartz, being useless for anything else, but having a talent for saying his beads, is supposed to have a vocation to the priesthood. His friends intercede for the curé and the bishop, and a subscription is got up, enough to send him in the cheapest way to Rome. He has his open letter of commendation written in Latin, which secures him guidance on his way. He is addressed like a connoisseur of goods "To Cardinal Barnabo." I remember once seeing four such specimens. They were about stuffed with straw, coarse parchment, and carried a general appearance of grease and ingr. It would have puzzled Gall to detect the lump of piety in them; but these were the raw material of missionaries whose pattern is Francis Xavier. They are not learned, except in sufficient Latin to say mass

intelligibly and pass ordination. Their idea of conversion is to baptize; their display of the glory of the gospels is by rosaries, pictures and crucifixes. "We like this," said a Buddhist to one such, "for all the barbarians are becoming Buddhists." Any means are at the missionary's discretion, if the gross total of his converts increases. As to their sincerity or conviction, that is quite another thing. Equipped with two suits of clothes, a breviary, vestments for mass, a chalice and paten and crucifix, a consecrated slab for an altar, and a worn cloak, the newly ordained priest is sent wherever the prefect determines. It is a question of want of men, not the fitness of the men sent. The mission field is mapped out before him, and he disposes of his available forces where he can to the best advantage numerically. You will find the phlegmatic Teuton, equally with the ardent Asiatic, fired by one impulse—success. They will convert, and be heard of as successful men by their old tutors and the prefect. Ignorant, uneducated, boorish, unacquainted with the commonest forms of society, but yet zealous almost to frenzy, brave, determined, undaunted, they are the men the propaganda can use. Every year many a youth goes to certain death from yellow fever in Sierra Leone, to pestilential lagoons in southern India, and to the treachery and cruelty of Japan and China; but he cannot look back or ask why.

This is but one of the many careers of the propaganda. We will endeavor to give the heads of the foremost.

A second is education, in schools, colleges and convents. The prefect is perfectly amiable with the Jesuits, and adopts their educational plans. The Roman College is entirely under their sway, from divinity and humanity classes to rudimentary Latin. They turn out clever men at times, but it is despite their system. They seem to suspect that every boy is radically bad, and will make an evil use of knowledge. Consequently, to enroll him in a confraternity, to make him a precocious religious, is far more advantageous in their eyes than turning him out a good linguist or general scholar. The late Dr. Arnold ruled that it is prejudicial to a boy's morals to let him see you suspect him of evil. The Jesuit acts on the reverse supposition. In Rome the Jesuit system of education is at the root of popular ignorance and precocious vice. But in countries like Great Britain, France and the United States, other tactics must be adopted. Here a public opinion more or less hostile to and suspicious of Rome reacts upon the emissaries of the propaganda. It has long sought to undermine the quality of Protestant education, by causing the public to believe that its seminaries are purer than those of non-Catholics, and impart a higher religious training. Just here is the secret of the success of convents. Protestants send their children to convents, in doubt of other schools. It seeks to gain pecuniary support from its avowed enemies, and, cautiously creeping step by step, to obtain the entire rule in educational matters. It held this rule in Italy until the dissolution of monasteries brought to light its great evils. It was found that almost every cent left for secular education had been perverted to religious uses. Let it be carefully examined, and the plan of the propaganda which it is now sought to carry out in Ireland, Great Britain, the United States and France, viz., to subvert all scientific and secular education to purely religious training, is the most dangerous weapon yet forged by Cardinal Barnabo.

A specimen of the style of religious training in Catholic schools may be fittingly given here by way of parenthesis. The Rev. J. Furniss, a Redemptorist father, published one of a series of tracts addressed to children, in 1864, "permeated superstitious," which are widely circulated in this country. It is a description of hell, skillfully adapted to fill the untrained mind of childhood with indelible terror. The visions of St. Francis of Assisi and St. Theresa, and the profane speculations of St. Bonaventure, are gravely related as absolute facts. Hell is about four thousand miles below the surface of the earth, is illimitable in extent, and filled with dark fire and sulphur. The Devil is a huge horned monster breathing fire, fastened to a beam with chains of red-hot iron, and waited upon by millions of little devils, whom he dispatches to the four quarters of the globe, to tempt children to sin. If a little spark of hell fire, less than a pin's head, were thrown into the ocean, "in one moment it would dry up all the waters of the ocean and set the whole world in a blaze." So, "if one single body was taken out of hell and hid on the earth, in that same moment every living creature on the earth would sicken and die, such is the smell of death from one body in hell." An eternity of burning, choking, drowning, flogging and fighting in this abode of horrors is promised to all children who neglect mass, confession and catechism, and do not obey their priests.

CLOTHES.

My sight not being so good as it was, my granddaughter is in the habit of reading the *Times* aloud to me daily. Possibly, this is not always a labor of love, I being a rather fidgety listener, though I trust not one of those conceited old persons who consider that to minister unto them is to the young a privilege invaluable. There have been times when, perceiving Netty's bright eye wander, and her voice drop into a monotonous absent tone, I have inly sighed over those inevitable infirmities which render each generation in its turn dependent on the succeeding one; times when it would have been easier to me to get up a peevish "There, that will do," and forfeit my own undeniable pleasure, than thus to make a martyr of my little girl. But then, few can have lived to my length of days without being taught the blessedness that lies not only in labors of love, but labors of duty; and I am glad, even at the cost of some personal pain, to see my grandchild learning this lesson; conquering her natural laziness, accommodating the frivolous tastes of youth to the prosy likings of old age, and acquiring, even in so small a thing as the reading of a newspaper, that habit of self-control and self-abnegation which we women have to practice, voluntarily or involuntarily, to the end of our lives.

So, after going steadily through the leading articles—(by the way, what a curious fact of modern intellectual advance is that page of *Times* leaders, thought out with infinite labor, compiled with surpassing skill, influencing the whole world's destinies one day, to become the next mere waste paper)—after this I said to Netty, "Now, my dear, I leave the choice to you; read anything that you consider amusing."

"Amusing!" As if she doubted whether anything in the *Times* could come under that head. But shortly her countenance cleared. "An American Bridal Troussau—will that do, Grannie, dear?"

I nodded, and she began to read.

"Extraordinary Marriage Ceremony. Cuban Don—Young lady of New York. Will no doubt amuse English ladies."

"Why, I declare, it's a list of her clothes! And such a quantity; only hear:—

"One blue silk, ruffled to the waist; one green and white double skirt, trimmed with black lace; one light blue silk chintz, flowers down the skirt, trimmed with deep fringe to match; one steel-colored silk, with purple velvet flowers, trimmed with wide bands of purple velvet, edged with black lace; a surplus waist trimmed to match the skirt; one Swiss dress, the skirt formed with clusters of ruffles and tucks, the waist to match; one white Swiss muslin dress, five flounces, edged with narrow Valenciennes lace; one white Swiss dress skirt, with three flounces, three ruffles on each flounce, pink ribbon underneath; one Swiss dress tucked to the waist; six dresses of poplin, merino, and Ottoman velvet;—

"Stop, stop! let us take breath, child. Poplin, merino, Ottoman velvet; and how many more was it? Swiss muslin, silk chintz, and something with a 'surplus waist,' whatever that may be."

"Indeed, I don't know, Grannie, mamma," laughed the child; "though you do think me such an extravagant young lady. Not so bad as this one, anyhow. Just listen:

"Eighteen street dresses, of rich, plain and figured silks, double skirt and two flounces; also more antique, made in the newest and most fashionable style; twelve afternoon dresses, consisting of grenadines, organdies and tissue, all varied in styles of making; twelve evening dresses, one pink embossed velvet, trimmed with the richest point de Venise; one white silk tunic dress, skirt embroidered and trimmed with blonde lace; one pearl-colored silk, double skirt, with bouquets of embossed velvet; three white erape dresses, ornamented with bunches of raised flowers; three white tulle dresses, with colored polka spots of tulle silk, to be worn over white silk skirts; six dinner dresses, one white silk embroidered with gold; one pink moire antique, very elegant side stripes; one blue silk, with lace flounces; one amber silk, with black lace tunic dress; one black moire antique, trimmed with velvet and lace; one white moire antique, with puffs of illusion, and the sleeves made in Princess Clothilde style; twelve muslin dresses, made with flounces and simple ruffles;—

"That's a mercy, girl. I began to think the only 'surplus' article the lady possessed was her husband."

"Grannie, how funny you are! Well, will you hear to the end?"

"Certainly. One is not often blessed with such valuable and extensive information. Besides, my dear, it may be of use to you when the prince comes."

(This is the name by which we have always been accustomed to talk openly of Netty's possible, doubtless, she thinks certain, lover and hus-

band. Consequently, to no ignorant lady's maid or silly young play-fellow, but to her sage old grandmother, has my child confided her ideas and intentions on this important subject, including the imaginary portrait, physical and mental, of "the prince," what she expects of him, and what she means to be toward him. Also, in no small degree, what they are both to be toward their revered grandmamma. Poor little Netty, she little knows how seldom is any dream fulfilled! Yet, if never any more than a dream, better a pure than a base, a high than a low, a wise than a foolish one.)

"When the prince comes," said the little maid, drawing herself up with all the dignity of sixteen, "I hope I shall think a great deal more of him than of my wedding, and that he will think more of me than of my wedding clothes."

"Very well, my dear, I trust the same. Now, go on reading."

She did so; and I here ent it out of the newspaper entire, lengthy as the paragraph is, to prove that I have not garbled a line; that I do "nothing extenuate, nor ought set down in malice," with regard to this young American bride, whose name is not given, and of whom I know nothing whatever:

"Three riding habits, one black Canton crepe, trimmed with velvet buttons; one green merino, English style; one black cloth, trimmed with velvet; three open cloaks, one white merino, double cape, elegantly embroidered and trimmed with rich tassels; one white cashmere, trimmed with blue and white plaid plush; one grenadine, with ribbon quilling; twenty-four pairs of varied colored satin slippers, richly embroidered; twelve pairs of white satin and kid slippers, plain; twelve pairs of white satin and kid slippers, trimmed with ribbon; six pairs of mouse-embroidered slippers; one pair of kid India mouse, embroidered; one green and gray chenille, embroidered; one purple and black silk, embroidered; two pairs of brown Morocco plain French, all made a la Turque; six pairs of slippers, variously embroidered in various colors for the toilette; twelve pairs of silk and satin Frangais, dress, habit, and walking gaiters; six pairs of walking and winter gaiters, double soles; six street bonnets, made of the most recherche Swiss straws, trimmed with handsome ribbon; one opera bonnet, made of white lace and long fancy marabout feathers; one black and white royal velvet bonnet, trimmed with cluster of pink roses, intermingled with black velvet leaves; six rich head-dresses, consisting of chenille, pearl and gold, and other rich materials; six sets of hair pins, of coral, turquoise, pearl and gold ornaments; six brette capes of white tulle, trimmed in various styles of fancy velvet chenille and ribbon; one Bruxelles point applique cape, trimmed with puffs of illusion and ribbon; one dozen of French embroidered handkerchiefs, with initials richly embroidered in the corner; one dozen of real point lace handkerchiefs; one dozen of guipure lace handkerchiefs; one dozen of pineapple handkerchiefs, embroidered and trimmed with lace; one dozen of fancy illusion sleeves for evening dresses, made flowing a la favorite; two dozens of glove-tops to match sleeves; one pair of glove-tops of point d'Alençon, trimmed with orange blossoms; six sets of fancy wristlets, made of velvet and laces; six French parasols, made of the most magnificent embossed velvet, with rich Chinese carved handles; also three coquette parasols, simple and elegant; twelve pairs of open-worked and embroidered China silk hose; twenty-four pairs plain silk hose; twelve pairs of Paris thread hose, open-worked; twelve pairs of Paris thread hose, plain; twenty-four pairs of rich French embroidered elastic; twelve pairs of China silk under-vests; twelve dozens of French kid gloves of various colors; twelve pairs of gamuflots, buckskin and kid; twelve pairs of traveling gloves, gamuflot top. The trousseau lace dress was the exact pattern of that used by the Princess Clothilde at the selection of the Empress Eugenie, having been reproduced in Europe expressly for this occasion. The lace is point plat, point aiguille, Chantilly, and Brussels—in fact, a combination of the most valuable lace known. Among the handkerchiefs were two of point d'Alençon lace, valued at \$200 each, and one Valenciennes worth \$250, the richest ever imported."

Ending, my granddaughter regarded me with a puzzled air—"Well?"

"Well, my dear?"

"Grandmamma, what do you think about it all?"

"I was thinking what a contrast all these gowns are to the one the lady must some day, may any day, put on—plain white, 'frilled,' probably, but still plain enough; and after her first dressing, or rather being dressed, in it, no one will ever care to look at it or her any more."

Netty started—"Grandmamma, you don't mean a shroud?"

"Why not, child?—since, with all our fine clothes, we shall all require a shroud some time."

"But it is so dreadful to think of."

"Not when one approaches as near to the time of wearing it as I do. Nor, at any age, is it half so dreadful to think of one's own body, or of any fair body one loves, wrapped up in this garment—as I wrapped your mother up, my Netty, when you were still a baby—as to think of it decked out like that young creature whose 'trousseau' forms a feature in the public newspapers. She apparently comes to her husband so buried in 'clothes' that he must feel, poor man, as if he had married a walking linen-drawer's shop instead of a flesh and blood woman, with a heart and a brain, a sweet human form, and a responsible immortal soul. Ask yourself, would you wish to be so married, Netty, my dear?"

A toss of the curls, a flash of the indignant young eyes—

"Grannie, I'd rather be married like—like—Patient Griseldis!"

Suggesting that, taken out of the region of romance into common practical life, Griseldis' costume might be, to say the least of it, rather chilly—I nevertheless cordially agreed with my little girl. And I half sighed, remembering what was said to me about forty years ago, when I came, with only three gowns, one on and two off, a moderate store of linen, and five golden guineas in my pocket, to the tender arms that would have taken me without a rag in my trunk, or a penny in my purse—ay, and been proud of it too! I did not tell Netty her grandfather's exact words; but when she questioned, I gave her a full description of the costume in which I walked down the aisle of that village church with young Dr. Waterhouse—my dear husband who was then—and is now, though his tablet has been in the said church aisle for twenty-two years.—Author of John Halifax.

Scientific.

A new marble has been discovered in the Giant Mountains of Bohemia, which is described as in every way equal to Carrara both in whiteness and fineness of grain, and invaluable for sculpture.

COMPARATIVE PRODUCT OF COAL FROM WOOD.—Chestnut makes more coal to the cord than any common wood; oak a little less; walnut a little less; and so on down through elm, willow, ash and birch to pine, which makes only two-thirds as much to the cord as chestnut.

FOSSIL SHELLS FILLED WITH BLUE VITRIOL.—An immense bed of fossil shells has lately been found in southern Russia. The shells are filled with beautifully crystallized sulphate of copper, from which it is proposed to extract the metal. This is a good illustration of what has been said of the replacement of organic by inorganic matter in the process of petrification.

VERY valuable mines of silver, lead, antimony, zinc-blende, copper and gold have lately been discovered in the Himalayas. One mine at Shigri, on the old boundary of Northern India, is described as an enormous lode, in which the ore is several feet thick and solid. The others are principally in the Vazeeri Rupi (the silver country of the Vazeers)—a name it was long known by, being so described in the maps as part of Kirloo.

M. LAMY has concluded that very high temperatures may be measured by the tension of the carbonic acid evolved by the heat arising from carbonate of calcium. A porcelain tube, glazed inside and out, and closed at one end, is charged with fragments of marble or Iceland spar; the other open end is connected with a manometer. On exposing the closed end to the high temperature which has to be measured, carbonic acid is expelled, and the amount expelled, as shown by the tension indicated by the manometer, is a measure of the temperature. On cooling the carbonic acid is reabsorbed by the quicklime.

WELDING BY PRESSURE.—It is claimed that recent experiments by French machinists have shown that continued, steady hydraulic pressure in welding causes complete union of two masses of iron, while the junction is only superficial if produced by the hammer. Among other experiments two iron bars, one and a half inches in diameter, were beaten to the welding point and brought under the hydraulic press. The welding was effected with extraordinary quickness, the fibers of the iron being thoroughly interlarded with each other, and the joined portions of the bars were quite as strong as anywhere else, a microscopic section of the joint showing a perfectly homogeneous texture.

SALT IN THE AIR.—From a series of observations conducted with great care at Monaco, on the shores of the Mediterranean, a French scientist reports to the Academy the presence of a stratum of air two hundred feet high, extending for miles inland, which is constantly impregnated

with saline particles. This saline stratum, the writer asserts, is found on all sea coasts, is independent of barometric pressure, or the hydro-metric state of the atmosphere, and is due to the "pulverization" of the sea water by the breaking of the surf upon the rocks. He contends that the phenomenon he points out must not be confounded with what is commonly known as "spray," which is of a coarse nature, and entirely local in character.

NEW KIND OF PAPER.—A new kind of paper, specially adapted for various kinds of clothing, has been invented in England. Both animal and vegetable materials are employed in its production, the latter being New Zealand flax, jute, hemp and cotton, and the former wool, silk, skins, etc. These matters are reduced to a pulp and bleached, and then felted in appropriate machinery. The mixture of these materials gives a paper of extraordinary pliancy, flexibility and strength, which may be sewn together as easily as woven fabrics, and make as strong a seam. Among the articles made of the paper are quilts and table cloths, stamped with patterns of great beauty, curtains, shirts and various other articles of dress. A very good imitation of leather is made of it, of which furniture coverings and oven shoes may be made. The last may be rendered waterproof by the introduction of oils and India rubber.

ONE of the most remarkable deposits of petroleum known exists in the region of the Caucasus. On the east coast of the Caspian sea there are no less than twenty thousand petroleum wells. Although they have been known for generations, it is only within the last few years that they have been worked upon a large scale. They are generally of a slight depth, and are frequently found beside each other. A new source was recently discovered beside an old one, which for centuries has daily produced thirty-four hundred pounds of petroleum, and which is not in the slightest degree affected by the vicinity of the new source, which daily produces forty thousand pounds. The American system has lately been applied to them; the sources rising from a depth of two hundred and fifty feet, frequently overflow their orifice and ascend above them in great jets to the height of fifty to sixty-five feet. It is calculated that the district of the Caucasus yields annually nineteen million pounds of petroleum, and two hundred thousand pounds of paraffine or asphalt.

CHEAP RAILWAYS.—The following description of a cheap railway system is from the *London Railway News*. It is peculiarly applicable to mountain districts.

The Portmadoc and Festiniog Railway, Wales, is now attracting much attention among scientific men. This is a little one in North Wales, which was originally constructed for the purpose of acting as a tramway for slate and stone from the hills of Merionethshire to the sea shore. It is now being used as a regular goods and passenger line. The chief peculiarity in its construction is that the gauge is only two feet broad. Hence, though the line runs through a very difficult country, the expenses of constructing and working are so small that the traffic yields the enormous revenue of thirty per cent. The reason is simple enough. It is because the proportion between the dead weight and paying weight is so much less than upon other railways. The engine and tender upon this line weigh about ten tons, against forty tons upon the wider gauge of other lines. Instead of a first class carriage weighing seven and a half tons, to carry thirty-two passengers, and representing nearly five hundred pounds of dead weight for each passenger, the carriages on the Festiniog weigh only three thousand pounds for twelve passengers, or two and a half hundred weight for each person carried.

The *Railway News*, without going so far as to say that a two-foot gauge will furnish the railway of the future, is confident "its economy and efficiency will cause it to be extensively adopted."

The Pope has issued an indulgence—and whoever while confessing and receiving the sacrament of the Lord's Supper, and shall repeat an Ave fifty times, and the Lord's prayer five times a day for a week in the hope of the council being brought to a successful issue, is to receive full absolution of his own sins or of any dead person whom he may wish to benefit.

The *Eastern Budget* states that Barbara Ubyrk, the nun of the Carmelite convent at Cracow, whose case created such a sensation last summer, died February 24, in the hospital of the Holy Ghost, in the above city. She was buried privately, in order to prevent hostile demonstrations on the part of the people.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, APRIL 9, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—Rev. J. C. KEEPER, 112 Camp street, New Orleans, La.
AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.**FOR MOBILE CONFERENCE:**

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS,
REV. WILLIAM A. SHAPARD,
REV. J. B. COTTRELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY,
REV. WILLIAM P. BABTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEEPER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office ORDER, DRAFT, or by EXPRESS. If this cannot be done, Remittance the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

GENERAL CONFERENCE NEWS.

The fact that we are on the eve of the meeting of the General Conference of our church should be set forth as no ordinary inducement for persons to subscribe to the Advocate now. Does not the brother wish to watch the course of church legislation? We shall publish full accounts of the doings of that body, and may venture upon an editorial correspondence besides, from Memphis. It is amazing what a profound lethargy has crept upon some of our people. Now if our agents will awaken these enchanted sleepers long enough to enroll their names as subscribers to the NEW ORLEANS CHRISTIAN ADVOCATE we will follow up the advantage.

REVIVAL IN LOUISVILLE.

We clip the following good news from the Commonwealth. We rejoice with the pastor in this blessed result of his labors.

A LITZ CHURCH.—For the last month, considerable interest has been manifested in the Shelby Street Methodist church, Louisville, (the Rev. Edmund W. Sehon, pastor.) Upward of fifty persons have connected themselves with that church recently. On Sunday night, the sixth instant, one hundred persons rose to their feet and asked the prayers of the church in their behalf, some of whom were persons of advanced age.

THE FELICITY STREET SUNDAY SCHOOL EXHIBITION will take place at the church, on the evening of the fifteenth, at half-past seven P. M. Price of admission, fifty cents. The object of this optical entertainment is to pay for the magnificent library which has been recently purchased for the school. Let all go.

THE SUNDAY SCHOOL CONVENTION.—The committee does not publish the programme as promised, not having yet heard fully from the parties who are expected to address the convention.

REVIVAL IN MOBILE.

Rev. J. Bancroft writes: "Our meetings are unabated in interest. Twenty have joined at Franklin street. St. Francis and St. Paul's are sharing in the gracious outpouring."

MAP OF SOUTHWESTERN LOUISIANA.—Colonel Dennett has prepared an excellent map of this part of the State. The Opelousas country, the salt mine region, the newly discovered sulphur mine, and the route of the Chattanooga railroad are all items of interest clearly defined in this chart. Price, \$1.

"THE LIFE OF BISHOP WILLIAM MCKENDREE."

We have already noticed the first volume of this valuable work, and this is the second. The character of the great and good Bishop develops gradually to the end. The names of the men who spring up around him, to receive the impress of his spirit, have now become scarcely less venerable than his own; so that an increased luster, by reflection, invests that part of his life which is recorded in this concluding portion of the narrative. It is very edifying to trace the influence of a powerful and pure nature upon those in the immediate circle of its rays; to see how one great soul gives birth to another, or develops in another an expression of itself, if possible, more distinct than its own. The tendency to cluster, and by action and reaction to grow, has often been remarked in reference to minds of a high order. It is illustrated by the controlling spirits of this period of Methodism. The history of the Bishop's declining years brings us to the eventful period of the Presiding Elder Resolutions and the "Radical" controversy. Humanity, whether in the organization of Church or State, seems doomed to govern and be governed by a resolution of forces. There is always, in both rulers and the ruled, such a proportion of faith, or of wisdom or of ignorance, or of "progress" or of conservatism, or of ambition, as to keep things in a perpetual stir—nothing remains settled long; the wisdom of to-day is the folly of tomorrow, and the folly of yesterday is the wisdom of to-day. We account this a part of man's probation; it affords an ample ground for the trial of temper and quality. The best things in the world seem all, at one time in their history, to have passed through a crisis by the slightest preponderance of wisdom, or by the merest providence. Methodism has passed through more of these critical periods than our people generally suppose, and by their reading such books as the one now before us our church will be saved many an additional pang and experiment.

But it is mainly for the spiritual and religious fervor which sparkled like the glow on Moses' skin, all over the soul of Bishop McKendree, that we value this "Life." His character was much like his sermons; which, says the venerable Henry Smith, "were often attended with a soul-searching, melting, subduing influence, that bore down all before it. Christians were made too happy to jump and shout—yes, more than shouting happy—while sinners were cut to the heart." The eye of his enlarged soul ranged over the whole field; it took in continents—the wants of Africa, of the East, of the slaves in the far South and of the Indians in the West. He was out among those aborigines, planting the kingdom of his Lord wherever there were warriors enough to hold up a banner. He had not wings, but a good horse answered the purpose; and as a minister to the heirs of salvation he went forth to the very last. We conclude this notice of this deeply interesting work with a letter from the Wyandottes to the Bishop.

UPPER SANDSCKY, Sept. 5, 1825.

FATHER: On the fifth day of the first full month we are assembled together, and all of us salute you in the Lord; returning thanks to God that he has spared us all alive, and that all the leaders that you saw here, when you were with us last, are still alive, and have good health, with most of our nation.

Bishop McKendree, father in the church, we, your brethren and children, send you this letter to let you know some of the good that has fallen to us through your exertions in sending us the most blessed gospel. We still are watching and laboring, and are determined to do so till the end comes. Many of our people are still on their way to heaven, and are happy in the love of God; and we, your leaders in the church, are still going from house to house, and trying with all our might to banish all evil from among our people.

But, father, we must tell you the bad with the good. Some of our people slid back. This we know will not be so pleasant for you to hear; but you must pity us and help us by your prayers; though we are not out of heart, for we still believe

the Lord will hear our prayers, and the work we will never give up. Although we have many difficulties to encounter, the Lord helps us, and we are much encouraged, and we think we are gaining strength. One of our chiefs—Wapole—that did not belong to us, has joined, and this day was received into full connection, and appointed one of the leaders. We hope he will prove faithful, and make us a strong stake.

The school is still prospering, and our children are like the buds of the trees in the spring; and although we have not yet tasted the ripe fruit, we see the blossoms, and rejoice in expectation, and believe we will not be disappointed. We still pray that you continue your care for us and our children; and through you we return our thanks to all our friends that have contributed to help forward this great work among our nation. We hope they will not get tired, but as they have helped us to wake out of our deep sleep, and on to our feet, they will still help until we can walk and gather food for ourselves.

In our farming business we are still on the march, and go the slower because we are poor and unacquainted with the business; but our condition is altered very much for the better. Father, when we last took you by the hand, you told us you were old, and did not expect to see us again. This made us very sorry, but we still hoped God would bring you back this last summer; but we heard you did not expect to get here. It may be God will appoint a day for us to see one another on earth again; but if not, we are determined to do as you told us, and hold fast until we meet in heaven. There we hope to meet you, and all your brothers in the ministry. Father, we cannot express our minds to you and your brothers (the Bishops) as we feel for the gospel; and we do thank you all, and want you to know that we pray for you all, and we hope you will not forget to pray for us.

BETWEEN THE LOGS, his X mark.

TRANSFERS.

No feature of Methodism distinguishes it so much as the law by which its pulpits are kept in constant action. This is simply the law of the itinerancy. That which produces debates, burnings, jarrings and oftentimes rupture in other organizations, in ours is effected with scarcely a tremor. There may be tremors or shudders somewhere, but the system as a whole does not shiver them. The readiness, almost ease, with which Bishop Asbury picked up a brother and sent him say one thousand miles through the forest, to the "Natchez country," or by field and flood, may be, a full two thousand, from "Dan to Beersheba," presents a study for admiration to the historians. Indeed the right to transfer and the readiness to be transferred from one part of the field to another is mutually essential to the effectiveness of the general superintendency and the regular ministry. Our Bishops have used this power with excellent judgment during the past four years. Men have been taken from regions where they were popular and highly appreciated, and appointed to other fields, where they were scarcely known but greatly needed. The church has thus been strengthened at weak points marvelously, and the whole connection not only recognizes the fact, but feel a debt of gratitude to those who have borne the brunt of the movement, who were required to leave good salaries, pleasant associations and boundless influence, to go into regions where everything had to be started from the ground, and where they found themselves only as strangers after the successful ministry of a lifetime. The very best results could alone vindicate the wisdom of appointments that render so largely unavailable the labors of a man's preceding career.

We said the "whole connection" admires the devotion of these transfers. We should have said nearly the whole; for there are portions of Methodism that do not, it seems, feel grateful, to any considerable degree, to any man who comes at the bidding of a Bishop, however

much they may think of one who goes. It cannot have escaped observation that but few transfers have been honored with a seat in the General Conference. In some of the Annual Conferences no transfer has received a single vote—transfers who have been long distinguished, and who are universally recognized as among the most influential and important ministers of the connection. The church has thus been deprived of wisdom and experience in council which, but for the fact that it was thoroughly itinerant, she might have commanded. This leads us to inquire whether an itinerant's chances of promotion among Methodist preachers are weakened in proportion to his conformity to the law of itinerancy.

We can conceive of ministers who are ready to take good appointments without regard to Conference lines, and who sometimes even suggest congregations where they are wanted; and we can also conceive of churches out in search of distinguished men, that can only recognize distinction at a distance; but we do not now speak of such eccentricities. But we speak of those who go because they are ordered to go, and who have nothing to gain, but much to lose, by going. Are these men to be put under ban for their integrity as traveling preachers? We know that "going to General Conference" is a vain conceit at best, and probably these very brethren do not care a rush for it. And we have noticed that, among sensible persons, just about in the degree that a man don't care to come to a position of responsibility, or does care, just about in that degree is he fit or unfit for it. It is not, therefore, in the interest of these transfers individually that attention is directed to this matter, but in the interest of our entire Methodism. It is annoying to think of the extent of this transfer prejudice, for certainly it is a prejudice. We suppose there is no cure for it; but it must greatly increase the difficulty of moving men, when the Bishop must needs reflect that to transfer a man is to deprive the legislative part of the church of his experience and counsel. It occurs to us that a Conference decides that in its opinion it needs no help from without when it taboos every one who is not bred and born within its inclosure.

Are we not all brethren?

A Suggestion to Methodist Planters and Farmers within the Mobile Conference.

BRETHREN: Many of you think you are not able, at present, to make contributions in aid of the Southern University, while you profess to believe that is an important interest, and should be sustained. Many say that you would aid it if you were able. Now I wish to suggest to you a plan by which you can help it with but little cost to yourself.

Let each one who cultivates the soil set apart a portion of land, say from one to ten acres, according to your possessions and operations, the proceeds of which shall be given to this object. Let it be land of average quality, well and faithfully cultivated, and the result left to Providence. The University and its friends will willingly abide by the result. You will feel that you have done your duty on this point.

The cost of cultivating a few acres would be very small, and I think the result would suggest some important fact to those who will try it. Will any of our planting friends communicate with me on this subject?

J. HAMILTON.

MOBILE, April 4, 1870.

WASHINGTON CITY CHURCH.

Will friends who have money for the Mount Vernon Place Methodist Episcopal Church South, at Washington, D. C., please hand the amount to Rev. Robert J. Harp, at the Book Depot, 112 Camp street?

F. OLIN DANIELLY, Agent.

NEW ORLEANS, April 5, 1870.

LAMES do not talk, but they do shine. A lighthouse sounds no drum, it beats no gong, and yet far over the waters its friendly spark is seen by the mariner. So let your actions shine out your religion.

THE SAVIOUR IN EGYPT.

By a marked Providence the fortunes of the family of Abraham are involved with the history of Egypt. Nearly two thousand years before Christ the patriarch had, by the pressure of famine, made his way from Bethel to the fertile valley of the Nile, and was entertained at the Court of Pharaoh until the king, warned and plagued by God, sent him away richly laden with presents. Two hundred years later Joseph, at the age of thirty, "stood before Pharaoh." In twenty-five years more Jacob and all his family were settled on a strip of land ten miles from the right bank of the Nile, and about one hundred and twenty miles above the sea. There they remained for two hundred and fifteen years, until doubtless, to all outward appearance, they became Egyptians. By the direct intervention of God, by his mighty hand, they were brought out of this region, and guided back to the valley and hills of the Jordan; so that Egypt is the background of the whole history of the Israelites—the prelude to Sinai and Palestine. These facts must have all come in review before the "council" that Herod called to determine where the Messiah should be born. The three places mentioned by the prophets were Bethlehem, Nazareth and Egypt. How the promised One could by any course of events ever be "called out of Egypt" must have baffled their conception. And we, even since the event, can scarcely think of the Saviour as having been by the banks of the Nile, and near, it may be, the very spot where Moses was "drawn out" of its waters. The sister of Moses was named Mary—for Miriam is the Hebrew equivalent of the English Mary—and it was she who watched the little waif until it fell in the hands of Pharaoh's daughter; and it was she who called the nurse for the babe at the request of the princess; so that the Lawgiver was the type of the Saviour even in his infancy, and was, like him, saved from the destructive malice of the Enemy in the land of the Nile. The stay of the Holy Family in the land of the Pharaohs did not exceed sixty days. Within sight of where they were—that is, near the ancient site of Cairo—there stood the Egyptian's pride and wonder of the world. Cheops, or the Great Pyramid, was already two thousand years old, and then, as now, it rose seven hundred and eighty feet above the plain. Its huge bulk covered eleven acres of ground, and its sides, encased with polished granite, gleamed in the sun, and was distinctly visible for many miles. Even then the vast statue of Rameses the Great stood in partial ruins, and commemorated that Pharaoh—the self-styled child of Phra, the sun—that resisted the King of kings, and was destroyed in the Red sea. So, too, while the Saviour was there yet a babe, the temple of Karnak stood in stupendous ruin. This great temple of Ammon, with its one hundred and thirty-four columns, each seventy feet high and eleven feet in diameter, with its approach through an avenue of colossal sphinxes, more than a mile in length, then, as now, recorded the genius and idolatry of Egypt, and the destructive military prowess of the Persian, Cambyses.

The prophet had only read off the history of the Saviour in advance when he said: "Out of Egypt have I called my Son," for presently the Angel of the Lord brought Joseph word, saying: "Arise and take the young child and his mother and go into the land of Israel, for they are dead which sought the young child's life." He had been sent into Egypt to save his life, the nearest place of safety beyond the power of Herod, and now the storm had passed and the Father called him back to the obscure hills of Nazareth.

NEW ADVERTISEMENT.

MR. JAMES TURNER & Co., chemists and druggists, No. 20 Camp street, under the City Hotel. See advertisement of this week. They have a very neat and well stocked establishment.

NEW PUBLICATIONS.

We are indebted to Mr. George Ellis, No. 7 Old Levee street, for the following new books:

THE UNKIND WORD AND OTHER STORIES. By the author of "John Halifax, Gentleman." New York: Harper & Brothers. 1870. Pp. 418, 12mo.

This is a very entertaining book, refined in sentiment, and instructive to every class of readers. It is a collection of articles, we suppose, which have been prepared for English magazines by the gifted author. Those who are inquiring for a book which will entertain them for an hour, profitably and pleasantly, will find it in this unpretending volume. It can be picked up and laid down without breaking the thread of its interest.

JOURNAL OF A VISIT TO CONSTANTINOPLE, THE CRIMEA, GREECE, ETC., in the suite of the Prince and Princess of Wales. By the Hon. Mrs. William Gray. New York: Harper & Brothers. 1870. Pp. 209, 12mo.

The royal party had every possible facility and opportunity for seeing everything wherever they went, especially the ladies, who were the greater part of it. They visited the harems of the Sultan and Viceroy; and places which the gentlemen of the party were not permitted to enter. Then we have in the book a very rare, unpretending narrative of explorations of great ruins, diversified with the receptions, entertainments, reviews, etc., which may be supposed to attend the appearance of such distinguished visitors. We always like to read after the eyes of a woman, if she has her fair share of wit, which this writer certainly has.

SKETCHES OF CREATION. By Alexander Winchell, LL. D., professor of geology, etc., in the University of Michigan, etc. With illustrations. New York: Harper & Brothers. 1870.

This elaborately illustrated treatise embodies the facts and fancies of a modern geologist who is a believer in an intelligent first cause: "Science interpreted is theology. Science prosecuted to its conclusions leads to God." He does not receive the Mosiac account, excepting in the indefinite sense in which modern science renders the "evening" and the "morning" of the Scriptures. Great periods of dilution, then of crystallization, then of fusion, etc., preceded, he supposes, the earth proper. The professor, like most geologists, seems to think that it was much easier to create gas than to create granite, and that we are to measure the forces creative by the forces now at work; that laws established and plants perfected give indication of the means by which they were made. In our opinion no class of scientific men are putting to print more nonsense in the way of theory than the geologists of the present day—theories which will not outlive this generation, and many of which have already exploded by the recent discovery of a mine of pure sulphur, one hundred feet thick, in the southern part of Louisiana.

UNDER FOOT. By Altou Clyde.

SO RUNS THE WORLD AWAY. By Mrs. A. C. Steele.

THE RULE OF THE MONK. By General Garibaldi.

This is a description of Rome in the nineteenth century—affronted, degraded, defamed—the metropolis of monks instead of Caesars, the emporium of solemn farces, miracle plays and superstitious hypocrisies.

We have received from the Southern Publishing House, 112 Camp street, several new works, which we notice below. By the way, we call special attention to the fact that the agent here, the Rev. R. J. Harp, has a most attractive and extensive stock of books. One who wishes to purchase either standard works or recent publications will find them on the shelves of this establishment. He has also a most excellent variety of Bibles, Testaments, hymn books and school books at publishers' rates.

THE SCRIPTURAL DOCTRINE OF HADES. By Rev. G. Bartle, D. D., principal of Walton College, Liverpool. Philadelphia: J. B. Lippincott & Co. Pp. 222, 12mo.

The author proposes to "demonstrate from the Bible that the atonement

ment was neither made on the cross nor yet in this world." We do not think that he has succeeded. Yet the work contributes to the better understanding of what are the true doctrines of the Scriptures on that momentous item of the faith: He supposes that the Saviour's "descent into Hades" had what to do with the redemption of mankind from eternal death; that the pains of his "body" were not of themselves sufficient. The Christian world holds, however, on the contrary, that the sufferings of the garden and of the cross present a mental, spiritual and physical anguish adequate to satisfy the demands of the law against us; that the Father accepts the precious price of his Son's blood. The apostle says that by the will of the Father we are sanctified, "through the offering of the body of Jesus Christ, once for all." Language could not be plainer. The atonement was not a commercial transaction, but a legislative; and the system of redemption in the Levitical system did not always contemplate the payment literally; so that the argument that Hades can only redeem from Hades will not hold. The author sets forth the doctrine of the intermediate state as it is connected with his argument; and he also reviews that dreadful conceit of purgatory which has given birth to the Inquisition, and is now represented by the prisons of the Propaganda, directly under the walls of St. Peter's, the infernal regions of the infallible. Price, \$1 50.

THE BIBLE TEXT CYCLOPEDIA. By Rev. James Inglis (first American from the seventh London edition). Philadelphia: J. B. Lippincott & Co. Pp. 513, 8vo.

This is a complete classification of Scripture texts, in the form of an alphabetical index of subjects—that is every text belonging to each topic is arranged in its appropriate place, i. e., under death, all the utterances of the Scriptures which have relation to that thought, in which the word itself occurs or not. It is a verbal kind of concordance to be within reach of the Bible student and a maker of sermons. Price, \$3.

JENNIS' HANDY LEXICON. Philadelphia: Claxton, Remsen & Co. 1869.

A pocket dictionary of all except familiar words. All the hard, abstruse words of the language are here put together—a convenient study. It is the book we had been wishing for. One can see on every page how little he knows even of his own language.

PAUL'S SCRIPTURE A.T.S. By William Hughes, F.R.C.S. London. Price, twenty-five cents.

Maps suited to Sabbath schools. These twelve are all in one little primer: The Ancient World; Armenia; Canaan in the Patriarchal Ages; Egypt; Canaan as Divided Among the Tribes; Dominion of David and Solomon; Kingdom of Judah and Israel; Assyria; Palestine in the Time of our Saviour; Jerusalem; Travels of St. Paul; Modern Palestine.

THE JEFFERSON FAIR.

The fair for the Calix Street Methodist church—once City of Jefferson, but now Sixth District of New Orleans—is over. It included six days of one week and two of another, ending on Tuesday evening, March 29; and, as the result shows, it was a decided success, the figures looking up, with all expenditures paid, the handsome sum of \$1,326 75.

To the ladies who had charge of sales and the different departments in this fair all praise is due for that untiring energy and cheerful industry with which, amid difficulties, they continued to provide bountifully of good things for the entertainment of the numerous visitors who, from evening to evening, favored us with their presence. And to them and to all who, in any wise, have contributed to make up the amount above stated; to our worthy friend, M. C. Randall, Esq., for the very edifying and amusing entertainment afforded by the exhibition of his magic lantern illuminations on the last night, and also to the Home Hook and Ladder Company

for the use of their spacious hall, the thanks of the members and congregation of the Calix Street church are due. And, as I am sure that such an expression will meet with their ready approval, I take the liberty hereby of tendering to all the parties referred to, *their (i. e. our) sincere and hearty thanks.*

This fair, as proposed in the outset, was conducted on Christian principles, and visitors had to compensate them, for their patronage, not only that feeling of satisfaction which the act of aiding a noble enterprise affords, but in addition to this they had such enjoyments as were to be gathered from those entertainments of a substantial and social character, that were provided from time to time by fair hands and ingenious minds, to gratify the palate, and give pleasure both to the eye and the heart. And now, after expressing the wish that all fair that are held for worthy objects may be conducted as harmoniously and successfully as ours has been—with the best bow that I can make, to all concerned—I take leave of this, my first experiment in the way of a fair.

P. M. GOODWYN, Pastor.

Rev. Bp. Edward Thomson, D. D., LL. D.

This able minister of Christ died at Wheeling, March 22, of pneumonia. He was born in England in 1810. He became a member of the Ohio Conference in 1833. For many years he was at the head of church schools and colleges. In 1864 he was elected a Bishop of the Methodist Episcopal Church. The Pittsburg *Christian Advocate*, in the notice of his death, says:

Shortly after the General Conference of 1864 he began his arduous labors as one of the Bishops of the Methodist Episcopal Church, by a tour of visitation to our foreign missions, proceeding as far as China, and is said to have traveled, in a little over one year, about forty thousand miles. Thus for nearly six years he has gone forth on rapid wing, like the angel of the Apocalypse, and now has only turned his light heavenward. Under the pressure of the hour we can furnish but little more than this brief outline of the public career of one whose path of light will shine yet more and more unto the perfect day. Neither time nor space permits us now to enter into the more minute details of his life, or to attempt a suitable portrait of his numerous distinguishing excellences; suffice it to say that few men living have been so tenderly loved, or dying, will be more sacredly cherished in the memories and hearts of grateful multitudes. As an orator, thousands have felt the power of his eloquence drawing us with cords of love and thrilling their inmost souls. His published writings—concise in their graceful elegance, abounding in metaphor, and fraught with the richest truth—have already taken their place among the English classics. His work, as an educator of consummate skill, has long since attained abundant fruitage among the hosts of noble men who have risen up under his plastic hand. In every Conference where he has presided the fame of his administrative tact and wisdom as a Bishop will continue for many years to come. But Bishop Thomson, our friend and brother, will be held in the most tenderly affectionate remembrance for the sweet simplicity and exalted purity of his character, and for the blessed Christ-like influence which he leaves as a priceless heritage to a bereaved family and a sorrowing church.

From the *Northwestern Christian Advocate* we take the following:

A character so lovely as that of Bishop Thomson furnishes an abundance of incident that, now he is gone, has a touching interest. When he set out to meet the Lexington Conference at Louisville, Kentucky, which met February 24, it was without expectation of returning to Evanston until he had finished this tour of Conferences. But he did return. A citizen of Evanston meeting him on the street expressed surprise, and inquired the reason of his return:

"Oh," said he, "I didn't feel that I had bidden good-by to my family just as I wanted to, and so came back."

It proved to be his last "good-by" to them, and that return for a now farewell, for just such a goodbye as he wanted, seems strange enough, since it has proved his last. It is paralleled by the case of the lamented Munroe, who, after he had started on his last journey, as it proved, and had gone out of the door yard, came back for one more kiss. It was given, to be no more repeated. The Bishop's was a very loving soul; exceedingly gentle in its exceeding greatness. But we

must not trench upon the province of those appointed to present his obituary, and we omit a delineation of his character.

REV. THOMAS L. DENSLER.

Mr. Editor: It becomes my painful duty to announce that the Rev. Thomas L. Densler, an old and valuable member of the Montgomery Conference, departed this life week before last, near Benton, Alabama. I have no participation. An extended obituary notice will be furnished soon. Yours truly,

W. S. TURNER.

WETUMKA, ALA., March 30, 1870.

New Map of Southwestern Louisiana.

Complete and accurate, including Attakapas and St. Landry. For sale at the principal book stores in New Orleans, at the post offices of Attakapas and St. Landry, and at the office of the *Planter's Banner*, Franklin, Louisiana. Price, \$1.

D. DENNETT.

DEATH OF ELDER TENNEY.—We have just heard some sad intelligence from Thibodaux. Our dear brother, Elder S. Tenney, has departed this life. Brother Tenney was long and well known among us as a popular and successful teacher, an amiable, refined and excellent Christian gentleman, and an efficient ruling elder. We hope soon to be able to present to our readers some appropriate tribute to his memory. *Southwestern Presbyterian.*

PRESBYTERIAN.—We are glad to learn that the churches in Mobile are being visited by special influences of the Holy Spirit. Rev. Dr. Stiles, the venerable evangelist, is now preaching in the First church with great acceptance and success. We have nothing of this nature to record in reference to our New Orleans churches. The additions to the most of our churches, during the past year, have been steady and large. *Southwestern Presbyterian.*

BAPTIST.—During the past two weeks our Baptist brethren have been holding an interesting series of meetings, conducted by Rev. A. B. Earle. They were well attended by persons of all denominations, and we hope will prove beneficial to the community. The immediate result, as far as we can learn, has been the addition of ten or twelve members to each of the two Baptist churches. *Southwestern Presbyterian.*

Try to frequent the company of your betters; in books and life, that is the most wholesome society. Learn to admire rightly; the great pleasure of life is that. Note what great men have admired; they admired great things; narrow spirits admire basely, and worship meanly.

Married.

At the residence of the bride's mother, Mrs. S. A. Toler, on Tuesday, March 15, by Rev. A. Z. Young, Mr. WILLIAM M. JAMES, of Wilkinson, Mississippi, to Miss MARTIE TOLER, of Anite county, Mississippi.

Near Dover, Mississippi, March 16, 1870, by Rev. Thomas W. Flowers, Mr. A. E. BEMSEL, to Miss FANNIE A. GRAYSON, both of Yazoo county.

On Sunday evening, March 27, at Mechanicsburg, by Rev. Thomas W. Flowers, Mr. JOHN H. FOSTER to Mrs. LOUISE J. EASLEY, both of Yazoo county, Mississippi.

Obituaries.

Mrs. SARAH SPARKMAN, daughter of Thomas and Sarah Daniel, was born in Sumpter county, Alabama, January 4, 1817, and was married to her now deceased husband November 17, 1865.

She joined the Methodist Episcopal Church South in July, 1868, and passed from the church militant in full and certain hope of the one triumphant, in Cooksville, Mississippi, February 3, 1870.

Sister Sparkman was in many respects a beautiful type of female character. Being ornamented and strengthened by divine grace, she shined over her associates the sweetness of her own spirit, striving always to abound in the illustration of those graces and virtues which enshrine in precious memory those who possess them. She did not seek notoriety, but her retiring nature would shrink involuntarily from public gaze. She was not demonstrative in her religious devotion, but always firm and consistent. In fact, the spiritual current of her almost stainless life was so quiet that some of her friends were uncertain, for a time, as to her real condition. The writer, being apprised of this fact, cautiously introduced the subject to her; but soon the murky cloud of doubt disappeared before the bright light of joyous rapture beaming from her heaven-lit countenance.

Through many weeks of pain and suffering Mrs. McInnis was led to anticipate death, and had with anxious consideration "set her house in order." Unknown to her friends, tokens and memorials of her affection were carefully set aside for those whom she loved, and nothing was left undone, nothing left unfinished. She left behind her an infant daughter of a few days to inherit her name, and in our prayers for the little one we could ask no greater blessing to fall upon it than that it should inherit her virtues also.

Weep not for her; in her spring time she flew. To that land where the wings of the soul are unfurled; And now, like a star beyond evening's cold dew, Looks radiantly down on the tears of this world.

Truly there was no room for doubt when with her own pallid lips she told us, in intonations of strong, commanding faith, there was not a shadow between her and her gracious Saviour. The unobtrusive excellence possessed by this Christian woman were well calculated to soften the hearts and win the purest affections of those who knew her best.

One who was intimately acquainted with her said of her: "She never thought evil." She told her husband she was not distressed that the cold waters of death were gathering about her feet, but for him in his loneliness. She gave directions with reference to her burial, and on the morning of her death asked her husband how long she could live. Seeing that he hesitated, she very promptly said: "Tell me: I am not afraid to die." When, with a heart all crushed and bleeding, he told her that her departure was near at hand, she turned her languid eyes heavenward and said: "I have three sisters, one brother and a sainted father gone before." A friend who prayerfully watched by the dying sufferer, said of her that she did not care to live but for her husband and loved ones; that she looked around upon them and exclaimed: "My poor kindred, how hard it is to leave you! We'll meet in the happy land." When her sufferings were so intense as to make her impatient for her departure, she was referred to the sufferings of her Saviour. She quietly remarked: "I will be patient, since he has suffered that I might live." Trusting fully in a Father's love to do for his children what would be for their good, she breathed her life sweetly away without a struggle.

J. B. STONE.

Died, on the twenty-sixth of December, 1869, near Moss Point, Jackson county, Mississippi, at the residence of her father, the Hon. George Wood, Mrs. MARY EDWINA MCINNIS, wife of Daniel McInnis, Esq., of Green county, Mississippi, aged twenty six years.

In the death of this lovely and estimable lady the society in which she moved has lost one of its brightest ornaments. Possessed of a warm and tender heart, an affectionate, confiding disposition, and an amiability of character rarely equaled, she was, in the truest and purest sense of those terms, a wife, daughter, sister, friend. But her highest, her noblest praise is that she was an earnest, faithful and devoted Christian. What a consolation it is to those whom she has left behind, buried in grief and sorrow, to feel that what has been their loss is her eternal gain, and that while in her desolate earthly home there is a vacant chair, the pearly gates of paradise have opened to receive another of earth's redeemed children, and that a new harp of praise has been tuned on the bright and glorious seat of heaven.

Well and beautifully was it said at her grave by one who had known her long, and in whose family she had passed many of her girlhood's years, that "to many it might seem that a character so lovely needed no other preparation to fit it for the companionship above." But to her it did not so seem; for, with all her moral excellences and many virtues, she felt the want of "the one thing needful," and that one thing she had earnestly sought and gained. Of the truth of this her life was a living assurance, a beautiful testimony, to those who knew and loved her best. During her whole life her serene and happy face, always radiant with a smile, seemed to tell to those around her that she was, even in this vale of tears, calmly and quietly basking under the influence of heaven's holy light; and much more truly so, since she united with the Methodist Church at this place some two years ago. Examples of a calm, quiet, humble Christian life cannot pass away. Its influence will rise up, crowned with pleading memories, long after God calls his children home, melting softly the hearts of those left behind struggling with life's storms, and drawing them up beyond where life's billows may dash. And such was the life of her for whom we mourn, and such will be its influence.

Landreth's warranted garden seeds have been familiarly and favorably known to the American public for upward of three-quarters of a century, with yearly increasing popularity.

They Speak their Own Praise Wherever Planted.

Landreth's Rural Register and Almanac, 1870, will be mailed without charge to all who apply, including a stamp to pay postage. Sent by JAMES T. LARSEN & SONS, Nos. 21 and 23 South Sixth street, Philadelphia.

TO OWNERS OF HORSES AND CATTLE.

Tablin's Dandy Condition Powders are warranted superior to any others, or no pay, for the cure of Distemper, Worms, Rots, Coughs, Hives, Colic, etc., in Horses, and Colds, Congas, Loss of Milk, Black Tongue, Horn Distemper, etc., in Cattle. These Powders were formerly put up by Simpson I. Tobias, son of Dr. Tobias, and since his death the demand has been so great that Dr. Tobias has been compelled to manufacture them. They are perfectly safe and innocent; no need of stopping the working of your animals. They increase the appetite, give a fine coat, cleanse the stomach and bowels, and increase the milk of cows. Try them, and you will never be without them. Col. Philo P. Bash, of the Jerome Park Race Course, Fort Laramie, New York, would not use them until he was told of what they were composed of, since which time he is never without them. He has over twenty running horses in his charge, and for the last three years has used no other medicine for them. Sold by Druggists and Storekeepers throughout the United States. Price, twenty-five cents per box. Depot, 10 Park Place, New York. mh24 1y

ONE DOSE OF DR. SHALENBARGER'S

FEVER AND AGUE ANTIDOTE

ALWAYS STOPS THE CHILLS.

This medicine has been before the public fifteen years, and is still ahead of all other known remedies. It does not purge, does not sicken the stomach, is perfectly safe in any dose and under all circumstances, and is the only medicine that will

Cure Immediately and Permanently

every form of Fever and Ague, because it is a perfect Antidote to Malaria.

Sold by all Druggists. dec4 1y2

WILLIAM T. SMITHSON

Banker and Dealer in Exchange.

No. 14 WALL STREET, NEW YORK.

I offer my services to my Southern friends, Bankers and General Investors, for the transaction of their business in this city, including purchases and sales of Gold, Government and Southern State Securities of every description, and the Negotiation of Loans. I earnestly solicit the patronage of my friends and the public generally. Any matter of business intrusted to me will be promptly and faithfully attended to.

The Child's Corner.

GOLDEN HAIR.

Golden Hair sat on her grandfather's knee,
Dear little Golden Hair, dressed was she.
All the day busy as busy could be.

Up in the morning as soon as 'twas light,
Chasing the bird's and the butterfly's flight,
Filling about till the coming of night.

Grandfather toyed with the curls on her head:
"What has my baby been doing," he said,
"Since she arose with the sun from her bed?"

"Pity much," answered the sweet little one;
"I cannot tell, so much things have I done,
Played with my dolly and feeded my bun;

And I jumped with my little jump-ropes,
And then I made out of water and soap
Booiful worlds, mamma's castles of hope.

And then I readed in my picture book,
And little Bella and I went to look
For smooth stones by the side of the brook.

Then I comed home and eated my tea,
And I climbed up to my grandfather's knee,
And I'm just as tired as tired could be."

Nearer and nearer the little head pressed,
Until it dropped upon grandfather's breast.
Dear little Golden Hair, sweet be thy rest,

We are but children; the things that we do
Are as sports of a babe to the Infinite view,
Who sees all our weakness, and pities it too.

God grant that when night overshadows our way,
And we are called to account for the day,
He may find it as guileless as Golden Hair's play.

And O! when weary, may we be so blest
As to sink, like an innocent child, to our rest,
And feel ourselves clasped to the Infinite breast.

THE DISTINGUISHED SNAIL.

"May I ask whom I have the honor of speaking to?" asked a large snail, with a fine ring-marked shell, who was leisurely feasting on a low branch of a very fine crop of green peas.

"My name is Atalanta," quietly replied a sober-looking caterpillar of a greenish-black color, with a spotty yellowish band running along its sides.

"Dear me, what a ridiculous fine name for such a dingy creature; 'Deadleaf' would be far more consistent with the faded color of your vestments, which seem to have seen better days. I hope you are not hungry, my good fellow, and that you have not come on a foraging expedition; because I must tell you that this row of peas is especially the peculiar property and feeding ground of my family, and our own cousins, the Slugs."

"Don't alarm yourself," said the caterpillar, "I don't care for peas. I always prefer something more highly seasoned; indeed nettles are my principal food."

"Indeed," said the snail, patronizingly; "and I dare say, now, you consider them good eating. What a bountiful provision there is for the lower orders! How many more nettles there are than rows of peas or beds of strawberries! We, more delicate and refined beings, who are particular in our fare, are not so bounteously provided. For myself, I prefer early green peas; I don't care about them when they get the least old and hard. I am partial to strawberries, when ripe and full flavored. When I am really pushed to it for food, however, I can make a meal on the heart of a young mild cabbage lettuce."

"You are easily satisfied, then," remarked the caterpillar; "not very dainty in your eating, seemingly."

"Yes," said the snail, with a virtuous air; "I am, alas! used to the ups and downs of life, and have known times of great scarcity. Why, do you know, I have really passed one or two summers almost without tasting an apricot or peach?"

"You must have suffered much, then," said the caterpillar.

"Indeed I have," sighed the snail, "for a member of such ancient lineage. We are of as good family as any in the land, being cousins only once removed from the fat white Dorking snails. They, as you have doubtless heard, are illustrious exiles from the sunny land of France. Still, even the highest and noblest meet with occasional misfortunes, and I have had my share. I have been tormented by those obnoxious articles, called gardeners, to a fearful extent; in fact, they only seem made to be a perpetual penance to us. The trouble they have given me, I am sure, no one would believe. Many times have I snuggly established myself in a pleasant grove of ivy, intending to make my winter residence there; but not the perverse wretches would not let me alone, but must send me flying over the railings into the road. Fortunately my house is strong and well built, so I have never come to any material harm. The greatest annoyance, besides flying through the air in that breathless way, has been from being obliged to walk back over the dusty, gritty road, through the garden gate again."

"You are not very easily daunted, then," said the caterpillar, who had listened with amusement to all this pompous oration.

"Oh dear, no!" said the snail, affectedly; "we must not let a little daunt us, and deter us from our purpose. And so, when I am sent flying thus, as I am obliged to change my residence, I do so for the better, and locate myself in the middle of a chump of nice choice carnations, or a blooming pansy."

"But suppose the ruthless gardener should find you there, and crunch you without remorse," suggested the caterpillar.

"Why, then, I shall have lived my life, and leave my children to carry on an illustrious line. By the way, I have a most promising family of this season, feeding yonder on those young shoots. Their shells are almost hard already."

"They seem to have voracious appetites for such small creatures," observed the caterpillar; "notwithstanding their delicate rearing."

"They are young," said the snail haughtily, "and require plenty of nourishment to sustain their delicate nervous systems. By the way, where do you lodge for the night? I suppose you are obliged to put up with anything."

"Why, I generally curl myself up in a leaf," said the caterpillar. "I find it very airy and well ventilated in the warm weather."

"Ah, poor fellow!" said the snail, compassionately, "what a vagrant, gypsy sort of life. You should have a house like mine; it is so much more respectable to be a householder."

"I should think such property must bring its own responsibility, and often become burdensome," said the caterpillar. "Don't you find it a great load to carry?"

"Oh dear, no!" answered the snail, "and only consider the comfort of being able to draw in your head in safety from your enemies."

"Thrushes manage, though, to demolish your mansion sometimes, don't they?" asked the caterpillar, mischievously.

"Sometimes, but not very often; and then one must put up with a few dangers on account of one's dignity and exalted situation. Take my advice, and get a house; I dare say you can find a few empty ones lying about, quite good enough for your limited wants. And now, as I see my friend, Sir Helix, coming this way, I must leave you; and I will beg of you to go a little farther off, my good fellow, as he is not very fond of new acquaintances, unless they are extremely select."

Some time after, while our snail was slowly creeping along on his way to a fine fruit tree, richly laden, he beheld not far above his head a gorgeous creature. Its wings, of a rich velvet-like black, were edged with the most brilliant blue; splendid scarlet bands that seemed robbed from the poppy itself, were, as it were, embroidered upon them, studded with snowy spots of pure white. On the underneath these lovely wings were painted, as if in imitation of an Indian shawl. Rich shades of golden brown were mingled with delicate patterns of red, amber and blue, in the most harmonious manner.

"Good morning, your royal highness," said the snail, obsequiously; "we are deeply honored by your condescending visit."

"And who may you be?" inquired the lovely creature, languidly. "You seem a slow, humble sort of body; and your bundle on your back, too; how very amusing."

The snail was deeply mortified at the ridicule of the butterfly, but did not presume to reply, for fear of giving offense. Those who are most overbearing to their inferiors, are generally servile enough to those who are above them in station.

"Do you carry your food in that funny sort of cupboard on your back?" inquired the butterfly; "pray, what do you live on, you groveling creatures?"

"Please, your highness, this is my house, my little cottage; and as for food, we snails live on peas, lettuces or strawberries, when we can get them."

"Oh, you coarse things," said the butterfly, "how very unpleasant! But all you lower orders are so uncouth in your habits. I suppose you have no idea what the taste of honey is like?—that is the nectar upon which we feed."

The snail professed his ignorance very humbly, hoping to get an invitation to the butterfly's domain.

"Poor drudging thing!" said the butterfly, with an air of supreme pity, "toiling along the dusty road with all your goods and chattels on your back. Now, when we are tired of reposing in a lily, we spread our light wings and go next door to a rose. We feed on the sweetest dews and the purest and finest honey. We soar into the air on our jeweled wings, and fly hither and thither over garden and meadow, wheresoever we will."

"Oh, your highness," said the snail, enviously, "what a charming existence! How flattered I feel by the honor of your conversation!"

"Do you?" said the butterfly; "I

am sorry I cannot return the compliment. I suppose in this gay attire you don't recognize the caterpillar you once patronized and insulted?"

The horrified snail fairly drew into his shell with dismay, but speedily recovering his presence of mind, he began a sort of apology.

"Pray, don't say another word," said the butterfly, unfolding his beautiful wings, and preparing for flight. "Such blindness as yours is not confined to the snail tribe; there are many greater and wiser, who can find no beauty or virtue under a humble exterior. Had you been only commonly civil to me when I was a humble, crawling creature like yourself, I should not now disdain your acquaintance; but your present respect is only paid to my gay attire. You disowned me in my lowly, early days; and despised me; consequently, now my wings are grown, I leave you to your own sordid pursuits, and soar far above you in the sunny air."

The Farm and Garden.

ORANGE CULTURE IN LOUISIANA.

The writer of the following interesting article (which originally appeared in the New Orleans Times) has kindly revised and placed it at our disposal, and we take pleasure in giving it to the readers of the Southland.

In this parish (St. Mary's) known so favorably as the "Sugar Bowl," there is to be found a strange, fairy-like land, and in spots an "oasis," as it were, in a desert. Now, as we glide along the graceful Teche, the majestic Beuf and its continuation, the Bayou Sheffer, to Mossy Point, the bay at Brashear City, these water courses at midday are not less beautiful or attractive than those described by the dramatic poet when his ardent nature gave impulse to the grand description of the Lake of Como. Had he seen these surrounding lands clothed in tropical vegetation, we can only opine that this would be his "beau ideal of grandeur."

However, this is not my specialty to follow "beaten tracks," but simply to express my wonder that so many of our young men and heads of families are ignorant of the fact that, within four hours' ride of the city, a country possessing a soil of untold richness—an alluvial loam, the accumulation of ages—and a climate providential and peculiar for the culture of the orange, the lemon and the lime, as this basin.

The timber on the margin is principally live oak, of majestic proportions, festooned with gray moss. A stillness rules its peculiar situation—its proximity to the Gulf, and lakes immediately north, renders its formation most favorable for the successful culture of the orange—

"Those fragrant flowers, and
Fruits of vegetable gold."

May I ask, why so much indifference? or why our numerous young men, who expect, like myself, to reach threescore and ten, and so far, to live without an object? Oh, no! The past week's work will, in time, produce the golden fruit for thousands yet unborn, and our railways—the Chattanooga, of course—extending into distant States, will open new channels, and desirable markets for more than can be produced.

You will please note that the great majority of the orange trees, now bearing in whole or in part, are more or less affected and diseased, and will shortly go "the way of all flesh."

The overflows of 1865 and 1867 did not benefit the orange groves, and particularly those owned by slothful and careless proprietors, or men without taste or judgment. To all such, the days are numbered, as far as their groves are concerned. The indifference observed, the great want of judgment at that critical time and subsequently, has already consigned to the wood-pile what otherwise would be a source of income. The long-standing waters scalded the numerous fibers, or feeder roots, and eventually created a dry rot, whilst a few, whose efforts to restore by proper nourishment, have the satisfaction of now gathering a bountiful crop.

I note from my diary:
"A dry stump," near the gate, around which I caused to be piled for future use a quantity of oyster shells. Judge of my surprise, to see it to-day full of foliage, and now promises to bear next season.

I find in this grove many varieties of the sweet orange, and some as agreeably flavored as any epicure could desire. I have gathered from some trees eight barrels, which would bring \$5 per barrel. There are one hundred trees to the acre. The abundance of this fruit this season and the value of money forced many to rush their crops into the market; but here we may with propriety and perfect safety allow our fruit to hang on the trees till Christmas. We rarely have a killing frost until January. Oranges at

Christmas are often worth \$50 per thousand.

The grove should be cultivated in tubers, care being taken not to disturb the roots. The common potato, and subsequently the sweet, or yam, will pay well on this same soil, thus employing the land for good and profitable purposes; stir the soil, and drain it well; this is the key to prosperity.

The cultivation of the orange is very simple. Few fruits can be so easily propagated, either by seeds, cuttings, layers, grafting or budding, the like always producing like. Yet the most judicious is to graft on a wild stock; and this much will I venture to assert, in no country has the sweet orange come to higher perfection than in lower Louisiana.

The sweet orange from the seed, if properly treated, in rich, mellow ground, may be made to produce fruit at seven years; if budded or grafted on a sour or wild stock, in three years, provided the location is favorable. I have noticed opposite sides of the river, where the trees were annually cut down, whilst vis-a-vis, in full bearing. Places exposed to sudden changes, and particularly for acidulous fruit, evergreen, charged with abundant sap, are extremely sensitive to sudden changes, and places thus exposed should be avoided. Hence the peculiar surroundings in this alluvial basin, possessing a soil specially adapted—orange requiring an extremely rich, light, sandy loam, a climate tending to humidity, and a uniform temperature; and location where sufficient protection offers, there is no doubt of success in this business.

I state these facts from experience, in order to warn the many risks in selecting land for future groves. The peculiarities of places are worth studying; to aim at first conclusions, what situations and what conditions of atmosphere are most favorable for this species of agriculture?

Orange trees require much manure, and are always benefited by its application in a liquid state; care being taken in preparing the same; stable manure, placed in a hopper, into which should be emptied all slops, and in this condition a few gallons applied all round the roots by opening several holes, and filling up all the ground will absorb, taking the precaution to administer the same only during rainy spells, and at least three times per annum. To each tree thus treated, a marked improvement on this great feeder from the soil will soon be visible.

There are other matters of pecuniary value in connection with an orange grove. Already an indifferent sample of orange flower water has been forwarded from this place. What success, or how it will meet our expectations from the city druggists, remains to be proved. We shall keep trying until success crowns our efforts.

I would further remark, there is no part of the tree that is not capable of being converted into money value—the fruit, the flower, the leaf, and finally the wood.

Our apiary, of eighteen stands, we hope to increase next season. A compliment was paid us by a respected friend, when partaking of the honey, that it had the smell and taste of the ravishing perfume of the orange flowers, "equal to the honey of Hyettus."

In conclusion, I would remark, it requires no skilled labor to commence an orange grove. The time and outlay, when calculated in interest and compound interest, will pay better than any stocks I am acquainted with. I may probably except, by stating that some experience is necessary to properly fix a graft.

A grove of ten acres—one thousand trees—will at least pay \$10,000 per annum.—Southland.

WHAT SHALL I PRAY FOR?—"Why not pray for just what you want?" said a speaker. "Why not? When Christ was here on earth his language was: 'What wilt thou that I should do unto thee?' He asks us what we want. If we want temporal help, why don't we tell him? He is the same yesterday, to-day and forever. When he was here on earth he never turned away from those who were seeking temporal help. It is true we may ask for things which are not good for us to have. But if we ask believing, we shall have something given a thousand times better for us than the something withheld.

"But I believe in asking for needed temporal blessings. I believe He answers such prayer. I am sorry to see persons in temporal distress putting in their petitions that we will pray for them in the day of adversity, in a timid manner, as if they felt afraid they were doing something very improper. Not it is not improper. This is a world of trouble, and we never shall get rid of it till we get out of the world."

SMALL debts are like small shot: they are rattling on every side, and can scarcely be escaped without a wound. Great debts are like cannon—of loud noise, but little danger.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD

NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, combining all the new and important improvements; also to the extra height of the Oven under the fire chamber, the Patent Air Chamber, Front Doors, and Patent White Enamelled Iron Knobs, the improvements in the covers and centre pieces, all of which have been covered by the Patent, and increased in no other Stove. They are warranted to stand fire, or others sent free of charge in all cases. We have all sizes of this justly celebrated Stove, both

PLAIN AND EXTENDED BACKS,

the Extended Back with cast Iron Enamelled Reservoir and Panet, Tin Warming Closet, Grilliron Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, as in the case in most of the Stoves now used, and the heat is forced directly against the whole surface of the bottom of the Reservoir. The Reservoir, being detached from the pipe, can be removed at pleasure, thereby forming a six-hole Stove—the best in use, as the back holes will heat as well or better than the middle ones. For sale by

G. W. W. GOODWYN,

62 Camp street.

ALSO, THE MOST

Complete and Perfect Cooking Stove

FOR BITUMINOUS COAL OR COKE,

ever invented, in the estimation of all who

have yet seen it. Patented in 1869.

THE MONITOR.

which can be seen at 62 Camp street. The advantages possessed by this Stove over all the other Cook Stoves are so numerous, and so patent to every sensible observer, that it is only necessary to examine it in order to be convinced of its superiority.

All of the above Stoves are fitted with extra care. Oven Doors lined with tin, and furnished with William Ross's Patent Air Chamber, sliding front doors, patent centres, covers and White Enamelled Knobs.

The operation of every Stove guaranteed. Directions for putting up and using same accompany each Stove.

G. W. W. GOODWYN,

62 Camp street,

Side Agent for States of La. and Texas.

THE TIMES.

THE IMPROVED

LARGE OVEN COOKING STOVE,

with extended Fire Chamber and Feeder-Top—one of the best Baking and most economical Stoves made.

The Fires are constructed so as to insure the most perfect draft. The heat of the Oven is so equal that when baking there is no need for removing anything until done.

THE TIMES

is made of a superior quality of Iron, very heavy, of neat design and fine finish. The Top is put together in sections, to permit of the greatest expansion without cracking.

We invite the attention of Housekeepers

to the advantages of this Stove. Remember, we guarantee them to give entire satisfaction. Duplicate parts can be had at all times, at small cost, by which repairs can be made which will frequently save the price of a new Stove.

ZABIE & DALTON,

No. 115 Poydras street.

STOVES, GRATES AND HOUSE FURNISHINGS.

NISHING GOODS.

The undersigned would call the attention of city and country buyers of Cooking Stoves to the following list of Stoves manufactured by Mr. M. L. Filley:

The Philanthropist.

A first class Cooking stove, having all the latest improvements that have so far been invented. Has a new arrangement for boiling; also an Ash-pan. The casting is heavier than any Stove sold in this market. Sold under a full guarantee in every respect.

The Diamond

The Christian Advocate.

SATURDAY, APRIL 9, 1870.

EDUCATION OF CHILDREN.

In a child's education, for instance, consider the two elements of unconscious observation and experience, on the one hand, and of definite and purposeful instruction on the other. Is it possible to estimate the worth of the wisdom gained by a mere contact with the facts of life, the observation of nature, and men and things, long before any theorizing or sense of plan or purpose has begun to work in the mind? Wise educators have said that systematic instruction may begin far too early, simply because we cannot prudently occupy the attention of children with book learning or artificial wisdom, at the cost of taking them at the period of eager curiosity and impressibility from the school of nature and life. It is like shutting up the bee in a hot-house, or in its life, and forbidding it to choose for and wide the materials from which to secrete its honey! Where would the future philosopher, poet, moralist, novelist, statesman, successful man of business and wise reformer find the materials for the play and action of their dialectics, their skilled language, their logic or their fancy, their shaping imagination or their statesmanship and saintly guidance—if observation, experience, an open and wide-eyed early life, had not filled their souls with suggestions, images, ideas, hopes, analogies, deep insights, visions, dreams, which they did not arrange, analyze, nor consciously meditate upon at the time, but which in the age of reflection and disciplined thought and feeling, they found an inexhaustible storehouse of thought and invention? Was ever a poet or a saint, a reformer or a statesman, made out of any boy who had not dreamed and wandered fancy-free, and conversed with nature in her visible forms, and laced out broadly, and we might almost say in a blessed neglect, beneath the eye of the open heavens, and in view of "the wide, wide world." When training on theory, when education on narrow principle begins too early, it closes more windows than it opens; it makes roads and ruts, where God has prepared fields and trackless forests for a young wanderer; it confines our attention that was meant to roam, and directs through certain conventional channels a vision that was designed to be all-armed. Of course the true time for systematic education arrives and must not be unduly postponed; not that its date is fixed, or does not differ for different natures. But no one can expect any amount of private and personal observation, or teaching from mere experience, to take the place of that systematic drill, and furnishing in books of the grand results of all human experience and observation, without which any private and personal notices and experiences must be narrow indeed. It is the light and heat which personal and direct experience and observation throw upon all indirect experience and collected knowledge and learning, which make it vital and capable of real assimilation. The knowledge of a few living plants alone interprets the vast herbarium of all nature's flora. Book learning, science, philosophy, theology, are of most value to those who have the most original and direct observation, feeling and thought. The mere observer and wholly original thinker is narrow and imperfect, as a matter of course. But the mere book worm and trained student is at best a learned duncie, who cannot test or graduate, arrange or apply his knowledge; and is an elaborate simoleon, considered from a true standard of wisdom.

It is the union of the largest and freshest personal experiences and observations, with the largest and most complete systematic learning, that makes the grandest minds, minds like Dante's, Milton's, and Bacon's—minds that shape after generations and take their place among the guiding constellations in the heaven of intellectual voyagers.

THE SUNDAY SCHOOL, NOVEMBER.—Take the Sunday school novel by itself. Weighed in balance, it is found wanting. We do not let it be understood, refer to all the books that sometimes find their way into the libraries; for we have known even Captain Maryatt's works to secure a place on the shelves in the most popular church in the land, and have heard that Ike Marvel's "Dream Life"—with the chapter on boy religion left out—has been made an effective Sunday school book in certain quarters; but the reference is to a very large portion of the Sunday school novels that are "duly accredited" religious by "boards," committees and Christian publishers, and indorsed by editors, and teachers. Their authors are largely such as cannot read one of God's lessons of fact or truth aright. Very many of them, for we make honorable exception of some, cannot run over a page of mature narra-

tately; do not know a man in the hidden springs of his life; could not write even a respectable essay on any important topic; are incapable of comprehending any religious truth with which they deal, in its essence and bearings, as the fly in the fable was of understanding the nature of the elephant on whose trunk he buzzed. But such writers, whose ignorance is only surpassed by their weakness and vanity, the larger number of whom prudent parents would not trust to teach their children arithmetic, essay to furnish our children with their religious aliment, and we permit it and thank them for it! They tell us in affecting strains of the good people who die early. They narrate in more stirring style the adventures of little children not so good, who, like the hero of "Tip Lewis," attain to wondrous heights of sanctity and success by ways and means more adapted to take them thither than a steam balloon would be to take one on a voyage to the sun. They cannot depict anything without distorting it, for they never have seen anything.—*Princeton Review.*

HOUSEKEEPERS' DEPARTMENT.

TO TAKE STAINS OUT OF WHITE MARBLE.—Take one ox-gall, one wine-glass of soap lye, one-half wine-glass of turpentine; mix and make into a paste with pipe clay. Put on the paste over the stain and let it remain for several days. If the stain is not fully removed, a second application will generally prove sufficient.

TOAST WATER.—Carefully remove the crust from a slice of stale bread, and toast the slice through on both sides, but do not burn it. Break the slice into three or four pieces, and put them into a pitcher, with a small piece of orange or lemon peel. Pour on a pint of boiling water, cover up with a napkin, and, when cold, strain off the water for use. It should be freshly made, especially in warm weather.

PUDDING SAUCE.—Boil one pint of water; thicken with one and a half heaping spoonfuls of fine flour, or two of wheat meal; sweeten to the taste, and after it is taken from the fire add the juice of two medium-sized oranges. If lemon juice be used instead of orange juice, half the quantity will be sufficient, and it should be added before the sauce is taken from the fire. The juices of various tart fruits may be used instead of these.

BROWN BEN.—Pare, quarter and core good tart apples; put them in an earthen pipkin or stone jar, filling them one-third up with water, and cover with crusts of rye and Indian bread about equal to them in quantity. Cover close, and let them stew very slowly, until all are soft; then mix evenly and serve. This makes a good side dish with vegetables. If a few Zaute currants or stewed raisins have been added, it will serve for a desert, trimmed with sweetened milk and cream.

BUBBLE AND SQUEAK.—Cut into pieces, convenient for frying, cold roast or boiled beef; pepper, salt and fry them; when done, lay them on a hot drainer, and while the meat is draining from the fat used in frying them, have in readiness a cabbage already boiled in two waters; chop it small, and put in the frying pan with some butter; add a little pepper and salt; keep stirring it, that it all may be equally done. When taken from the fire, sprinkle over the cabbage a very little vinegar, only enough to give it a slight acid taste. Place the cabbage in the center of the dish, and arrange the slices of meat neatly around it.

A NEW RACE OF PEOPLE.—An exchange paper states that a new race of people, thought to be of Asiatic origin, having features strongly resembling the Anglo-Saxons, have been discovered by the missionaries in the southwestern part of Africa. They do not join the Bechuanas, and are known as the Ovass. A king by the name of Tjikongo reigns over them. They have long, curly hair, not woolly, and are characterized by very considerable intelligence. Their religion is, in many respects, so much like that of the Puritans as to induce the belief that the Ovass belong to that race, or have been under its tuition. They are not idolaters, but believe in a Supreme Being, the Creator, who is omnipotent, omnipotent and omniscient, and whose symbols are the sun and fire, and to these they pay homage as his representatives, but offer no sacrifices to them. They keep the sacred fire constantly burning, and the princes, who are also priests, intrust to their daughters, and sometimes to their wives, the duty of superintending these sacred fires. The Ovass also believe in the existence of a very powerful evil spirit, who is not, however, omniscient nor omnipotent; and to his interference they attribute their misfortunes and accidents, and they offer no sacrifices to him. They are said to be an honest, industrious and temperate people, far more respectful of their word and more observant of good morals than most of the African nations.

MUSICAL INSTRUMENTS.

GREAT SOUTHERN MUSIC HOUSE.

PHILIP WERLEIN.

80..... BARONNE STREET..... 80

NEW ORLEANS.

PRICES REDUCED.

Pianos and Organs from 10 to 20 per cent. Cheaper

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S

COMMERCIAL COLLEGE,

Corner Commercial Place, N. O.

Open day and evening the entire year.

Penmanship, Book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from twelve to fifty years of age attend. The instruction is tailored to each student. Persons who have neglected their education can here specially qualify themselves for good situations in business. Some from the country may obtain board in the family of the principal.

William Walker, a late graduate of the Southern University of Alabama, and son of the Rev. J. B. Walker, of New Orleans, has charge of the Mathematical department. Tuition, from twenty per cent. less than other colleges in this city.

A liberal deduction made when three or more enter together. The principal has been a practical teacher in New Orleans since 1841. For circulars, giving terms, etc., address

J. W. BLACKMAN, N. O.

METHODIST FEMALE COLLEGE,

TUSCALOOSA, ALABAMA.

Under the Patronage of the Mobile Conference.

The regular scholastic year will begin on the first Monday in OCTOBER next, and end the last of June. It is divided into two terms of four and a half months each.

EXPENSES.

Primary department, per term..... \$20 00

College department, per term..... 25 00

Latin and Modern Languages, each..... 10 00

Music on Piano and Guitar..... 25 00

Use of Instrument..... 5 00

Dressing and Painting..... 20 00 to 25 00

Cothrent fee..... 3 00

Board, including washing, lights and fuel, per month..... 22 00

Young ladies must furnish their own towels, sheets, pillow cases and table napkins.

Payments for each term in advance. Pupils entering within the first month will be charged from the beginning. Indigent ministers charged no tuition in the Literary Course.

Strict attention given to the manners and morals of the young ladies, and to their habits of study.

Refer to Dr. Keener.

For information address the President, at 3m

C. D. OLIVER, Principal.

TUSKEGEE FEMALE COLLEGE,

TUSKEGEE, MAON COUNTY, ALABAMA.

REV. GEO. W. F. PRICE, PRESIDENT.

1. Institution permanent and successful.

2. Full faculty of experienced teachers.

3. Music made a special feature.

4. Art taught thoroughly and cheaply.

5. Fine Scholastic Awards in good order.

6. Boarding department excellently kept.

7. Pupils under control of President.

8. Attention to health, manners, morals.

9. Vocal music gratuitously to all.

10. Languages taught, ancient and modern.

11. Particular care given to Primaries.

12. Object Lesson System adopted.

13. Discipline thorough and efficient.

14. Literary culture unsurpassed.

MUSIC DEPARTMENT.—Dr. S. M. Bartlett, principal.—Dr. Bartlett has been a successful teacher of vocal and instrumental music for nearly twenty years, much of the time in female colleges in Alabama. The Institution has excellent instruments for instruction. Pupils practice under the professor's eye. Vocal music is a gratuitous daily exercise. Vocalization taught thoroughly.

BOARDING DEPARTMENT.—Capt. J. H. Foster, steward; Mrs. E. R. Whitehurst, housekeeper. The gentleman in charge of this department is late of Marianna, Florida, and is of elevated character and social standing. The President resides in the college, and has charge of the boarders. Young ladies must furnish one pair blankets, one pair sheets, towels, pillow cases, toilet soap and lights. Fees for each term in advance. Four weeks make a scholastic month.

Next year begins September 15, 1869. Two terms, twenty weeks each.

CHARGES FOR YEAR OF FORTY WEEKS.

Primary department..... \$25 00

Academic department..... 40 00

College department..... 50 00

Music department..... 60 00

Art department..... 20 00 to 40 00

Languages, each..... 20 00

Diploma fee..... 5 00

Board per month, without lights..... 20 00

No incidental charges of any kind. Fees for each term in advance. Total expense, without extras, at \$200.

REV. GEORGE W. F. PRICE,

Pres. Tuskegee Female College,

Tuskegee, Macon Co., Ala.

SHARON FEMALE COLLEGE,

SHARON, MADISON COUNTY, MISSISSIPPI,

will reopen on MONDAY, the 27th of September, under the presidency of

REV. J. M. PUGH, A. M.

The course of study is extensive and thorough, and no pains will be spared to give to the student a solid education.

Rates of tuition per session of ten months:

Primary division..... \$30 00

Preparatory department..... 40 00

College department..... 50 00

Cothrent fee..... 5 00

Music at usual rates.

Board can be had at from \$16 to \$20. For further information address the President.

J. H. MONTGOMERY,

President of Board of Trustees.

NOTE.—My friends in the counties of Madison, Yazoo, Holmes, Carroll, Sissindow, Attala, Scott, Rankin, Banks, Hinds, and elsewhere, will please consider this notice as a personal application for their patronage, as it will be out of my power to pay them a special visit.

The daughters of the preachers of the Mississippi Conference, and the orphans of deceased preachers, and also the orphans of deceased Masons, on application, shall have their tuition free of charge.

J. M. PUGH, President.

WHITWORTH FEMALE COLLEGE,

BROOKHAVEN, MISSISSIPPI.

will reopen SEPTEMBER 22, 1869. Provision will be made for all who apply for admission.

To send your daughter here will cost you \$20 for the term of ten months, or forty weeks. This amount will pay for board, fuel, lights, washing, tuition in English, English text books, slates, pencils, and all the stationery used in the school room. A deduction of \$50 will be made for ministers' daughters.

All the branches are taught. Our music teachers are believed to be unexcelled. Music and the Languages are extra.

Send for circular.

H. F. JOHNSON,

President.

NEW ORLEANS MARKETS.

From the N. O. Price Current.
The activity in the wholesale trade, noticed in our last issue, has been without abatement, a large business having been done on orders by mail, and a fair amount sold to country merchants, a considerable number of whom are in town laying in spring and summer supplies. We learn, moreover, that all are satisfied that they have done as well here as they could have done in New York, and saved the expenses, risks, delay, etc., of a long journey to the North. The receipts of sugar have been moderate, and met a pretty fair demand at the improvement realized last week. Molasses has sold to a limited extent, at previous rates. We have no new feature to notice in Western produce, the movement in which is still confined to the local trade and shipment to Gulf ports.

Our accounts from the country are less encouraging. We hear more complaints of cold, ungenial weather, but with this exception the indications are favorable. Our receipts of cotton have been less liberal and show some falling off from last week, but are considerably in excess of last year. The Red river and tributaries are low and falling, and some planters above the raft depair of being able to ship their crops before the June rise.

The river is now two feet eight inches below high water mark, having fallen two inches since our last.

Cotton.—The following are the arrivals since the first instant:

Louisiana and Mississippi	bales, 12508
Alabama	81
Florida	266
Mobile	125
Texas	286
Total	13266

On Saturday the demand was rather slack, and although factors generally refused to make any concessions, yet some were compelled to give way a fraction in order to effect sales, and the business was confined to 3,800 bales, at rather weaker prices, but requiring only a slight modification in quotations. On Monday, under the stimulus of an advance of $\frac{1}{4}$ d. at Liverpool, and $\frac{1}{8}$ c. at New York, buyers came forward with much more spirit, and although factors raised their pretensions $\frac{1}{4}$ to $\frac{1}{2}$ c., yet the sales embraced 5,950 bales, good ordinary closing at an advance of $\frac{1}{4}$ c., low middling of $\frac{1}{8}$ c., and other descriptions of $\frac{1}{4}$ to $\frac{1}{2}$ c. On Tuesday the market opened with very little variation, and a few sales were made at the full prices of the day before, but owing to the failure of the usual telegrams from New York and Liverpool, caused by a violent storm which suspended communication beyond Washington City, the demand subsided, buyers standing aloof, awaiting later intelligence, and hourly anticipating a resumption of telegraphic intercourse. Up to four P. M., however, no dispatches had been received north of Washington. The sales were consequently confined to 3,050 bales, mostly at Monday's advance, but, in some instances, at figures which would not have been accepted previously.

This makes an aggregate for the past three days of 12,800 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 954,476 bales, against 725,818 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 584,043 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 327,011 bales to Great Britain, of 94,724 to France, and of 103,454 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	174 to 184
Good ordinary	204 to 205
Low middling	21 to 21 1/2
Middling	22 to 22 1/2
Strict middling	22 1/2 to 23

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES.

VOL. XVI.

NEW ORLEANS, SATURDAY, APRIL 16, 1870.

NO. 137

NEWS OF THE WEEK.

DOMESTIC.

WE UNDERSTAND that the New Orleans, Mobile and Chattanooga Railroad Company has just concluded a contract with Messrs. Dillon, Casement & Co. for the construction of the first division of the road from New Orleans to Houston, Texas. This division extends from this city to the Lafourche at Donaldsonville, and is, according to the requirements of the contract, to be completed within the fifteenth of December next. These contractors have had large experience in road-building, having constructed the greater portion of the Union Pacific road, and, as we understand it, they pledge themselves to organize such a force on the line as will enable them to undertake the work west of the Lafourche by the first of October next, to complete the track to Vermillionville by the first of May, and the whole line to Houston by the close of next year. The surveys, we are informed, are nearly completed between the Sabine and Houston, and the whole line will be prepared for contract within the next two months. It is confidently asserted the company will have their track between New Orleans and Mobile completed on or about the first of July next.—*New Orleans Times.*

THE PNEUMATIC CAR ON SUNDAY.—The car of the Pneumatic Company made its trip on Sunday as expected, appearing on Canal street at ten o'clock A. M., and taking its turn with the regular cars. It proceeded, full and over, up Tchoupitoulas street, at customary mile speed, making no noise, moving with an easy and steady motion, and without the unpleasant jar peculiar to horse cars. In the vicinity of Ohio street it went off the track, partly because of the extraordinary weight of passengers in the rear of the car, and partly on account of the extended forewheels, which do not belong to it, and are not a perfect fit. Near Bull's Head the motive power had been expended and a mule became its substitute. It was then dragged up to Jackson street, and being disappointed in its expectation of a turn-table at that point, faced about, with the help of the crowd, and took its way back to the company's factory, where it arrived about eleven o'clock.

All who saw it moving by means of its own motor were more than satisfied—were gratified, and why should exhibit itself drawn by a mule over a mile of unnecessary street, with no apparent object but to give the experiment the appearance of a failure, is wholly inconceivable. It excited much wonder among those observers who knew where its abode was located. An excursion journey under mule patronage seemed incredible. We trust somebody will explain. We are at least satisfied that it was neither the wish nor the fault of Mr. Roberts.

However, those who had been incredulous as to the previous midnight experiments, about which so much had been said, were rallied to a sense of their incredulity. The believers were detected heretics, and the town is now convinced that we have a pneumatic car among us, which promises unconditional emancipation to the horses and mules of the Republic. Will it follow that they vote?

The company have been unfortunate. It was the victim of an unjustifiable confidence, we are told, in the contractors who made its air engine. But for the ability and what is almost as good, the indefatigability of Mr. Franklin Roberts, it would still be without the means of moving. That skillful worker, with his own hand, has so far remedied the engine as to wring from the recent demonstrations of power and capacity. He is now employed, we learn, in adjusting the car, upon which depends the appropriation of the whole motive power to use, and which is regarded as Captain Wailley's masterpiece of invention. On this important part of the engine time has not permitted perfect reconstruction. In the meantime we hear that the company is instituting some grand measures for rebuilding, by the most approved means and regardless of cost, under the auspices of Mr. Roberts, a superb car, with engine, tanks and all the necessary machinery to correspond. We cannot consider its success any matter of doubt.—*Times, April 12.*

NO TRIP.—The vessels sent out in search of the City of Boston have returned, and bring no tidings of her; the underwriters decline

any further risks of insurance, and the owners begin to theorize as to what may have happened. An iceberg may have run her down, she may have foundered in a storm, or caught fire. In either event it is possible some of her crew or her passengers may have got off in boats and been picked up by passing vessels, and may even yet be brought to land to tell the sad fate of their companions. It is possible, but, considering the time that has elapsed since she sailed, barely probable. Hope will not die for weeks yet, perhaps, in the breast of those whose loved ones were on board; night and morning, and all the weary day, they will wait and almost expect to hear something of the missing ship, if it be only the certainty of her destruction, and hard will be the struggle, even when all others have given up, to realize that they must live their desolate lives in doubt as to the fate of their friends. But the disinterested—so far as any human being can be disinterested—already, though hopefully, conclude that she has gone down into the secret and unknown ocean graves of the President, the Pacific, and the United Kingdom, of whose fate and burial no man knoweth.

DOUBLE IDOLATRY.—The London Times publishes another remarkable letter from Comte Montalembert, dated February 28—that is, a few days before his death. The letter is a reply to a person who had professed to find a contradiction between the count's former speeches against Gallicanism and his recent earnest protests against the tendencies of the ultramontane party. The count shows clearly that he has never sympathized with the ultramontane schemes of the present day. He quotes a very interesting letter to him from the late Archbishop Sibour, of Paris, dated September 10, 1853, which is as follows: "The new ultramontane school leads us to a double idolatry—the idolatry of the temporal power and of the spiritual power. When you formerly, like ourselves, M. le Comte, made loud professions of ultramontanism, you did not understand things thus. We defended the independence of the spiritual power against the pretensions and encroachments of the temporal power, but we respected the constitution of the State and the constitution of the church. We did not do away with all intermediate power, all hierarchy, all reasonable discussion, all legitimate resistance, all individuality, all spontaneity. The Pope and the emperor were not one the whole church and the other the whole State. Doubtless there are times when the Pope may set himself above all the rules which are only for ordinary times, and when his power is as extensive as the necessities of the church. The old ultramontanes kept this in mind, but they did not make of the exception a rule. The new ultramontanes have pushed everything to extremes, and have abandoned in hostile arguments against all liberties—those of the State as well as those of the church."

Comte Montalembert closes his letter as follows: "Therefore, without having either the will or the power to discuss the question now debating in the council, I hail with the most grateful admiration, first, the great and generous Bishop of Orleans, then the eloquent and intrepid priests who have had the courage to place themselves across the path of the torrent of adulation, imposture and servility by which we risk being swallowed up. Thanks to them, Catholic France will not have remained too much below Germany, Hungary and America."

According to cable dispatches received from Rome, the Papal Council has adopted a number of canons concerning the Roman Catholic faith. These canons do not include the doctrine of infallibility, but as regards the claims of the church of Rome, with regard to other Christians, to the secular governments, and to society in general, they reassert the most ultra-papal views.

Some few weeks ago a paragraph was going the rounds of the press, to the effect that the British and Foreign Bible Society had sent six millions of reals, or about \$600,000, for the purpose of building a church or churches in Madrid. This is a gross misstatement. The funds entrusted to the society are used only for the circulation of the Bible, and never for the building of churches.

THE PROPOSED London street railways are to charge fare at the rate of two cents a mile.

Public Education in New Orleans.

Public education in this State is about to be subjected to the operation of the law recently enacted by our Radical Legislature. Politicians seem determined, for partisan aims and selfish purposes, to destroy all that good men would accomplish in this department. The proposed changes will be most sensibly felt in this city, where our public schools have been successfully maintained, and have enjoyed an enviable reputation for efficiency and usefulness. The new law is generally regarded as unwise and inexpedient, and contains many obnoxious provisions. When enforced, and there are indications that it soon will be, the city schools will be seriously crippled, if not ultimately destroyed. Many of their pupils will be withdrawn and placed in private schools, by such parents as may be able to pay for their tuition. Others, less fortunate in their circumstances, will prefer ignorance at home to degradation at school; or will be prematurely sent, with scarcely the groundwork of elementary instruction, to manual employment.

We do not propose to discuss the importance of public education to the individual character, or to the probable destinies of the nation. All that could be said of the one may be embodied in the words of Locke: "Of all the men we meet nine out of ten are what they are—good or evil, useful or not—by their education." For the nation, we have a form of government which can only exist, according to the Jewish proverb, "by the breath of its school children."

While there are few who are prepared to deny the benefits of public education, the number is unfortunately small of those who take an active interest in the subject, beyond the wants of their own household. We are the only civilized nation without a national system of public schools. With our State and municipal systems, confessedly defective and partial, depending upon the caprice of the ignorant, so that within the very sight of the school house, children, by hundreds and thousands, are growing up in idleness and vice, there is placed before us the most solemn alternative of great calamity to our prosperity, or greater exertion on our part to overcome existing defects.

Christians, throughout the land, are taking this subject under serious consideration. Denominational schools are everywhere springing up—many of them thriving and prosperous. Protestant churches have been forced into the measure for self-preservation. The Roman Church, with great sagacity, wherever it can find a foothold, is building a school house—not colleges and universities, but school houses for the children. With every inducement of free or cheap tuition, numerous displays, and other attractive measures, they are constantly recruiting from the ranks of those who have little affection for the Roman Church, or little knowledge of its history and aims.

We are not prepared to say, with Goldsmith, "that school masters in a State are more necessary than clergymen, as children stand in more need of instruction than their parents;" but we do think that the importance of the school teachers' work is too often overlooked, and that, in the present condition of our country, we cannot, as a Protestant Church, afford to surrender to others the entire field of primary instruction. When public schools are so directed as to drive from their walls all who can possibly attend elsewhere; when Protestant children, in order to secure the benefits of a common education, must be subjected to a religious training, foreign to the faith of their parents, then we think it is time for Presbyterians to ask if they are doing their whole duty in the matter of public education.

We are of the opinion that if that day has not come, it is near at hand. We need now, or we soon shall need, at least four good schools in this city, whose teachers shall be God-fearing men and women, to whom our people may confide their children, with the assurance that their moral culture will not be neglected, and that the religious training of the church and the fire-side will not be contemned. Two of these schools should be of primary character, and so aided that the child who can pay nothing can enjoy equal educational privileges with those who can afford to pay moderate tuition fees. The other schools should be a first-class institution for boys, and a seminary for young ladies, where solid attainments in

scholarship, and rigorous mental training would not be sacrificed to the glitter of show and superficial accomplishments. These higher schools would not only be self-sustaining, but could be made to contribute whatever was needed in the support of the two primary schools.

If our people would earnestly co-operate in the establishment and support of such an enterprise, we feel assured that, with the divine blessing, success would crown their efforts, and much good would be accomplished.—*Correspondent of Southwestern Presbyterian.*

The Last Hours of Bishop Thomson.

Dr. T. H. Logan, who was with Bishop Thomson during his short illness, and witnessed his death, writes to Bishop James an account of his last hours, from which we excerpt the following, which our readers will note with interest:

"About midnight of Monday the critical point in his case was reached. He was himself conscious of a rapid change in his condition. I had sent for his physician, and on his arrival about one o'clock A. M., Tuesday, the Bishop requested him to speak plainly in regard to his condition; that he was conscious that a change had taken place in the last hour, and that he thought he comprehended its import. He was 'ready for any event in God's will.'"

"The doctor explained to him the character of the disease, and informed him that while it was possible that he would recover, the probabilities were against it. The Bishop received the announcement with great composure, expressing his entire resignation to the will of God, and his perfect confidence in the wisdom of his plans. After a few minutes given to silent prayer, in which he was evidently holding wrestling communion with God, he requested me to prepare a message to Mrs. Thomson, the matter of which he dictated with much pain, but great clearness and wisdom. Soon after he looked up at me with a most benignant expression, which encouraged me to ask him: 'Bishop, have you full peace?' His reply was: 'Oh! yes; oh! yes.'"

"At another time he used this language: 'If this be dying, it is very easy.' He remained in this frame of mind and freedom from pain until about eight o'clock Tuesday morning. At seven o'clock, after bathing his face and hands, arranging his bed, and giving him some nourishment, he requested me to 'conduct morning devotions.' I inquired if he would select the Scripture to be read. He replied: 'You select it.' I read the twenty-third Psalm, and then with his hand in mine, and under the power of emotions never before experienced, I prayed with him and for him. At eight o'clock the pain in his stomach returned with greatly increased intensity. I sent for his physician, who arrived in a few minutes, but was unable to afford him much relief, the pain refusing to yield to the influence of appropriate remedies. This pain, combined with increased difficulty of breathing, induced rapid prostration; and it was soon evident that but a few hours of earthly life were reserved for our dear Bishop. He comprehended this fact himself, and it brought to him the great trial of his dying hours, probably of his life. Until this period he had fully hoped to see his wife before death. She was not expected until evening, but might possibly arrive in the noon train. He felt a strong desire to meet her once more on the shores of Time, but now it seemed that it was not so to be; and the conviction caused him a struggle of intense and touching interest. He referred to it as a 'severe trial,' but that 'God's grace would help him to bear it.' A few minutes later he said: 'The Master said to Peter, Satan hath desired to have thee that he may sift thee as wheat, but I have prayed for thee that thy faith fail not; and he then, with great fervor, repeated, 'that thy faith fail not.'"

"A few minutes later he said to Dr. Homer J. Clark, who had a few minutes previously entered the room: 'Doctor, pray for me, that my faith fail not.' The doctor prayed with him, and in answer to his inquiry if he felt 'that the strong arm of the Almighty was supporting him?' he replied as to my previous inquiry: 'Oh! yes; oh! yes.'"

"This was his last expression in reference to his religious condition. His last words were addressed to his physician, and were understood as referring to the continued pain in his stomach, which seems to have

yielded only with his life. In the meantime the capacity of his lungs had been rapidly diminishing from effusion into the pleural cavities, and his appearance began to indicate carbonization of the blood. In less than half an hour after his reply to Dr. Clark, he was from 'pain and sorrow free.'"

"The painful condition of his lungs and his extreme debility prevented him from speaking, except with great effort and pain, during the Sabbath and later; under these circumstances, and by the advice of his physician, we did not encourage conversation with him, more than his own will would suggest. He was not demonstrative in the expression of his religious feelings; and all his expressions on the subject of religion were voluntary, except those in answer to Dr. Clark and myself.

"Much of his time during his entire illness was given to silent prayer, and at his request Mr. Stone and myself were accustomed, morning and evening, to read the Scriptures and pray with him. His composure and patience were full and complete. The trial involved in meeting death, in the absence of his wife and children, was the only interruption to the current of a strong and tranquil faith; and that I doubt not was swept away in the fervor with which he wrestled with God for grace to remove it.

"On several occasions he manifested his great love for the church and his intense interest in her prosperity. He had thought that 'there was work still for him to do,' but he added: 'God knows better than we do what is best. God's will be done.'—*Methodist.*

INFANT BAPTISM.

It is no doubt a matter of some importance to ascertain that manner of applying water in baptism which is agreeable to Scripture usage; and we are firmly persuaded this mode is by applying water to the subject by pouring or sprinkling, not by dipping or immersion. But this is a matter of minor importance compared with the question, Who has a right to the ordinance? If those who have no right are admitted, or if any who have a right are refused, a serious wrong is committed and dishonor done to an ordinance of God. In refusing to professing Christians the privilege of dedicating their children to God in baptism, we believe this wrong and dishonor are done—not intentionally, but from misunderstanding of the true nature of their relation to the church.

It is not our intention to attempt, at present, anything like a discussion of the subject, but simply to notice the fallacy of the objections of those who deny the right to infants of Christian parents. All the arguments against it amount only to this—first, that infants are not capable of faith; and second, that there is no express precept for infant baptism in the New Testament. In answer to the first it will be readily admitted by all that the infants of the New Testament church are as capable of faith as the infants of the Old Testament church were. But the male infants then had the sacrament of circumcision administered to them by God's special command, and it was the rite by which they were recognized as members of God's visible church, and a sign and seal of the covenant of grace; or, which is the same thing, that covenant which admits of imputed righteousness by faith as the apostle declares, Rom. iv, 11. Now since God appointed the sign and seal of the covenant of grace to be administered to infants eight days old, the objection of infants' want of faith is made against God himself, who instituted both these rites, circumcision and baptism.

To deny that baptism is come in the room of circumcision is mere assertion without proof, and is contrary to what the apostle plainly intimates in Gal. ii, 11, 12. Besides, our Lord's abolishing circumcision and instituting baptism is as clear evidence that the one is come in the place of the other, as that the institution of the Lord's supper superseded or came in the room of the Passover.

As to the other objection, that there is no express command for infant baptism in the New Testament, it might be sufficient to reply that none was necessary. A more pertinent and just question would be, Has the privilege been denied or forbidden to them? If we would proceed honestly and safely in our inquiries after truth and duty, the question would assume this form,

Has the Lord Jesus Christ repealed the privileges he once conferred upon the infant seed of the church? Has he given the least hint of this either in the Old or New Testaments? That he has not altered, much less diminished, the privileges of the infant seed of the church, must be admitted by all candid inquirers, and what better proof is needed that these privileges remain, or that the infants of the New Testament church have the same rights to the sign and seal of his covenant, which he granted to the infant seed of the Old Testament church, and, therefore, there was no occasion to renew an express precept for that purpose.

Children are considered as parties in God's covenant as well as their parents. Thus, when Moses called the children of Israel to enter into covenant with God, (Deut. xix, 10-12,) he said: "All of you, this day, stand before the Lord your God—your little ones and your wives—that thou shouldst enter into covenant with the Lord, thy God." If infants, then, are parties with their parents in God's covenant, what reason can be given that they should not enjoy the sign and seal of that covenant?

We might add that the Scriptures are far from hinting, that the privileges of believers' children, under the New Testament, are abridged; on the contrary, it is clearly intimated that they shall rather be enlarged. Jeremiah, speaking of the conversion of the Jews under the gospel, says, xxx, 20: "Their children also shall be as aforetime;" and Isaiah, speaking of the conversion of the Gentiles, says: "They are the seed of the blessed of the Lord, and their offspring with them."

Agreeably to these ancient predictions and his own institution, our Lord gave his apostles a commission, without making any exception of the infants of believing parents. That infants were included in this appears evident from the practice of the apostles, who, upon the confession of the parents of their faith in Christ, baptized them and their household. Thus, when the jailer believed, he was baptized and all his household; and when Lydia believed, she was baptized and her household.

But we will not follow the subject farther at present. Let professing Christians realize that it is both a very precious privilege and a solemn duty to dedicate their children to the Lord in baptism. Let them recognize their own covenant engagements to the Lord, and earnestly and prayerfully endeavor, through divine assistance, to bring them up in the nurture and admonition of the Lord.—*United Presbyterian.*

AN OLD CITIZEN, who has long been identified with our city, and who many years ago was one of its leading merchants, Mr. William A. Gasquet, departed this life yesterday at his residence on Bourbon street, at the age of seventy-one. Mr. Gasquet was a native of Petersburg, Virginia. His parents were French emigrants. During his early manhood he was engaged in the dry goods business in that town. He emigrated to this city about the year 1820, and became connected with the great house of Parish & Co., succeeded to the business of the house, and for many years, in conjunction with his brother, James A. Gasquet and Peter Conway, conducted the largest wholesale dry goods business in this city. Having accumulated a large fortune, Mr. Gasquet retired from business twenty years ago. He leaves a widow and three children, all grown, and an estate large enough to make each of them independent and wealthy.—*Times, April 8.*

A SEARCHER AFTER INFALLIBILITY.—If the Pope of Rome is infallible does not he himself know it? If not, he must be fallible. If he does know it why does he not proclaim it, like him who said: "I am the way, the truth, and the life?" Can a fallible council infallibly pronounce "his holiness" infallible? Might not the council pronounce the Pope infallible when he is fallible, or vice versa? If the Pope knows himself to be infallible why does he submit the question to a council? How can the Pope or council assure the world of infallibility?—*Buffalo Advocate.*

A MAN might frame and let loose a star to roll in its orbit, and yet not do so memorable a thing before God as he who lets go a golden orb, thought to roll through the generations of time.

The Christian Advocate.

SATURDAY, APRIL 16, 1870.

LOCAL PREACHERS.

MR. EDITOR: I am pleased to see that my little article on Local Preachers has been read by some of your readers. I thought that I had so worded my article that no local preacher who was doing his duty would take offense. If those who are offended belong to the class who have no good apology for not preaching more than four or five times a year, I have nothing to reply, for their practice is a severer criticism on their professions than anything I could write.

My article looked toward the increased efficiency of the local ministry. Can anybody reasonably object to this? I did not say that all, or even a majority of local preachers were doing less work than they could. No; I said that many of them were able and faithful, preaching almost as often as regular itinerants; but I said there were some, even elders who had made most solemn vows, who rarely preached, and appeared to be as much devoted to business as the most worldly of men. Are there not too many of such? Any man who has preached as many years, in as many Conferences, and has been, as I have been, a circuit preacher, station preacher and presiding elder, knows that there are too many local preachers who rarely preach—with whom preaching seems but an incidental business. Now it is to this class I alluded, and to none others. Local preachers, it seems to me, should be as anxious as any others to have their class elevated and improved. I don't think anything but personal affliction of the minister or his family can excuse a man, called of God to the work of the ministry, from the duty of preaching at least once a month. I have never known any sort of preacher poorer than St. Paul, and yet he preached a great deal.

I hope the unwillingness to have the General Conference do something toward increasing the efficiency of the local ministry does not arise in the mind of any brother for the reason assigned by the Irishman, who, being charged with some violation of law, was expressing his painful apprehension of the result of the trial. When he was told not to be anxious, that justice would certainly be done to him, he replied: "Faith and that's the thing that I am dreading. That I don't want at all, at all."

"But why not write about and call the attention of the General Conference to delinquent and shortcoming itinerants?" Because the General Conference always has a standing committee on the itinerancy, and it is their especial duty to investigate and report on all matters connected with this peculiarity of Methodism.

I still think, Mr. Editor, that men who profess to be called of God to preach, who ask and receive license to do so, ought to be required to comply with their vows, or else they ought to forfeit their credentials. If anybody wants to defend the class here alluded to, let them come on. I am not afraid to meet them, ten deep.

W.

Footprints on Columbus District.

MR. EDITOR: As I started out on last Thursday evening for a tour on the district I was accosted by Brother Shaeffer, saying to me in a pleasant way: "Following in the footsteps of your illustrious predecessor?" On this rainy Thursday morning I find myself fifty miles from home, yet comfortably domiciled at the house of Brother William Stegall, one of those hospitable wayside homes found here and there along the itinerant's path. While the rain patters down, and all is drear without, I will, with your permission, describe some of the "footprints" of my predecessors on Columbus district. The order in which the names of this line of men, faithful and venerable, shall appear, may be chargeable with anachronism; but, as the writer prefers it, the reader will allow it.

First in our account shall be the

name of Rev. George Shaeffer. He was presiding elder on the district for nine years, during which time he missed but one Quarterly Meeting, and he was only prevented from reaching this one by high water. The frequent inquiries made about him, and the young people in the district who hear the *phenomenon* Shaeffer, all attest the affection of the church for its faithful ex-presiding elder. His name, all over the district, is "like ointment poured forth."

More than thirty years ago one presided over this district whose name I humbly bear, whose office I imperfectly fill. The good people often ask: "Are you related to him?" I know not how long my cherished father, Rev. William Wier, served the district; but I know that, with a feeble and suffering body, and yet with unflagging zeal and energy, he addressed himself to the work of an itinerant preacher. Years have passed away since, with words of faith and hope, he cheered the mourners at his bedside, and exchanged this scene of evil and strife for the rest that remaineth to the people of God.

At the Conference which met at Talladega, in December, 1854, Rev. Charles McLoud was appointed presiding elder of Columbus district. He died, while still serving the district, near Bridgeville, Alabama. A veteran of the cross,

He fell at his post.

leaving a good record behind him. Rev. Elisha Callaway is a name, the mention of which will call up, in the minds of many, a man of quiet mien and placid brow. A stranger would not suspect the fiery ardor and fearless zeal that slumber beneath his calm exterior. Through all these valleys and hills his voice has rung, "as trumpet loud," rallying the militant hosts, and calling sinners to repentance. And woe to the graceless sinner who stood in the range of his scathing rebuke. Brother Callaway still lives among us, enjoying "a green old age," and possessing the esteem and confidence of many brethren.

Rev. William Murrah, D. D., has more than once been appointed to this district. His last term of service found him near the completion of his threescore years; and yet, notwithstanding his advancing years, he brought to the execution of his office a remarkable degree of vitality and energy, both physical and mental, making his headquarters, as he said of himself, "in the saddle." Last year, at the earnest solicitation of friends in Pickens county, Alabama, he consented to become a candidate on the Conservative ticket, to fill a vacancy in the State Legislature. He was elected, but continued faithfully to perform his duties as preacher in charge of Carrollton circuit until the first of November, when he left to occupy his seat in the legislative assembly. As a member of the General Assembly, so called, of the State of Alabama, he stands a peer among the wisest, and a head and shoulder above the scallawags, carpet baggers and negroes assembled to make laws for the people.

Here, Mr. Editor, we rest for the present, purposing, if you are interested in these "footprints," to invite you to follow them further at some future time.

T. C. WIER.

FEBRUARY 22, 1870.

An interesting and unusual ceremony lately took place in the English Church at Algiers. The Abbe —, a member of a well known noble family in France, and himself an ecclesiastic of considerable eminence and influence, formally read his abjuration of the tenets of the Roman Catholic Church, and was received into the communion of the Church of England. During the ceremony the abbe was clothed in his priestly vestments, which were afterward sent to the archbishop. This event has caused intense excitement in the colony.

He who cannot find time to consult his Bible will one day find that he has time to be sick; he who has no time to pray must find time to die; he who can find no time to reflect is most likely to find time to sin; he who cannot find time for repentance will find an eternity, in which repentance will be of no avail; he who cannot find time to work for others may find an eternity in which to suffer for himself. — H. Moore.

BIOGRAPHICAL.

REV. HOLLIS H. WILLIAMS was born in Kershaw district, South Carolina, April 14, 1814.

His parents removed to Robinson county, North Carolina, while he was yet a child. From thence he removed to Carroll county, Mississippi, in 1834. He was married to Miss Elizabeth Barfield, of Hinds county, in 1837; and settled, the same year, some six or eight miles from where the town of Winona is now located.

Brother Williams embraced religion in early youth. His conversion was clear and scriptural, and he immediately joined the Methodist Episcopal Church. Soon after coming to this State he was, in spite of his own earnest remonstrance, appointed class leader. A few weeks afterward he had an appointment at a neighboring school house. The hour came on and he went to the appointed place, but felt inefficient for the duty devolving on him, and retired to a neighboring wood to seek help from on high; and so absorbed in prayer was he that an hour beyond the appointed time for service to begin had passed ere he was aware of it. He returned to the house, where, instead of fifteen or twenty persons, he found the house full. He read a chapter, he hardly knew how; sang and prayed, and began an exhortation. The Holy Spirit attended his words with power, and his congregation of hardy pioneers became so highly excited that it was impossible for him to proceed. The few Christians there, among whom was his own gray-haired father, were made to rejoice because the love of God was shed abroad in their hearts, and sinners were made to weep and tremble at the thought of his justice and power.

Brother Williams continued for several years in the office of class leader, and was one of the few men who magnified that difficult and important position. In 1847 or 1848 he was licensed to exhort; while the Rev. H. Williams was in charge of the Middleton circuit, and to preach in 1849, when Eld. Father Bird was in charge of the circuit, and the late C. M. Rogers was presiding elder. He was ordained deacon at Vicksburg, by Bishop Kavanaugh, in 1855, and elder at Canton, by Bishop Paine, in 1861.

Brother Williams being, like his Lord and Master, of poor parentage, was deprived of the advantages of an education, and his language in the pulpit was often defective. A stranger would sometimes smile at some of the words used by him in his introduction, but there was an earnestness and fervor in and a divine power attending his words that soon made him forget to criticize, and those who smiled at his exordium wept at his peroration. Hard, indeed, must have been the heart and callous the soul of him who could sit unmoved under his powerful appeals and heart-searching sermons. We have referred to his defective language, knowing that were he living, like Cromwell, he would say to those who would sketch his character: "Paint me as I am." Such, indeed, was the love of his brethren for him, and such the confidence of all in his Christian integrity, that those who know him scarcely noticed the construction of his language, and his services were eagerly sought by all classes. He was abundant in labors and usefulness—the most self-sacrificing local preacher we ever knew.

For the last twenty years he has devoted the most of his time, during the summer and fall, to the work of the ministry, and that without earthly compensation or reward. In the altar, on revival occasions, he was unsurpassed by any man we ever knew. Like Paul, he counted not his life dear, so he but won Christ and saved souls. He literally sacrificed himself to the work of the ministry. About the first of September he attended a protracted meeting in Tallahatchie county, where he preached three times a day for five or six days, with great power, resulting in much good; but his strength, feeble at best, could

not sustain such excessive labors, and he returned home weary and worn, and in much feebleness. He preached a few times, when his strength failed so far that he had to retire from the field, saying that his work was done. In a few days he took his bed, to rise no more. The writer visited him in his last sickness, and on one occasion, when about to leave, said: "Brother Williams, your brethren and friends will want to know how you are. What shall I tell them?" He said: "Tell them that all is well. Not a cloud, not a shadow passes over my mind. All is peace and joy;" and with streaming eyes he went on to speak of the goodness of God and the glorious hope that sustained him in his afflictions. He lingered till December 10, when, at half-past twelve o'clock P. M., he fell asleep in Jesus. On the eleventh we laid him in the family graveyard, beside his father and mother, there to wait the resurrection of the just, when doubtless a multitude will rise up and call him blessed.

Brother Williams leaves a widow and seven children to mourn the kindest of husbands and best of fathers. Five of his children have been hopelessly converted. His eldest son fills the responsible position of church steward, his second that of exhorter; and doubtless a covenant-keeping God will regard the prayers of his servant, and his remaining two sons will become the servants of their father's God.

In Brother Williams the church has lost one of its strongest pillars, the Masonic fraternity one of its best members, and the world one of its brightest illustrations of the power of our holy religion.

WILLIAM H. HOLMES.

WINONA, MISS., JAN. 17, 1870.

For the Advocate.

WRITTEN ON FINDING THE LONG-LOST GRAVE OF MY SON, F. F. CLEVELAND, WHOSE REMAINS LAY IN A DISTANT PART OF THE SOLDIERS' GRAVE YARD AT VICKSBURG, MISSISSIPPI.

O Fenton! my son, my son!
Rests here thy noble head?
Is this the grave my soldier won?
No name above the dead.

No sculptured stone to mark the spot,
Or tell where sleep the brave,
And say they shall not be forgot
By all they died to save.

What now avails the bright career,
And all that glory won?
How few are left to shed a tear,
Or soothe the heart forlorn!

Still let me weep and make my moan;
Still heave thy parting sigh,
That floated low in death-like tone:
"Thy glorious thus to die!"

Murmured from dying lips the prayer:
"O God, my country save!"
Thy guardian angel heard thee there,
And hallowed then thy grave.

Beside that grave I knelt in prayer,
For thou didst seem near by,
And meekly read the Bible there,
With Faith's uplifted eye!

The sacred page with bliss ran o'er;
Redeeming love the theme;
"He is not here, but risen." Lo!
What heavenly glories beam,

And shed around celestial peace;
A Saviour's love is thine!
Thou cease, my murmuring heart, O cease!
And own the Power divine.

Farewell! farewell! we laid thee down—
By Mississippi's flood;
Where sleep thy Southern comrades round,
On Vicksburg's field of blood!

No more to mark the bursting shell,
That blazed along the air;
No more to guard the heights that swell
So proud and lofty there!

No more to watch with earnest gaze
The floating battery's light;
The deafening cannon's horrid blaze,
That glared upon the night;

To tread with thoughtful step and air
The sentinel's measured round;
Though slight and frail, undaunted hear
The cold and freezing ground.

But go! thou martyred hero, go!
And join the sacred band,
Where wars shall cease, and man no more
His brother's blood demand.

Thou wert my all—my hope, my joy!
Now whither shall I turn?
For home seems home no more, my boy:
Thy steps shall ne'er return.

Yet soon will come the welcome voice,
And I shall go to thee!
And in that heavenly home rejoice
That thou wert born to me.

ELIZABETH.

VICKSBURG, MISS., 1868.

A METHODIST Episcopal church has been erected in Fultonia, in Bulgaria, bordering on the Black sea. It numbers twenty-one members, and is the first Methodist church ever built in Russia.

The publishers of *Zion's Herald* are building a Methodist House in Boston, at an expense of about \$300,000.

How Should a Regular Minister Dress?

BY REV. L. PIERCE, D. D.

Beloved brethren, I think the picture drawn in the last scene of the last article will satisfy our brethren that a minister that dresses after the common fashion of a real rowdy—although simply a good man—might be more positively herded with rowdies, by first class people—most of whom cannot relish a minister that ignores in his dress the style of a gentleman, in places where a gentleman never does it voluntarily. Many of these violators of the laws of decorum justify themselves on the ground that the people they serve make none of these differences, indeed, do not know whether their minister is in order and in good ministerial decorum or not. Well, my brother, if I understand you, your principle of action is, that you do not believe that there is any difference in a good and cultivated taste, a delicate sense of dressing or even sleeping, in the higher classes in civilized life, over that in the lower, more brutal and vulgar style of living of men about half clothed in their own homes, in the presence of wife and daughters and visiting friends. A man at his table, in presence of these, in his shirt-sleeves, sweating and fussing like an Indian—killing off, and out of his sons and daughters the sensibilities which, if cultivated, leads to higher and more refined life—that cattle breed of mankind, who all huddle and pile up at night in one common room, just because the animal element in them pushes out the finer sense of refined, civilized and social life, at the head, and in the front of which must be refined, orderly, domestic life and society. I say, your excuse for the vulgarity of your style of dress as a minister of Jesus Christ is, that the people that you serve are so low down and far behind in their ideas of living that they do not know whether your dressing is in ministerial order or disorder—nor do they care. Alas! my brother, in this pitiful excuse, you are caught in one or the other of two miserable dilemmas. Either these low levels of life are the ones congenial with your taste and, therefore, you follow them—or else you practically refuse and fail to seek the improvement of society, in the refinements of life, by a noble example in yourself. Nay more, you endorse by your adoption of it a manner of dress universally outlawed in good society as vulgar, as a proof of low breeding, as a want of refined sense—I mean the voluntary adoption of a sack coat as your dress coat in ministerial intercourse—a mongrel ranging between a jacket and a coat, while really neither—utterly objectionable as a minister's dress coat, even when long enough to conceal, disgusting when short enough to expose. The question whether every regular itinerant Methodist preacher should be a gentleman in good society will be affirmatively answered everywhere, where good society is. I ask those preachers who publicly and professionally ignore and denounce the sense of gentlemanly order and decorum, what can be their estimate of order and decorum? Do they intend to have it understood that there should be no laws of order and decorum in social life? If so, low down as it lets them, there is the semblance of consistency. But to be consistent with low bred ideas of social life is a downward movement in the ministerial order. I have said "professionally ignore and denounce" these rules of gentile life. I do not relax my hold. I affirm and appeal to common sense for judgment, that if a man professes to be a minister of God, and a regular church recognizes him as such, I care not how incongruous his dress may be with propriety, if he were to wear no coat, but go about in vest and shirt, visiting and preaching, that would be his professional dress. He cannot get away from his profession so long as he uses it professionally. We have regular ministers now among us, indulging in these incongruous modes of dress, in their ministerial rounds, who, if they have any sense of propriety, would not, if invited to a gentleman's house, where ladies were to be as guests, go in a curtailed sack, knowing it was deemed utterly rude and indecent. Yet strange to tell, these preachers disregard the higher, holier proprieties of God's sanctuary, where not only the eyes of modest women, but of angels gaze on their ministerial estimate of decorum.

My brethren beloved, allow me to say to you in all candor, that a minister of Jesus Christ, who will allow himself to enter into God's holy places, in a dress outlawed by the sense of good society, as too vulgar and immodest to be worn in social intercourse, is in some way essentially wrong. What! a minister of Jesus Christ dare to enter the pulpit, preach, administer the holy sacraments, preside over church meetings, perform pastoral visits—always special occasions, if the pastor is in order—occasions where a thoughtful minister, acting up to the

demands of ministerial decorum, would know that every decorum would be noted with surprise, if not with offense—and still further, visiting his sick, and burying his dead, in a dress he would not presume to appear in as a bridegroom or as an invited guest in any gentleman's parlor; and yet, by the miserable perversion of his taste, or by his utter insensibility to the rules of propriety, or the still greater fault of indifference to these inchoate elements of order and propriety, he rushes along, in reckless disregard of feelings and of views, which, under all the mutations of fashion, have never changed in good society, to wit: that a gentleman, who knows he is going into society as a visiting guest, will never dare do it in the same style of dress in which he had performed his daily, common life duties in.

There is a great mistake committed by those ministers who resolve their idea of ministerial life and character into the one idea of personal piety. For while this is the most indispensable qualification, it is not the only one prescribed by divine authority. And I lay it down as the only, whole-hearted sense of Christian life and character to esteem everything which God regarded of moral importance enough to enjoin as a Christian duty, as of too much importance to be ignored by us. I say things enjoined as duties. God has not merely advised the observance of these rules of propriety. He has absolutely ordered the observance of them, and the non-observance of anything divinely required is ungodliness. It loosens us off from God. The order, that we give no offense in anything, covers all the ground. If we can offend against any law of propriety by a rude, unbecoming style of dress, which, while it may be bearable in the private, business walks of life, is offensive in the public associations of life; I say if we can offend against the proprieties of life and the sensibilities of virtue, by any deficiency in dress, we are required by divine injunction not to do it. It is proper for me now to say that this unclerical manner of dress, indulged in by some ministers in their holy vocation, gives offense to me, and causes the ministry to be blamed.

In Second Cor., 4th ch., opening verses, we have these sweeping words, "Commending ourselves to every man's conscience, in the sight of God," spoken primarily to, and of apostolic ministers. In these words I find a special law of behavior laid down, which, exactly sustains my views in these premises. The rule is to meet every man's conscience in the sight of God. In the sight of God is the great issue. Now then, brethren, you who violate the rule of decorum in dress, as laid down in the regulating laws of good society, do it, as you say, because the people you serve have no conscience on the point in controversy. Admit it, while it is yet uncertain, still the requisition is upon the basis of every man's conscience in the sight of God, and not upon the accidental consciences of the people in certain localities.

These, you say, have no conscience upon this point. If so, you only conform to their ignorance of the relation of certain proprieties to moral law and order; and instead of elevating them in their sense of the proprieties of higher life by your example, you confirm them in their rude and vulgar notions. But the moral force of this rule is found in this fact—that if a minister dresses in true ministerial order among these people, he does not offend their consciences at all, and his observance of ministerial order and decorum commends him to the consciences of all. It is in this way we commend ourselves to every man's conscience in the sight of God. Proprieties never give offense anywhere, but improprieties always give offense somewhere. Ministers should always keep within the lines prescribed. To be gentlemen in the virtuous and courteous sense of the term, is their second greatest duty. In this they offend no one; in the want of it, they offend all well put people, and bring upon themselves, when spoken of, the evil of many butts, and ifs, which make an injurious discount upon the ministerial currency. A moderate preacher, who properly commends himself to every man's conscience in the sight of God, will always be at a premium.

Let me close this fatherly rebuke of inconsiderate brethren, who break the rules of our orderly ministry, by unseemly innovations in their ministerial appearance, by cutting their minds to this golden rule of upright living. See Phil. iv, 8. Finally, brethren, whatever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are of good report; if there be any praise, virtue, and if there be any praise, think on these things. Inside of these prudential rules of life God may be served—unmindful of them we must be heedless and reckless of his divine counsel.—Southern Christian Advocate.

The Christian Advocate.

SATURDAY, APRIL 16, 1870.

ASLEEP.

BY S. JENNIE JONES.

One little arm thrown over the golden head,
One dimpled hand beneath the glowing cheek,
Two silk-fringed, snowy eyelids drooping low;
Our little, one doth sleep.

Two waxen hands crossed meekly o'er the breast,
Two azure eyes closed, ne'er to wake and weep.

Two spotless lilies where the roses were;
Our little one doth sleep.

—The Children's Hour.

TEN YEARS IN ROME.—NO. II.

THE PROPAGANDA.

Third is the Congregation of the Index. This is a choice engine of the Propaganda. It seeks not only to leave the Protestant mind with the principles of Trent, but to repress any contrary development in the minds of Catholics. It is as opposed to liberalism as to Anglicanism. Monsignor Maret and "Janus" are on a level with Dr. Pusey and Henry Ward Beecher. The reader may not be aware of the *modus operandi* of the famous Congregation of the Index. There is a prohibition against heretical books and books considered of a dangerous tendency to either morals or doctrine. The catalogue of books prohibited to indiscriminate reading is called "Index Prohibitorius." In the case of other books which are considered partially erroneous, or in need of revision, the "Index Expurgatorius" is provided. This sets forth what passages are to be expunged or altered so that they shall become innocuous. It is presided over by a cardinal with a staff of secretaries. It is used generally as a means of fighting liberalism. When a book cannot be answered, and is becoming popular, it is placed on the Index. "Suppose it is," I hear a Protestant say, "what then?" To read it becomes mortal sin, which unabsolved will incur damnation. This was the action of the Propaganda in the case of Mr. Foulkes, Bishop Maret and "Janus." It is not necessary that a book should be intrinsically bad, if its author is a heretic or suspected. All books written by Protestants, from the orthodox version of the Holy Bible to the smallest tract of the Methodists, are prohibited. It takes a wider range still. It suppresses science is secretly inimical. Bossuet describes a heretic as "one who has an opinion." The Syllabus (proposition 13) defines as erroneous those who think "the method and principles whereby the ancient scholastic doctors cultivated theology are unsuited to the necessities of our time and the progress of the sciences." Casuistry, which at various times has condoned every crime conceived by a depraved imagination, was the principal method of the ancient scholastic doctors. Against this science and decency protest; *ergo*, science and decency ought to be placed on the Index. The works of Bacon, Locke, Laplace, Galileo, Newton, Humboldt, Goethe, Schiller, Milton, Dante, Leibnitz, and nearly all great modern names in science and belles-lettres are on the Index. In one compartment—among a choice collection of literary filth and moral garbage, seemingly gathered by some one anxious to find how low human nature had sunk—I found the Bible of King James and Hooker's "Ecclesiastical Polity" side by side with the "Decameron" and "Pantagruel." Yet it is by reading the writings of Protestants that Romanists achieve a reputation for learning. If a priest confines himself strictly to the literature prescribed by the Index, he can never emerge from a state of gross ignorance. Of course such a mental condition is best suited to the Propaganda, which seeks passive obedience, not thoughtful acquiescence from moral conviction. "You have no business to think," said Cardinal Franzoni to the writer; "we think for you."

When a book is placed on the "Index Prohibitorius," this is the order of procedure: The cardinal prefect appoints some doctor of divinity to read it, and mark the passages which contravert the doctrines and discipline of the church. His conduct in this particular is guided by certain standard regulations. First, if a book is ostensibly hostile to the Holy See, and written by a Protestant or schismatic, it is *prima facie* condemnable, because the writer's mind may be supposed more or less under satanic influences. In such cases reading is quite formal. Second, if a book is ostensibly hostile, but written by a Catholic, for instance "Janus," it is to be carefully examined, to ascertain whether it has indications of a state of mind in the author meriting excommunication, major or minor, or *lata sententia*, according as these indications point to a permanent conviction or a passing impression. The book may be an isolated act, like a mortal sin in the life of a good Christian; if so, the author is not con-

demned. And third, a book may not be worthy of condemnation from error of doctrine or viciousness, and yet have a tendency to free thinking, and the erection of some other standard of arbitration than the dictum of the Holy See. In this case it is relegated to the "Index Expurgatorius."

When a book is unreservedly condemned, a hole is bored through it with an anger, in which is inserted a small stake, with this formula: "So be it into the body of the impious writer!" This used to precede burning by the executioner. Hundreds of such works are thus fettered, with the word "Condemned" inscribed upon them. The author is allowed, if a Romanist, the option of public retraction or excommunication. This was recently done in the case of Mr. Foulkes. If a book is only partially condemned, the objectionable passages are blotted out with ink, and while it is wet, dry vermilion in powder is thickly strewn over it. This prevents the restoration of the words by aqua fortis. The late Cardinal Mai recovered Cicero's "De Republica" from the library of the Index, because, happily, no vermilion had been used. I have seen a folio Chrysostom, with numerous erasures of this kind. In this list are the works of Hallam, Robertson ("Charles the Fifth"), Young ("Night Thoughts"), Walton, Sherlock, Tillotson, Burnet, Bingham, Bossuet, Pascal, Fenelon, Du Pin and Bellarmine. The Holy Scriptures in the vernacular are always placed on the first list with stringent additions to the sentence of censure. "This book must not be read indiscriminately, lest the tenacity of men cause more evil than good to arise therefrom." Without a license from the Congregation of the Propaganda, it is a mortal sin to print Bibles, to sell them, or read them in public or private.

There is an officer of the Index called the "inquisitor of heretical purity," who happily is only able to exercise his functions at Rome. He visits all printing offices and booksellers' shops, where a catalogue of the publications on sale must be seen and approved by him, under pain of fine and imprisonment in temporals, and excommunication in spirituals. Testamentary executors may not use the books of the deceased person, or transfer them to others, until he has examined them and approved. This prohibition, however, does not always hold good. The annotations of Erasmus were approved by the Pope, and yet they are on the Index.

A single illustration will suffice to show that the Propaganda is mistrustful of science. One of its staunchest adherents and most humble servants, Cardinal Paul Cullen, some years ago perpetrated a pastoral against the Copernican system of astronomy. He excited the greatest ridicule in England and America, but he did not deserve it, being only loyal to the Index. The writings of Galileo, based on the system of Copernicus, are condemned by the Index with "a mark of infamy." These are the terms of the condemnation literally translated from the records of the Index: "The proposition that the sun is the center of the world, and immovable from its place, is absurd, philosophically false, and formally heretical, because it is expressly contrary to Holy Scripture. The proposition that the earth is not the center of the world, nor immovable, but that it moves, and also with a diurnal motion, is also absurd, philosophically false, and, theologically considered, at least erroneous in faith." The way such an astronomer as Padre Secchi gets over this is shown in the preface of the "Commentary on Newton's Principia," written by two monks, Lo Shneur and Jaquier, with the imprimatur of the Index, and used as a text book in Rome: "Newton, in his third book, assumes the hypothesis of the earth's motion. His propositions could not be explained but upon the admission of this hypothesis. We have therefore been compelled to put on the appearance of admitting it. But we hereby profess our submission to the decrees of the Popes against the opinion of the earth's motion."

The expurgation system tries to prevent the influence of heretical books by purging out the obnoxious passages and substituting orthodox ones quite foreign to the author. If any enterprising Southerner had done this to "Uncle Tom's Cabin," making Mrs. Stowe a violent partisan of slavery, he would have done exactly what the Index did in the case of Corbey "On the Body and Blood of our Lord." This book was condemned by the Council of Trent; but it is now made a strong argument in favor of the dogma it denounced. Certain passages in St. Augustine are so used.

The Congregation of the Index owes its origin to Paul the Fifth, and the Council of Trent formally approved of it. Consequently, what Romanist writers try to prove an obsolete machinery is really in full vigor. Every now and then its action is felt when any remarkable

book appears. And lest any one should doubt that it is a standard institution of the Propaganda, bishops are in all countries bound to observe it; some of them are its consultants; and its proceedings will be formally approved by the council now sitting. Cardinal Baronius said to its originator: "Blessed father, the ministry of Peter is twofold—to feed and kill. To feed sheep is to take care of obedient, faithful Christians, who in meekness, humility and piety show themselves to be sheep and lambs; but with lions and other wild, refractory, troublesome beasts, Peter is commanded to kill them; that is to say, to attack, fight and slaughter them, until there be none such left." This Paul the Fifth jealously carried out. His successor, the present pontiff, is not less splenetic against heretics, for all his mildness; but times have changed. The temporal arm is palsied and inert, but the moral power is more active, and the Propaganda under Barnabo is more to be dreaded as a repressive engine directed against liberty—mental, social, personal and religious—than Torquemada and the Inquisition, or an army of bloodthirsty crusaders.—*Galaxy*.

The Ditzler and Wilkes Debate.

In the second and third days' discussion of the first proposition—Infant Baptism—Mr. Ditzler seemed easily to retain the advantage secured upon the first day. He came to his work with a calm, confident manner that in itself would have inspired confidence in the minds of all who wished success for the affirmative side of the proposition. Not upon one single occasion did we detect any embarrassment, or hesitancy in his manner of setting forth his own arguments or refuting the more prominent ones advanced by Mr. Wilkes. It was also remarked by all, and even admitted by those differing from him, that in stating the arguments of the negative, Mr. D. uniformly did so in a candid, manly way; and it was suggested to him by some of his friends that some of these arguments thus stated were put forth more lucidly and forcibly than when first advanced by Mr. W. In this regard the conduct of the latter was in marked contrast. At least one-third of the time of Mr. D. (as was frequently remarked by him, and not denied by his opponent) was occupied in correcting misrepresentations and noticing the mistakes of the negative. It was not alleged that these things were done intentionally; but it was certainly somewhat remarkable that whenever Mr. D. advanced an argument that seemed to tell with peculiar force upon the audience, in the reply of Mr. W., instead of answering what Mr. D. did say, straightway a semblance of the argument was presented in such a manner as to make it mean precisely what Mr. D. did not intend, and then would proceed to tilt against this man of straw of his own creation. For a short time this may have had its effect, but the audience became acquainted with this mode of avoidance, and it passed for what it was worth.

Our friends, the enemy, are strong on philology, they delight in *hermeneutics*. Let a man be transferred from the plow, the work-bench or cattle pen to the office of teacher or elder in their church, and he forthwith becomes learned and dogmatic. His *vide murem* is a red edged Greek Testament, with English translation appended; and though he may never have looked into an English grammar, and could not for his life correctly parse a single sentence, yet he will tell you that "no Greek scholar ever thought of translating *baptizo* and its derivatives by anything but immerse;" and is ready at any time to give a profound philological disquisition on the merits of *en, eis and apo*. Mr. Wilkes himself is considered the mighty Achilles of the Greeks. In critical excesses he is probably the best authority of their sect. But even he, with all his erudition, showed a lack of confidence in his skill in this respect when he found himself opposed by one whom common report had credited as being critically skilled in some fourteen or fifteen different languages! During the whole course of his debate we find him always avoiding, rather than seeking, philological disquisitions; and this course did not surprise those who were acquainted with the similar course of Sweeney at the Florence debate. Mr. Ditzler has given them the languages until they "have supped full" of them. His rendition of the Syriac at the Warrensburg debate concerning the baptism of "Lydia and her children" has caused the *Apostolic Times* (the Kentucky organ of the Reformers) to grow formidable with learned dissertations on that language; and, although confident in Mr. D.'s ability to maintain his position, yet we anticipated on this ground a severe struggle between himself and the learned linguists of the Lexington University. Here, so near their grand seat of learning and center of erudition, the halls in

which sat and taught their great elders; so near the sanctum of their octavo organ, with its four editors; here in the presence of Hopson, Errett and others of lesser light, it was expected that they would throw a flood of light upon the Peshito version which would at least be enlightening, if not bewildering or blinding. Mr. Ditzler made his point by reading first from the original Syriac, and then giving us the literal translation in Acts xvi, 15, in connection with the baptism of Lydia, the word *children* instead of "household," as is in our version. When the authority and weight of the original Syriac were explained, no mind in the audience so dull of comprehension as not to see the force of the argument. Time and again had the Peshito-Baptists been challenged to produce one single instance of the baptism of an infant in the days of the apostles. The households of the Book of Acts, of Lydia, Stephanus and the jailer will not do, for there may have been no children in any of them. They demand "an instance where children are named." Rules of practice, according to their logic, may only be adduced, not from principles, but facts. They demand an example; but the trouble in showing them examples seems to be that we cannot also furnish them eyes. But here, at last, is a place in what even they acknowledge to be the oldest, most authoritative of all the versions of the New Testament, in which *children*, at least, are named. What will be done with it? We notice a flutter on the other side of the house, and a confident bearing which we interpret that they, too, have their Syriac, to be produced in good time. We shall see. This thing is of great importance in the argument, and though that Syriac may be "all Dutch to us," yet the common mind, as we have said above, may easily perceive its force. What does Mr. Wilkes reply? "Tell it not in Gath, publish it not in the streets of Askelon!" He candidly admits that he doesn't know how to read a word of Syriac, and none of his brethren around him seemed disposed to assume the task for him. This is true, but then—but then—he holds in his hands a copy of Murdoch's translation of the Peshito Syriac, and he reads "household!" "Son of the morning, how are the mighty fallen!" To ask for bread and receive a stone, to expect the very depths of the Syriac to be sounded with the plumb line of hermeneutics, to anticipate the philology, the origin, root, derivatives, etc., of the original word whose meaning is so important, and then to have our high hopes dashed so suddenly to the ground by a translation! Knowing from the experience of Sweeney, at Warrensburg, that this Syriac would surely come, Mr. Wilkes has challenged its production; it has come, and with what a reception it meets! It does not take Mr. Ditzler long, in return, to dispose of this translation. He shows that Mr. Murdoch never, in the first place, professed to a critical acquaintance with the Syriac; that he did not commence its study until past fifty years old, and demonstrated from several lexicons in his possession that, however valuable this translation might be in some regards, yet that here his rendering was incorrect and entirely unauthorized. Just here a friend at our side remarks to us that "we won't soon be likely to see anything more in the *Times* on the Peshito Syriac." The Reformer who tries to spike Ditzler's gun in that unbusiness will get blown up for his temerity.

There is a rumor here on this subject, to be received for what it is worth. It was currently reported on the streets of Mt. Sterling that as soon as Mr. Ditzler had produced his Syriac, had demonstrated his thorough acquaintance with it, and, in addition thereto, so completely demolished their translation, in their anxiety to do something, they sent a telegram to Cincinnati for a brother who was supposed to be critically learned in this language which they heartily wished was so "dead" that it could never be brought forth again! The brother came by rail, and soon the case was before him. "Now, brother, Mr. Ditzler says that this word means children, and children only; that it never is translated household; that Mr. Murdoch had no authority for the meaning which he has given to the word. He has been quoting his lexicons on us and we can't tell whether he is rendering them right or wrong. We wish to know of you just how it is." "Well, as far as I know, it is just as Mr. D. has represented." The good brother took the early stage on the next morning on his return home.—*St. Louis Christian Advocate*.

MANIKIND has been learning for six thousand years, and yet how few have learned that their fellow-beings are as good as themselves!

Muller's Lecture on the Vedas.

BY REV. GEORGE D. CHEEVER, D. D.

In his lecture on the Vedas, Muller says: "No doubt, if we must employ technical terms, the religion of the Veda is polytheism. But whenever one of these individual gods is invoked each god is to the mind of the supplicant as good as all gods. He is felt at the time as a real divinity—as supreme and absolute."

Both the poets and the worshippers of the various gods of this polytheism are presented as in essence worshipping truly one and the same godhead. And Muller demands a charitable interpretation on many doctrines of ancient heathenism. "We shall learn," he says, "that there is hardly one religion which does not contain some truth, some important truth—truth sufficient to enable those who seek the Lord and feel after him to find him in their hour of need." "Those doctrines are sacred traditions, which millions of human beings are born and brought up to believe in, as we are born and brought up to believe in Christianity. It is the only spiritual food which God in his wisdom has placed within their reach."

Muller describes them as "poor, helpless creatures, brought up in the faith of their fathers, accustomed to call their god or gods by names sacred to them from their first childhood; men who had derived much real help in consolation from their belief in those gods; who had abstained from committing crime, because they were afraid of the anger of a divine being; who had performed severe penances because they hoped to appease the anger of the gods; giving a tenth, a half, perhaps the whole of their property as a free offering to their priests, that they might pray for him, or absolve him from his sin." Is this religion? If there be truth in such a system, is it anything but truth turned into error? And then the question comes: Is such error to be considered as a spiritual food supplied by the wisdom of God? Will it answer the purpose of spiritual food? Is sincere idolatry as good as true worship? Does sincerity in error take away the evil of the error? Can a man continue to drink poison live on poison as if it were bread? Because he has nothing but poison supplied to him, is bread any the less necessary? Or, because the poison has been conveyed to him through the medium of bread, is it any the less necessary that pure bread be given him? Will the bread in which the poison has been mingled neutralize the poison, or must it be removed from him as poisoned, as effectually as if the whole loaf were poison? Will the bread nourish him mixed with the poison, or will the poison take on itself the characteristics of the bread because it is mixed with it? Or, is his digestion naturally able to eliminate and reject the poison from the bread, and to take up only the qualities of nutrition into his system? If so, then all religions are sufficient for salvation; because, as St. Augustine expressed it, quoted by Muller, "there is no false religion which does not contain some elements of truth." If so, there is no more need of divine revelation after the corruption of nature than before. The corruption of truth is as good as truth if it leads the soul to God. Truth itself can do no more than that for morals.

But the apostle requires "whole-some words and the doctrine according to godliness;" and Christ declares that it is only the truth that sanctifies, not error, and that the believer of a lie is the worse for his belief. When the Spirit speaks expressly that some shall depart from the faith, giving heed to seducing spirits and doctrines of devils, speaking lies in hypocrisy, having their conscience seared as with a hot iron, is it meant that the searing makes the conscience good and whole? or that the doctrines of devils have still in them some portion, some elements of true and saving faith? or that superstition and an evil conscience are as good as a pure faith and a good conscience? Such seems to be the conclusion of a charitable comparison of religions.

"There is, perhaps," says Muller, "no race of men so low and degraded as the Papuas. It has frequently been asserted that they had no religion at all. And yet these same Papuas, if they want to know whether what they are going to undertake is right or wrong, squat before their *Karwar*, clasp the hands over the forehead, and bow repeatedly, at the same time stating their intentions. If they are seized with any nervous feeling during this process, it is considered as a bad sign, and the project is abandoned for a time; if otherwise, the idol is supposed to approve. Here we have but to translate what they in their helpless language call 'nervous feeling' by our word 'conscience,' and we shall not only understand what they really mean, but confess, perhaps, that it would be well for us, if in our hearts the *Karwar* occupied the same prominent place

which it occupies in the cottage of every Papua."

This may be very well, considered as a satire on the easy virtue of Christianity, the indifference of Christians to the voice of conscience; but not well if the design be to represent the voice of superstition toward an idol as equally sacred with that of faith toward God, taught and guided by divine revelation. If we believe in divine revelation at all, we must trust God's revealed judgment of natural religion as being the corruption and darkening of that which was good into that which is evil; under the power and guidance of ungoverned selfishness. That is the broad, appalling light cast like sheet-lightning at midnight over the whole heathen world, at the time of the Apostle Paul, in the generalizations of the first chapter of the Epistle to the Romans. All nations were left to try the great and terrible experiment of living without God in the world; before Christ came. All sins had been practiced, and many of them as virtues; all knowledge of God smothered and perverted; all evils had been tested, and all remedies of philosophy, poetry, science tried. The experiment of that reprobate mind had been tried, which was the consequence of not retaining God in their knowledge, because they preferred not his reign. When they put the images of men and beasts in the place of God, pretending that they were merely types, exponents of the divine being and aids in his worship, this was the changing of the truth of God into a lie by that very process which would leave it possible in aftertime to say in regard to the science of religion that there is hardly one religion which does not contain some important truth. As if the setting up of an idol contained a recognition, important and true, of the being of a God; instead of being itself a blaspheming of that recognition, a despotism of the godless reason, after God has been de throne from the soul and the reason idolized. And so the Apostle Paul, in the midst of the most refined as well as degraded forms of idolatry that the world ever knew—that very idolatry of the imaginative beauty and fascination of which the poet Wordsworth has

given so exquisite a description—denounced it all as the communion of devils. The things that the Gentiles sacrifice they sacrifice to devils, and not to God; and I would not that ye should have fellowship with devils. Ye cannot be partakers of the table of the Lord and of the table of devils.

This natural religion was the inevitable consequence and cause of unnatural irreligion. "There never was," says the Chevalier Bunsen, "a more crude and unphilosophical notion than that of the English and French deists of the last century respecting natural religion. Its most absolute formula is that of Diderot—*All positive religions are the heresies of natural religion*. There no more exists a natural religion than there exists a natural or abstract language, in opposition to a positive or concrete language. What was called natural is, on the contrary, but the dross of religion, the *caput mortuum*, which remains in the crucible of a godless reason after the evaporation of all life."—*New York Independent*.

THE WORD "SELAH."—The translators of the Bible have left the word Selah, which occurs so often in the Psalms, as they found it, and of course the English reader often asks his minister or some learned friend what it means. And the minister or learned friend has most often been obliged to confess ignorance, because it is a matter in regard to which the most learned have by no means been of one mind.

The Targums, and most of the Jewish commentators, give to the word the meaning of eternally, forever. Rabbi Kimchi regards it as a sign to elevate the voice. The authors of the Septuagint translation appear to have regarded it as a musical or rhythmic note. Herder regards it as indicating a change of tone; Matheson as a musical note, equivalent, perhaps, to the word repeat. According to Luther and others it means silence! Gesenius explains it to mean: "Let the instruments play and the singers stop." Woeber regards it as equivalent to *sursum corda*—up my soul!

Sommer, after examining all of the seventy-four passages in which the word occurs, recognizes in every case "an actual appeal or summons to Jehovah." They are calls for aid and prayers to be heard, expressed either with entire directness, or if not in the imperative "Hear, Jehovah!" or "Awake, Jehovah!" and the like, still earnest addresses to God that he would remember and hear, etc. The word itself he regards as indicating a blast of trumpets by the priests. Selah, he thinks an abridged expression used for Higgion Selah—Higgion indicating the sound of the strung instruments, and Selah a vigorous blast of trumpets.—*Bibliotheca Sacra*.

Pope Adrian the Third declared that the Scriptures nowhere taught a purgatory, and therefore he did not believe in one.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, APRIL 16, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—Rev. J. C. KEENER, 112 Camp street, New Orleans, La.
AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS,
REV. WILLIAM A. SHAPARD,
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY,
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, whenever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, REGISTER the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

HOW TO START A CONVERSATION.

The preacher, in visiting his flock, if he be a young man, finds it difficult sometimes to know what to talk about—where to begin. Will he suffer the exhortation? well—begin at the Advocate. Each week will furnish him with an unending theme and a varied. But suppose the parties do not take the Advocate—ah, well, in that case we could not know what he would do. It is not necessary to make any such supposition; every family should take it that even professes to be a Methodist. We can conceive of no lighter "work" by which even the smallest pretension to religion could be shown.

These thoughts are not original, or we should put them forth not quite so positively, but are, in fact, a suggestion by a brother who writes: "I have determined, if possible, to double the subscription of the Advocate on my circuit. I find it a great help in getting up and maintaining spirituality among the church members. By its assistance there need be no difficulty in getting up a religious conversation with families who are blessed with its weekly appearance."

MEMPHIS CHRISTIAN ADVOCATE.

The new dress in which this excellent paper appears this week shows what good taste, enterprise and first rate business qualities can accomplish in publishing a Conference journal. Within a narrow field its present editor has secured for this Advocate a large circulation. During the General Conference, about to convene in Memphis, it will be a power in the church for good. It speaks well for the Memphis and Arkansas Conferences, and is not the least among many evidences of the increasingly solid strength of Southern Methodism.

THE QUARTERLY CONFERENCE of the New Orleans circuit, embracing the Jefferson City, the Louisiana avenue and the Algiers charges, will meet on Wednesday evening, April 20, at six P. M., at the Advocate office, No. 112 Camp street.

ATLANTA SCHOOL.—The male and female school at Atlanta, Louisiana, is located sixteen miles north of Red river, in a healthy piney woods region, free from all epidemics, and is surrounded by an excellent population. Board and tuition very reasonable. L. George, principal; Rev. T. S. Collier, president of the Board of Trustees.

"PASSION WEEK."

"To whom is our report made known? Of mercies which the Lord hath shown? Such wonders scarce can faith believe, And scarce the mind such love conceive."

The whole Christian church agrees in assigning the present week as the anniversary of those great events in the life of our blessed Saviour which completed his work of redemption. The day on which the lamb was selected for the Passover, to be kept until the time of slaying it, begins the sacred period. On this day the Saviour entered Jerusalem in his true character as a King, though with none of the elaborate preparation which marks a royal entrance. But his reception by the multitude, who had just heard of the raising of Lazarus, was worthy of a restored monarch. They bore in their hands the fronds of the palm tree, they spread their garments beneath his feet, and with the disciples they shouted even to the little children: "Hosanna to the Son of David." It was during this progress that the Saviour with tears pronounced sentence upon Jerusalem.

On Monday (the eleventh Nisan) He came into the city from Bethany, by the fig tree, went into the temple, and for the second time in his ministry cleared the house of God of its money-lovers—a purification the church needs periodically.

On Tuesday (the twelfth Nisan) He was again in the temple, warning the people and denouncing the wickedness of the Jewish priesthood. The parables of the wicked husbandmen, the wedding garment, his answer to the Herodians, the woes pronounced on the Scribes and Pharisees, the commendation of the poor widow, the approach of the Greeks, and the Voice from heaven, were parts of this day's incidents. At night he gave that sublime description of the coming of the Son of Man. Meanwhile the high priests, lashed to fury by the Saviour's denunciation, were busy at work to complete his destruction, and had found a pliant tool in Judas.

Wednesday (the thirteenth Nisan.) He remained at Bethany until Thursday afternoon. After three days of incessant activity our Lord secured this unbroken interval of holy contemplation preparatory to his Passion.

Thursday (the fourteenth Nisan.) At sunset was the time for killing the Paschal lamb. It was then roasted, and the feast of the Passover began. This great sacrifice of the Old Covenant our Lord observed before he offered the one great sacrifice of the New, as he rested in the grave on the Jewish Sabbath before he instituted the new Sabbath by his resurrection. Entering the city privately, the Saviour sat down with the twelve apostles at the holy feast.

Thursday evening and night.—He handed them there the first cup of wine and water, which usually accompanied that feast—refusing to drink any himself, or ever again until he drank it new in the kingdom of God. He then arose, stripped and girded himself after the manner of a slave, and, taking a basin and towel, washed the feet of his disciples; enforcing on them the lesson of humility and mutual love.

Resuming his garments, he discoursed to them upon his betrayal and approaching end. He then instituted the commemorative sacrament of the New Covenant in his blood with bread and wine. After this he spoke those greatest even of his own transcendent utterances, which are recorded in St. John—fourteenth to the seventeenth chapter. These momentous moments were ended by the singing of Psalms—115 to 118. This must have brought them far in the night, and it must have been about midnight when he arose and moved out of the chamber, then out of the city, down the ravine of the Kedron, and up the Mount of Olives to the Garden of Gethsemane.

Upon that agonizing, mysterious conflict we do not dwell; the exceeding anguish of his soul was seen on his brow and face, in gathering, falling drops of blood. It

was no earthly foe that he there encountered. It was a battle which lay partly in earth and partly in the region of angels. Enough of it was visible to us to suggest the height and depth of the horror encountered by our Lord in the work of our redemption. An angel from the Father appeared to him to strengthen the humanity of the sufferer, that he might "bear the iniquity of us all."

Just outside of this garden Judas and his company now appeared in force, and arrested the Saviour at about three o'clock in the morning.

Good Friday (fifteenth Nisan.)—At the dawn the council met, and Jesus was arraigned. Jesus replied to none of the accusations, excepting only to affirm to the high priest that he was the Christ, the Son of God. He could not be stoned, because the Romans governed, and knew no such punishment; but the priests proceeded to secure his death by crucifixion. From Pilate to Herod, then from Herod to Pilate, his "judgment was taken away," and he was at last yielded by Pilate, against his own convictions of justice, to the claims of the Jewish rabble. The Saviour was crucified.

It was a Roman execution, conducted in the usual forms. The scourging had already been inflicted; he was led forth outside of the city, probably in the direction of the valley of Hinnom; and possibly where the hill began to descend, by a public road, not far from one of the city gates, he was executed. Bound to a cross and nailed, the cross was raised and placed in a socket in the rock—his feet not hanging more than twenty inches from the ground. On each side was another cross, for there were executed on this memorable occasion two thieves and the Saviour of the world! This was nine o'clock on the morning of Friday.

At twelve o'clock M. it became dark, and continued so until three in the afternoon. During this supernatural night there was an earthquake which rent the rocks; Mount Zion surged, the partition in the holy place of the temple was broken, and horror pervaded those who watched the crucified. At three o'clock P. M. the Saviour gave a loud cry, "It is finished!" and then, in ordinary tone, said: "Father, into thy hands I commend my spirit," and died. In less than an hour Joseph of Arimathea took possession of the sacred form of Jesus, and put it in his own tomb. There it remained that night and all day Saturday.

On Sabbath morning, while it was yet dark, the Saviour arose. An angel descended with the rush of an aerolite, and with a countenance of "lightning" overthrew the Roman watchers. They fell as if dead. He then rolled away the stone, that the women might see that the Saviour had arisen, and sat on it.

HABITUAL TITTLING.

One of our most valued correspondents recently suggested that the General Conference define "imprudent conduct," on page 126 of the Discipline, still further to consist of "habitual titling." He says that "public opinion favors the traffic in alcohol, and public taste favors its use as a beverage." The usual course of argument, by many of our people who are opposed to the temperance movement, is that the church is of itself a temperance society, and nothing beyond is needed. We are not disposed to controvert this position, but to accept it with all that is implied in it, namely, that the church does not allow a drunkard to remain in her communion. Now we believe that if every branch of the Christian church would promptly turn all out who are known to get drunk occasionally, then the church might indeed claim to be a temperance society. Let us ask, Is this the case?

But surely a church must go beyond this if she would have credit for advancing "temperance." She should so teach and discipline her members as to prevent the dreadful habit of drunkenness. Does she fear to arrest this sin before it becomes incurable, upon the plea that the church should not legislate upon the use of wine? Well, at what point, then, should her authority be in-

voked and interposed? It must be at some stage of the habit between the "moderate-reasonable" use and the excessive use of intoxicating drink. There is much difficulty in defining exactly where that point of interference lies. It is for "the church-a-temperance-society" people to ascertain it. We think that whenever a man becomes a habitual tippler he is as fit a subject for church action as he ever will be at any stage of this terrible disease. And a church that will not arrest its habitual tipplers ought to have full credit for producing its own drunkards.

But who shall define what "habitual tippling" is? Sure enough—who has the analytical power and the nicely discriminating speech adequate to separate between the "moderate drinker" and the out-and-out "tippler"? The quantity—how many glasses; the quality—strong or weak, wine or whiskey, biters or brandy; the frequency—once, or three times, or nine times a day, or all along during the day; the occasion—solitary or socially, at the table, at the sideboard, or at the saloon. These are controlling items one may not dismiss who is estimating where the line of moderation truly separates from the region of excess. Ah, how many a soul has been lost in the honest attempt! As no man can safely judge as to where it lies in his own case, we suggest that he leave it to those who love him to determine. And if no one can be found who is both interested in his welfare and yet sufficiently courageous to tell him his danger—the present strength of his habit—let him find a stranger who has lost a dear friend by this disease, and get an opinion from such an one. If a committee, consisting only of fathers, mothers, wives, sisters, sons or daughters, members of the church, who have at some time lost a son, a husband, a brother or a father from excessive drinking, could be summoned by the preacher in charge to determine what degree of tippling should be considered "habitual" and what should be accounted moderate, an authoritative opinion could be had. For our part, after all that can be said by apologists for moderate drinking in favor of the great benefit of a wide culture of the grape; that all things, when taken to excess, are hurtful, as well as wine; that open drinking is better than secret; that children, if denied at home, may plunge into dissipation when away; we say, after all this, we have observed that people who habitually use wine rarely stop at wine; and that all drunkards begin moderately.

There is a vast amount of drunkenness that is not reckoned—that degree which unfits a man for the delicate relation of a father or husband by making him unnaturally cross and exacting; which renders an employer tyrannical and unreasonable; that degree which produces a general disturbance of the temper without affecting the intellect or the full command of the physical powers. Here is the widest curse of drink—drunkenness of the heart, not of the head or the limbs. And it is this fostering which blood stimulants give to the malignant passions of our nature that constitutes their chief poison. They elevate unduly, and then leave a depression which is as the gnawings of a viper. This mental depression becomes an incipient hell, and often death by suicide has supervened directly upon habitual moderate drinking, without drunkenness. So far as effects are concerned, if alcohol were a liquid fiend it could not more effectually destroy all amiability, cheerfulness, faith and hope than it does in many hearts, even when used in small quantities. When we see godly men whose hopes of heaven once were strong, who seemed stronger than we ever felt ourselves to be in the faith of God, now laid low by this matter of moderate drinking, their characters for usefulness destroyed, the church humbled through them, and their families alarmed with looking for the increasing and the inevitable result, we lose all patience with those who, either by example or speech, put the cup to their neighbors' lips.

THE BISHOP OF THE SENATE.

WASHINGTON, April 11.—Senator Revels, of Mississippi, is in Brooklyn, New York. His nerves have given way.

We used to know Revels, and we doubt the correctness of this telegram. The "Senator," though in color a mulatto, is in constitution a thorough negro. And, if so, he is the first one that was ever known to "give way" in that way. If we may judge from his speech in the Senate, he evidently is not remarkable for the delicacy of his nervous organization. The usual etiquette of the Senate is that a new Senator shall only be seen during his first session. But Revels soon finds his legs. The Northern Radical papers expatiate upon the benignity of his countenance; they think, however, that his moral qualities are possibly superior to his intellectual. He is compared by one correspondent to Dr. Newman, with decided preference given to the Senator over the chaplain. This is too important to be lost, so we put it on record.

"Hiram Revels," says the writer, "whose moral faculties are of a higher order of development than his intellectual, and whose countenance shines with apostolic unction, looks the bishop of the Senate. All things considered, it is not a bad thing for this body to have a bishop. It has a chaplain. I heard him pray this morning. I haven't a doubt but he intended to offer it to the Lord, that loud-rolling, oratorical prayer; but it sounded very much as if it were addressed to the Senators."

But we wander somewhat from what we had in hand—the nervous development of this African Senator. An immense audience had collected in the Senate chamber to see for themselves the evidence of the advance in political science made by this republic in the fact that an ordinary negro preacher had been elevated to the position of a United States Senator, and had a voice in the government of the country, equal to one-half the State of New York—who was now about to speak! His breadth of shoulder, his dusky complexion, his kinkish hair and his voice—"strong, clear, mellow and sympathetic"—were entirely satisfactory. But the speech itself, by no means. It was, in fact, entirely devoid of any nervous quality, excepting a certain stolidity which the Radicals describe as "great self-possession and dignity." The great utterance which this African on a pedestal was expected to make, and which those who placed him there stood around waiting to hear, he never made. The nervous system of the pachydermatous Senator was so thoroughly eased that what belonged to the occasion probably never for one moment occurred to him. He did not feel himself to be the representative of the colored man, nor was he capable of estimating correctly the present position of his race, as related to the white man or the Radicals. He was, in truth, from the very prominence of his position, the most striking exponent of the utter helplessness of the African which the world has ever witnessed. For it was only necessary to look at him and hear him, to be reminded that he was in a place which, by the mere force of genius, neither he nor any other colored man could have arrived at, either in this country or this century. He was, however, true to his maternal ancestry. He felt himself under no obligation to any one, and it did not seem to him that he had any thanks to offer either for himself or his people to the Radicals, but rather that possibly there was an undefined and undischarged debt still due by them to the colored man. He had heard a good deal about the service which the blacks had rendered to the Radicals during the war, and it came into his head that it would be a grand stroke to mention this fact, and let them know that the black man held himself ready to receive payment in full! And just here Mr. Hiram Revels shivered the delicate nerves of his Radical friends very greatly, by discovering that he had none himself. In the full strength of his sonorous style, he proclaimed that "the people of the North owe the colored race a deep obligation, which it is no easy matter to fulfill." He enlarged; that

during the war but for the black man the North would have been overrun by the rebellion, that Northern women would have been violated, Northern cities burned, and the Northern people subjugated, etc. Rather cool, that, in Revels. As one of those "Northern women" says, in speaking of this passage: "It is not well, in the faces of hundreds of thousands of Northern graves, for any African to take on tones of patronage, and proclaim that the North owes to his race a debt of gratitude that it cannot easily repay." No, it is certainly "not well," but it is very much like "any African" to patronize anybody that will sit down and suffer him to do it. Revels can hear them congratulating themselves on every side that he is there, that it is a great step forward, that an intelligent negro like himself is a better representative than the State of Mississippi ever had before in the United States Senate; and there is nothing in Revels' nervous constitution that prevents him from subscribing to every word of it—he feels somehow that it is so.

We are curious to see if Mrs. Revels will come to the same conclusion about herself, and if the Radical Senator's wives will have as great an admiration for her society as their husbands have for the "Bishop of the Senate."

Death of Distinguished Ministers.

The Rev. Philander Smith, D.D., senior Bishop of the Methodist Episcopal Church in Canada, died at his late residence, Brooklyn, Ontario, on Monday evening, March 28, 1870.

A telegram from Beyrout, dated London, April 3, announces the death of Bishop Kingsley, of the Methodist Episcopal Church.

Also, in the Memphis Christian Advocate we have the announcement of the death of Rev. Moses Brock, of the Methodist Episcopal Church South.

Brother Brock was a traveling preacher from 1819 to 1854, except an interval of two years following his removal to the West, and filled the important office of presiding elder twenty-six years—the only kind of work assigned him after his first appointment to it. To this office and to the itinerant work generally he was admirably adapted by reason of executive talents and methodical habits, as well as on account of excellent qualities as a preacher. At the Memphis Conference, held in Somerville in 1854, he located; and since has been in retirement, seldom taking part in any public service, but illustrating in his household the virtues and graces which belong to a matured religious character—the steadfast expectant of a better, even a heavenly country.

The Rev. A. T. Goodloe writes to the Nashville Christian Advocate, from Culleoka, Tennessee, March 21, 1870: "At twelve o'clock yesterday I performed the burial service over the remains of William Mullins, who died at his residence in Marshall county, in the bounds of Duck River circuit, March 18. Please announce his death in the Advocate, and say, especially to the veterans of the cross with whom he labored forty-eight years in the Tennessee Conference, that he fell on the battle-field, with sword in hand, still warm with recent fight."

REVIVALS.

We take the following list of revival notices in block out, of the Richmond Christian Advocate, because, as our own correspondents are not reporting any special work of grace in their several fields of labor, we will not deny ourselves the opportunity of magnifying God's goodness as revealed elsewhere.

REVIVAL AT R. M. COLLEGE.—There is a promising work of grace in progress at the college. Deep seriousness prevails among the students; several have been converted. The many are under conviction. The prayer meetings held morning and afternoon are truly seasons of refreshing. Let the church pray for the increase of this gracious influence on all connected with the institution. When our sons can have at the same time the best mental and moral training, should we hesitate to send them to the schools of the church?

Randolph Macon is doing well; twenty-five young men are studying for the ministry; nearly all the students are members of the church, and those who are not are brought daily under the influence of their pious associates. The minds of our

people must be turned to the college as the source of great religious power. To make it a success, we must work for it, pray for it and give to it; must realize the true value of Christian education to the youth of our country.

CHARITIES AT HOME.—We learn from Dr. Rosser, who has just returned home to enjoy a few days rest, that the revival in Norfolk resulted in the conversion of one hundred and forty persons—one hundred had joined the church.

At Covington, Kentucky, a great revival has prevailed in the Southern Church.

Our church has great life and power in Missouri. The St. Louis Advocate reports above two hundred conversions in different circuits.

The Nashville Advocate reports one hundred and forty conversions in a few circuits in Tennessee and Alabama.

Lovelandville, S. C.—The Rev. Manning Brown writes: "Our community has been blessed with a most precious outpouring of the Holy Spirit, which resulted in a glorious revival. Quite a number were converted. My experience teaches me that as the work of God is revived, the people become willing to subscribe to our religious papers. I feel encouraged, therefore, to hope that you will receive a large increase to the number of subscribers to the Advocate from this charge—and also to the Weekly, that excellent paper for little folks."—*Southern Christian Advocate.*

Take a hint from this, and always put the church paper in the hands of young converts.

GOOD NEWS.

A letter from the Rev. J. M. Scott, dated Bragg's, Alabama, April 1, says: "The prospect for a revival is encouraging; congregations are good; Sabbath schools are in full operation; social meetings generally well attended; the heads of families have, for the most part, erected the family altar, and the Bible is studied." He sends us a number of subscribers.

The Rev. P. A. Johnston sends us a number of subscribers from Kosciusko, Mississippi, and adds: "I have not worked as faithfully as I should have done, or I could have sent as many more. I want to see the Advocate in every Methodist family in the bounds of my circuit before Conference." We should like to know that there was one circuit in existence in which every family took the Advocate.

REV. THOMAS L. DENSLER.

"Tell the brethren of the Conference and the presiding Bishop, at its next session, that I love them all, and to meet me in heaven," was among the last expressions of Rev. Thomas L. Densler, of the Montgomery Conference, who departed this life, of heart disease, on the seventeenth ultimo, at the residence of Mr. Williamson, in Autauga county, Alabama, in the sixty-fifth year of life.

We visited Brother Densler during his illness, and found him in a most excellent frame of mind, and willing to die. His wife and devoted companion died in December, and he then expressed a desire that he might soon "follow her to the grave," which was realized in less than three months; and the graves of both are fresh—to be seen at Benton, on the Alabama river. He was sick about four weeks, and, from the locality he was in, saw but few of his friends. His children, however, were all with him, and young Mr. Williamson and Mr. Howard, with whom he died, deserve all credit for their untiring service to him. The place was desolate, the weather gloomy, and in all the dreary waste of days there was but one bright spot, which was the heavenly countenance of the dying man of God.

He was born in Savannah, Georgia, in 1804; was converted at the early age of fourteen years, and continued a consistent Christian all through life. He was for some years a local preacher, but entered the old Alabama Conference about the year 1841, and except a short time, on account of throat disease, he continued faithfully to serve the church and his God until the time of his death. We are unprepared to give any general outline of his remarkable work. His appointment for this year was Autauga circuit. He filled but one round of appointments; but he served the same

work last year, and leaves on it many warm friends.

He told the writer he was ready for death, and requested him to preach his funeral sermon; on the occasion of his burial, from First Thess. iv, 14.

WM. A. EDWARDS.

ATLANTA, ALA., April 7.

NEW PUBLICATIONS.

THE MYSTERIES OF MASONSRY. By L. E. Reynolds, P. M., P. H. P. Philadelphia: J. B. Lippincott & Co. 1870. 572 pp.

"The reflecting mind," says the author, sees that "the universe is a system of uses, causes and effects, consisting of a series of three, six, nine and twenty-seven; with their attendant orders of three, five and seven, in likeness of the degrees of Ancient Masonry." This sentence is as intelligible to us as any in the book, but even this ascends so into the "regions of the vast and unknown" that we find ourselves absolutely unable to follow. The work seems to be the application of a highly spiritualized Swedenborgianism to the occult mysteries of Masonry; the result, to us, is the unintelligible. The work exhibits much labor and research. The author has harmony in him, for he is the architect of the most beautiful house in New Orleans, and his analysis of Solomon's temple, we should consider, is as accurate as it can be made at the present day. We give one sentence of this work (let him that readeth understand): "When the spheres of the heavens are first opened to man his affections are perceived by the angels; the natural affections are examined in the South by the light of science, the spiritual affections are examined in the West by the light of wisdom, and, lastly, the celestial affections are examined by the Lord in the East." For sale in the book stores of this city.

New Orleans Sabbath School Convention.

The New Orleans Sabbath School Convention will meet on Thursday, April 28, at six P. M., at Carondelet street.

6 o'clock.—Devotional exercises.

Children invited to be present.

6.30.—Organization.

7.—Singing by the children.

7.15.—Prayer.

7.30.—Address. Subject: Our Material—Infancy in its Relation to the Church.

8.15.—Reports of condition and prospects of Sabbath schools in the district.

8.30.—Address on the importance of Sabbath school libraries as the medium for diffusing general information among youth.

9.10.—Singing.

9.15.—Discussion of the address.

FRIDAY EVENING, APRIL 29.

5 to 6 o'clock.—General prayer meeting.

7.—Singing by the choir.

7.30.—Address: The Importance of Senior Classes in Sunday Schools.

8.15.—Discussion of the above theme.

8.30.—Discussion: How can we best rivet the lesson on the minds and hearts of the children?

8.55.—Discussion: How can we most effectually lead children to Christ?

9.15.—Singing by the choir.

SATURDAY EVENING, APRIL 30.

6.30 to 7 o'clock.—Prayer for the outpouring of the Holy Spirit in Sabbath schools. Children and teachers are invited to be present.

7.—Singing by the choir.

7.20.—Address: The Qualifications desired in Sabbath School Teachers, and the best way of Training them.

8.—Discussion on proceeding theme.

8.15.—Singing.

8.20.—Discussion: How shall we increase the spirituality of the Sabbath school?

SABBATH, MAY 1.

9 o'clock A. M.—Addresses to the various Sabbath schools by visiting ministers and laymen.

3 P. M.—Anniversary exhibition of the New Orleans District Sabbath School Union. Addresses, recitations, dialogues, speeches and singing by the schools.

Any of the above programme may be omitted or changed at the will of the convention.

DEATH OF MRS. SARAH C. SAGE.—We regret to learn that this venerable Christian lady died on Thursday, the thirty-first of March, at the residence of her son-in-law, Mr. V. H. Jones, in the parish of Caddo, Louisiana. Mother Sage had entered her seventy-ninth year, and continued, up to her last illness, to enjoy health of body and mind. She was the relict of the Rev. Alexander Sage, and sister of Rev. John C. Burness. The sickness of which she died was of only a few days' duration, but the final summons found her ripe for heaven, and ready to depart.

PLEASANT HILL, LOUISIANA.—The high school at this place is, we learn, steadily increasing in students. The board is put down at a very low figure—less than \$10 a month. The principal deserves great credit for his untiring devotion to the institution. Scholars are coming in from Texas.

THE AGRICULTURAL FAIR.—The managers invite machinists, merchants, agriculturists and all kinds of producers to become exhibitors in the fair, to be held in this city, beginning on the twenty-third of this month.

ON NEXT FRIDAY the moon will be full and in perigee—i. e., at the point nearest the earth—so that our satellite will appear unusually large, and as it is the first full moon after the vernal equinox, it is called the Paschal Full Moon—the day being Good Friday, and the Sunday after being Easter. This is an unfortunate name for the Passover, and if the proposed revision of the English Bible is ever made, the latter will doubtless be substituted for it in Acts xii, the only place in which it occurs in our version. Our church, like nearly all others, celebrates at that time the glorious fact of the resurrection of our blessed Lord. Despite the superstitions connected with it by Greeks, Latins and some Anglicans, we doubt not that its observance, down through all the Christian centuries, has done not a little to confirm the faith of Christendom. Let the sound go forth in all the earth, at the recurrence of the Christian passover, "Christ, the Lord, is risen to-day!"—*Nashville Advocate, April 9.*

DEDICATION SERMON.—It is expected that the main audience room of the new Central church in this city will be completed by the opening of the General Conference; and we are happy to add that the Rev. Dr. Munsey, secretary of the Board of Foreign Missions, has been engaged to preach the dedication sermon, on the second Sunday in May. *Memphis Christian Advocate.*

KOSKOO.—This medicine is rapidly gaining the confidence of the people, and the numerous testimonials of its virtues, given by practitioners of medicine, leaves no doubt that it is a safe and reliable remedy for impurity of the blood, liver disease, etc.

The last Medical Journal contains an article from Prof. R. S. Newton, M. D., president of the Medical College, city of New York, that speaks in high terms of its curative properties, and gives a special recommendation of Koskoo to the practitioners of medicine. This is, we believe, the first instance where such medicines have been officially endorsed by the faculty of any of the medical colleges, and reflects great credit upon the skill of Dr. Lawrence, its compounder, and also puts "Koskoo" in the van of all other medicines of the present day. *Norfolk Daily Journal, Dec. 11, 1863.*

Married.

In the church at Walnut Grove, March 30, 1870, by Rev. R. W. Coons, Mr. E. HELMS, of Blount county, to Miss BETTY A. TURNER, of Etawah county, Alabama.

Obituaries.

At four o'clock A. M., April 6, 1870, Sister DOROTHEA S. Aiken fell asleep in Jesus, aged seventy-four years. When twelve years old she joined the church, and has ever since been a co-worker with God. To the last her trust was in Jesus, and her treasure in heaven.

"Servant of God, well done! Rest from thy loved company! The battle fought, the victory won, Enter thy Master's joy." M.

Sister MARY ANN TAYLOR fell asleep in Jesus, March 29, 1870, aged sixty-two years.

She was a member of the Methodist Church nearly thirty years. As her life was illuminated by the sunlight of her Master's smiles, so in death he forsook her not, but sent his angels gently to bear her sanctified spirit to its eternal rest.

Fond husband and daughter, let us yield her meekly, turning our longing eyes heavenward, hoping there to rejoin her, where parting shall be no more.

Died, of typhoid pneumonia, in Wilkinson county, Mississippi, January 18, 1870, Mrs. ELIZABETH JANE Lusk, in the thirty-fifth year of her age.

Sister Lusk was born in 1835. She was the only daughter of John and Mary Sturgeon, of Adams county, Mississippi, who both died when she was quite small. After the death of her parents she became the ward of her uncle. She was baptized in her childhood, and joined the church some years after she was grown, and sustained that relation until her death. She was converted to God at a prayer meeting conducted by her uncle, Hiram Enlow, at his residence.

A few years before the late war she was married to Mr. M. Lusk, who was in the Confederate army, and died in Yazoo City on the twenty-third of April, 1863, leaving her a widow with an orphan babe. Six years and seven months after his death she died, and no doubt now rests in the bosom of her Saviour.

H. ENLOW.

DR. DAVIS ON DEAFNESS.

Send Forty cents, and get the NOTES ON DEAFNESS, by W. L. Davis, M. D. To be had of Steel & Co., 72 Camp street; Eyck, 130 Canal street; Ellis, opposite the Post Office; also, by Eells, of the author, Glass Box 339, New Orleans.

Observe.—Dr. D. has removed to No. 19 Baronne street, where he holds himself in readiness to attend to the treatment of persons in cases of Deafness—a special branch of his profession, to which he gives his whole attention.

KOSKOO.....KOSKOO.

THE GREAT REPUTATION

which Koskoo has attained in all parts of the country

AS A GREAT AND GOOD MEDICINE,

AND THE LARGE NUMBERS OF TESTIMONIALS

which are constantly being received from physicians, and persons who have been cured by its use, is conclusive proof of its remarkable value.

As a Blood Purifier it has no Equal.

BEING POSITIVELY

THE MOST POWERFUL VEGETABLE ALTERATIVE YET DISCOVERED.

DISEASES OF THE BLOOD.

"The life of the flesh is in the blood," is a Scriptural maxim that science proves to be true. The people now are suffering from many diseases, and like many popular opinions this of bad blood is founded in truth.

The symptoms of bad blood are usually quite plain. Bad Digestion causes imperfect nutrition, and consequently the circulation is feeble, the soft tissues lose their tone and elasticity, and the tongue becomes pale, broad, and frequently covered with a pasty, white coat. This condition soon shows itself in roughness of the skin, then in eruptive and ulcerative diseases, and when long continued results in serious lesions of the Brain, Liver, Lungs or Urinary apparatus. Much, very much, suffering is caused by impure blood. It is estimated by some that one-fifth of the human family are affected with Scrofula in some form.

When the blood is pure you are not so liable to any disease. Many impurities of the blood arise from impure diseases of large cities. Eradicate every impurity from the fountain of life, and good spirits, fair skin and vital strength will return to you.

KOSKOO AS A LIVER INVIGORATOR

STANDS UNRIVALLED.

BEING THE ONLY KNOWN MEDICINE

that efficiently stimulates and corrects the hepatic secretions and functional derangements of the Liver, without debilitating the system. While it acts freely upon the Liver, instead of copious purging it gradually changes the discharges to a perfectly natural state.

SYMPTOMS OF LIVER COMPLAINT AND OF SOME OF THOSE DISEASES PRODUCED BY IT.

A sallow or yellow color of the skin, or yellow-brown spots on the face and other parts of the body; dizziness and drowsiness, sometimes headache; bitter or bad taste in the mouth; internal heat; in many cases a dry, teasing cough; unsteady appetite; sometimes sour stomach, with a rising of the food; a bloated or full feeling about the stomach and sides; aggravating pains in the sides, back or breast, and about the shoulders; constipation of the bowels; piles, flatulence, coldness of the extremities, etc.

KOSKOO

is a remedy of wonderful efficacy in the cure of diseases of the Kidneys and Bladder. In these affections it is as near a specific as any remedy can be. It does its work kindly, silently and surely. The relief which it affords is both certain and perceptible.

DISEASES OF THE KIDNEYS AND BLADDER.

Persons unacquainted with the structure and functions of the Kidneys cannot estimate the importance of their healthy action.

Regular and sufficient action of the Kidneys is as important, nay, even more so, than regularity of the bowels. The Kidneys remove from the blood those effete matters which, if permitted to remain, would speedily destroy life. A total suspension of the urinary discharges will occasion death in from thirty-six to forty-eight hours.

When the Urine is voided in small quantities at the time, or when there is a disposition to Urinate more frequently than natural, or when the Urine is high-colored or containing, with weakness in the small of the back, it should not be trifled with or delayed, but Koskoo should be taken at once to remedy the difficulty before a lesion of the organs takes place. Most of the diseases of the Bladder originate from those of the Kidneys; the Urine being imperfectly secreted in the Kidneys, proves irritating to the Bladder and Urinary passages. When we recollect that medicine never reaches the Kidneys except through the general circulation of the blood, we see how necessary it is to keep the Fountain of Life pure.

KOSKOO

Meets with great success in the cure of DISEASES OF THE NERVOUS SYSTEM.

Almost nine-tenths of our people suffer from nervous exhaustion, and are, therefore, liable to its concomitant evils of mental depression, confused ideas, softening of the brain, insanity, and complete breaking down of the general health. Thousands are suffering to-day with broken-down nervous systems, and, unfortunately, tobacco, alcohol, late hours, over-work, (mental and physical), are causing diseases of the nervous system to increase at a fearful rate.

The symptoms to which diseases of the nervous system give rise may be stated as follows: A dull, heavy feeling in the head, sometimes more or less severe pain or headache; vertigo, or dizziness; noises or ringing in the head; confusion of ideas; temporary loss of memory; defection of appetite; starting during sleep; bad dreams; hesitation in answering questions; dullness of the brain; twitching of the face and arms, etc., which, if not promptly treated, lead to Paralysis, Delirium, Insanity, Impotency, Apoplexy, etc., etc.

KOSKOO

is not a secret quick remedy. Formula around each bottle. Recommended by the best Physicians, eminent Divines, Editors, Druggists, Merchants, etc. The

Best and Most Popular Medicine in Use.

TO OWNERS OF HORSES AND CATTLE.

The Child's Corner.

TWO FORTUNES.
BY ALICE CAREY.

"He not among wine bibbers; among riot-
ous eaters of flesh; for the drunkard and the
glutton shall come to poverty; and drowsi-
ness shall clothe a man with rags."—Prov.
xxiii, 20, 21.

I'll tell you two fortunes, my dear little lad.
For you to accept or refuse—
The one of them good, the other one bad:
Now hear them, and say which you choose.

I see, by my gift, within reach of your hand,
A fortune right fair to behold—
A house and a hundred good acres of land,
With harvest fields yellow as gold.

I see a great orchard, the boughs hanging
down,
With apples of russet and red;
see droves of cattle, some white and some
brown,
But all of them yours to command.

I see doves and swallows about the barn
doors,
See the fanning mill whirling so fast,
See men that are thrashing the wheat on the
floors;
And now the bright picture is past!

And I see, rising dimly up in the place
Of the beautiful house and the land,
A man with a fire-red nose on his face,
And a little brown jug in his hand!

Oh! if you would behold him you would wish
That he were less wretched to see;
For his boot-tops, they gap like the mouth of
a fish,
And his trousers are out at the knee!

In walking he staggers; now this way, now
that,
And his eyes, they stand out like a bug's;
And he wears an old coat and a battered-in
hat,
And I think that the fault is the jug's!

For our text says the drunkard shall come to
be poor,
And drowsiness clothes men with rags;
And he doesn't look much like a man, I am
sure,
Who has honest, hard cash in his bags.

Now which will you choose?—to be thrifty
and snug,
And to be right side up with your dish;
Or to go with your eyes like the eyes of a
bug,
And your shoes like the mouth of a fish!

THE BREAD-FRUIT TREE.

Away in the South Sea Islands
grows a very remarkable tree, called
the bread-fruit tree. You have,
doubtless, often seen pictures of it,
and formed a general impression of
a fine, wide-spreading tree, with
excellent loaves of bread growing all
over its branches, waiting for some-
body to pick them off and slice
them up and butter them.

It was a very natural idea, but
hardly correct in all respects. The
bread-fruit is, in reality, a large
berry about the size of a watermelon,
and when you peel off the skin of
the ripe fruit you come down to a
delicate white pulp, a little tart,
which looks somewhat like wheaten
bread. The natives cut this berry
into quarters and roast it in hot
coals, when it makes a very good
substitute for bread. There are
various other ways of preparing it,
but this is the most common.

But while the bodies of those na-
tives are thus supplied with bread,
their poor souls are perishing for
want of the bread of life. Jesus
says, "I am the bread of life," but
they have not knowledge of Jesus,
and so their souls die of famine.

You know that if we have the
nicest bread on our tables, it will do
us no good unless we eat of it. So,
if we do not take Jesus for our
Saviour we shall be no better off
than those poor islanders.

The bread-fruit tree supplies
many other wants of the body. The
inner bark is a tough, white net-
work which serves them for cloth.
The broad green leaves answer well
for wrapping paper. The wood is
used for building their boats and
houses, and a milky juice, which
issues forth wherever it is wounded,
is boiled with coconut oil and
makes an excellent ointment.

Jesus Christ, the bread of life,
supplies every want of the soul. He
can make up for the loss of every-
thing else.

A minister went to visit a poor
old man in a miserable, smoky hut,
through which the rain dropped
down upon his sick-bed, and asked
him of his welfare.

"Oh," he said, with a bright glad
smile in his face, "I am sitting un-
der his shadow with great delight."
That poor man ate of the bread of
life, and he never hungered.

A blind boy used to thank God
for "clouding his eyes;" "for," said
he, "I never saw until I was blind."
He had never before seen himself to
be a sinner and Jesus Christ as a
great Saviour. Now this bread of
life supplies all his wants.

A poor converted heathen woman
lay on her dying-bed, when the good
missionary asked her of her state.
"I have Christ here," she said, clasp-
ing her precious Bible to her breast.
"And Christ here," she added, lay-
ing her hand on her heart. "And
Christ there," she continued, point-
ing upward.

Oh, if you have never taken of
this bread of life, do not wait
longer. Many, many poor souls

are dying of famine, even while an
abundant feast is spread before them.
Do not be of their number.—*Sunday
School Visitor.*

HELEN'S REWARD.—It was hard for
a girl of fifteen to take a mother's
place to two young brothers and a
baby-sister, but, for her father's
sake, Helen tried to meet her duties
with a brave heart—for Christ's
sake, too, for Helen was a Christian.
She knew where to look for help in
every trial, but there was one trial
harder to bear than all the others.
Before her mother's death the family
were accustomed to gather night
and morning, in the little sitting
room, for prayer and singing, but
the voice that had led those devo-
tions was singing now in heaven,
and their home was without an altar,
for her father was not a follower of
Helen's loving heart. How she
wished that in this, too, she had the
strength and courage to take her
mother's place, and with the wish
came a resolve at least to make the
attempt. It was a difficult task at
first, and more than once the young
girl faltered, but a sainted face
seemed bending above her, and a
voice, dearer than an angel's, whis-
pered encouraging words.

Weeks passed, and every day that
hour of prayer grew dearer. Dea,
the faithful German girl, and the
little brothers, too, felt its sweet in-
fluence, and gave more ready obe-
dience to one who so nearly filled
the mother's place. But Helen's
heart was burdened for her father.
Day after day she prayed for him.
And, by and by, the answer came.

One Sabbath evening, as she
knelt with her little flock, her father
for the first time came and knelt
beside her. For a moment she
hesitated to pray before him, but
God gave her strength. Stilled
sobs interrupted her, and when she
finished, there, in the presence of
those little ones, the strong man
prayed the Psalmist's prayer—
"There was joy in heaven that night,
and Helen's cup was full."—*The Sun-
day School Scholar.*

A REMARKABLE PRINCESS.—A cor-
respondent of the San Francisco
Call, writing from Jerusalem, men-
tions the following pleasant inci-
dent:

Close to this place I saw two
Arabs and a woman building a
rough wall along the road. There
was an air of intelligence about the
woman's face not in accordance with
her occupation, apparel or soiled
hands. The impression was con-
firmed on conversing with her, and
I was astonished to think she could
not gain a living by some higher
occupation than building a wall.

"Would she be kind enough to
write her name for me?"
"Yes. Would I walk into her
house? It was close by."
"I did not like to take her from
her work."

"Oh, she had plenty of time."
We entered a neat cottage, plainly
furnished and well supplied with
books. She produced a large book
and asked me to write my name. I
glanced over the pages, and saw
French counts, German barons,
Russian princes, Irish and English
lords and dukes, and Francis Jo-
seph, Emperor of Austria. She
wrote her name on a card, the
"Princess de la tour d'Auvergne."

She obtained a grant from the Sul-
tan of the piece of ground whereon
Christ taught the Lord's prayer,
and is erecting a temple on it, at
her own expense, which will contain
this prayer in every language. She
has already expended over two
hundred thousand francs.

THE LARGEST CITY.—It is com-
monly believed that London is the
largest city in the world, but the
belief is erroneous. Jeddo, the
capital of Japan, is without excep-
tion the largest and most populous
city in the world. It contains the
vast number of one million dwellings
and five million human souls. Many
of the streets are nineteen Japan-
eseries in length—twenty-two Eng-
lish miles. The commerce of Jeddo
far exceeds that of any other city in
the world, and the sea along the coast
is constantly white with sails
from the southern portion of the
empire, where they are laden with
rice, tea, sea coal, tobacco, silk, cot-
ton and tropical fruits, all of which
can find ready market in the North,
and then return freighted with corn,
salt, singlass and various other
productions which have a market in
the South.

THE SCIENTIFIC AMERICAN has a
strong leader against ceding the Yo-
semite Valley to private parties. It
will be remembered that Congress
transferred that portion of the public
domain to the State of California,
"to be held as a pleasure resort for
the people of the United States, free
forever," but that certain settlers
have claimed to have preempted it.
The question now comes before
Congress, and as the claim of the
settlers seems to have no legal founda-
tion, it is to be hoped that this won-
der of the world may remain na-
tional property.

The Farm and Garden.

PLANT AND BEAUTIFY.

There is a class of persons who
come out from a city to locate in its
suburbs with ill-defined notions of
how to appreciate and enjoy country
life to best advantage.

By the time their house is finished
their capital is entirely exhausted,
and further improvements seem to be
impossible. For months, or even
years, the debris of the builder
hangs around the house in unsightly
heaps; or, if even wheeled away, no
effort is made to lay out the ground
neatly, and form neat lawns.

In how many towns and villages
have we seen scores of such houses,
repulsive in their very plainness, and
always carrying in them an un-
finished look!

By and by the place changes
hands, and the new proprietor be-
gins to improve his lots or acres as
soon as he can, by setting out choice
trees, shrubs and flowers. He
thinks nothing can make home so
attractive to his family, or so de-
lightful to himself, as the cultivation
of a few of nature's fairest gifts.

He twines the honeysuckle around
his porch, and in summer sits on the
piazza, and watches the humming
bird and bee fly in and out, gather-
ing their fragrant store.

He decks his lawn with beautiful
tulips, peonies, roses, pansies, dah-
lias, and other flowers, and laughs
to see how his neighbors stop be-
fore his gate and gaze with admiring
eyes on the delicious sight.

What a charm his cottage imme-
diately possesses, and how great the
contrast with other plain and barren
yards around!

Year after year this tasteful man
adds here and there a choice root
and plant, and never fails or flings in
his love for such beauties until the
little field becomes almost a para-
dise in itself.

We cannot expect great results
from every suburban resident—
Tastes differ, and people differ in
their powers of application and per-
severance; but every human being
is capable of exerting an effort and
accomplishing some such result, be
it of greater or less comparison.

Plant out handsome variegated
shrubs, the Japan quince, snow-
ball, dentzia, and others, that, when
flowers are lacking, there will be
something to give pleasure.

Plant out evergreens, that, when
both flowers and shrubs are gone,
there will still be left an element of
life and beauty, and your grounds
not seem altogether bare and deso-
late.

Every owner of a country place,
from a single lot to a villa site or a
large farm, should possess, accord-
ing to his ability, either few or many
of these charming adornments and
indispensable accompaniments of a
well kept country home.

The possession of them will enable
him to spend his days in peace, and
enjoy with quiet contentment the
luxury of such a rural life, while the
influence of these simple yet beau-
tiful charms will be productive of an
everlasting good in both mind and
heart.

"More than building showy mansions,
More than dress and fine array,
More than domes and lofty steeples,
More than stables, power and sway,
Make your home both neat and useful,
Bright and pleasant, always fair,
Where each heart shall rest contented,
Grateful for each beauty there."

—Southern Farmer.

PEACH GROWING ON THE SEA COAST
OF MISSISSIPPI.—The writer has re-
sided in this section for over thirty
years, and is well acquainted with
the whole piney-woods region of
Mississippi. The most of the land
is very poor, except the river and
creek bottoms. The hills, nearly
everywhere, have a clay foundation,
and are peculiarly adapted for or-
chards. The early varieties of ap-
ples, peaches, apricots, nectarines
and the native grapes, do well, and
yield good crops, when properly
cultivated. Near the sea coast the
lands are more sandy than in the
interior, with a thin soil, and these
lands require manuring constantly
in order to produce fruit trees and
vegetables. There have been some
fine orchards near this sea coast as
in any part of our country. The
most of these orchards were en-
tirely neglected during the war, and
the trees died, leaving the proper-
ties so poor and so much dispirited
that they have made little or no
efforts to restore their orchards.
But there are some few who are
cultivating peaches and peaches with
fine success, and with profit.

There is a general impression that
fruit trees in this region are very
short-lived, especially the peach.
This is an error. Many persons
have cleared off these pine hills, and
planted peach trees, which grew
luxuriantly and bore fine crops when
three and four years old, and when
six and seven died out. It is no
wonder, they died—it would have
been a miracle if they had lived.
The trees were planted without
manure, and the ground between
the trees cultivated every year in
corn, rice or sweet potatoes, until
every iota of fertility was exhausted,
and the trees died of starvation.

The lands astonish every one with

their fertility and productiveness for
two or three years; and, if properly
manured, will produce the finest
orchards in the world.

The soil is only four or five inches
deep, hence the roots of all trees
spread a long distance near the sur-
face in search of food, and the hot
rays of the summer scorch these
roots and they die. If these lands
were cultivated eight or ten inches
deep, and properly drained, and
potash and phosphates applied, I
have no doubt the peach and other
fruit trees would live here as long
as anywhere in the world.—*Corres-
pondent of Southland.*

THE ECUMENICAL.—Wearied as the
fathers are, their responsibility and
their power every day they feel
more. The Jesuits cannot manage
them altogether as they have been
accustomed to manage them each a
thousand miles off in the insulation
of his own See. The regulations,
though reinforced by supplementary
rules and by several monitions, have
become almost waste paper. The
bishops move about in society ex-
pressing their own opinions and re-
ferring to one another's, so that
every opinion is known; some one
says they have been ordered not to
assemble in more than fifteen or
twenty, but Roman palaces are
large, and Roman receptions multi-
tudinous, and the bishops make as
large circles as they please there.

The Pope's journalists are the first
to break the rule of secrecy by tel-
ling as much as suits their space or
their readers. The Pope himself,
seeing how things are going in the
council, accepts the fact, and says,
"Let them talk," and no doubt for
one Latin declamation there are
some thousand conversations in the
several vernaculars. What is more,
the really representative men are
feeling their weight, and showing
it. The Archbishop of Paris repre-
sents more Catholics than all the
"Roman Bishops" together. The
opposition has been carefully com-
puted to represent eighty millions,
while the entire Roman Catholic
Church cannot make out more than
one hundred and seventy millions.
Under such circumstances the bare
chance of a schism is terrible. The
fathers are daily getting more insight
into the whole situation, and they
are even learning history. Then,
from the other rock ahead the pilots
here have their eyes open. They
see how promptly, and, as they say,
how irregularly and scandalously,
the German protest was published
at home, whereas, it is maintained
here, it never was presented, and
was not allowed to be presented, to
the Pope. Austria, so apt to en-
tangle herself, cut a knot there. As
to France, it is sinking deep into
the mind of Rome that the power
which occupies Civita Vecchia is the
majority in the French chamber for
the time being; that majority which
is itself one of the doctrines to be
anathematized by this council. The
assembled fathers see all that Rome
sees, but not with all her fears or her
inferences. Of course Rome will
never give up the game. If she is
forced to send these fathers away it
will only be for a time, and if their
presence would save her, not one
would be allowed to leave her ter-
ritory. They are hostages. But I
must close.—*London Times.*

ONE Sabbath afternoon an elo-
quent English minister, in his clos-
ing prayer, referred to a long pre-
vailing drought, and earnestly be-
sought the divine Giver of all good
to vouchsafe some seasonable and
much wished for rain. Immediately
rain began to fall—the first for
many weeks—and for a short time
it fell like a shower bath. Mean-
time, the church service having con-
cluded, the congregation was dis-
missed; and then came the scramble
for umbrellas. One lady, who had
no umbrella with her, commenced
to gather the skirts of her gown
over her head before quitting the
church vestibule, at the same time
remarking to a neighbor: "El-
se, wouldn't it be too bad of the doc-
tor, he might have lotten us hume
first."

CHINESE TEMPLES FOR SALE.—Bish-
op Kingsley, of the Methodist Epis-
copal Church, now in China, writes
that "the oldest and most imposing
temples are going to decay. Some
of the temples are offered for sale,
that the copper idols may be turned
to pecuniary account. Public opin-
ion will not exactly tolerate the
desecration of the temple by native
Chinese, but they will allow foreign-
ers to buy the temples and dispose
of the copper, and they will buy it
of them." He says a temple is now
offered to the mission, and the own-
er promises to buy back the copper,
and pay \$40 more for it than he
asks for the temple, idols, ground,
etc., etc.

The most famous ruin in England
just now is the young Duke of
Hamilton, who has squandered a
fortune of \$200,000 a year, and has
contracted for, more properly, ex-
pended debts to the amount of half
a million more.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD
NOW IN USE.

THE FASHION.

We call especial attention to this Stove,
which has been produced at great expense,
combining all the new and important im-
provements in the extra height of the
oven under the fire chamber. Instead of the
Chamber, Front Doors, and Patent White
Enamelled Iron Knobs, the improvement in
the covers and centre pieces, all of which
have been covered by Letters Patent, and
are used in no other Stove. They are war-
ranted to stand fire, or others sent free of
charge in all cases. We have all sizes of this
justly celebrated Stove, both

PLAIN AND EXTENDED BACKS,
the Extended Back with cast Iron Enamel-
led Reservoir and Flue. The Warming Closet,
Gridiron Cover, etc. The part of the top sup-
porting the Reservoir is raised so that the fire
is above the top plate. Instead of below, as in
the case in most of the Stoves now used, the
heat is forced directly against the whole
surface of the bottom of the Reservoir. The
Reservoir, being detached from the pipe, can
be removed at pleasure, thereby forming a
skilful Stove. The best in use, as the back
holes will heat as well or better than the
middle ones. For sale by

G. W. W. GOODWYN,
62 Camp Street.

ALSO, THE MOST
Complete and Perfect Cooking Stove
FOR HUTTENSON'S COAL OR COKE

ever invented. In the estimation of all who
have yet seen it. Patented in 1869.

THE MONITOR,
which can be seen at 62 Camp Street. The
advantages possessed by this Stove over all
the other Cook Stoves are so numerous,
and so patent to every sensible observer,
that it is only necessary to examine it in order
to be convinced of its superiority.

All of the above Stoves are fitted with ex-
tra large, heavy, double lined iron flues, and fur-
nished with William Rosser's Patent Air Cham-
ber, sliding front doors, patent centre, cov-
ers and White Enamelled Knobs.

The operation of every Stove guaranteed.
Directions for putting up and using same
accompany each Stove.

G. W. W. GOODWYN,
62 Camp Street,
Sole Agent for States of La. and Texas.

THE TIMES.
THE IMPROVED
LARGE OVEN COOKING STOVE,
with extended Fire Chamber and Feeding
—one of the best Baking and most econo-
mical Stoves made.

The Flues are constructed so as to insure
the most perfect draft. The heat of the fire
is so regulated that when burning there is no need
for removing anything until done.

THE TIMES
Is made of a superior quality of Iron, very
heavy, of neat design

The Christian Advocate.

SATURDAY, APRIL 16, 1870.

LETTER FROM DR. HURST.

THE GERMAN LITURGICAL COUNCIL.
COURSE OF THE VATICAN COUNCIL.FRANKFURT-ON-MAIN, GERMANY.
February 18, 1870.

Notwithstanding every precaution to prevent the proceedings of the Vatican Council from getting to the public ear, quite enough of even the most carefully guarded portion of what has been done, and proposed to be done, has gotten out, and even to this side of the Alps, to awaken in all Catholic sections that have a spark of liberalism and general sympathy with the spirit of the century a feeling of indignation against the whole spirit of the council. The Jesuits have for once overreached themselves. It now comes out that their and the Pope's—they boss the job by turns, when not together—great object in getting up the council was to adopt the dogma of papal infallibility; and to sugar-coat the pill in the most grandiose way, they have made everything contribute to the very outset. They began adroitly enough, it would seem, and have taken several important steps to carry out their purpose. The climax of these is the address, circulated for signatures, praying the Pope "to take the requisite steps to have his own infallibility declared by the present council an article of faith." At first this was given out as merely a personal affair, just as the handing his holiness a few English sovereigns for his hungry purse, and due pains were taken to have the telegraph tell Europe that Pius the Ninth looked upon the paper as a pleasant and unofficial testimony to his fatherly person. But not a bit of it. This document was designed as the entering wedge for bringing the subject of papal infallibility before the council, not for debate, but for a slavish affirmation.

Protestants could not understand this and all the other preparatory movements for the adoption of the proposed dogma. And how could they, not being "to the manner born?" But the liberal Catholics of Germany, who naturally knew the tactics of their wary co-religionists, comprehended the scheme at a glance. They said—and the sheets containing their rationations have hardly had time as yet to get into the waste-paper basket—that the ultramontanes were determined to go to extremes, and to follow the blind lead of the Jesuits, whose great goal was the passage of papal infallibility as a part of the creed.

DR. DOLLINGER THE LEADER OF THE MOVEMENT.

But the German liberal Catholics were not satisfied with merely expressing their fears; they went to work with all commendable zeal to prevent any possibility of their fulfillment. They published protests, held meetings, circulated remonstrances, and, indeed, got into motion the whole machinery of a tremendous opposition. The counter movement has been gathering great momentum within the last fortnight, and it is safe to say that there is not a Roman Catholic congregation in Germany that has not had its equanimity disturbed by it. Some have quite lost their equilibrium.

The very soul and tongue of the opposition is Dr. Dollinger, provost of the University of Munich. Before the council had convened he published a pamphlet or two against the spirit that had gotten it up and was likely to control it, while the least part that he is thought to have taken in writing *Jahres* is inspiring. Latest of all, he has appealed directly to the common sense of the Roman Catholic masses in a series of slashing articles in the *Angsbürg Allgemeine Zeitung*, the best paper on the continent, and the one hated above all others in Rome. You may imagine their drift from the following bold words:

"The bishops who have signed this address (the above mentioned one) demand that one hundred and eighty millions of human beings shall, under penalty of excommunication, exclusion from the sacraments and eternal damnation, believe and profess what the church has never yet believed or taught. * * * Between faith and the understanding acceptance of an opinion regarded only as probable, there is a world-wide difference. The Catholic can only believe the truth which has been divinely revealed, belongs to the substance of saving doctrine, has been propagated and prescribed as above all doubt by the church itself, the profession of which has been a condition of membership, and the denial of which it allows on no condition, but rejects as heresy. In truth, therefore, from the beginning of the church to this day, no person has ever believed the infallibility of the Pope—that is, as he believes in God, Christ and the Holy Trinity; but many have only imagined, or at most regarded as *humanly* certain, that this prerogative belongs to the Pope. The proposed

change would be something totally new in the history of the church, without a parallel in eighteen centuries. It is an ecclesiastical revolution which they desire who look less at the interests of the very basis of the church than the desires of a single man, the Pope. * * * If the address be passed, the Catholic must ever afterward say: 'I believe because the Pope, now declared infallible, has ordered so, and so to be taught and believed. I believe he is infallible simply because he says so himself. True, some four hundred or six hundred bishops, assembled in Rome in 1870, did resolve that the Pope is infallible; but the bishops and that whole council, save only the Pope, were subject to the possibility of error. To be raised above the possibility of error was the right and possession of the Pope alone, and hence the bishops, few or many, could neither strengthen nor weaken his testimony. That dogma, therefore, could only have the force and authority which the Pope gave it, since he appropriated infallibility.' Thus everything is resolved into the Pope's testimony of himself, all of which is very simple. In the midst of all this, let us remember that one thousand eight hundred and forty years ago an infinitely higher One said: 'If I bear witness of myself, my witness is not true.'"

HOW THE MOVEMENT IS REGAIDED.

The sympathy with Dr. Dollinger's opposition to the proposed dogma, and the general ultra course of the Vatican Council, is taking a peculiar shape. Addresses of encouragement are reaching him from all quarters of Germany. Munich gave him the freedom of the city. The Roman Catholic faculties in the universities are vied with by secular professors, by politicians, literary celebrities, schools of all grades, industrial organizations, and I know not what else, in giving him reassuring words, and imploring him to continue the fight. Dr. Dollinger is just now the theme of conversation in all circles, and of comment in all newspapers and magazines. His portrait is getting to be as familiar as Bismarck's. The following utterance from a political paper, the *Frankfurter Journal*, will furnish a fair idea of how the whole movement is regarded by the extra-religious world:

"We would serve the cause of the freedom of the German nation," it says, "and it is alone in view of its aims and hopes that we pass opinions on civil and political affairs on this as well as the other side of the Rhine, on this as well as the other side of the Alps. And it is just from this point of view that the Dollinger movement is significant and fruitful of hope. It shows life in just those sections which seemed stiffened to petrification; it shows an individual conviction where there seemed to reign supreme a dogmatism which submitted slavishly to every order from the Vatican; it shows the possibility and almost even the beginning of a new German Roman Catholic Church polity, where before everything had been surrendered to Rome. The most important and highly respected representatives of Roman Catholic learning and culture have declared for Dollinger. The Catholic theological faculties of Bonn and Prague (to these are now added Münster and several others) are his defenders; even political characters of great note join in the movement. The course things are taking in Rome hastens the matter. The Jesuit party in the Vatican have passed a number of canons which would have aroused the indignation of the whole intelligent world if the educated world were not so far off, fortunately, as to be content simply with astonishment. Right in the face and eyes of the century, everything is 'accused' which in moral freedom is worthy of the century—accused by a power which exists outwardly only by aid of the dying Caesarism in Paris, and inwardly begins to quake, as Dollinger, clearly shows, by the folly of the extreme party in Rome. Dollinger's protest—mark this well—dates back of the newest revelations from Rome; since these have been made, his protest has only had a more pervasive effect. Depend upon it, the opposition this side the Alps will surely increase with the violence of the measures beyond them. The affair is an eternal development; it is a most desirable phenomenon, producing blessings which no political power could bring to Germany. * * * Truly we have needed Caesarism to give new strength to the European party of freedom; and we have needed Jesuitism, with its pernicious character, to drag Catholicism up into the light of the century."—*New York Methodist*.

THE BISHOP OF LONDON PROPOSED

some time ago to raise £1,000,000 for city evangelization. There have been received £250,000, and the failure to secure all that was designed has prevented the building of chapels, rather than direct mission work.

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S

COMMERCIAL COLLEGE.

61 CAMP STREET,

Corner Commercial Place, N. O.

Open day and evening the entire year.

Pensionship, Book-keeping, Mathematics

and Languages are practically taught by ex-

perienced professors. Persons from twelve

to fifty years of age attend. The instruction

is private to each student. Persons who

have neglected their education can here

speedily qualify themselves for good situa-

tions in business. Some from the country

may obtain board in the family of the prin-

cipal.

William Walker, a late graduate of the

Southern University at Alabama, and son of

the Rev. Dr. A. H. Walker, of New Orleans,

has charge of the Mathematical department.

Trans-ten to twenty per cent. less than

other colleges in this city.

A liberal deduction made when three or

more enter together. The principal has been

a practical teacher in New Orleans since

1851. For circulars, giving terms, etc., ad-

dress J. W. BLACKMAN,

sell ly New Orleans.

METHODIST FEMALE COLLEGE.

TUSCALOOGA, ALABAMA.

Under the Patronage of the Mobile Conference.

The regular scholastic year will begin on

the first Monday in OCTOBER next, and end

the last of July. It is divided into two terms

of four and a half months each

NEW ORLEANS MARKETS.

From the N. O. Price Current.
The general market, especially in most branches of the wholesale trade, has exhibited a fair degree of animation since our last issue. Sugar and molasses have been in good request and commanded full prices, and the movement in Western produce has continued confined to the local trade and Gulf ports.

Our accounts from the interior report a rise in the Onachita, but no improvement in the Red river, which is extremely low and falling. The receipts of our leading staple, nevertheless, have been quite liberal, but 2,814 bales less than for the corresponding period last week.

The river is now three feet ten inches below high water mark, having fallen four inches since our last.

Cotton.—The following are the arrivals since the eighth instant:

Louisiana and Mississippi.....bales..	8619
Arlacoechee.....	66
Arkansas.....	1090
Mobile.....	714
Florida.....	4
Texas.....	110
Total.....	10663

On Saturday the previous animation was followed up by a slack demand, and as the advance in gold led many factors to raise, or at least be more stringent in their pretensions, very little was done until, in order to bring out buyers, they were compelled to offer their stocks more freely. But even this failed to excite any spirit, and the sales were confined to 3,650 bales, at previous rates in some descriptions, and a falling off of $\frac{1}{4}$ to $\frac{1}{2}$ in others. On Monday the movement continued languid, which a further advance in gold and foreign exchange failed to stimulate, although it led some factors to ask outside rates or a fraction more. In fact, some sales were made at a reduction, but the business, which embraced 4,950 bales, closed without any quotable change. On Tuesday the market opened under the depressing influence of a decline in gold and foreign exchange; and discouraging telegrams from New York and Liverpool, which unsettled prices, and confined the business during the morning to a few small lots, at a reduction of $\frac{1}{4}$ to $\frac{1}{2}$ cts, but later in the day parties came together, and 3,600 bales changed hands at a falling off of $\frac{1}{4}$ cts in good ordinary and the better qualities, and $\frac{1}{2}$ cts in the lower grades. The demand was slack, and sales could not be forced unless at inside rates or a fraction less. Hence sales were reported as low as 20 cts for strict good ordinary, 21 cts for low middling, and 21 $\frac{1}{2}$ cts for strict.

This makes an aggregate for the past three days of 11,300 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 971,479 bales, against 736,529 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest date, as compared with last year, is 584,429 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 336,558 bales to Great Britain, of 100,482 to France, and of 111,873 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary.....	17 $\frac{1}{2}$ to 18 $\frac{1}{2}$
Good ordinary.....	20 $\frac{1}{2}$ to 21 $\frac{1}{2}$
Low middling.....	21 $\frac{1}{2}$ to 22 $\frac{1}{2}$
Middling.....	22 $\frac{1}{2}$ to 23 $\frac{1}{2}$
Strict middling.....	23 $\frac{1}{2}$ to 24 $\frac{1}{2}$

The Christian Advocate.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, APRIL 23, 1870.

NO. 14.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, April 12.—The anti-Mormon bill, passed by the House some time ago, was favorably reported to-day by the Senate Territorial Committee. They retain all to which the House, on Cullom's motion, agreed, and insert half a dozen new sections. Officers of the Mormon church are not only prohibited from solemnizing marriages, but it is made a misdemeanor for them to do so, punishable with fine and imprisonment. Marriages in violation of the terms of the bill are declared incestuous and void, and all persons aiding or consenting to them are to be punished for misdemeanor. Spiritual marriages, sealing, consecrations, and all other devices whereby men get the services of women, are prohibited, and so-called spiritual wives may sue and recover payment for their labor. The Mormon remonstrance adopted in Salt Lake City about a fortnight ago, applicable to this bill and all other anti-Mormon legislation, was to-day presented.

WASHINGTON, April 15.—Senate.—Mr. Sherman presented a memorial from citizens of Maryland asking for a repeal of the law forbidding compensation for slaves unjustly taken from them. Referred to the Committee on Claims.

The Georgia question was resumed. Mr. Pomeroy advocated his amendment, making Georgia a military district and directing an election next fall, the present assembly to cease December 13, 1870. Mr. Hamilton, of Texas, made an argument in enforcement of the views of Mr. Morton. He said that the war was still going on in the South; that the only persons who had been disarmed in the dominion of the rebellion were victims of rebel animosity.

The adoption of the Bingham amendment, he held, would be the death-knell of the Republican party in every Southern State, because, unless prudently curtailed, rebel influence would practically nullify the new constitutions and set at naught the beneficent measures of Congressional legislation.

He favored the amendment suggested by Mr. Drake to require military intervention for the suppression of secret organizations, and denounced organized systems of outrage, arson and murder now prevalent in the late rebellious States. This state of things showed the futility of attempting to establish civil law there. It had been argued here that this organized resistance to the laws resulted from the stringency of the reconstruction measures. His answer was that like powers had been delegated to the commanders of all military departments. He thought that the country and the condition of the South was wholly exceptional.

The Senator from Massachusetts (Wilson) had estimated that the number of men murdered there since Lee's surrender had exceeded the mortality list in any engagement during the war. This estimate was a very moderate one. His own belief was that not less than ten thousand loyal persons in the South have ceased to live simply because they were loyal to the country. The trivial number of arrests, in comparison with this aggregate of crime, would show the license for these outrages in a vicious and disloyal public sentiment.

The practical operation of the Bingham amendment would secure to the rebel element the remodeling of the State constitutions, and the late rebel States would, in 1872, again be found rallying around the national Democratic councils, but the Republican party would never outlive the odium of the total abandonment of the colored race in the South, and it was too late to revise its record in behalf of that people.

He could not live there. He (Hamilton) for one, if the principle of Bingham's amendment prevailed, would not dare to return to his own community. He did not believe that any active Republican would dare live there. He knew the people there; he was born and raised among them—had lived all his life among them; and they were the most bloodthirsty set of cutthroats God had ever permitted on his foot-

Governor Bullock, of Georgia, and General Clark, of Texas, shook hands with Hamilton on conclusion.

WASHINGTON, April 20.—The Georgia bill, as passed by the Senate, at two o'clock this morning, remands

the State to military control till November, and provides for the suspension of the writ of habeas corpus, if necessary.

This action causes great consternation among conservative Republicans.

Sypher, of Louisiana, has just been sworn in.

The House, after admitting Sypher, of Louisiana, by a majority of five, subsequently reconsidered their action, and expelled him. This was followed by the passage of a resolution declaring the election in the first district of Louisiana invalid.

It is believed now that a similar course will be pursued with respect to the other Louisiana districts.

Sypher's lobbying, it may be stated, contributed to his ultimate expulsion.—*Picayune*.

FOREIGN.

CITY OF MEXICO, April 4, via Havana April 12.—The National Congress opened on the first of April. Prof. Juarez, in his message, recommends the Tehuantepec Ship Canal. The treasurer's report is a sad exhibit of the financial condition of the country. Senor Romero recommends the reconsideration of the free zone question.

Cadema and other rebel chiefs are still in the field, but with reduced forces. No recent engagements reported. Placido Vega, with an army, threatens Mazatlan, and the government has no troops there. The efforts made in California to assist him are known here.

LIMON, April 20.—Additional particulars of the Buena Ayres hurricane represent that the water flooded the greater part of the city, and that many men and horses were drowned in the streets. Many sailors were also drowned from wrecked ships. The loss is immense.

THE EARTHQUAKE AT GUAYAQUIL.—The news brought by the Panama steamer to-day includes a report from Guayaquil which will interest all who have noticed the remarkable natural phenomena of the last few years—phenomena which have given rise to much serious consideration among scientific people, and to more wild and improbable speculation. In Guayaquil, between Point Passado and Point Venada, a peculiar volcanic movement has taken place. In a space of two leagues the surface of the earth undulated slowly, and great chasms and deep circular excavations were opened. A new lagoon was found, and between the shore and the sea there appeared a large-sized hill.

During all this fearful commotion the hills along the coast were observed to be in a state of unrest, and large land slides took place, carrying with them rocks and trees. For four days this agitation continued, the undulations being from west to east. The precise date of these phenomena is not given, but they must have taken place early in the month of March. It would seem from this that the throes of the earth, which, a year or two ago, sent desolation and death through some of the most populous districts of South America, are not yet wholly spent.—*New York Post*, April 9.

A LETTER from Rev. H. Grattan Guinness to *The Christian* gives an account of the Protestant missions in Spain. In Madrid the most important mission is that of Carrasco, a native Spaniard, with whom are associated Ruez and other preachers. They have a chapel that holds seven hundred hearers. Carrasco is one of the most eloquent of the Spanish preachers. Next in importance is Prof. Knapp's effort, of which we have lately given an account, and which has just taken on a distinctive Baptist character. A third mission is under the charge of Mr. Gould and some other Englishmen. At Cordova the Protestant work was greatly injured by the defection of De Soler. He left the church of Rome, studied for the ministry among Protestants, preached against the papacy, and was placed at the head of the Protestant movement here. He subsequently sunk into a life of dissipation and sin, and ended by returning to the Roman Catholic Church. The Edinburgh Society have sent from Seville Senor Fernandez, one of their ablest preachers, to fill his place. He preaches in gown and bands, in a neat little chapel. At Seville, the largest city of southern Spain, Mr. Clough, an Englishman, and Senor Cabrem work together under the Edinburgh Society. The latter was once a priest, who left his church on principle, and refused for conscience' sake a ministerial position in the Church of England. They have

a small college for training candidates for the ministry. Cabrera preaches to five hundred people; and they will soon open for worship the Jesuit church, which they have bought for \$5,500, though worth \$30,000. Mr. Tagwell, of the Church of England, also has a mission in Seville. At Cadiz Senor Hernandez and another laborer are at work. At Malaga Senor Sanchez has five hundred in attendance on his services; and at Granada Senor Alhama is working with success. His late imprisonment has increased his usefulness.

The Gilbert Islands were made a missionary station in the latter part of 1868. Two native Hawaiians assumed the work in Tapitanea, or Drummond's Island, in September, 1868. In the same month a few began to cast away their sacred objects. On October 11 Kapu, one of the missionaries, preached on the folly of worshipping these false gods; and during the following week three hundred and twenty of these sacred things—such as stones, branches of trees besmeared with oil, trees, fish, birds, etc.—were destroyed, and the majority of the six thousand two hundred inhabitants became outwardly the worshippers of Jehovah. One of the things regarded with much superstition was a large *manani* tree, whose trunk is thirty-five feet in circumference a foot from the ground. This tree was taboo. No one was permitted to pass or sit under its shade. To it they carried offerings of coconuts, fish, lula fruit, etc. January 1, 1869, three thousand persons, old and young, male and female, met under, around, and upon this tree, to keep, as the missionary expressed it, their first happy new year. An examination of the schools was held at that time. Sixty persons recited the Ten Commandments, the Lord's Prayer read in the books prepared for them, and sang some of the songs of Zion as translated by Mr. and Mrs. Bingham. This tree has since been given to Mr. Kapu. He has purchased one-half of the land upon which it stands, and hopes to be able to obtain the other half. In July, 1869, an examination of the three schools was held, and one hundred and fifty were able to read fluently in the gospels, while a larger number are in the spelling book. The Hawaiian Board of Missions think this a very successful ten months' work. In Apia, another of the Gilbert Islands, the mission has been broken up by the shooting of the Hawaiian missionary left in charge. The Morning Star brought him from the island, still in a very critical condition. Baritani is a collection of a dozen islets, and having two thousand five hundred inhabitants. A few years ago this was the darkest spot in the Gilbert group. The king had killed two Hawaiians; the missionaries fled for their lives to Eben, of the Marshall Islands. Now the king does not oppose, though he does not attend, the instructions of the missionaries; while the king's youngest brother and his wife are members of the church. A little church of eighteen members has been formed the past year; five hundred and twenty persons can read the Scriptures. Our missionaries are comfortably situated, and appear to have the confidence of the people. These have contributed one hundred gallons of coconut oil to monthly concerts the past year, and have bought books for which they have paid two hundred and nine gallons of oil and \$8 12 1/2 in cash. These facts we learn from the report made to the Hawaiian Board, and published in the *Honolulu Friend*.—*Independent*.

THE BIBLE RECORD NOT DISCOVERED. It is said that many men of science are eager to seize any fact that appears to discredit the Mosaic account of the creation; but many have been the discoveries which have been expected to overthrow the Scripture record, they have miserably failed, and its integrity is unimpaired. A large number of human, and seemingly very ancient, relics, which were, some time ago, found near Natchez, in Mississippi, were pronounced by scientific men to belong to an age of extreme antiquity; but, on examining them carefully, a hog's tooth was found among them, which, as that animal was introduced into this country by the Spaniards, brings down the date of their history a long way this side of the deluge.

DR. NEWMAN writes another letter to the *Times*, admitting that he was mistaken, and that he did call the promoters of papal infallibility "an insolent, aggressive faction."

MARTYRDOM IN MISSOURI.

BY BISHOP W. M. WIGHTMAN.

MR. EDITOR: I have read with painful interest the first volume of Dr. Leftwich's work, "Martyrdom in Missouri." The mechanical execution of the book does great credit to your "Book and Publishing Company." The style in which it is written exhibits on the part of the author scholarly taste and felicitous grouping of materials—sad, indeed, in their import, but powerful to move the mind and rich in their lessons of grave instruction. The book furnishes a memorable chapter in the long and bloody story of fanaticism. It shows how readily men of ordinary correctness of view and deportment may be drawn into the stream of dark, profligate and cruel policy when once the fastenings of moderation are sundered by vindictive passions, and the restraints of genuine Christian principle are surrendered to relentless intolerance.

It might seem wonderful, if not impossible, that the church of Christ could ever have had the tinge of human blood upon its garments. Is not Christianity the embodiment of mercy, the very instrument of God's love to all men—to the wretched and helpless in particular? Does it not teach that charity is the greatest of the virtues and graces that compose religious character; and that love is the very root out of which these all grow—the circumference that binds them in perfect harmony, gives them perfection and keeps them in it? Does it not plainly and expressly declare that "whosoever hateth his brother is not of God"? This is, indeed, true. Nevertheless it is very possible that malign passions may avail them selves of pretexts seemingly virtuous, if not righteous, to hate iniquity—particularly if the iniquity should happen to be called, in rhetorical opulence and strength of style, "the sum of all villainies." In calumniating and persecuting, even to torture and death, the heretic, the plea of the church has been that the miscreant—misbeliever—was putting in peril the peace and safety of immortal souls by damaging the church; and that pity for him was not only contemptible, but actually wrong, and leniency the greatest of crimes. So they made an *auto-da-fe*, and burnt the poor wretch to death! On some such miserable plausibilities one may see how Protestant ecclesiastics—incidental causes of exasperation thrown in—might feel themselves called on to curse in God's name their fellow-religionists, who, in their estimation, were involved in the guilt of participating in the aforementioned sum of all villainies—to blaken their characters not only, but, when the opportunity came, to encourage the pillaging of their houses, their arrests, imprisonments, inhuman treatment, bloody deaths. Zen! for God, for country, for humanity—this is the fanatic's plea, so profound are the delusions of human nature, and such the degradations to which Christ's religion has, time and again, been subjected.

I earnestly hope that the readers of Dr. Leftwich's book may be impressed with this great lesson—that however possible it may be to lose from the heart the simplicity and fervor of spiritual religion, no substitute of mere fraternal zeal can safely take the place of universal love and universal holiness. The true zeal for God has no taint of malignity in it. Its vital force is not drawn from vindictive passions; however plausible their guise. Its fervors differ generally from those of imaginative pietism, though intensified by the most active sectarian partisanship. We are all moving on to the august tribunal of impartial, eternal justice. Those who have suffered for the truth and the right may well afford to leave in the hands of Sovereign Rectitude all final adjustments.—*St. Louis Christian Advocate*.

The decision of the lay delegation question in the Methodist Episcopal Church becomes exceedingly doubtful, and five or ten votes may carry it either way. At present, as we learn from the *Methodist*, the clerical vote stands one thousand two hundred and ninety-seven against the measure, and four thousand one hundred and ninety in favor.

Two Jewish rabbis of New Orleans preached the same sermon at the Feast of Purim, one of which was published in the *Israelite*, of that city; and both stole it from a sermon by the late Dr. Holdheim, which was published a few months ago in Berlin.

NEW ORLEANS SABBATH SCHOOL CONVENTION.

THE NEW ORLEANS SABBATH SCHOOL

Convention will meet on Thursday, April 28, at six P. M., at Carondelet street.

6 o'clock.—Devotional exercises.

Children invited to be present.

6.30.—Organization.

7.—Singing by the children.

7.15.—Prayer.

7.30.—Address: Subject: Our Material—Infancy in its Relation to the Church.

8.15.—Reports of condition and prospects of Sabbath schools in the district.

8.30.—Address on the importance of Sabbath school libraries as the medium for diffusing general information among youth.

9.10.—Singing.

9.15.—Discussion of the address.

FRIDAY EVENING, APRIL 29.

5 to 6 o'clock.—General prayer meeting.

7.—Singing by the choir.

7.30.—Address: The Importance of Senior Classes in Sunday Schools.

8.15.—Discussion of the above theme.

8.30.—Discussion: How can we best rivet the lesson on the minds and hearts of the children?

8.55.—Discussion: How can we most effectually lead children to Christ?

9.15.—Singing by the choir.

SATURDAY EVENING, APRIL 30.

6.30 to 7 o'clock.—Prayer for the outpouring of the Holy Spirit in Sabbath schools. Children and teachers are invited to be present.

7.—Singing by the choir.

7.20.—Address: The Qualifications desired in Sabbath School Teachers, and the best way of Training them.

8.—Discussion on preceding theme.

8.15.—Singing.

8.20.—Discussion: How shall we increase the spirituality of the Sabbath school?

SABBATH, MAY 1.

9 o'clock A. M.—Addresses to the various Sabbath schools, by visiting ministers and laymen.

3 P. M.—Anniversary exhibition of the New Orleans District Sabbath School Union. Addresses, recitations, dialogues, speeches and singing by the schools.

Any of the above programme may be omitted or changed at the will of the convention.

APPROPRIATION OF PUBLIC MONEY.

An immense meeting of citizens of New York was held at the Cooper Institute, the first week in this month, to protest against the appropriation of public money to the support of church enterprises. The resolutions embodying the sentiments of the meeting are to the point. In no State has this misuse of public funds come to be a greater outrage than in this State and city, excepting it be that of New York. Every Catholic church, school house, orphan asylum, nunnery of Sacred Hearts or Sisters, of Christian Brothers, Jesuits or Ligorians in this State has been built wholly or in part by the Legislature and the City Council. Thousands of dollars are annually diverted by the politicians of Louisiana from their legitimate uses to the support of the Roman Catholic Church. We give these resolutions:

WHEREAS, It is a fundamental principle of our whole polity to keep church and state entirely separate—a principle incorporated into our National Constitution, and also into every one of our state constitutions; and

WHEREAS, It is our profound conviction that the sacred interests of religion, of conscience, and of domestic peace require this separation to be strict and perpetual; and

WHEREAS, This sound principle has been violated in this state and city, and more than half a million dollars annually of the public money of this city is abstracted from the city treasury and given to certain churches and church and sectarian

schools, thus uniting church and state, and making the state support the church; and

WHEREAS, The union of church and state, in all ages and in all countries, has led to oppression and bloodshed; and

WHEREAS, Education is essential to the intelligent exercise in a free country of the rights of citizenship and to the preservation of our free and tolerant government, hence the American doctrine that the state owes an education to all its children as an obligation, and not a charity, and each child has a right to demand from the state a generous and unsectarian secular education, such as shall fit him to be a citizen of a free and tolerant republic; and

WHEREAS, In every country where the state assumes this obligation intelligence and prosperity increase; while, on the other hand, in every country where secular education has been left to the church, ignorance, bigotry and oppression, political and religious, continue; therefore,

Resolved, That we enter our emphatic protest against the appropriation of public money or property, by city, state or national authorities, for the establishment or support of sectarian schools and institutions.

Resolved, That every such appropriation is a violation of the sacred principles of religious liberty and equality before the law of all denominations—principles which have been the glory of our institutions in the past, and have been illustrated in the complete separation and independence of church and state.

Resolved, That any and every religious sect which attempts to support its churches, sectarian schools, or church charities by the public money raised by general taxation, by that act, uniting church and state, introducing sectarian bitterness into politics, and deserves the condemnation of all good citizens.

Resolved, That every such appropriation of public money is an attack upon the free non-sectarian schools of this state—schools now, with liberality worthy a great republic, free of cost, to every child in the state a generous and tolerant education.

Resolved, That section 10, chapter 876 of the laws of 1869, relating to the city of New York, which, in fact, though not in name, appropriates nearly a quarter of a million of dollars annually to a few sectarian schools in this city, is unnecessary, was not called for by the people, is a violation of the American doctrine of equal toleration to all religious sects and public support to none, and unless repealed will at once, and for the first time, introduce sectarian rancor into American politics, and array at the ballot-box the Protestants against the Roman Catholics.

Resolved, That the Legislature be petitioned and is hereby called upon to repeal the said section, and to take the yeas and nays on the vote, in order that the people may know what members are for the free schools and what members are for a state church and for turning education over to the bickorings of religious sects.

THE POPE AND POISON.—Appleton's *Journal* says: "At the time of mass, before the consecration, the box containing the hosts is placed on the altar, from which the holy father selects three, which are placed in a row. The Pope indicates one, but refrains from touching it. This the deacon takes to Monsignor Maronelli, who consumes it at once, being careful 'to look into the eyes of the Pope.' The Pope then points to one of the remaining two, which the deacon at once consumes, looking at the Pope. The third is used by the Pope himself, no one being allowed to touch it, under pain of excommunication. The deacon then takes the cruet, containing the wine and water, and, without wiping the chalice, pours a little of each into it. This is drunk by the sacristan, looking at the Pope as before. The deacon then does the same. The remainder is consumed by his holiness. These precautions presuppose that if the sacristan is guilty of poisoning, either personally or by collusion, he will show symptoms in his countenance when he has to consume the elements. Hence he must look at the Pope. Then the deacon, who is a cardinal generally, is interested in the sacristan's good faith, for he shares the same risk. If the chalice is poisoned, it will probably be by some mixture rubbed on its sides. This might be removed if, as is usual, the chalice is first wiped. This is much more than a ceremony, and the present pontiff exacts every tittle of it."

The Christian Advocate.

SATURDAY, APRIL 23, 1870.

PRUSSIAN CORRESPONDENCE.

PARIS, March, 1870.
 Mr. Editor: Some years ago I visited, (says an Eastern correspondent,) on account of archaeological studies, which led me to the richly blessed land of the Nile, the Homeric and hundred-gated metropolis of old Egypt. At the foot of a rock, used for the sepulchers of mummies, extend the ruinous remains of ancient Thebes; on the other side of the Nile shimmer the dark, mystic and legendary sphinxes of Luxor and Carnac; and the grotesque ridges of the Arabian mountains appear against the cloudless sky like giant hieroglyphics. During my sojourn in this neighborhood I inhabited one of the ancient Egyptian cells, hewn in the rock, which, through appropriate changes and furniture, had been made in some measure habitable. In my frequent excursions in the vicinity, and among the surrounding people, I had opportunistically made the acquaintance of an honest Copt, who was a man of more than ordinary intellectual gifts.

He spoke and wrote Coptic and Arabic with great facility, had some knowledge of astronomy, and was said to be skilled in magic. This descendant of the old Egyptians willingly attached himself to my expeditions, and related to me the legends of the ruins lying around.

Among others, he communicated to me that the library of a ruinous Coptic monastery, situated not far from my dwelling, still existed, and that he knew its half-shattered entrance. On my wish to view the folios which it contained, and which in all probability, were very valuable, my friend showed himself willing to act as a guide, nevertheless under the condition that we should execute our enterprise by night, so as to prevent the Mohammedans from tracing out the concealed treasure. I was contented, and on a starlight night we found ourselves on the road, in company with my Copt's twelve-year old son.

Silently and carefully we passed through the monstrous mummy field of the plain of Thebes. After a laborious wandering in the regions of the dead, we stood at length before a low, perpendicular wall of rock, in the middle of which my guide indicated to me a concealed entrance, covered with thistles and stones. We lighted one of the accompanying torches, and slowly crept into the interior. Through a hall we came into a roomy apartment, and from this into another, which was divided by two rows of mighty pillars into a principal and two side chambers. The walls and columns were partly adorned with hieroglyphics, partly with statues of idols resembling animals' heads. In the background of the middle hall stood a stone altar—the place where the Coptic monks had worshiped in times of persecutions—and on this there lay about nine books, with discolored, weather-beaten binding, written on cloth, in the Coptic language. Sticking our torches into the altar, we sat on the steps of the altar, and began to investigate the contents of these venerable manuscripts. While we were becoming more and more absorbed in this occupation, a light noise from the choir-corridors made itself suddenly audible. "What is that?" asked I, surprised, of the Coptic sitting near me. "Nothing, I think, or perhaps the rustling of the leaves we are turning over," replied he, while he illuminated the darkness with his outstretched flambeau. "What can there be here, a hundred feet under the earth, in the lonesome resting place of the dead? I am perfectly certain that not a soul besides ourselves knows of this place." Quieted by these arguments, and the silence again reigning around us, I continued my examinations of the folios further, when that peculiar noise again, and indeed distinctly, like the scraping of clattering footsteps, was heard. We looked at one another with questioning, somewhat startled gaze, and then full of shadowy apprehension, toward the side chambers, convinced that out of the unholy twilight something extraordinary must be coming. Then there resounded round about us, filling the whole vaulted roof with shuddering echo, such a shrill sound of complaint that we rushed from our own seats, and felt ourselves drenched in icy perspiration. Our bewilderment was still more increased as the son of the Copt, hastening toward us, fell on the torch sticking in the earth, which immediately turned over and went out in the sand. The hideous darkness, the loud and dreadful tones, which ever pressed onward, and sounded like an army of demon spirits let loose on us, made our hair stand on end; and no longer master of reflection, we betook ourselves hastily to flight, following a glimmering ray toward the entrance door. But who can describe our horror as we heard those mysterious murmuring stops pursuing us with equal speed? At last we had reached the mouth of the hall—the clear, sharp night air enveloped us in refreshing coolness, and drying the sweat of agony from my forehead, and turning to the Copt, I broke out into the words: "There are more things in heaven and earth than are dreamed of in your philosophy." "Ya, ya!" the thing re-echoed close behind me. Terrified anew, we looked around and observed, standing in the uncertain light of the moon, the figure of an innocent—Master Longears. The Copt's son, however, cried out, laughing: "See, father, that is our neighbor's ass, missed since yesterday. Good for him that we have driven him out of the hole, or he would have perished of hunger there."

Somewhat ashamed of the chicken-hearted turn of our adventure, we began our retreat, followed by the hungry disturber of our archaeological researches, and promising ourselves a speedy return to the subterranean chambers of the Coptic monastery.

Footprints on Columbus District.

Mr. Editor: If it is your pleasure, we are now ready to resume our researches among the Footprints on Columbus District.

Among the former presiding elders on this district the name of Rev. T. J. Koger is worthy of honorable mention. Reared by godly parents, a skeptic while at college, a convert to Christianity, educated for the bar, and a preacher by the calling of God, he brought to the altar of the church a strong and cultivated intellect. Great force and independence of character marked him as a man. In the pulpit his manner of address was earnest and bold, while a child-like simplicity and fervor characterized his prayers. He well knew how to adapt himself to his surroundings, making himself all things to all men. An old lady said of him: "He could go up as high and come down as low as he pleased." He was preaching on a certain occasion, in the village of Smithville, when "Old Harry," a negro man, came in with a large white pitcher and glass, doubtless magnifying his office as cup-bearer to some young ladies in the congregation. His first official act received but little attention from the pulpit. But after a time Old Harry reappeared, and having again waited upon the young ladies, was proceeding to answer the beck of others who seemed thirsty. This was too much for the forbearance of the preacher. Pausing, he thus addressed the sable cup-bearer: "Old man, get out of the church with that pitcher. Take yourself away, and don't come back any more."

On another occasion he was preaching at night in the same village, when, as was his custom, he placed his watch on the pulpit before him. A young man in the congregation took out his double-cased watch, opened it, and then closed it with a smart click, whereupon the preacher, addressing him, said: "Young man, it wants just thirty minutes of eight o'clock; and if you wish to know the time again, I have it here before me; just ask me, and I will tell you." The click of the double-

cased watch was not heard again during that service.

Once while preaching he spoke of the consciousness of sin which evil-doers feel. "Every one knows when he is doing wrong. He does not need to be told of it." Illustrating this point, he said: "As I was driving along the road I saw two fellows in a watermelon patch, who by their manner led me to suspect that their own labor had not produced the melons. I fetched a keen halloo, and never saw men run so in my life."

Brother Koger, feeling that the cause of the South was just, went into the late war with all the enthusiasm of his earnest spirit. As captain he commanded a company, and fell at the battle of Perryville, maintaining his Christian and ministerial character to the last. He was rapidly advancing to the front rank among his brethren in the ministry, and died a man greatly beloved and lamented.

Rev. Philip P. Neely, D. D., was presiding elder on this district for one or two years, his term of service occurring near the close of the war. To a gifted intellect, a fine person and a genial nature, he added the graces of cultivation and refinement. He was a man whose brilliant genius and finished oratory attracted overwhelming congregations. He died in the latter part of the year 1868, while serving as pastor of St. Francis Street church, Mobile, Alabama. In social life he was characterized by such suavity of manner and such amiability of spirit as won upon many hearts. The law of kindness was in his heart and on his lips. The first session of our Conference after his death met at Meridian. A large audience was assembling in one of the churches. As the preachers came in, separately or in small groups, and took their seats, a good brother at my side said, with sadness in his voice: "I miss Dr. Neely." We cannot better close our imperfect sketch of this eminent minister of the gospel than in the language of his memoir, as published in the Minutes of the Mobile Conference: "With the message, 'Tell my brethren I die in the faith, and true to my church,' lingering and quivering upon his lips, he breathed his last, and passed away."

My immediate predecessor on the district was Rev. T. Y. Ramsey. When a young man he studied law, and was admitted to the bar; but feeling as did Paul, "woe is me if I preach not the gospel," he abandoned his chosen profession to minister at the altars of the church. His tireless energy, in connection with slender physical proportions, obtained for him, in his early ministry, the appellation of "Whalebone Ramsey." Columbus district embraces a region of country where the lovers of tea and coffee are sometimes reduced to the alternative of the far-famed "long-sweetening" or no sweetening.

Brother Ramsey's tastes requiring tea or coffee served up in the most approved style, he carried about with him a small package of sugar, which was brought into requisition in cases of emergency, whereupon he obtained the sobriquet of "the sugar preacher." He labored as a presiding elder with fidelity and success, leaving his official "footprints" clearly defined, and discoverable by his successor in the well organized condition of the church throughout the district. He now labors, with his wonted earnestness and zeal, as pastor of the Methodist church in Columbus, Mississippi.

T. C. WHEA.

FEBRUARY 22, 1870.

Another four thousand Armenian Catholics, headed by thirty priests, have seceded at Constantinople from Rome. There is great excitement among them, and on a recent *fede* day the patriarchs had to be protected by four hundred police. They think the Pope is asserting too much power. A telegram, dated Rome, March 20, states that the arrival is expected from Constantinople of an agent of Ali Pacha, charged with obtaining concessions to calm the agitation of the Armenians, caused by the infringement of the privileges of the Papal Court.

The pious man and the atheist always talk of religion; the one speaks of what he loves, and the other of what he fears.—*Mondeperieu*.

WHO IS TO BLAME?

Mr. Editor: A few days ago I heard a conversation between two laymen of our church, in which it was remarked that too many of our ministers are either local or secular, and that the intelligence of the laity exceeds that of the clergy. With your permission I will write what I would have said, if, as Beecher once said of himself, my good thoughts had not come to me too late.

It is to be regretted that so many of our ministers are local, or at least secular. But "is there not a cause?"

In glancing over the Minutes of the last Mississippi Conference I find that one preacher received last year \$1,800, another \$1,096, four others \$1,000 each, and the rest about one hundred in number, from \$967 to \$10, nearly all of whom have families dependent on them for support. Those who receive the largest salaries, say from \$1,000 and upward, can barely live by the most rigid economy without becoming secular. We would all be glad to be men of one work if we could, but we cannot see our wives and children denied the necessities of life, when it is in our power to provide for them. We love to preach the glorious gospel of the Son of God, and would give ourselves wholly to the great work if the church would give us a living; but as she does not we get homes and teach school, or cultivate the soil, and some of us locate or never enter the traveling connection at all. In behalf of the clergy of our church I protest that we do about as well as we can, under the circumstances.

As regards the intelligence of the clergy I do not think they are, as a class, below the laity. We have some preachers who are less intelligent than some of our laymen; and, as for the matter of that, we have some lawyers who are less intelligent than some of our farmers. Lawyers, as a class, exceed farmers in the knowledge of law, and yet there are some farmers whom I would rather trust with a case in court, if they were permitted to practice, than some lawyers. So there are some laymen who know more about the plan of salvation than some ministers, and who could better lead a penitent to a saving knowledge of Christ, and if permitted to preach could better expound the Scriptures. But it does not follow that, as a class, the clergy is less intelligent than the laity, especially in the doctrines of salvation.

But, admitting that our ministers ought to be wiser than they are, the question arises, Why are they not? There are several obvious reasons for it, which the laity of our church would do well to consider.

1. Many of our ministers are compelled to engage in secular callings to get a support. They cannot "give attendance to reading" and "study to show themselves approved," as Paul directed Timothy to do, under these circumstances, as efficiently as if they did not have to serve tables. And among those who give themselves wholly to the work, there are but few who are not "troubled about many things," as Martha was, for the lack of a competent support. Some of our preachers are not able to procure a respectable library. Now if all these hindrances were removed we would have a more intelligent ministry.

2. I know of several young men of deep piety and good natural abilities, within the bounds of the Mississippi Conference, who are looking to the ministry. But they are uneducated. Let the church take hold of such young men and educate them for the work which they feel moved by the Holy Ghost to engage in, but which they have not the means to prepare themselves for, and she will have an intelligent ministry.

3. Many of the educated young men of our church who feel called to this work are deterred from entering upon it. They see in the ministry a life of poverty. They see the widows and orphans of deceased preachers poorly provided for by the church, even where they are in needy circumstances. They know that with their natural and acquired abilities they can pro-

vide well "for their own" at the bar, or in some other profession of life. Now let the church give her ministers a living, and such young men will enter the work, and she will have an intelligent ministry.

I write this not to entirely exonerate the clergy in all cases, but to show that they do not deserve to bear all the blame.

APRIL 9, 1870.

NEWS FROM THE CHURCHES.

LAFAYETTE, CHAMBERS CO., ALA., April 6, 1870.

Mr. Editor: On the completion of the first round of appointments on this district several things suggest themselves to my reflections as demanding most serious attention from those most immediately interested in them. For my own part, emotions of the sincerest gratitude stir the depths of my heart to that almighty Being who has so graciously preserved my life and health amid the fatigue of labor and travel, and the exposure by day and by night to the inclemencies of the weather and the alternations of fare and shelter. Much of the territory to be traveled over is perhaps the most rugged and mountainous of any within the bounds of the Conference, subjecting the often wearied itinerant to the bleakest exposure to the chilling winds of winter and the pitiless peltings of the summer storm. Hitherto the Lord hath helped me; life and limb, health and strength have been graciously vouchsafed me, and here would my soul erect its Ebenezer to him whose mercies never fail.

The preachers in charge of the various circuits and missions are all in place, and earnestly engaged in the work of their holy calling. If heartily sustained, as they certainly ought to be, by the zealous co-operation and earnest prayers of their membership, this year will yet prove to be one of great spiritual peace, power and prosperity in all our borders. Oh, that it may be so, to the glory of the blessed Saviour's name, and the salvation of a great company of precious and immortal souls! And let all the people say, Amen.

Many of the churches have been greatly weakened, the past year, by the removal of many of their former members to Texas. This is a heavy loss, both numerically and financially. But there are greater evils than that in our midst. The almost eovetous love of the world is a fatal leprosy of soul that is paralyzing all our energies, and cruelly robbing us of our beauty and glory. The spirit of a predominant and all-pervading feeling of levity, as manifested in the love of fashions, parties and dancing, is the canker whose consuming breath is eating off not only the brightness of its polish, but the very substance of our Christian name and profession. It is the prevalent impulse in the social circle, and is often painfully visible in the sanctuaries of God. The lack of earnest, heartfelt prayer—prayer that takes hold of the strength of the triune Jehovah—prayer in the closet, the family and the house of God—marks unlike our miserable leanness of soul, our lamentable want of strength. And, alas! that it should be so, our people seem to have lost almost entirely the spirit of aggressiveness upon the powers of darkness around them. "What wilt thou have me to do?" is a question that seems to catch no eye, to move no heart but that of the humble minister of the gospel. Class meetings, love feasts and prayer meetings are well nigh obsolete in many of our churches, we fear. And now-a-days, who over fasts, and goes into a close and solemn self-examination?

Can it be a matter of much surprise then, however sad and sorrowful it may be, that there are no tokens of revival power in our midst? that none are asking "the way to Zion with their faces thitherward," saying, Come and let us join ourselves to the Lord in a perpetual covenant, that shall not be forgotten?"

Oh, when will our membership wake up to a just appreciation of the sanctities of their holy calling, and a conviction of the solemnities

of their obligations? Lord help us, forgive and save us, for Jesus' sake.

In financial matters there is great dereliction somewhere. In some of our charges the ministers are very inadequately supported, and have to supplement the means of a meager support by laboring more or less in the more profitable employments of worldly business. From the marts of mammon they go to the altars of God, to lay a free-will offering thereon. From the selfish

strife and struggle for gain they go to the pulpit to preach a free gospel. With minds overburdened with the cares of living, and hearts often bleeding with anguish, they go to preach glad tidings to all, and bind up the flowings of the wounded in spirit. When will our brethren feel for us as they should, and be willing to sustain us in our work as they might? We would not complain if we could avoid it, and will not judge any man. "To his own Master he standeth or falleth." It certainly behooves us to look well to this matter, as one vitally affecting the prosperity of the church of Christ, and deeply involving our integrity as professing Christians.

A few thoughts just here in reference to many of our church buildings. Many of them are more uncomfortable than barns, and more untidy than kitchens. What would be thought of a man's pretensions to hospitality who would expect his neighbors to visit him while living in a log house without a crack stopped up, or a frame house unceiled, with half the window shutters gone, and not a spark of fire in the building whereat his guests might warm themselves? Yet that is the very kind of courtesy many churches extend to the congregations whom they invite to attend their services. Would we accept the tender of such civilities as these from our neighbors, and after enduring them for an hour or two feel much inclined to commend either the kindness or liberality of mind host? I trow not. Is it to be wondered at, then, that the delicate female, the enfeebled invalid, the old, whose powers of endurance are greatly weakened, the child, whose tender frame has not become hardened by frequent exposure in the lapse of years, should keep away from these unpainted refrigerators, and soberly decline the perils of a congestive chill for the sake of being at church? And is it not taxing too heavily the powers of endurance of even the very robust and healthy to subject them to a whole week of wheezing and sneezing for an hour of penance in their house of worship? And then the minister, poor fellow! he has no business having catarrh, bronchitis and consumption from preaching in the crazy old barns his people compel him to occupy! If a hungry man cannot listen patiently and profitably to an argument and illustration of an abstract yet possibly a very important proposition, can a man shaking and aching with chilliness be expected to do any better? Really, it would seem not. It is a sad condition of things, most truly, when stoves, wood, lumber and labor are suffered to outweigh the value of immortal souls!

In conclusion, we ask the prayers of all the people of God. In much depression of soul, and amid many trials and privations, we are humbly striving to do our whole duty to God, to the church of Christ, and to the souls of men. Bear us in remembrance before the precious, blood-bought mercy-seat, and plead for the outpouring of the Holy Spirit upon all our work, and upon every soul.

Yours in the gospel,

F. L. B. SHAVER.

Some impression has been made upon the pagan Indians of Parry Sound by means of the councils held with them by residents of Parry Sound, and already some of the young men have embraced Christianity, one of them being a son of old Chief Bagawmagabaw, a young man of some promise. A secular day school has been started, but as yet the chiefs will not allow any religious education to be given in it. A grant of \$150 a year toward keeping a teacher on the island, and \$50 to purchase farming implements, has been obtained from the Dominion government.

The Christian Advocate.

SATURDAY, APRIL 23, 1870.

TEN YEARS IN ROME.—NO. III.

THE PROPAGANDA.

Third comes the Holy Office, better known as the Inquisition. Although open persecution is no longer practicable, it is not because of any abatement of rigor in the bosom of Rome. It is a cardinal doctrine that to destroy heretics is a good work—good for the heretics themselves, and for those who are saved from contamination by their precepts.

Persons unacquainted with the internal workings of Romanism may think that the opposition of the Pope to Freemasonry and secret societies generally is merely a vagary of arbitrary power. But it is not so. Rome admits of but one secret society—that is, the Inquisition. The history of Freemasonry would throw a good deal of light on the conflict which has always raged between this secret society and the Roman secret orthodox society, the latter fighting it step by step in the deepest recesses of civilized society. The absolutism of continental governments stimulated secret societies at the first, as to-day the antocracy of the Vatican keeps alive the Roman committee. Freemasonry entered Italy at Florence, and Clement the Twelfth, jealous of the existence of another secret society in opposition to his own, condemned it in a bull, A. D. 1738. In the following year the cardinal vicar issued an edict denouncing capital punishment of all Freemasons detected within the papal States. This edict was committed for execution to the Inquisition, and is in force now.

As late as 1825 new prisons were built for the Holy Office in lieu of those humbly destroyed by the French. These gloomy piles excite the wonder of the traveler who comes suddenly upon them after visiting St. Peter's and the Vatican close by. For this blood-stained prison is under the pontifical roof. When the present pontiff fled to Gaeta, in 1849, the populace burst open the prison. No instruments of torture were found, for they were all destroyed by the army of the Republic. In one cell was a furnace, a woman's dress and long tresses of hair pulled out by the roots. The cell was of peculiar construction, and suggestive of horrible things, being large enough to contain a human body. The general impression of the people was that it had been used to consume the remains of victims. Near the luxurious apartment of the Primo Cus-tode, a Dominican friar, was found a deep trap, a shaft opening to unknown depths. This was the *voie infernale*. As soon as the accused had confessed his offense he was sent to the commissary, the *oulette* lying directly in his way. The words, "Go in peace," were a signal to loose the catch, which at the least pressure opened a yawning tomb. The earth found at the bottom of this pit was chemically analyzed, and proved to be a compost of common earth, decayed bones, etc., fetid to the smell and horrible to the sight. At one time (1860) it was thought necessary to examine this prison, as the foundations had become insecure from the constant overflow of the Tiber. The architect was not allowed to go alone, lest he should make plans, so two priests, one of whom was myself, and two guards escorted him. The most superstitious person could not tremble more than I did on entering those dread portals. The apartments of the jailers are commodious enough, and generally these are all that the visitor who obtains a special order from the Pope to inspect the Inquisition is allowed to see. Antonelli once remarked of these applications, "Show your gold to the thief," referring to the "chief among you takin' notes," of which the Vatican has a great horror. Dr. Maitland, author of "The Church of the Catacombs," had permission to take copies from the inscriptions in the Lapidarian Gallery, but after two days it was revoked, and Dr. Maitland had to surrender the papers he had about him under pain of search. But to return to the Inquisition.—Leaving the custodian's apartment, we entered a vaulted corridor, very dirty, gloomy and damp. It was a *cave de cave*, leading nowhere. The friar who accompanied us was more initiated, and opened what appeared a gar-goye made of a hideous grinning fiend, probably some defunct inquisitor. It yielded to his key, and a small door opened leading to the prison of the newly arrested. The cells were small, six feet by four, of stone, grimed with age and dirt, horrible as the dens of wild beasts in the Coliseum. There was no window except a little grating high up in the wall about the size of an octavo volume, no outlet but the little low door. Through this grating food and water were passed to the captive. The "State of Prisons" records no worse dungeons. They are living sepulchers. In one of them a large number of skeletons,

minus skulls, was discovered, buried in lime. This is supposed, with every probability in favor of the surmise, to have been the bath of quick-lime. In it the sufferers were immersed up to the neck, and it was slowly increased until, with the suffocation of the smoke and the anguish of suppressed breathing, they died in unspeakable agonies. After a little time the heads would roll off into the hollows left by the shrinking of the lime. These were found collected in a hamper. The first tier of cells seemed to complete the prison, but our Charon pulled an iron ring in the stone floor and revealed a small cavernous pit, with an iron ladder to it. It looked like descending a coal shaft. We hesitated, lest the ladder should prove rotten; and truth to say, being so wholly in the power of this friar, we were somewhat apprehensive of treachery. The architect, a Frenchman, told me afterward that the same thought had occurred to him, and under its impulse he had noted every peculiarity of the way we had come, and was fully prepared to strangle the friar at the least approach of danger. We insisted with much politeness that he should descend first. We followed cautiously, and found ourselves in a low corridor which baffles description. Damp dripped from the slimy walls; vile reptiles and horrible vermin held carnival. Rats, emboldened by impunity, scampered about, and stopped to stare at us. The cold, in that hot day, penetrated the skin. As before, we could see no cells, and no openings in the wall as above. The plashing of the river was audible. The friar pulled one of a line of rings inserted in the wall, and a small door, opened. By introducing the legs first, we managed to get in. Imagine a cell level with the bed of the river. A small grating looking upon it, but far above reach, admitted light enough to reveal a foul den of torture. Could any human soul exist in such a place! The odor was horrible. Into these prisons the condemned were sent. At the least enlargement of the capricious river, the cell was filled with water and the prisoner drowned. The despairing cry for help and mercy died away unheard. Or, worse than this, rats entered from the river, and devoured the victim. No inquiry was made for them after imprisonment. The technical word in the records for these dungeons was *Gehenna*, sufficiently expressive. We breathed a secret prayer for the unhappy victims once confined here, recalling the primo maxim of the tribunal, "as much punishment as can be inflicted without killing." Truly they made hell felt in life.

The Propaganda can no more use this weapon to kill, though it did so until the conquest of Naples by Garibaldi. It hopes, however, for better times. Meanwhile there is still the grand inquisitor, Cardinal Asubini, whose pay is \$4,000 per annum, vowed to extirpate "all persons obnoxious to the Holy See." Its operations are now confined to politics, though it has always been more or less political. I could fill pages with the story of the operations in Candia and Greece, in Russia and South America. If Jefferson Davis (whose emissary, Father Bannon, brought dispatches to the Pope) had been successful, the allegiance of every Romanist in the United States true to the monition of the Propaganda, would have been his. This brings us to the final and most extensive operation of the society.

Fourth, its Plan of Missions. This is so vast in its scope that I shall need to give it an article by itself. Here I will content myself with saying something of the missionary movement in England.

In England its progress has been steady. It has abandoned hostility, and, with "swords in myrles wreathed," sought to disguise its attack. The maxim found in "De Ecclesia Christi," a text book in all English Romanist colleges, that "the church retains its jurisdiction over all apostates, heretics and schismatics, though they no longer belong to the body," is carefully remembered. The attempt to revive the lax ceremonial and defective spiritual of the Church of England afforded it an unlooked-for opening. Its progress up to 1851 had been slow. But then, men of parts in the universities, distracted by theological discussions, imagining that quiet and tranquility were secured there in Rome, began to examine her claims. They all admit that this examination began with a predilection in her favor, and a distrust of the church of their birth. The most illustrious converts are the saddest instances of disappointment. Archbishop Manning is an exception, but he is a politician and a courtier, aiming at the cardinalate. The subtlety and casuistry of the Roman method was fully employed to make way. A sort of Protestantized popery was presented to the people. The offensive doctrines of indulgences, auricular purgatory, merits, image worship and transubstantiation were kept partially in reserve. The present Bishop of London told me this story: A lady who had entertained

grave religious doubts for some time, met a Roman priest at a sanatorium in the country, and conversed with him on their mutual differences. He presented his views most attractively, and she was pleased. "But," said she, "I can't believe what St. Liguori says upon the Virgin." "That," replied the priest, "is quite immaterial; every one thinks as he likes on that point." Relieved of this *crux*, the lady was soon afterward received into the church. But one evening at the Jesuit church in Farm street, Father Coleridge preached a sermon on devotion to Mary, in which he insisted strongly on the doctrinal statements of the Roman Church respecting her. If this was true, the convert was deceived, and she addressed herself to the priest. To her astonishment, on being reminded of his statement, "every one thinks as he likes on that point," he coolly denied entering it at all. The lady came to Bishop Jackson, and he with Dr. Meyrick Goulburn received her back into the Church of England. It would be easy to record many such instances of duplicity. The singing of vernacular hymns is very popular with the Dissenters in England. To meet this predilection, the Brompton oratory has English hymns to popular airs, English sermons and services, in which the congregation takes part with the priest. These are unknown save in England, and they are decidedly adoptions of Protestant forms. The power of the confessional is however the chief means of conversion adopted in England. There it succeeds, but nowhere else. And since it is sought to incorporate it into the Protestant Episcopal Church of this country, a few words respecting its real character are fitting here.

The Anglo-Romanist, admittedly the Ritualists—which last in several instances are countenanced by Rome and in active correspondence with Patrizi, the cardinal vicar—maintain that confession is a corrective of social morals. How does it work in Rome? A father there, who in his boyish days was regular at confession, strenuously opposes the attendance of his children, especially girls. He will point to fifty manuals of prayer in use whose questions on the Decalogue, supposing a child to be ordinarily innocent, must engender impurity; for the priest's instructions are, "carefully to explain the nature of the offense." Can this be done without corruption? The crime of seduction in the confessional is so common in Rome as to cause doubts of the chastity of any female regularly attending confession, especially if she is good looking. Concubinage is general, and considered as a light offense, but Pius the Ninth might well imitate Paul the Fourth and issue another bull *Contra sollicitantes*. The prominence given in the manuals of preparation for confession to questions on nameless crimes is an indication of the effect of confession in repressing immorality. It would be easy to prove by fact after fact that abominable offenses, for which death is pronounced in the statute book of every country but Rome, are common among country monasteries about Rome, and especially among the mendicant orders. Pius the Fifth in 1569 issued his bull *Horrendum*, which showed at that day the deplorable prevalence of such offenses. It is certainly a bad sign when such things as St. Paul declared should "not be named" become matters of jest. Yet such is the state of things in Rome.

The confessional, I repeat, is the chief engine of Roman conversion in England. It notoriously influences wealthy women to enter convents, as in the case of Miss Talbot. It seeks wealth, and spares no pains to get it. The industry and indefatigable toadyism of Monsignor Capel to the Marquis of Bute afforded material for caricatures at Oxford.

To sum up. The main effort of this mighty organization is absolute despotism over human souls. It has eleven hundred mitered agents throughout Christendom sworn to do its bidding. These are served by myriads of priests, monks and nuns. All look to Rome, all are guided by it. This engine of power is only harmless because it lacks opportunity to display its real nature. It is fortunate for mankind that free institutions are progressing. These keep pace with the growth of the papacy, each human conscience would lie prostrate and crushed. "During the last three centuries, to stultify the growth of the human mind has been her chief object. Throughout Christendom, whatever advance has been made in knowledge, in freedom, in wealth and in the arts of life, has been made in spite of her, and has everywhere been in inverse proportion to her power. The loveliest and most fertile provinces of Europe have, under her rule, been sunk in poverty, in political servitude and intellectual torpor; whilst Protestant countries, once proverbial for sterility and barbarism, have been turned by skill and ingenuity into gardens, and can boast of a long list of heroes and statesmen, philosophers and poets.

Whoever, knowing what Italy and Scotland naturally are, and what four hundred years ago they actually were, shall now compare the country round Rome with the country round Edinburgh, will be able to form some judgment as to the tendency of papal domination."

On the Vatican Hill, at this hour, the Propaganda musters its agents in one grand assault of arms upon progress and liberty. Beholding the mighty onward sweep of these two powers, the wreck of dynasties and empires that date from ages, the uprising of manhood to the highest intellectual level and largest degree of prosperity, we cannot but conclude as we witness the futile attempt to stay this heaven-directed influence—*Quem Deus vult perdere prius dementat.*—*Galaxy.*

A CONTENTED FARMER.

Once upon a time Frederick, King of Prussia, surnamed "Old Fritz," took a ride, and espied an old farmer plowing his acre by the wayside, cheerily singing his melody. "You must be well off, old man," said the king. "Does this acre belong to you, on which you so industriously labor?"

"No, sir," replied the farmer, who knew not that it was the king. "I am not so rich as that; I plow for wages."

"How much do you get a day?" asked the king.

"Eight groschen," (about twenty cents,) said the farmer.

"This is not much," replied the king. "Can you get along with this?"

"Get along, and have something left."

"How is that?"

The farmer smiled and said:

"Well, if I must tell you, two groschen are for myself and wife;

two I pay my old debts; two I lend away; and two I give away for the Lord's sake."

"This is a mystery which I cannot solve," replied the king.

"Then I will solve it for you," said the farmer. "I have two old parents at home who kept me when I was weak and needed help; and now that they are weak and need help, I keep them. This is my debt toward which I pay two groschen a day. The third pair of groschen, which I lend away, I spend for my children, that they may receive Christian instruction. This will come handy to me and my wife when we get old. With the last two groschen I maintain two sick sisters, whom I would not be compelled to keep; this I give for the Lord's sake."

The king, well pleased with his answer, said: "Bravely spoken, old man. Now I will also give you something to guess. Have you ever seen me before?"

"Never," said the farmer.

"In less than five minutes you shall see me fifty times, and carry in your pocket fifty of my likenesses."

"This is a riddle which I cannot unravel," said the farmer.

"Then I will do it for you," replied the king.

Thrusting his hand into his pocket, and counting him fifty brim new gold pieces into his hand, stamped with his royal likeness, he said to the astonished farmer, who knew not what was coming:

"The coin is genuine, for it also comes from our Lord God, and I am his paymaster. I bid you adieu." *German Reformed Messenger.*

ARE YOU ONE OF GOD'S MEN?

A Mr. T. T. Cooper, an English gentleman of excellent education and adventurous spirit, left Shanghai, as long ago as the autumn of 1867, with the intention of forcing his way through the mountains of China and Tibet, and reaching either British Barmah or Upper India. At a village on the eastern branch of the Irrawaddy he was brought to the chief, a noble, athletic and almost gigantic specimen of the mountaineers of that region. The chief at once said:

"You are a white man. Are you one of God's men?" Mr. Cooper, astonished to hear such a question asked in such a place, replied a little evasively. He was not, he acknowledged, in any evangelical sense a Christian. The chief went on to say: "If you are one of God's men, I want you to tell me and my people about God. Some of my people have heard from white men down the river about the great God, and I want to know about him myself, that I may become one of God's men." Mr. Cooper told him, as well as he could, the general truths of Christianity, though painfully conscious that he was not himself familiar with them; but the chief did not seem fully satisfied, and finding that the traveler was desirous of descending the river, he sent him in a boat, with a delegation of his own people, liberally supplying his needs, to Prome, and forwarded an urgent request, both by Mr. Cooper and his own people, to the missionaries there to send him a teacher, who could tell both him and his tribe how they might become "God's men."—*Gospel Field.*

IN MEMORIAM.

The Rev. JONAS W. STARR has finished his course on earth, and has gone to his reward on high. He died in Bibb county, Alabama, February 24, 1870, in the sixty-fourth year of his age.

I have known him long and knew him well, and at the earnest request of the family of the deceased I propose to send out through the ranks of the church this brief obituary notice of his life and labors.

John W. Starr was born in Wilkes county, Georgia, August 7, 1806.

His parents were pious, and were members of the Methodist Church before he was born; and I think even further back than this the Starrs of Georgia were Methodists.

John W. Starr united with the church when he was but a boy, and was never out of it from that day until the day of his death. Before he was twenty years old he was made a class leader in the church; and while laboring in this capacity he very soon evinced such talent and promise that the brethren authorized him to exhort, and in due time this license was superseded by a formal license to preach. Providence, however, evidently designed him for the itinerant work; and though he had a wife and several children dependent upon him, his way was opened, and he found easy access into this wide field of usefulness.

In 1833 he entered the Georgia Conference, and the first year traveled the Lagrange circuit; the next year Talbotton, the next Zebulon, the next Thomaston, and in 1837-8 he was stationed in Madison. These are all important appointments, and the testimony is ample that Brother Starr filled them well—filled them with usefulness and credit. At the close of his second year in Madison he was transferred to Alabama, and received his first appointment in this Conference to Enfantla, where he labored with his usual acceptability and success for two years. His connection with the Alabama and Mobile Conferences stretches over a period of more than thirty years, and during this long itinerant career he labored on circuits, stations and districts, though most of the time he served the church in the capacity of presiding elder, which seemed to be his appropriate sphere in the itinerant field. In all these different relations to the church he showed himself fully competent to the work.

As a pastor he was diligent and successful; as a preacher he was bold, strong, pointed, and sometimes eloquent and powerful—not the eloquence of rhetoric or fancy, but the eloquence of fervid truth and earnestness. As an officer in the church he was prompt, decided, faithful, and uncompromising in his vows and in the administration of discipline.

John W. Starr was by nature a man of rare endowments, otherwise he never could have clambered up from the vale of obscurity, in which his lot was cast in early life, to the high and responsible position which he occupied in the church and in the Conference. His parents were poor—too poor to send him off to school; and in his neighborhood schools were rare and worthless. The consequence was, he grew up to manhood without even the smallest educational advantages. Such was his desolation in this regard that when he was licensed to preach he could scarcely read intelligibly. I remember to have heard him say, time and again, that when his presiding elder came around to his first Quarterly Meeting he questioned him relative to his studies prescribed by the Conference, and he showed such utter deficiency—that he spoke sharply to him. "But," said he, "it was not because I did not study the books, but because I did not know how to study, and really could hardly read them intelligibly to myself." But, notwithstanding these serious obstacles, he surmounted them all, and rose to high position in the Conference and in the ministry; and, now that his voice is silent in death, he will be remembered with pleasure by the thousands who used to sit under

his ministry with profit and delight.

Brother Starr was a striking example of what grace and application will do for a young man in the itinerant work. And if he cumbered about in the beginning with such embarrassments as beset him, and rose in despite of them to usefulness and renown, what ought to be expected of the young men in these days, who go to the battle with all their armor on! God grant that our sons may be useful and holy in proportion to their pre-eminent advantages.

Brother Starr was a man who met all the emergencies of life, and in every department showed himself fully equal to the demands upon him. In his neighborhood he was always a leading spirit, giving tone and sentiment to all with whom he associated. In his family he was industrious, economical and thrifty—never in debt; and though poor, he was never without money. Upon these principles he reared his family, and, as might be expected, his children are industrious and useful members of society. Many of them have already gained the promised land, and those who still survive, I trust, are endeavoring to tread in the footsteps of their honored father; and I pray God that they may all, father and mother, brothers and sisters, hail each other at last in the promised land.

Last summer, hearing of our departed brother's declining health, I turned aside from my regular work to make him a formal visit. I am glad I did. The interview was not only pleasant, but profitable to me. I found him a great sufferer, laboring under dropsy in its worst form, but in a happy frame of mind, staying his soul upon the precious promises of God, and fearing no evil. He told me to say to the brethren of the Conference that the old-fashioned Methodist doctrines—meaning particularly the doctrine of universal redemption, and holiness of heart and life—are the truth of God. "And say to my brethren: Preach holiness. But," said he, "they need not preach it unless they live it. And furthermore," he added, "I have just been down into the cold waters of death, and after wading around in the stream for some time I found myself returning to the same shore where I had entered; and really I was sorry," said he, "for I had rather have gone over then; but here I am to await the will and pleasure of my heavenly Father." And thus he passed away without a struggle, dying "as the wave dies along the shore." Peace to his memory, and a thousand blessings upon his afflicted family.

A. H. MITCHELL.

Work for the General Conference.

Mr. Editor: At the last session of the General Conference the rule on dancing was stricken out of the Discipline, and transferred to the Preachers' Manual. This was generally regarded as a virtual indorsement of the practice of dancing by the fashionable portion of our church, especially as the Preachers' Manual is never seen by the laity, and by but a small portion of the ministry. The consequence has been that the practice of having dancing parties has become quite common among us; and many of the pastors, when they attempt to interfere on the subject, are met by the action of the Conference, and feel a backwardness in taking any disciplinary action on the subject.

Would it not be well for the General Conference, at its next session, to take some further action, so as to obviate an evil that may attend the permission of dancing in our church? Many of those who follow the profession of dancing master are wicked persons, and some of them are avowed infidels; and, by employing them as teachers of dancing, our Methodist children might be placed under unfavorable religious influences. I would respectfully suggest that the ensuing General Conference provide for the difficulty by the appointment of Conference dancing masters! as the church could by this means keep her young people under Methodist influences, and secure their Christian principles from contamination.

PROGRESS.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, APRIL 23, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—Rev. J. C. KESNER, 112 Camp Street, New Orleans, La.
AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KESNER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office ORDER, DRAFT, or by EXPRESS. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

THE GENERAL CONFERENCE.

Explain what it is from the pulpit—how proper it is that the old members of the church should be prepared to set forth, or, if necessary, to sustain the Discipline, as well as the doctrines of our church. Also explain that the legislative, and the only legislative body in our church is about to meet in Memphis—that the Bishops will be there, and the most experienced of our preachers and our laity. Then state that the reports of this Conference, day by day and week by week, will be accurately given in the NEW ORLEANS CHRISTIAN ADVOCATE; that it is the duty, and should be the pleasure, of every thoughtful praying man to read for himself these records, and that they are now about to begin. Then take down the names of the subscribers. "A word to the wise."

EDUCATION IN TEXAS.

This is a wide awake State, and has, to an unusual degree, the take-care-of-yourself spirit. So soon as a man crosses the Sabine, even without tasting its waters, he goes in for Texas. Texas lands, Texas cattle, Texas crops, Texas people, Texas preachers, Texas churches and Texas schools from henceforth become the burden of his speech. Well, it's not all talk; with immense individuality there is a wonderful readiness with Texans to combine for effecting great ends. Where a number of self-reliant individuals come together in a mass meeting, and their enthusiasm merges into one sentiment and purpose, the force becomes a very powerful one. Therefore it is that Texas audiences have more than once surpassed all that we have ever heard of in the fullness and greatness of their action. We are glad to know that this organized power for good is invoked in behalf of Southern education; and that now, while we write, a convention, composed of delegates from the several Conferences in that State, is in session in Galveston, to determine the site of a Texas central university of the Methodist Episcopal Church South. We hope the work will be done well and thoroughly—that the projection will be worthy the present and prospective greatness of that State. There are preachers there capable of making any amount of sacrifice to carry the design on to completion, and there are laymen there who have large hearts and full purses.—The Rev. R. Lane, from the Trinity Conference, passed through this city last week on his way to the convention.

THE SUGAR REGIONS.

Two years ago we gave some account of things as they appear in lower Louisiana. Here sugar cane is the plant cultivated to the exclusion of almost everything else. The latitude is too low for cotton. Excepting here and there some unusually smart person from the East, no one is willing to run the risk of the inevitable army worm. Though where only a small patch of cotton is put in, and not too frequently, that pest is escaped. We noticed along the bayous, while out on district service, that plantations which have been lying waste since the war are being brought one after another into cultivation; cabins are being built, sugar houses put in working order, and here and there a saw mill reconstructed. The repairs, however, all have a half serious look; no one seems to be working for anything beyond the immediate present. There is a want of confidence in the stability of things; labor is fluctuating; the planter that commands a full supply to-day may be without a "hand" to-morrow. North Carolina, Virginia, Norway, Sweden, Germany, and even China are looked to as possible sources from whence laborers may be obtained to supplement the leisurely negro. The opinion seems to prevail that the whole affair is yet an experiment, depending upon levees, seasons, Cuba, the government and the whims of a large colored population. The only thing that would seem to be sure is the stomach of the negro—he must eat; and even that is not so very certain, for while he can eat a great deal, and for the most part does, yet he can, when obliged to, live on less food and with less surroundings of comfort than any human creature in the world. Unlike Mr. Revels, his nerves do not give way. He has but one universal luxury, other things being equal—that is, leisure. His habits are contemplative without being philosophical. Now there is no calculating upon one who can live like Diogenes, without even the thought that he is thereby demonstrating any important principle. The extremes of want or plenty, of a good house or bare shed; of a decent appearance or rags, make but little difference in the comfort of one who is nature's exact imitation of a Greek stoic.

The last year was a very severe one upon the sugar planter. The crop was a failure. This more than balanced the profits of the year previous. Another such year as the one just past would seriously arrest the cultivation of cane in Louisiana. At present the planter is well up with his work, though the season is over-dry. The recent cool nights and days checked the tender shoots of this tropical plant. But the trouble here, as elsewhere in the South, is the too great concentration of all labor upon one product. The farmer must, to be successful, divide his toil between several sorts of produce. Nature has so arranged it that he can avail himself of all her seasons and moods. No matter how variable the skies, if he be a man of ordinary forecast, he cannot fail altogether: the corn and the small grain may be said to alternate with cotton or cane in their demand upon his labors, or upon the elements; and, if he fails at one point, he will surely succeed at another. Strange to say, many of our planters ignore wholly this arrangement of nature, and venture all upon one kind of planting. They pay no attention to the raising of hogs or sheep or neat cattle; they plant only for one-half the corn necessary to their supply—scarcely any rice; and then, if the cane or cotton fails, they are on the verge of ruin—having neither money nor food. Nothing in the way of agriculture can be more desperate and ruinous to the South than such management. And even when these staples do succeed, in vain is it that several hundred millions of dollars are garnered; the whole of this vast yield, instead of being husbanded, must be sent off to the West and North in exchange for food. Now we are sure that there is no such food-producing district in the world as the alluvial lands of this Southwest. Yet on the

road we saw wagons loaded with bales of hay and bags of corn, which had been brought down the Mississippi at a great cost. So long as this policy is pursued we shall be debased at the mercy of Northern politicians.

We saw fewer negroes riding about on horseback and in buggies than formerly; somewhat less of a crowd in the small towns. A few of them were at church—"white people's church." We met with a public character in the stage, who turned out to be one of our old Soule chapel officials. He was quite enfranchised, being the collector of the taxes for the parish; and we found him very sensible in his views of the condition and wants of his race. The more sensible among the negroes are worn out with the continual whanging and dreading, which at first answered for preaching, that has for the past four years been going on all day Sabbath. They once looked to the pulpit and the house of God as a place of instruction and spiritual edification; it is to them so no longer—though the pulpit is really worth more as an educator than the school room. As they become more solicitous about their children they begin to be willing to hear intelligent speech, and are, by just so much, prepared to accept the opportunity of hearing the gospel from white men. Let our preachers look to this, and wherever there is an opening give the colored people an afternoon service, and preach to them. The better class of colored people will at first attend, and afterward others. So far as we can observe, the African Methodist Episcopal Church, the Northern Methodist Episcopal Church and the Zion Methodist Episcopal Church have accomplished spiritually little, very little, for the colored man. They have the old panel of exhorters, preachers and leaders, which have been trained by the Methodist Episcopal Church South, and were converted away from us in block by an order from the War Department. We think that the colored people are beginning to see that their being Radicals does not necessitate their belonging to Northern churches, and that their respect for their old pastors and brethren of the Church South is at heart undiminished.

The white congregations in this region have been scattered and broken up more than in any part of the State. There are few men of wealth belonging to our church in it. It has returned to original circuit condition. But it goes hard with people who have been accustomed to hearing the gospel every Sabbath to put up with a service only once in three weeks, though they may be scarcely able to even pay for that. One blessed feature of Methodism is its elastic quality: it can contract itself to the most straitened circumstances, or can expand to the openings of a bountiful Providence. We need here, as elsewhere in this fertile State, more than all else, a revival. May the Lord send it! The field is ecclesiastically as primitive as when first broken by Enoch Tally or Richmond Nolly in their long circuit rides, though the snort of the locomotive has supplanted somewhat the scream of the panther.

EXPENSES OF DELEGATES.

These come in rather slowly, considering the willingness of brethren to go to General Conference. There is evidently a difference between sending and going. Some few circuits have contributed of their ability to this laudable object, and we hope to hear from a few more. The poor saints not in Jerusalem, but on their way to it, should be furthered.

SUNDAY SCHOOL CONVENTION.

We hope that we shall have the aid, not only of the speakers invited to attend this important gathering, but also the counsel and presence of brethren who may be in the city on their way to the General Conference. See the programme of this meeting.

A gently man's comforts and grievances are alike hid from the world.—*Silber*

THE PIEGAN MASSACRE.

This fiendish stroke in the recent campaign of the government against the Montana Indians has received the official approval of General Sherman and General Sheridan, and may be considered as a further test, if anything further was needed, of the civilization of those gallant officers and Christian gentlemen who hold the front rank in Northern military circles. And lest we should be considered as unduly prejudiced against the instigators and perpetrators of this deed of blood, we give the statement of this massacre by the *Boston Post*:

In addition to the fact that the Indian camp was at the time suffering severely from the ravages of the smallpox, there is still another fact which marks the cowardice and meanness of this attack. It was well known that the camp was composed for the most part of women and children; and that they, to say the least, were not the marauders whom it was considered so necessary to punish. Every military man knows that the presence of women and children in an Indian camp is always a token of peaceful intentions. They are carefully placed out of harm's way when the men are on the war-path. Of the number of Indians killed—one hundred and seventy-three—more than half were women, and fifty were children under twelve years of age. This simple and terrible fact is enough, in spite of any possible explanation, to connect our military history with a transaction which will disgrace us in the eyes of the civilized world.

The *Washington Chronicle* approves the deed: "These fiends must be made to feel the heavy hand of the government." The *Independent* says palliatively, we suppose, to the Northern conscience: "There was, until quite recently, the same feeling on the part of the Southern whites in favor of the summary punishment of the negro race in case of any alleged misconduct; how often they were foully accused, and to what hellish tortures they were subjected on the plea of necessity." This attempt to turn the force of public opinion for an instant from the diabolical perpetrators of the Montana tragedy against the South is, to say the least, ingenious. But not even the vicious imagination of a Mrs. H. Beecher Stowe has conjured up, in the whole sum of her slavery horrors, anything equal to the murder of fifty children under twelve years of age, and fourscore women, by a body of regular United States soldiers! "They burst," says one of the command that accomplished the deed, "like a hurricane upon the camp, and the work of slaughtering continued for three hours, when the troops could find no more Indians to kill, except a few squaws and papooses."

General Sheridan has published a letter justifying this Indian butchery by Colonel Baker, his subordinate. He argues the case, and evidently considers the wholesale murder as a capital thing in its way. He is used to attack non-combatants, and to pillage, to burn and to ravage the homes and fields of the defenseless. The valley of Virginia witnessed the brutality of this hero of Montana. Gen. Sherman finds in him a kindred spirit, and comes to his support. The man whose motto was, "Cruelty to the rebels is mercy," may be supposed to approve any deed that can for one moment hide his own record of fire and blood.

This massacre of the Piegan Indians, Sheridan's raid through the valley of Virginia, Sherman's raid through South Carolina and Georgia, the refusal by General Grant to exchange forty thousand Andersonville prisoners, or even to receive them without exchange, the hanging of Mrs. Surratt, and the murder of Wirz, are on a par, and for fiendishness transcend every horrible deed ever committed in this country, not excepting the African slave trade of New England merchants.

ADVERTISEMENT.—Mr. Philip Werlein advertises extensively his admirable stock of pianos, harps, organs, melodians, etc.; also the latest music. Mr. Werlein has displayed great enterprise, and is meeting with the success which he so richly deserves.

NEW PUBLICATIONS.

We have received from Mr. George Ellis, No. 7 Old Levee street: *THE HISTORY OF THE AMERICAN CIVIL WAR.* By John William Draper, M. D., LL. D., professor of chemistry and physiology in the University of New York, etc. Volume 3. From the emancipation proclamation to the end of the war. New York: Harper & Brothers. 1870.

This "History" is a running statement of a prodigious armament by land and water, wielded by Northern captains and created by Northern energy, for four long years against an enemy that, according to the historian, was singularly wanting in the elements of genius, military or other. The statement of one who breathes an atmosphere of intense prejudice against everything south of Mason and Dixon's line is valuable, may be, to those of our people who have the courage to go to an enemy to ascertain what others think of our recent struggle for political rights. To such this work will answer a good purpose. It will serve, too, to fill up geographies, for the next hundred years, with a highly colored view of the prowess of the Federal arms. Mr. Draper is a political philosopher who, no doubt, expresses the sentiments of not a few Radical leaders. We quote a significant sentence: "The mind of our nation is expanding to the imperial future; before it; it realizes the necessity of political unity, and the establishment of a center of power. It recognizes that it is the destined successor of Rome, but with influences far greater than Rome ever possessed." He evidently regards the civil war as a long step toward the *American Empire*.

From the publishers, Messrs. Burko & Co., Macon, Georgia, we have *STRAY LEAVES FROM THE PORTFOLIO OF A LOCAL PREACHER.* By Rev. I. Belling, of South Carolina. 1870.

This is a large 12mo of 311 pages. For \$2 50 a copy will be sent post paid. To those who knew the author we cannot imagine a livelier souvenir than this volume. He calls up a wonderful picture of camp meetings and other revival scenes, and fixes them by introducing the names of the heroes of those battlefields. The survivors of the "old Waterloo circuit" will never forget old Green Pond, Island Creek, Rehoboth, Sheridan's Chapel, Buckhead—"much-loved old Buckhead!"—Bethel, Antioch, Salem, Sandy Dam, Little Swamp, Providence and Mizpah. In the words of the author, "What times of immortal remembrance have they seen there! It was in this circuit the author was born, 'over sixty years ago.' His labors and experience extended to Georgia and Florida, as well as South and North Carolina.

We have received from the Rev. N. A. Cravens, A SERMON ON BAPTISM. It is lucid and unanswerable. We can imagine the work it has done, when uttered in the deliberate and popular style of its author; and we doubt not "the region round about" Mount Lebanon, if it could speak, would confirm all that we might say of this well forged argument. We hope that it is for sale. It is a pamphlet of twenty-one pages; not very large; but, since the discovery of glycerin and the Peshito Syriac rendering of Acts xvi, 15, it does not take a folio to explode the doctrine of exclusive immersion.

OUR PRUSSIAN CORRESPONDENT.

We take much pleasure in introducing to our readers one whose pen will hereafter frequently enrich our columns. The writer is a native of New Orleans, is highly educated, and, as our readers will see, is gifted with no ordinary powers. He is at the very center of the great Protestant power of Europe, and from his acquaintance with the German language is admirably fitted for obtaining such information as an American periodical wishes to place before its readers.

RELIGION will always make the bitter waters of Marah wholesome and palatable, but we must not think it continually will turn water into wine, because it once did.—*Warburton*.

GERMAN BRANCH OF OUR CHURCH

Mr. Editor: As the General Conference draws nigh, during whose session, as both the Texas and Louisiana Conferences by resolutions indicated, some important changes pertaining to our German work are being deemed advisable to be initiated, a few words from one who is intimately acquainted with the present status, wants and prospects of that work may not be uncalled for.

It was cotemporary with the division of American Methodism, in the year 1844, that the doctrines successfully advocated by John Wesley were first introduced to the Germans in the Gulf States. Though insignificantly small in its incipency, the work soon grew to be a considerable stream—a valuable tributary to that "Father of Waters," the Methodist Episcopal Church South. Through the biblical doctrines of our church large numbers of Teutons were converted from the error of their way—from Catholicism, Rationalism, and, what is equally pernicious, from "orthodox" formalism—to a saving knowledge of a living Saviour. Quite a number of prosperous congregations, here and in Texas, and hundreds of those who through the courts of heaven with the dying thief, rejoiced to see

"That fountain in their day"—the fountain filled with the blood of Christ, and made manifest to them through the instrumentality of our church. "Bless the Lord, O my soul!"

But, alas! "the course of true love never did run smooth." The war came—the national, and then the ecclesiastical war. Wonderful things transpired. We saw, heard, and were amazed.

Northern Bishops—"Behold, how pleasant it is for brethren to live in unity." Join us; let us be one."

Chorus (*Western Christian Advocate*)—"The Koran or the sword." Northern Bishops—"You see we are influenced by true Christian principles. We are actuated by the burden of our Lord's prayer, 'That they may be one.' Let us be one, and lo! what a power we will be!"

Chorus (*Zion's Herald*)—"All this is but a species of sacred strategy. We know there will be no union; but we must sing the song of the spider to the fly. Silly thing! We knew she wouldn't come. Ha, ha! We profess peace and mean war. The world will judge us by what we profess."

I need not specify what wicked means were resorted to to disintegrate and absorb our German work, nor to what extent our "peace-loving" sister church succeeded.—But whether that success be great or small, the German branch of our church survived, lives, means to live, and by the grace of God will continue to live to bless a dying world with gospel truth.

But to avoid further inroads some very important measures are necessary to be taken. We require, first, a separate church literature; second, a distinct organization.

1. Say not that our people must be Americanized, and be constrained to use our English hymn book, catechism, and Discipline. True, they speak English in their business transactions. When they congregate to worship God, to pray, the native tongue is brought into requisition. Ay, roam from pole to pole, speak languages modern and ancient, converse in their native vernacular—with Ethiopian or Mongolian, when you kneel down to pray the accents you learned while nestling in your mother's bosom will be the most natural. When the heart is overwhelmed, when the soul holds communion with its Creator and Saviour, the use of a foreign language seems an artistic mockery. Our offspring will be prepared to join our American churches; but the emigrants now here, and those who will follow, must be supplied with a church literature in their native tongue. A Discipline we have. The *Evangelical Apologist* has also been resuscitated. In addition to these, we now need a hymn book and a catechism. I hope and pray that our

General Conference will make provision for their immediate publication. A committee of not less than five German preachers should be appointed to make the necessary selections of hymns, etc.

2. Another imperative want of our German Zion is a centralization of our powers. Our various German missions are, so far, scattered fragments. We require a distinct organization. The heterogeneous elements must be gathered into a species of solar system. Perhaps the organization of a Mission Conference is the thing we need. Or, if that would be asking too much—though "just the thing"—the preachers might continue members of their present Annual Conferences, and yet be organized into another Conference—a wheel within a wheel—under the supervision of a Bishop annually appointed for that special work. This Bishop, assisted by the secretary of Domestic Missions, should have full power to remove our preachers, untrammelled by the difficulties attending transfers.

Thus new fields might be taken in. The principal Southern cities—Galveston, Mobile, Portsmouth, Charleston, Richmond, Memphis, etc.—could be blessed with the labors of one of our German missionaries. Thus, too, the difficulty of supporting our German missionaries will at the same time be met. No longer dependent on the various Annual Conferences to which they are attached, it will become the duty of the Board of Domestic Missions to make provision for their support. Ample support of our missionaries will prevent partial secularization. They will then devote all their powers to the promotion of God's kingdom. A number of young men will then enter the ranks of our ministry. We promise ourselves most glorious results.

Oh! that our church, as a church, would recognize the crisis through which our German work is now passing, and would rally to our help. Large numbers of Germans are now settling in the Southern States. Shall we allow them to be absorbed by other churches? "There is a tide in the affairs of men (and churches too) which, taken at the flood, leads on to fortune." May our church fathers, at the session of our General Conference, devise liberal things for the German branch of our beloved church!

J. B. A. ADAMS.

To the Board of Trustees of the East Alabama Male College.

DEAR BRETHREN: Your relation to the above named institution suggests to the agent the propriety of addressing you a letter through the columns of our Conference organ. Of course you are expected to feel, and do feel a great interest in this our Conference college, of which you are the trustees. The great interests of our church and the country, hence involved, are intrusted to you; hence the agent believes that in you he will find sympathizing friends, who ought to and will co-operate with him in his efforts to place this institution on a proper footing.

It is known to many of you that a resolution was passed, at the last session of our Annual Conference, requiring the preachers to take up collections in all their churches during this month for the relief of the college. It is hoped that they will earnestly present its claims, and that their collections will amount, at least, to as much as the present debt.

Relying upon this, it has been deemed advisable, as indispensable to the success of the college, to make an endowment as soon as practicable.

The modest plan for effecting this desirable end is simply for one thousand persons to give each \$100, with the privilege of dividing it into annual payments, if preferred. This plan does not preclude the more able and more liberal from giving larger amounts. Now, brethren, this ought to succeed, and to make it a success we simply need your help. We most respectfully and urgently solicit your earnest and practical co-operation. Will not each of you give at least \$10 a year for the next ten years? and cannot

some of you give more? Will not each of you procure the names of five or ten persons for the endowment list? About fifty of our itinerant preachers are on it, and if they can give, who can't? We beg you to interest yourselves in this move, and please report the names of any you may obtain to the agent, to be entered on the register.

We subjoin a list of the names of the trustees:

Bishop H. N. McTear, Revs. M. S. Andrews, William Shapard, D. Pitts, W. B. Neal, O. R. Blue, John Mathews, W. A. McCarty, Wm. M. Motley, J. B. Cottrell, B. B. Ross, G. F. Dowdell, E. S. Smith, J. F. Dowdell, G. W. F. Price, J. G. Motley, Hons. David Clifton, and W. H. Barnes, Colonels M. B. Locke, S. H. Dent, J. W. Willis, G. P. Harrison and J. C. Meadors, Drs. W. H. Lamar, J. W. Myrick, and C. M. Howard, G. C. Dillard, E. T. Glenn, A. Adison Frazier, Isaac Hill, Simeon Perry, H. N. Sweet, W. C. Dowdell, D. T. Halliday, J. H. Harris, W. C. Hurt, W. T. Davis, L. B. Banks, T. S. Monnt.

The asterisk denotes those who have subscribed on the endowment proposition.

T. J. RUTLEDGE.

MONTGOMERY, ALA., April 15, 1870.

BISHOPS' SUPPORT.

We beg leave to call the attention of the preachers and members of the church to this subject once more before the close of the fiscal year, which will be the thirty-first of May.

The salaries of the Bishops should be promptly met. The receipts, however, up to this date are inadequate to meet the claims. The preachers in the several Annual Conferences will please place in the hands of their respective delegates to the General Conference any amounts they may have, or may be able to collect, for this purpose; or contributions from any persons to meet the deficiency may be sent to me in post office order or in check.

A. H. REFRON, Agent.

Not Right.—Gentle poverty, to which some ministers are "doomed," is one of the greatest evils under the sun. To place a man in circumstance where he is expected to be generous and hospitable, to open his hand as wide as his heart to the poor, to give his family a good education, to bring them up in what is called genteel life, and to deny him the means of doing so, is enough, but for the hope of heaven, to embitter existence. In the dread of debt, in many daily mortifications—meeting, perhaps, some old acquaintance, whom he dare not ask to his table, lest his prudent wife should frown upon his extravagance—in harassing fears of what will become of his wife and children when his head lies in the grave, a man of cultivated mind and delicate sensibilities has trials to bear more painful than the privations of the poor. It is a bitter cup, and my heart bleeds for brethren who have never told their sorrows, concealing under their cloak the fox that gnaws at their vitals.—Dr. Guthrie.

The improvements made on the sewing machine are truly wonderful. Singer's latest improved sewing machine embroiders, tucks, folds, gathers, cords, embroiders or braids on lace, canvas or woolen. It will gather and sew on a ruffle without creasing and busting, and do all kinds of sewing as neatly and substantially as by hand, and, of course, far more rapidly. The depot of Singer's sewing machine, No. 7 Camp street, has just undergone thorough repairs and refitting by the new agents, Messrs. William E. Cooper & Co., who have succeeded Mr. John McNulty in the business.

Kosko.—This medicine is rapidly gaining the confidence of the people, and the numerous testimonials of its virtues, given by practitioners of medicine, leaves no doubt that it is a safe and reliable remedy for impurity of the blood, liver disease, etc.

The last Medical Journal contains an article from Prof. R. S. Newton, M. D., president of the Medical College, city of New York, that speaks in high terms of its curative properties, and gives a special recommendation of Kosko to the practitioners of medicine. This is, we believe, the first instance where such medicines have been officially indorsed by the faculty of any of the medical colleges, and reflects great credit upon the skill of Dr. Lawrence, its compounder, and also puts "Kosko" in the van of all other medicines of the present day.

Rev. J. H. CHEM died in Wilcox county, Alabama, September 17, 1869, in the sixty-sixth year of his age. He left three motherless children to battle with the world, and a large circle of relatives and friends to mourn his loss. He joined the Methodist Episcopal Church South in his youthful days, and after a few years he felt it his duty to preach, and applied for license; after which he stood up boldly and proclaimed faithfully the gospel of Christ.

Married.

On the twenty-fourth of March, 1870, at the residence of Mr. John Wilson, by the Rev. John A. Miller, Mr. J. T. Tigner to Miss L. J. Vinton, all of Claiborne parish, Louisiana.

Obituaries.

Died, at Sartoria, Mississippi, March 26, 1870, WILLIAM B. ANDERSON, a native of Ohio, but for the past twenty years a resident of Mississippi.

His family resides in Hinds county. He died while absent from them, but received the kindest attention from the ladies and gentlemen of this place. Mr. Anderson was a professional school teacher, and as such enjoyed the highest opinion of all who knew him. He was a warm-hearted and accomplished gentleman, and leaves a large circle of friends, and a wife and two little children to lament his loss. He died of suffocation, caused by hemorrhage of the lungs.

A FRIEND.

Died, in Carroll county, Mississippi, on Sunday evening, March 27, of congestion of the brain, EMORIO ROGERS, daughter of Mrs. Sallie Rogers and granddaughter of Mr. B. T. Marshall, aged eleven years, five months and eight days.

How inscrutable are the ways of Providence! Little Dora was well on Thursday morning, and on Sunday evening her soul took its flight to God. Possessed of unobscured qualities of mind and soul, and highly endowed with those gifts and graces that foreshadow the promise of the future usefulness of a woman, she was the pride of her widowed mother and loved by all who knew her.

Died, at her residence in Wilkinson county, Mississippi, of pneumonia, Mrs. EMALINE ENLOW, daughter of Jacob and Lucretia Lusk, in the fifty-ninth year of her age.

She was born October 1, 1811. Her father having died when she was young, she was provided for by her widowed mother, and was married to Jesse Enlow January 1, 1837. She became the mother of six children, three of whom survive to lament their loss.

She joined the Methodist Episcopal Church some years before her death, and continued an acceptable member to the end. She kept the faith and died in peace. In her last sickness she said to her children and friends present that she was ready and willing to die.

H. ENLOW.

Died, of measles, near Clover Hill, Mississippi, on the twenty-sixth of March, 1870, GEORGE THOMAS COLLINS, in the twelfth year of his age. He was born in St. Martin parish, Louisiana.

The subject of the above sketch was a member of the Clover Hill Sunday school, Clover Hill circuit, Mississippi Conference. He was baptized during his illness, March 19, 1870. He was the idol of his family; was an invalid all his life up to within a few months before he died, during which time he bid fair to become strong and healthy; but the "grim monster" came. The tender plant, unable to stem the chilling blasts of time, was transplanted to a more congenial soil in paradise. He leaves a widowed mother, a brother and five sisters to mourn his loss.

PASTOR.

Died, of pneumonia, on Buffalo circuit, Wilkinson county, Mississippi, Mrs. AME WHEELER, in the seventy-fourth year of her age.

The writer of this obituary can state but little in regard to the early part of her life. Her maiden name was Guice. At about fifteen years of age she was married to John Anders, with whom she lived about twenty-six years, and became the mother of ten children, seven of whom yet live to mourn her loss. After the death of her husband she lived a widow some years. She was married again to John Wheeler.

About twelve years before her death, at a protracted meeting held by Brother Youngblood, in Amite county, Mississippi, she joined the Methodist Episcopal Church, and lived a consistent Christian. She suffered much for some nine or ten years before she departed this life. She endured the pain with Christian patience, and died in full hope of heaven.

H. ENLOW.

Rev. JACOB H. CHEM died in Wilcox county, Alabama, September 17, 1869, in the sixty-sixth year of his age.

He left three motherless children to battle with the world, and a large circle of relatives and friends to mourn his loss. He joined the Methodist Episcopal Church South in his youthful days, and after a few years he felt it his duty to preach, and applied for license; after which he stood up boldly and proclaimed faithfully the gospel of Christ.

He was a great power in the church. He threw in his means liberally as long as he was able. His theme was reli-

gion, and he never seemed so happy as when he was in the altar talking to mourners and seeing sinners coming home to God. He labored zealously in his Master's vineyard until he called him to his reward in the skies. His death cast a gloom over the church and community in which he lived. He was kind to the poor, and charitable in all his dealings.

May his example live in the memory of his children and all who knew him. When the last enemy (death) approached he was ready, feeling confident of a glorious victory.

WHEELER'S EXCELSIOR LABOR-SAVING

WASHING COMPOUND.

No Rubbing Necessary.—No Washing Machine Needed.

(Patent granted September 22, 1868.)

REASONS FOR PREFERENCE THIS SOAP.

1. It is not only the best, but the cheapest yet offered to the public.

2. It may be successfully used in any kind of water—cold or hot, hard or soft.

3. It so modifies the heat of boiling water on wooden goods that their fibers do not contract under its influence, and the garment is left bleached, soft and as large as originally made.

4. It will not destroy colors; on the contrary, renders them bright and beautiful.

5. The goods do not require any rubbing with the hands, washboard or washing machine; all that is necessary is soaping, boiling and rinsing.

6. It will not injure the hands; on the contrary, renders them soft and smooth.

7. Without tolling it will bleach clean and white the finest linens, kerchiefs, lace, curtains, etc. Simply drench them in warm water, soap them, place them in a dry vessel until next day, then rinse and dry, and they are very much soiled may require boiling.

We guarantee all the above facts, and will refund the purchase money to any one not satisfied with their trial of the Soap. We also guarantee to pay for any injury done to clothing by the Soap, on proof of such injury. It is hardly necessary to inform the public that the goods do not require any rubbing with the hands, washboard or washing machine; all that is necessary is soaping, boiling and rinsing.

R. G. LATTING, Manufacturer.

KOSKOO.....KOSKOO.....

THE GREAT REPUTATION

which Kosko has attained in all parts of the country

AS A GREAT AND GOOD MEDICINE,

AND THE LARGE NUMBERS OF TESTIMONIALS

which are constantly being received from physicians, and persons who have been cured by its use, is conclusive proof of its remarkable value.

As a Blood Purifier it has no Equal.

BEING POSITIVELY

THE MOST POWERFUL VEGETABLE ALTERATIVE YET DISCOVERED.

DISEASES OF THE BLOOD.

"The life of the flesh is in the blood," is a Scriptural maxim that science proves to be true. The people talk of bad blood as the cause of many diseases, and like many popular opinions this of bad blood is founded in truth.

The symptoms of bad blood are usually quite plain. Bad Digestion causes imperfect nutrition, and consequently the circulation is feeble, the soft tissues lose their tone and elasticity, and the tongue becomes pale, broad, and frequently covered with a pasty, white coat. This condition soon shows itself in roughness of the skin, then in eruptive and ulcerative diseases, and when long continued results in serious lesions of the Brain, Liver, Lungs or Urinary apparatus. Much, very much, suffering is caused by impure blood. It is estimated by some that one-fifth of the human family are affected with Scrofula in some form.

When the Blood is pure you are not so liable to any disease. Many impurities of the Blood arise from impure diseases of large cities. Eradicate every impurity from the fountain of life, and good spirits, fair skin and vital strength will return to you.

KOSKOO AS A LIVER INVIGORATOR

STANDS UNRIVALED.

BEING THE ONLY KNOWN MEDICINE

that efficiently stimulates and corrects the hepatic secretions and functional derangements of the Liver, without debilitating the system. While it acts freely upon the Liver, instead of copious purging it gradually changes the discharges to a perfectly natural state.

SYMPTOMS OF LIVER COMPLAINT AND OF SOME OF THOSE DISEASES PRODUCED BY IT.

A sallow or yellow color of the skin, or yellow-brown spots on the face and other parts of the body; dullness and drowsiness, sometimes headache; bitter or bad taste in the mouth; internal heat; in many cases dry, tensing cough; loss of appetite; sometimes sour stomach, with a raising of the food; a bloated or full feeling about the stomach and sides; aggravating pains in the chest, back or breast, and about the shoulders; constipation of the bowels; piles, flatulence, coldness of the extremities, etc.

KOSKOO

is a remedy of wonderful efficacy in the cure of diseases of the Kidneys and Bladder. In these affections it is as near a specific as any remedy can be. It does its work kindly, silently and surely. The relief which it affords is both certain and perceptible.

DISEASES OF THE KIDNEYS AND BLADDER.

Persons unacquainted with the structure and functions of the Kidneys cannot estimate the importance of their healthy action.

Regular and sufficient action of the Kidneys is as important, nay, even more so, than regularity of the bowels. The Kidneys remove from the Blood those effete matters which, if permitted to remain, would speedily destroy life. A total suspension of the urinary discharges will occasion death in from thirty-six to forty-eight hours.

When the Urine is voided in small quantities at the time, or when there is a disposition to Urinate more frequently than natural, or when the Urine is high-colored or scalding, with weakness in the small of the back, it should not be trifled with or delayed, but Kosko should be taken at once to remedy the difficulty before a lesion of the organs takes place. Most of the diseases of the Bladder originate from those of the Kidneys; the Urine being imperfectly secreted in the Kidneys, proves irritating to the Bladder and Urinary passages. When we recollect that medicine never reaches the Kidneys except through the general circulation of the blood, we see how necessary it is to keep the Fountain of Life pure.

KOSKOO

Meets with great success in the cure of

DISEASES OF THE NERVOUS SYSTEM.

Almost nine-tenths of our people suffer from nervous exhaustion, and are, therefore, liable to its concomitant evils of mental depression, confused ideas, softening of the brain, insanity, and complete breaking down of the general health. Thousands are suffering to-day with broken-down nervous systems, and, unfortunately, to tobacco, alcohol, late hours, over-work, (mental and physical) are causing diseases of the nervous system to increase at a fearful ratio.

The symptoms to which diseases of the nervous system give rise may be stated as follows: A dull, heavy feeling in the head, sometimes more or less severe pain or headache; periodical headache, dizziness, noises or ringing in the head; confusion of ideas; temporary loss of memory; depression of spirits; starting during sleep; bad dreams; heat in answering questions; dullness of hearing; twitching of the face and arms, etc., which if not promptly treated, lead to Paralysis, Delirium, Insanity, Impotency, Apoplexy, etc., etc.

KOSKOO

Is not a secret quick remedy. Formula around each bottle. Recommended by the best Physicians, eminent Divines, Editors, Druggists, Merchants, etc. The

The Child's Corner.

THE VILLAGE SCHOOL.

BY THE AUTHOR OF "CHILD-NATURE."

The village is a pleasant place,
The Hawthorn bushes are so sweet,
And elms in their abundant grace
Make lovely shadows in the street.

With trellis porch and lattice pane
How neat each little cottage is!
London would be as nice again
If London streets were all like this!

Green the corn and the pool
Whereon the lazy lilies lie;
Freshly fair and brightly cool
The water shines beneath the sky!

Wise donkeys crop the grassy ground,
Straying in placid ease about;
And from the prison, called the pound,
A melancholy calf looks out.

But sweetest sight of all, I ween,
Half hidden by the friendly grove,
The modest little church is seen,
With spire that always points above.

Blest is the home beside its gate,
Where dwells the pastor of the poor;
On him his happy people wait,
Of food for souls and bodies sure.

Kind and unclouded are the eyes
Through which his tranquil spirit looks—
A spirit learning from the skies
More than the common lore of books.

A shepherd fit to feed his flock,
And strengthen feet that faint or fall;
His hope a light, his faith a rock,
His charity a world for all.

He dwells beneath a low thatched roof,
Which roses lift their head to see;
Where laughter rings without reproof,
From sweet young wife and bairns three.

A little on the other side,
With roof of slate and wall of stone,
The school house with a proper pride
Stands unrelenting and alone.

The mistress, crowned by snowy cap,
Sits at the table, calm and grave;
With little rod prepared to rap
The little hands that misbehave.

With shining faces, shining hair,
(Could I but add with shining wits!)
The scholars at their lessons stare,
Acquiring sense by labored hits.

A sort of dullness fills the school;
Rules must be made and kept, we know,
Yet somehow, while we keep a rule
Life always is a little slow.

But hark—a step—a well known sound!
The children fling at us their fear,
With furtive glances smiling round,
While little dimples will appear.

Even to make a bird rejoice
I hold a pleasure pure and wise;
Thrice happy ye whose step and voice
Can capture bring to children's eyes!

One small delinquent, for his sins
Standing defenseless on a stool,
A lamentation loud begins,
And looks as foolish as a fool.

Keen is the glance that seeks him out,
Cheery the voice by none withstood,
"Jacky again! what's this about?
Now, Jack, you're going to be good!"

Of course he is! the sin confess,
And rescued from the dire disgrace,
He clears the trouble from his breast,
And dares his brother boy to face.

With questions vigorous and wise,
The Vicar for their knowledge delves,
Such questions almost force replies,
From boys astonished at themselves.

The tasks are done—the clock has struck—
Eager they flock about his chair,
Who smiling says, "By gosh! good luck,
I find I've half an hour to spare!"

—Good Words for the Young.

VICARIOUS PUNISHMENT.

This is the term applied to such punishment as that which Christ bore when he suffered on the cross, the just for the unjust. You do not quite know what it means, do you? I think I hear you say, "Oh, we do not want to know what such long words mean; we want to read something pretty!"

But stop a minute; I have a story to tell.

It was a warm summer afternoon; a lazy breeze stole through the windows of a little hot district school house, lifting the white curtains, and rustling the leaves of the copy books that lay open on all the desks. Thirty or forty scholars of all ages were bending over their writing, quiet and busy; the voice of the master, as he passed about among the writers, was the only sound. But though so silent, this little light, hot school room has its heroes and heroines as certainly as the wider sphere of life.

The bell rings for the writing to be laid by; and now comes the last exercise of the day, the spelling, in which nearly all the school join. At the head of the class is a delicate little girl in a blue dress, whose bright eyes and attentive air show that she prizes her place, and means to keep it.

Presently a word which had passed all the lower end of the class came to Eunice. The word was "privilege." "P-r-i-v-i-l-e-g-e," spelt Eunice. But the teacher, vexed with the mistakes of the other end of the class, misunderstood and passed it. The little girl looked amazed, the bright color came into her cheeks, and she listened eagerly to the next person, who spelt it again as she had done.

"Right," said the teacher; "take your place." "I spelt it so," whispered Eunice to herself; the tears springing to her eyes as she passed down. But too timid to speak to the master, she remained in her place, inwardly determining soon to get up again. But her trials were not yet over.

Many expedients had been tried in the school to keep out the arch enemy of all teachers—whispering. At length the following plan was adopted. The first whisperer was placed upon the floor in front of the teacher's desk. Here he acted as a monitor; as soon as he detected another he took his seat, and the next offender kept a sharp lookout to find some one to take his place; for, at the close of school, the scholar who had "the whisperer's place" was punished very severely—as the school phrase was, "took a feruling!" This plan appeared to operate very well; every one dreaded being found last on the floor; but though it secured an orderly school, many of the parents and scholars doubted its justice.

The boy who was on the floor when Eunice lost her place was an unruly, surly fellow, who had smarted for his faults often before; and as school drew near its close, he began to tremble. The instant Eunice's whispered complaint reached his ear his face brightened up; he was safe now. And when the class was dismissed, he said, "Eunice, whispered, sir."

Eunice rose, and in a trembling voice related what she had said; but the teacher saw no excuse in it, and she was called to take the place of the ungenerous boy who had told of her.

Books had been put away, and the waiting school looked on in sorrowfulness as Eunice left her seat to take the dreaded punishment. She was one of the best scholars; bright, faithful, sweet tempered, and a general favorite. Every one felt that it was unjust; and many angry glances were cast at the boy who was meant enough to get a little girl whipped. Overcome with shame and fear, she stood by the side of the desk crying bitterly, while the teacher was preparing to inflict the punishment.

At this moment a tall boy stepped out of his seat, and going to the desk said:

"Are you going to whip Eunice, sir?"

"Yes; I never break my rules!" the teacher answered.

"We will not see her whipped!" said the boy, in an excited voice; "there is not a boy here but that one, that would see her whipped; whip me, sir, and keep your rule if you must, but don't touch this little girl!"

The master paused; the school looked on tearfully.

"Do you mean to say you will take her punishment?" asked the teacher.

"I do, sir," was the bold reply.

The sobbing little girl was sent to her seat, and without flinching her friend stood and received the punishment that was to have fallen on her. The school was dismissed, and the boys paid him in admiration and praise for all he had suffered, while the grateful little girl blessed him from her heart for a noble and generous boy, who had saved her from the greatest shame and suffering.

I said the little school had its heroes—and this was one of them. Do you not think this conduct admirable?

And was this vicarious punishment? It was—one suffering from his own free will the punishment that was to have been borne by another.

You see—do you not?—that this is just what he did who bore our sins in his own body on the tree—the Saviour of men. What he suffered we cannot know in this life; but God laid on him the iniquity of us all, which he willingly bore, to save us from eternal shame and misery. With his stripes we are healed. How great the gratitude each of us owes such a Friend.—*Christian Treasury.*

LIVING ON A PROMISE.—A lady gives the following statement: "I went, just before Christmas, to see a young friend who, although surrounded by all the luxuries which wealth can give, was languishing with disease. As words were spoken of the beautiful gifts which devoted friends were expecting to make to her, she said with great earnestness, 'There is only one thing which I want; if I can have that I shall care for nothing else.' 'What is that gift for which you long?' I inquired. She said, 'I want my father to give me a promise that he will take me South; then I shall escape the cold, and I know I shall get well. O how I should live on that promise! The hours and days would pass so quickly I should forget all my weariness and pain.' I thought, dear girl, your father may give you his promise, and not be able to keep it; he may be snatched away by death, or riches may take to themselves wings and fly away. But you could 'live on your father's promise,' and how unwilling I am

to live on the words of promise which my Father in heaven gives; he whose word cannot be broken, whose promise cannot fail! Then came to mind the sweet words of Dr. Hamilton, written many years ago: 'One single promise of Jesus Christ, accredited in the heart, unites the soul to God. The graft has taken, and the soul abides as a branch in the vine.'

The Farm and Garden.

APRIL.

Those who have been unable to plant seasonably, may still plant lima or butter beans, mustard, okra, tomato, radish, parsley, squash, cucumber, melons of all kinds, beet, pepper, Irish potatoes, corn, rocket and cross. In fact, almost everything adapted to March may be planted in April.

Now is the best time to set out egg plant, tomato and pepper plants. As the weather and earth are getting warm, there is nothing to retard plants in growing, and they will outgrow those planted out last month.

English peas, the early varieties only, may be planted yet; and if the next month is not too dry and hot, they will make a good return.

This is the month to plant all kinds of pole beans. Any person fond of salad should sow curled endive now, and continue to do so at intervals during the next two months. It is best to sow it in drills a foot apart, and after the plants are up, thin out to about six inches in the row. When grown large enough, tie up the plants for about a week, so the leaves become blanched and it is ready for use. It is an excellent and very wholesome salad.

Head lettuce may be sown also, but if the ground is not very good and the season favorable, it will shoot up into seed without making any head.

All kinds of herb seed may be sown now, such as sage, thyme, summer savory, sweet majoram, basil, etc. No garden should be without them, as their use is so manifold.

This is the proper time to sow asparagus seed. Roots obtained in this State will do better than those brought from the North. Select a good piece of ground, spade it up deeply, and work in as much rotten manure as possible. After smoothing the surface well, plant the seeds in drills eighteen inches apart, and from eight to ten inches in the rows. Put four to five seeds to each place, and cover about one inch with earth. When well up, leave one strong plant to each place, and pull the others up. Keep clean during the season, and next fall, or early in the winter, cover the bed with about two inches of mold, or compost.

After the plants have been growing for a year or two, a top dressing of salt will be very beneficial to them. When engaged in transplanting, take the plants up carefully with a trowel or shovel, and save as many of the fine roots as possible; put the plants in a bucket half full of water, and take each plant from the bucket, as it is needed. If the sun shines, cover each plant with a little tuft of moss as soon as it is planted. Remove the moss and place it back again in the morning, till the plants begin to grow.

The hoe should now be active. Cabbages should be hoed weekly, and wormed where the worms are found eating the plants. The ground may be covered an inch thick all around each plant with old, well-rotted manure, or new, if old cannot be obtained. This mulches the ground, and the rains send the richness of the manure to the roots of the plant. This may be worked in with the surface soil in hoeing. Manure may, in like manner, be put between the rows of onions, beets, peppers, and all plants which grow in drills, and squashes, tomatoes, melons, cucumbers, and every other vegetable in the same manner. This keeps the surface from baking in the hot sun after rains, enriches and loosens the soil, and operates at once on the growth of the plant.

Everybody who manages a garden should remember how injurious it is to vegetables in this country to permit a dry crust to form around them. The hoe should be active after every rain, as soon as the surface soil will pulverize. The principal business of the gardener after the seeds are all planted and the plants transplanted, is to kill all the weeds and grass as fast as they make their appearance, keep the surface mellow, the walks clean, and the ditches open.

FLOWER GARDEN.

Those who have a flower garden should not any longer defer to sow some annuals. A good many of them which are sown North, in the spring of the year, have to be sown here in the fall, to come perfectly. Still there are some which, if sown now, will do well, and make a handsome show the whole season—such as the zinnia, lady-slipper, portulaca, globe amaranth, marigold,

cockseomb, Chinese pinks, Drummond's phlox, verbena, morning glory, and cypress vine. Dahlia roots should now be planted.

VINES, FRUIT TREES AND SHRUBBERY.

All sprouts of the roots of trees should be clipped smooth with the surface of the ground. Sprouts starting from the body of a tree, or from the lower and heavier parts of the limbs, should be removed. New shoots should be rubbed off as they make their appearance, in April. Moss forming on the bodies of fruit trees should be scraped off; long moss forming on the branches should be pulled off; and when the soil has become impoverished make holes from one to two feet deep, with a pointed bar of iron, all around within three feet of the tree, and pour in liquid manure. Chicken manure is good for fruit trees.

Keep the ground bare all around fruit trees for a distance of four feet by scraping the surface with a hoe; or cover the same space two or three inches deep with fresh earth thrown from a ditch near by, and stir this occasionally with a hoe, to keep the weeds and grass down.

Orange trees thrive best when the roots are as near the surface as possible. If planted too deeply the ants attack them on the trunk just above the roots. Last year we tried mounding orange trees as an experiment, and became satisfied that it is hurtful to these trees. Our experiment in mounding peach trees, which does so well in higher latitudes, seems not to have either improved or injured the trees.

The orange louse on the bodies of orange trees makes the leaves turn yellow, and in time kills the tree. Lye, strong enough to make soap, should be rubbed over the bark of the trees, and on the bark of all trees that are unhealthy. The thorns, knots and smaller limbs in the way should be trimmed off. Soap-suds poured around the roots of all fruit trees and vines, improves them. They are particularly good for grape vines. Fruit trees may be grafted till the bark slips, in the latter part of this month, or later.

All kinds of trees may be transplanted any time during the year if a large ball of earth is taken up with them, and they are plentifully watered and mulched after transplanting; but the winter or early spring is the best time for this work.

Everything in the orchard should now be cleaned for spring; grass cut up with the hoe, sprouts cut from around the plum trees, rubbish removed, vines tied up, arbor repaired, fences righted up, rotten posts removed, and pickets attended to. Much of the work done now only has to be done once in a year, and it ought to be well done.

Everything in the orchard should now be regulated for the growing season. The work left undone in March should now be completed. The bodies of all fruit trees should be particularly looked to. If the bark looks unhealthy, or if moss accumulates on it, scrape off all unhealthy matter with a dull knife, from the body of the tree, and wash it with lye.

Grape vines on the side of a house should be tied up to nails with stout hemp strings, and new shoots, when they become lengthy, should be tied up. When trained to stakes or arbors, the vines should be properly directed, and long, new shoots tied to the proper places. The arbors of Scuppernon vines need enlarging yearly. The vine needs no pruning, and covers an immense space, when it has ago and is in a good soil.

Grape arbors should either have large posts a foot square, of heart cypress or live oak, and charred at the bottom, or the posts should be framed and braided, the tenons pitched and spiked, and the bottoms set on brick pillars or blocks. A grape vine on an arbor lives from twenty-five to fifty years, and in some instances they have lived a hundred years. The arbor should be made to last accordingly, for it is difficult to repair or renew a grape arbor covered with matted vines.—*Planter's Banner.*

BRAMHINISM IN INDIA is receiving severe blows from various quarters, as every Indian mail gives fresh evidence. The *Indian Mirror*, for instance, says: "That stronghold of idolatry, Benares, has been shaken to its foundations by the appearance of a most learned Hindu Pandit, who is engaged in a violent and fearless crusade against idol worship. The Rajah and the Brahmins of the place are afraid of him. None has yet been able to vanquish him in discussion, and his pre-eminence is universally acknowledged."

Dr. DOLLINGER has published a most severe article against the petition of papal infallibility, and his course is approved by most of the Roman Catholics of Germany. Simultaneously with his withering exposition has appeared the protest of the German and Hungarian bishops against the regulation of the council. They complain that the right of starting any discussion has been taken from the fathers.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD

NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, combining all the new and important improvements; also to the extra height of the oven under the fire chamber, the Patent Chamber, Front Door, and Patent Exhausted Iron Knapels, the improvements in the covers and centre pieces, all of which have been covered by Letters Patent, and are used in no other Stove. They are arranged to equal fire, or others sent in of change in all cases. We have all sizes of the celebrated Stoves, both

PLAIN AND EXTENDED BACK.

The Extended Back with cast iron Exhausted Iron Knapels, Tin Warming, Griddle, Cover, etc. The part of the top of the Stove is raised so that the fire is above the top plate, instead of below, as in the case in front of the Stove. The new mode of the heat is forced directly against the surface of the bottom of the Exhausted Iron Knapels, being detached from the pipe, can be removed at pleasure, thereby forming six-hole Stoves, the best in use, as the heat will heat as well or better than the plain ones. For sale by

G. W. W. GOODWIN,

62 Camp Street.

ALSO, THE MOST

Complete and Perfect Cooking

FOR HITCHCOCK'S COAL OR COKE

ever invented. In the estimation of all who have yet seen it. Patented in 1869.

THE MONITOR.

which can be seen at 62 Camp Street. The advantages possessed by this Stove over the other Cook Stoves are numerous, and so patent to every sensible person that it is only necessary to examine it in order to be convinced of its superiority. All of the above Stoves are fitted with a new and improved Patent Exhausted Iron Knapels, which will heat as well or better than the plain ones. For sale by

G. W. W. GOODWIN,

62 Camp Street.

Sole Agent for States of La. and Texas.

THE TIMES.

THE IMPROVED

The Christian Advocate.

SATURDAY, APRIL 23, 1870.

A Voice from Boston to the Negro.

The New Orleans Times says: We have received from Francis J. Parker, Esq., of Boston, the following letter addressed to the Hon. Senator Revels, (colored,) from Mississippi. Mr. Parker occupies an exalted social position in Boston. He is largely connected with the cotton manufacturing interest of Massachusetts.

The Hon. Mr. Revels, Senator from Mississippi, United States Senate:

Claiming no personal acquaintance with yourself, and no political rank or prominence, my excuse for addressing you must be found in your official position, and more particularly in the first speech read by you in the Senate, whereby you address yourself through that body to the people, and wherein you appeal directly to the people of that portion of the country to which I belong.

You declare yourself to be speaking as the recognized representative, and on behalf of the negro race, to which you are allied; and so speaking you say:

"The people of the North owe to the colored race deep obligations, which it is no easy matter to fulfill. When the Federal armies were chained by death and disaster, from what source did our nation in its seeming death-throes gain additional and new-found power? It was the sable sons of the South that voluntarily rushed to the rescue; and for their intrepidity and ardent devotion, many Northern households would miss the paternal counsels or a brother's love. Sir, I repeat the fact that the colored race saved the Union, and the women of New England and the Middle States."

Now, Senator, considering the frequent repetition of these and the like assertions by stump orators of the "base sort," illiterate men may be excusable if they accept them as the truth, and, if no voice is raised to the contrary, even persons of intelligence will come to regard these charged claims of the negro race as containing at least a portion of justice. Your position as a Senator, and your representative character as a colored man, combine to give to these statements a degree of importance which demands a vigorous denial; and at this hour, when in your person the blacks for the first time enter as associates the National Legislature, it is eminently fitting that there should be established a clear understanding as to the real relations of the two races upon this question of obligation. It is for this reason that I desire at an early moment to traverse your estimate of the services rendered by your race to mine or to the country. I deny that in any sense whatever "the colored race saved the Union of New England," directly or indirectly, or in any degree from anything whatever.

I deny that, by reason of anything connected with the war, the Northern people of my race are under any obligation whatever to yours. I deny that the sable sons of the South did do anything at any time which could be honestly described as "rushing voluntarily to the rescue" of the National cause, as you say they did.

I shall go further, and assert that it is the want of "daring and intrepidity" on the part of the sable sons of the South, or—more emphatically—of the absence in them of the ordinary elements of manhood—to their entire cowardice and despicable poltroonery—to the aid and comfort which they gave to the insurgent power—we owe the unbroken prolongation of the contest, and the bloodshed, grief, and loss which followed thereupon.

I do not pretend that your people are under any obligation to mine for their freedom. The war was commenced by Southern whites, clearly in your interest, and was waged only to compel their submission; but certainly from the first day of 1863, if not earlier, your freedom was a necessary corollary to the success of the war, and depended entirely upon our success. Will you tell me what the race did of its own accord to produce this result, so vital to your interest?

A few blacks enlisted voluntarily, they were mostly Northern citizens, taking some portion of a common burden. A large number of "sons of the South" were conscripted into our army, and by army discipline were brought to do more service; but the race, the sons of the sable sons of the South, on the other side. They were your speech not merely admits, but caring for the property of the families of their property, in order that every able man might be spared to the forces opposing us; they were building and repairing the cotton, driving the army supplies, and food for the Confederates. They were making

ing powder, casting cannon, building ships, mining saltpeter and iron, serving the troops in the field, and the sick and wounded in the hospitals. Yes, you blacks were feeding, clothing, arming, and practically recruiting the very armies whose success was your deeper bondage, while we, upon whose triumph must follow your emancipation, were obliged to take from their homes and enlist in our armies the hundreds of thousands of our best to do what you were doing for our foe.

You describe your people as at this time "waiting"—"waiting patiently"—protecting women and children, and making property secure, while their masters were absent; as bearing no revengeful thoughts, no hatred, no animosities; as aiming "not to sacrifice one single interest" of the whites.

Ah, Senator, once it was thought "who would be free, themselves must strike the blow"; but in this new dispensation, they must strike no blow, bear no animosity, and help to drive their fetter-rivets home, and—"wait patiently."

"We white men are not accustomed to wait patiently under deprivation of our rights, to lick the hand that strikes us, or to cherish the property, interests or persons of those who enslave us, when liberty is within our reach. We did not look, much less hope, (God forbid,) that you would attack the lives or honor of innocent children or defenseless women, (bitter enemies as women and children even were to us,) but we did hope that you might refuse to help your and our foes. We did think (doubtless, as you say, "the wish was father to the thought,") that even you might produce such alarm in the rear as should, at little risk to you, weaken the front of our enemy; and some of us believed that you would dare even more."

If a dozen or two of your intrepid race could have been brought at critical periods, under cover of the night, to tear up the rails which alone enabled the insurgents to concentrate their forces against us, or occasionally here and there, to fire the Confederate depots of arms, clothing, forage and supplies, or the bridges upon important lines of railway, (all of which would have implied but little personal risk,) the war would have been far shorter, and its cost in life and treasure very much less; but no such aid came to our cause, and when we conquered at last, our triumph was over the united power of the South, male and female, white and black, for you were combined against us.

You know the truth of all this, and, knowing it, you claim (as I think justly) the support of the Southern whites, for whose cause you did so much; but how can you claim, as it were with the next breath, that the people of the North are under any obligation to your race? It cannot be that the blacks were saviors like to the North in its "seeming death-throes," and the South in its "days of weakness and impotence."

No, Senator; whatever may be due to individuals, we owe your race, as such—nothing; and it is well, as you enter your political arena, that this should be fairly understood. Whatever you may aspire to hereafter must be earned by future merit; and as long as we are content to leave your war record out of sight, profound silence on your part is the loftiest wisdom. With sincere congratulations upon your political elevation, believe me, respectfully yours,

—FRANCIS J. PARKER.

Boston, March 23, 1870.

THE WESTWARD FLOW OF EMIGRANTS.—Advice from the Old World represent that we may look for an immense emigration, this season, from all the Scandinavian and many of the German States. The emigrants will settle mostly in Kansas, Missouri, Wisconsin and Minnesota. A private letter, received in Milwaukee from Stockholm, says:

"All over the North the moving bangle sounds, and ere long the crowd will be with you. The Scandinavians hear good reports from Wisconsin and Minnesota, and seem to prefer these States to any others, on account of the climate, for one thing, and the fact that so many of their acquaintances are located there, for another. Ole Bull has written and had published in our papers some letters of advice to his countrymen, and in these letters he tells them that they will find a better home in these States than anywhere else. Feeling confidence in Ole, these letters have had no little weight, and many undecided before are fully determined now. Many of the emigrants, who went out some years ago, are sending home tickets and drafts to poor relations. We shall send you a good lot of people, and you must take good care of them."

Advance is like snow: the softer it falls the longer it dwells upon, and the deeper it sinks into the mind.—Coleridge.

MUSICAL INSTRUMENTS.

GREAT SOUTHERN MUSIC HOUSE.

2. Full faculty of experienced teachers.

3. Music made a special feature.

4. Art taught thoroughly and cheaply.

5. Fine scientific Apparatus good order.

6. Boarding department, excellently kept.

7. Pupils under control of President.

</

NEW ORLEANS MARKETS.

From the N. O. Price Current.

We have again to notice quite an active business in most branches of the wholesale trade in filling orders and sales to country merchants. Sugar and molasses have come forward more freely and met a steady demand at full prices, and molasses has sold readily, considering the limited supplies, at previous rates. We have no material change to notice in Western produce. Provisions have continued in good request, and commanded full prices, but most other articles have been quiet and rather weaker.

The accounts from the Red river are rather discouraging, there having been no available rise from the rains previously noticed, and the river falling at Shreveport. The Onatchita is at a good navigable stage, but boats are bringing out light loads. The receipts of cotton have, nevertheless, been liberal, compared with last week, showing a slight increase.

The river is now three feet ten inches below high water mark, having fallen one inch since our last.

Cotton.—The following are the arrivals since the fifteenth instant:

Louisiana and Mississippi	9802
Alabama	891
Florida	103
Texas	188

Total 11005

On Saturday operations were restricted by light offerings and higher pretensions on the part of factors, who predicted their claims on an improvement in gold and foreign exchange, but, as buyers were reluctant to pay an advance, the business was confined to 2,200 bales, at irregular prices, showing an improvement of $\frac{1}{2}$ to $\frac{3}{4}$ c. from the lowest point, good ordinary closing at 20 $\frac{1}{2}$ to 20 $\frac{3}{4}$ c., low middling at 21 to 21 $\frac{1}{2}$ c., and middling at 22 to 22 $\frac{1}{2}$ c. On Monday there being no telegrams from Liverpool, and factors claiming full prices on a further rise in gold and foreign exchange, buyers generally showed a disposition to stand aloof and await Tuesday's Liverpool dispatches, but a number, nevertheless, came forward in search of small lots, and the sales embraced barely 2,000 bales, at prices showing no quotable variation, but with the advantage on the side of the buyer. On Tuesday the market opened under the rather assuring tenor of telegrams from Liverpool, which reported a steady demand at the rates of Thursday last, but at the same time corrected the previous dispatch of shipments from Bombay, which were only 27,000 bales instead of 50,000, as telegraphed on Monday. Under these circumstances factors assumed increased confidence, and evinced a disposition to meet the demand less freely. Finding, however, that buyers would not go on unless at previous rates, or a shade lower, they subsequently relaxed in their pretensions, and 4,300 bales changed hands, at prices exhibiting some little irregularity, without any quotable variation—good clean cottons showing continued firmness, but mixed lots, dusty, stained, etc., being rather weaker.

This makes an aggregate for the past three days of 8,500 bales. The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 98,926 bales, against 745,070 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 608,743 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 340,730 bales to Great Britain, of 95,804 to France, and of 112,547 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	17 $\frac{1}{2}$ to 18 $\frac{1}{2}$
Good ordinary	20 to 20 $\frac{1}{2}$
Low middling	21 to 21 $\frac{1}{2}$
Middling	22 to 22 $\frac{1}{2}$
Strict middling	23 to 23 $\frac{1}{2}$

COTTON STATEMENT.

Stock on hand Sept. 1, 1869, bales	770
Arrived past three days	11005
Arrived previously	103284-1043289

Exported past three days	15026

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, APRIL 30, 1870.

NO. 15.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, April 20.—In the Supreme Court of the United States, this morning, Mr. Chatfield, of the counsel for the appellants, in the cases of Latham and Denning vs. the United States, declared that the appellants had determined their own appeals in the cases, and therefore moved to dismiss them, and filed a notice of withdrawal. There were present: Attorney General Hoar for the United States, and Messrs. Chatfield, McPherson and Merriman for the appellants. Hon. Clarkson N. Potter was also in the court, by leave, to discuss the legal tender question, if heard.

After the motion was made to dismiss, Attorney General Hoar expressed his opposition to it, but desired, in case the court concluded to dismiss these appeals, to grant the motion he made to rehear Mr. Potter's case, Hepburn vs. Griswold, which was still undecided. He urged that the argument ought to be heard, involving so many important interests, especially in view of the fact that the fourteenth amendment of the constitution has ratified the legal tender act of Congress, and the validity of this issue of the public debt to the full measure of its statutory qualities could no longer be questioned in the courts.

Justices Miller and Bradley suggested doubts as to the rights of the appellants to withdraw the appeals, and asked for a conference. After a brief conversation among the judges, the chief justice announced that the court would retire for consultation, which they accordingly did. They returned in a few minutes, when the chief justice said the motion to dismiss the appeal was unanimously concurred in by the court, as the absolute right of the parties, and he announced that the court had determined to deny the motion of the attorney general for a rehearing in the Hepburn and Griswold case. This is the case in which the court heretofore decided that the legal tender act is invalid as to contracts made before its passage.

The chief justice said as the reason why the rehearing was denied, was that none of the four judges now on the bench, who concurred in the opinion in that case, desired to have the case reheard, and under the rule of the court, without the consent of some one of the judges who concurred in the decision of a case, it could not be reheard.

Justice Bradley said, according to the practice to which he had been accustomed, an appeal or writ of error could not be dismissed without the consent of the other party, but as the practice of the Supreme Court was otherwise, he had yielded a cheerful concurrence. The refusal to rehear leaves the decision as it was heretofore made in the Hepburn-Griswold case.

In one of these two appeal cases withdrawn, that of O. B. and O. S. Latham vs. the United States, the Court of Claims had ruled as the conclusion of the law that the United States notes offered to and received by the claimants were a legal tender in payment of any debt due to the claimant in the premises, whether due under the special contracts set forth in the petition, or in any other manner whatsoever. The special contracts above referred to were contracts which the Secretary of the Treasury, in the years 1855 and 1856, agreed, on behalf of the United States, to pay the Lathams \$19,000 in lawful money of the coin of the United States, as above stated.

Upon the calling of these cases, this morning, the counsel for appellants, instead of proceeding to argue in support of their appeals, moved to dismiss the same, and the motion was allowed, so that the judgment of the Court of Claims, including the point above stated, remains undisturbed as a valid judgment of the law of the land.

RICHMOND, VA., April 27.—About noon o'clock the Supreme Court of Appeals of Virginia was crowded with eminent citizens and many of the public at large, who were there by curiosity, to hear the result of the late hearing of the case of the majority of Richmond. The friends of Messrs. Elliott and Cahoon, who comprise the permanent Republicans and Conservatives of the city, had assembled to hear the decision, which it was expected would be given to-day.

Among the many prominent persons present were ex-Governor Nelson, ex-Congressman Nelson, J. A. Meredith, Patrick A. Meredith, ex-United States district attorney for this district, ex-United States District Attorney Chandler and others. At one o'clock the gallery of the court room, which was crowded, fell.

The floor followed, and thereon descended thirty feet to the floor below, which was the floor of the House of Delegates of Virginia, on which some few of the members of a caucus were waiting around. There was a general crash of all the timber, and the falling of the inside wall. The killed were Patrick H. Aylett; Captain Charters, chief of the Fire Brigade; E. M. Schofield, city assessor, and brother of Major General Schofield, late Secretary of War; Dr. J. B. Brock, editor of the Richmond Inquirer; Julius A. Hobson, city collector; S. Dugger, a member of the House of Delegates; T. A. Beckwith, commission merchant of Alexandria; Samuel Eaton, of Boston, Massachusetts, and former theatrical manager of the Boston Theater; Powhatan Roberts, commissioner in chancery and of the Court of Common Pleas; James A. Blamire, of Berlin, Prussia; S. E. Burroughs, Syracuse, New York; N. P. Howard, lawyer; Ash. Levy, merchant; J. W. D. Bland, colored, Senator from Prince Edward; J. Watson, merchant, of Danville; Thomas Wilcox, ex-Confederate general; Sam. H. Harston, a wealthy landholder of Henry county; Charles J. Grinnan, of Washington, D. C.; Robt. H. Maury, Jr., land agent; Edward Ward, of England; William H. Davis, coal merchant; John Robertson, colored, Baptist minister; Colonel Pichegrew, Woolfolk; T. P. Foley, deputy United States marshal; and a captain and one sergeant, and nine privates of the police, who were on duty in the building. Among the wounded were ex-Governor Wells, ribs broken, and otherwise internally injured; Major H. K. Ellison, slightly; Major George Cahoon, slightly; L. H. Chandler, Judge George A. Meredith, James Nelson, John Howard, Rush Burgess, collector of the district; Wm. C. Duneau, agent of the Virginia and New York Steamship Line; Hon. Thos. S. Bocock, ex-Speaker of the United States House of Representatives, leg amputated; General M. D. Corse, ex-major general Confederate army; Colonel George Brent, of Alexandria; Captain Geo. Allen, portwarden; W. C. Ellum, newspaper correspondent and broker; Thomas S. Baldwin, merchant from Newark, N. J.; W. D. Chesterman, of the Petersburg Index; W. H. Soper, merchant from Baltimore, and about one hundred others.

After the disaster occurred the fire alarm was used to give notice, and the hook and ladder companies of the city repaired at once to the scene. A cordon of police was drawn around the building; the ladders were thrown up to the windows. For three hours after that the scene was full of horrors. Minute after minute there appeared, swung out by a rope tied around the middle, the body of some popular favorite, who, after being swung on the shoulder of one of the fire brigade, mangled and dead, were brought down the ladder into the green of the public park, when it was instantly surrounded by two or three thousand of those who had gathered to recognize the slain.

The park was full of weeping women and anxious men until two o'clock, when the last victim was drawn from the building. After this the police closed the park, refusing admittance to any one. The bodies of the dead having been sent out, all the stores in the city were closed, and placards put on the doors—"Closed in cognizance of the disaster at the capital." No more business was done during the day.

At those two epochs it was believed, even as I myself believe to-day, that anything done without your consent was illegitimate.

The constitution of imperial and democratic France may be reduced to a small number of fundamental provisions, which cannot be changed without your consent.

Your decisions will have the advantage of rendering definite the progress already made, and of placing beyond the influence of political fluctuations the principles of the government.

I address myself to all of you who from the tenth of December, 1848, surrounded all obstacles to place me at your head. To you who for twenty-two years have without cessation guarded me by your suffrages, sustained me by your co-operation, rewarded me by your affection, give me a new proof of confidence. In bringing to the ballot box an affirmative vote you will exercise the

monarch of revolution, you will place order and liberty on a solid basis, and you will render easier in the future the transmission of the crown to my son. You have almost unanimously for eighteen years clothed me with the most extensive powers; be also signally unanimous to-day in supporting the transformation of the imperial regime. A great nation has no way of attaining its development without resting on institutions which guarantee, at the same time, stability and progress. To the call which I make on you to ratify the liberal reforms realized during the last ten years, reply yes. As for myself, faithful to my origin, I shall continue penetrated by your thoughts, and fortified by your will, and confiding in Providence, shall work without cessation for the prosperity and the grandeur of France.

PARIS, April 25.—It is reported that the disaffection in the party of the left has been healed, and that all will vote alike.

The Journal Official contains the following circular to the officers of the civil service, signed by all the ministers:

The emperor addressed a solemn appeal to the nation in 1852. He asked power to assure order. In 1870 he asks power to establish liberty! Confident of the title which is his, by reason of the right of eight million suffrages, he does not surrender the empire to discussion. He submits to a vote only. In its liberal transformation, to vote "yes" is to vote for liberty.

The revolutionary party is secretly attacking the national sovereignty, and misrepresenting the respect which the emperor pays to the sovereignty in consulting the people. They are not true friends of liberty, but in spite of these the masses will move in our ranks. Can they ignore the fact that to abstain from voting, or to vote "no," will be to strengthen those who only combat the transformation of the empire in order that they may destroy it, and with it the political and social organizations to which France owes her greatness?

In the name of public peace and liberty; in the name of the emperor, we demand of you all, our devoted co-laborers, to unite your efforts with ours. It is to the citizens we address ourselves, not as ordering, but as offering patriotic counsel. Our object is to assure to our country a tranquil future, to the end that on the throne, as in the humblest dwelling, the son may succeed the father in peace and quiet.

PARIS, April 25.—The following is the emperor's proclamation:

I address all the French people. You, who since the tenth day of December, in the year 1848, placed me at your head, have recompensed me by your affections, and I call on you to give me a new proof of your confidence in me by casting an affirmative vote on the plebiscite.

Such a vote is a vote against threatened revolution; such a vote assures order; such a vote renders easy for me and for France the transmission of the crown to my son. Let your vote be unanimous, as it was eighteen years since. A great nation, in order to secure the fruits of its own development, must support institutions guaranteeing additional stability and progress. Let the people answer "yes" on the day of election, in order to ratify by their voice the liberal reforms which they have enjoyed during the past ten years. For my part, faithful to my origin, and confident in the providence of God, I will continue to work incessantly for the prosperity of France. It becomes indispensable that the new constitutional act shall be approved by the people, as were formerly the constitutions of the republic and of the empire.

At those two epochs it was believed, even as I myself believe to-day, that anything done without your consent was illegitimate.

The constitution of imperial and democratic France may be reduced to a small number of fundamental provisions, which cannot be changed without your consent.

Your decisions will have the advantage of rendering definite the progress already made, and of placing beyond the influence of political fluctuations the principles of the government.

I address myself to all of you who from the tenth of December, 1848, surrounded all obstacles to place me at your head. To you who for twenty-two years have without cessation guarded me by your suffrages, sustained me by your co-operation, rewarded me by your affection, give me a new proof of confidence. In bringing to the ballot box an affirmative vote you will exercise the

monarch of revolution, you will place order and liberty on a solid basis, and you will render easier in the future the transmission of the crown to my son. You have almost unanimously for eighteen years clothed me with the most extensive powers; be also signally unanimous to-day in supporting the transformation of the imperial regime. A great nation has no way of attaining its development without resting on institutions which guarantee, at the same time, stability and progress. To the call which I make on you to ratify the liberal reforms realized during the last ten years, reply yes. As for myself, faithful to my origin, I shall continue penetrated by your thoughts, and fortified by your will, and confiding in Providence, shall work without cessation for the prosperity and the grandeur of France.

PARIS, April 25.—In a public meeting held yesterday to discuss the plebiscite, the majority of the audience declared in favor of abstaining from voting on the eighth of May. Signor Caradere, an Italian banker known for his Republican proclivities, has presented one hundred thousand francs to the anti-plebiscite committee. Prince Pierre Bonaparte, yesterday, gave a grand banquet to the Corsicans belonging to the guards.

LONDON, April 25.—Mr. Otway, under secretary of State for foreign affairs, stated, in the House of Commons to-day, that the government has dispatches from Athens confirming the melancholy intelligence of the fate of the captives in the hands of the brigands. The Greek government made every effort to save them, but in vain. Negotiations having been exhausted, troops moved against the robbers and drove them to a tower on the coast, near Crapo, where they were surrounded on Friday afternoon. Offers were once more made to the brigands, but were rejected, and at ten o'clock next morning an attack was made on their position. As soon as the troops commenced to move, Herbert and the secretary of the Italian legation were taken out by their captors and butchered, and subsequently; when the brigands found themselves hard pressed, Vyner and Lloyd were killed. The troops finally carried the tower, and the brigands, two of whose leaders had been mortally wounded, fled, closely pursued by the soldiers. There are strong hopes that most of the band will be captured, in which case they will be summarily dealt with by the Greek authorities. The British press clamors for the punishment of the murderers and demands indemnity from the Greek government.

LONDON, April 25.—Captain Eyre, of the steamer Bombay, is seeking for the restoration of his certificate, on the ground that the evidence against him is contradictory and inconclusive. There is much sympathy shown for him.

There is every sign that business will be pushed with vigor in Parliament. The Liberal Whip has issued a circular to the members, notifying them to be prompt in attendance, as a week of heavy work is expected.

LONDON, April 25.—It is stated that a thin slip of board a yard long, painted blue, drifted ashore, inscribed: "City of Boston is sinking, February 11."

ROME, April 25.—The council, six hundred and sixty-four fathers being present, unanimously adopted the Schema de Fide. It contains four chapters and eighteen canons, as follows: Chapter first, of five canons on the Creator. Chapter second, of four canons on the revelation. Chapter third, of six canons on faith, and chapter fourth, of the three canons on faith and reason.

BERLIN, April 25.—The Parliament of the Zollverein has completed its organization. Herr Senfow was elected president, and Prince Hohenzollern and Herr Ujest vice presidents.

Madrid advices represent that a violent quarrel has broken out in the Spanish cabinet. The partisans of Montpensier are gaining ground outside of the capital. It is also reported that a rising in favor of the Prince Asturias is threatened.

ROME, April 25.—Another public session of the Ecumenical Council will be held to-morrow. The Pope will preside and the fathers will vote openly on the additional articles of faith.

ROME.—A letter from Rome, of April 1, reports the following extraordinary case: The theologian of an American bishop, since his arrival here, had been indulging in

such attacks on authority that Cardinal Barnabo, prefect of the Propaganda, thought fit to counsel moderation, and invited him to go to the convent of Sts. John and Paul of the Passionists, and remain there for some time. The other, however, refused in such terms that the vicar was obliged to decide on force to compel him to proceed to the place designated. The agents went, in consequence, to the Sacro-Ritiro a la Lungara, where the theologian lived (it being also the bishop's residence,) and having seized him placed him in a carriage. But the Armenian made a desperate struggle, and succeeded at length in throwing himself out of the vehicle, after which he ran back to his house, and the agents, who followed, were deterred from a fresh seizure by the protest of the bishop himself.

Another fact is more serious. An apostolic visit had been ordered to the convent of the Armenians, called Antonines, under the colonnade of the Vatican; but the bishop refused to receive the visitor, on which the Pope ordered Mgr. Ksagian to proceed from St. Sabine to the Dominicans to perform these religious exercises. But the bishop persisted in his refusal, and he has written to Mgr. Place, Bishop of Marseilles, to claim the protection of France against the Holy Father.

Another Roman correspondent gives an animated description of the scene in the Ecumenical Council on the twenty-second of March, when Bishop Strossmayer made his speech against that part of the Schema de Fide which ascribes all modern errors to the Protestants. The bishop observed that it is unreasonable to describe Protestantism as the source of atheism and materialism, seeing that many eminent Protestants, such as Leibnitz and Guizot, have combated these doctrines. Here the bishop was forced to stop by loud protests from all parts of the council, but he went on when the clamor had ceased. There are many sincere people, he said, among the Protestants of France, England, America, Germany and his own diocese, who err bona fide. This raised another storm, which was only appeased by the intervention of Cardinal Capalti. But when the bishop began to touch on the question whether the dogmas should be passed by a majority of votes or only, as in former councils, when all the members are unanimous, the council lost all patience. Cries of "Hereticus! hereticus!" and "Damnamus eum!" were heard on all sides. One bishop exclaimed, "Il ego non damno eum," upon which the others repeated, "Damnamus," and shouted to the speaker, "Tu es Protestantus! taceas! ab ambone descende!" Ultimately Bishop Strossmayer was compelled to leave the tribune without finishing his speech.

The noise was so great that it was heard in the ante-rooms, and the bishop's military servant drew his sword and endeavored to force his way into the council chamber to defend his master.

The Ecumenical Council has voted almost unanimously in favor of the entire text of the schema of the dogma of the papal infallibility.

It is evident that the Garibaldians contemplate another attempt upon Rome. What would please their hearts more than a raid now and a capture of the whole hierarchy of the church, with the Pope at its head? The papal authorities are said to be on the alert. Forty suspected persons have been arrested, and out of their examination has grown the belief that a conspiracy is brewing within the papal territory in concert with the revolutionary party outside.

Six hundred bishops voted for the Constitution de Fide in the Roman Council. There was no opposition. Cardinal Gonelli died in Rome on Sunday morning.

I HAVE TAKEN much pains to know everything that was esteemed worth knowing among men; but, with all my disquisitions and readings, nothing new remains with me, to comfort me at the close of life, but this passage of St. Paul: "It is a faithful saying, and worthy of all acceptance, that Christ Jesus came into the world to save sinners;" to this I leave, and herein I find rest.—*Selden.*

WHEN ONCE infidelity can persuade men that they shall die like beasts, they will soon be brought to live like beasts also.—*South.*

WHEN WE are alone we have our thoughts to watch, in the family our tempers, in company our tongues.—*Hannah More.*

THE LAST ACT of life is sometimes like the last number in a sum: ten times greater than all the rest.—*Collier.*

AN APPEAL.

JASPER, ALA., April 13, 1870.

MR. EDITOR: You will not be surprised to learn that we are doing about the best we can. All at peace; congregations full and attentive, and some prospect of better times, and, we trust, not far ahead. We have thus far received several into the church; occasionally some inquiring the way of salvation. But owing to one or two facts, we are brought to a halt. The very special one is, we are needing houses to worship in, and particularly here in our little town. Will you be so kind as to grant me the privilege of appealing to the members of the church within the bounds of the Mobile Conference for help in the way of money to complete our church house in this place. To this I truly hope every one will respond; neither are we very particular from whom or from what Conference. Help we want, help we need. Read why: This little place suffered as much as any place of which I have any knowledge, during the war, to survive at all. Our church house, just completed, was burned—the courthouse, every business house, with tavern, and nearly all the residences in town. Since then the people have done nobly. They have replaced their business houses, repaired their dwellings, built a court house, and have on hand the church house. We have expended about \$1,000, which has exhausted our means, leaving the house still incomplete. I certainly think any Methodist who reads this will inclose us one or more dollars to aid us in this enterprise.

Let me say, brethren, when you are in a like condition let us know, and the bottom dollar shall come. Let every one help us, however small the amount, and you will receive our thanks and prayers. Send it in a letter to Jasper, directed to myself, J. M. Boland or Rev. F. Gamble. Wm. E. CAMERON.

CRUCIFIXION IN THE NINETEENTH CENTURY.—The following account of an execution at Yokohama is translated from a letter written by a young Prussian attached to the warship Medusa:

"On the ninth of September nine Japanese rebels were executed, eight of them by being beheaded with the sword, and the leader by crucifixion. This last was a tall man, exceedingly pallid, looking more like a ghost than a living man; he was bound to a cross with his legs spread far apart, and between them was placed a stick of wood on which the body had a torturing support. A cord round the neck tied the body to the cross, and the upper and forearms were also bound tightly to it. This being done, he remained hanging for half an hour, during which he was obliged to witness the beheading of his eight companions, one after the other. After beholding this scene, and the washing and combing of the heads which were stuck upon poles, he was pierced in the side with a spear, so that a large stream of blood flowed from the wound. His countenance became horribly distorted, and shortly afterward he received another thrust in the other side. He bit into the rope around his neck in the agony of his suffering, and died in this position at last. Just before he drew his last breath he was pierced again in the bowels with a hooked lance, and the intestines drawn out. You cannot imagine the horrible spectacle, and the fearful contortions of the face and the whole body. It seemed as if I received the thrust myself. He was left hanging there the whole day, as a warning example to everybody. The Japanese look upon all this with the greatest indifference."

OF TWO EVILS, it is, perhaps, less injurious to society that a good doctrine should be accompanied by a bad life, than that a good life should accompany or lend its support to a bad doctrine; for the sect, if once founded, will survive the founder.—*Colton.*

THE LAST ACT of life is sometimes like the last number in a sum: ten times greater than all the rest.—*Collier.*

MARY.

BY ROSK TERRY.

The box is not of stainless alabaster
Which o'er thy feet I break;
Nor filled with costly ointment, gracious
Master,
Poured for thy sake.

Nay, rather is it shapen in this fashion—
A living heart;
Dashed all across with scarlet stains of pas-
sion,
And broke in part;

While from its open wound comes softly drip-
ping,
Like slow tears shed,
In heavy drops, along thy footstool slipping,
Its life-blood red.

It needs no balm or myrrh for sweet or bitter,
But life and love;
These sad conditions make mine offering fitter
Than heart to move.

From all these chains of cruel wrong and an-
guish,
This load of grief
Wherewith my soul doth pant, and mourn,
and languish,
Give me relief!

In thy far home is not thy soul still tender
For mortal woe?
Hear'st thou not still amid that spotless
splendor
The seraph know?

Oh turn thy human eyes from heavenly glory!
Say as before
Those tenderest words of all thy gospel
story—
"Go, sin no more!"

—Lippincott's Magazine.

RICHES VERSUS RELIGION.

Our blessed Saviour, on a certain occasion, said: "How hardly shall they that have riches enter into the kingdom of God."

This seems at first sight to be a hard saying, and almost incredible, for one would suppose that the rich would have greatly the advantage of the poor in securing the salvation of their souls. They have the means of commanding the greatest facilities; they can command the best preaching, the best books, the best associations. They have time to devote to their religious duties, and, in short, every advantage of the poor, who have to labor hard for their living, and have not the means and facilities for religious improvement, which are enjoyed by the rich; and yet our blessed Lord declares that it will be exceedingly difficult for a rich man to be saved. Why is this?

In many instances where riches have been accumulated by the proprietor, and not by inheritance, unjust means have been resorted to in order to their acquisition. This, of course, is not always the case; but there are few fortunes that have been thus accumulated which will bear the touchstone throughout. If any portion of a man's wealth has been obtained by fraud or over-reaching; if an advantage has been taken of the mistakes or ignorance of men to appropriate their property to ourselves, without rendering an equivalent, we are dishonest, and stand condemned by God's holy law, and without restitution and genuine repentance we cannot be saved. How hard a requirement to the man who loves his wealth, and how few have the nerve to disgorge from their coffers the unlawful gains they have accumulated. In some instances it would almost impoverish the man of wealth. Who is sufficient for these things? In all such cases "how hardly shall they that have riches enter into the kingdom of God."

Another reason why it is hard for a rich man to be saved is that he is liable to set too high an estimate upon wealth, and to trust in uncertain riches rather than in God, and thus become idolatrous. As wealth gives power among men—commands all the pleasures of sense and secures the honors of the world—it is very natural that it should be highly esteemed, and there is great danger of its becoming an idol. If men will make sacrifices for wealth that they would not make to secure the favor of God; if they are more concerned about the accumulation of riches than they are about securing the riches of grace; if they will compromise the cause of religion rather than lose earthly gain, they prove themselves idolaters. Covetousness is expressly called idolatry by the Apostle Paul, and idolatry is expressly numbered

among the sins which exclude a person from the kingdom of heaven.

Another reason is that wealth surrounds its possessor with flatterers, who are seeking to profit themselves by his instrumentality. Scarcely any one will admonish him of his faults and errors; but he is flattered and enjoyed and puffed by nearly all who approach him, and his deceitful heart is ever ready to take part in the work of delusion. And there is great danger of thinking more highly of himself than he ought to think.

Riches tend to make their possessors proud. They enable men to live in ease and luxury—to wear fine clothes, ride in fine carriages, live in fine houses. And it is perfectly natural for them to think themselves as much better than other men as they are finer and more luxurious. They are in danger of being blinded by the god of this world, and taking this world for their portion, forgetting that they are mortal and must soon leave all their earthly possessions behind, and go naked into eternity. Riches have a powerful influence in shutting God out of the heart; they foster pride and the love of the world, which are the greatest enemies of Christ and religion. It is exceedingly hard for a man of wealth to withdraw his trust from his wealth, and come to the foot of the cross upon the same terms as the poor beggar at his gate—to renounce all claim to the favor of God on the ground of worldly dignity, and acknowledge himself a poor, guilty, condemned, helpless sinner, claiming pardon and salvation by grace alone, through faith in Jesus Christ.

The care and attention required for the preservation of riches is a serious hindrance to religion. It requires as much industry, watchfulness and care to retain wealth as it does to accumulate it. The man of great earthly possessions is loaded with care and anxiety. He can scarcely find time to read his Bible or pray, or attend to self-examination. His mind is constantly occupied with earthly plans, and God and religion are shut out of the heart. All wealthy persons have found the cares of the world a serious obstacle to their religious prosperity and enjoyment. "The cares of the world and the deceitfulness of riches choke the good seed, and it brings forth no fruit."

Wealth brings worldly associations, and introduces its possessors into fashionable society, where it is extremely difficult to preserve a strictly religious life. The Christian is commanded, "Be not conformed to this world." This evidently refers to its precepts, maxims, follies and sinful pleasures. How difficult to avoid these things while we are identified with fashionable society! How often do persons professing Christianity sacrifice their children upon the altars of mammon and pleasure. They are seeking wealthy alliances, and send their children to the resorts of fashion and worldly pleasure, that they may form acquaintance with the rich, and often seek matrimonial alliances solely on the ground of wealth, and sacrifice the moral and religious interests of their children to wealth and worldly distinction.

In view of all these solemn considerations, Jesus has well said: "How hardly shall they that have riches enter into the kingdom of God." And all who sincerely desire to be saved should be careful not to make the accumulation of wealth the object of their lives. While we use proper economy, industry and frugality, let the honor and glory of God be our great object. Let us seek first the kingdom of God and his righteousness—seek his favor and approbation in all things, and use this world so as not to abuse it. Live for eternity!

G. SHAEFFER.

"When my mother says no, there's no yes in it." Here is a sermon in a nutshell. Multitudes of parents say "no," but after a good deal of teasing and debate, it finally becomes yes. Love and kindness are essential elements in the successful management of children, but firmness, decision, inflexibility, and uniformity of treatment are no less important.

PRUSSIAN CORRESPONDENCE.

GERMANY, March, 1870.

MR. EDITOR: Germany is in a state of delightful literary excitement this year. The presses of Leipzig groan with works for publication—works of herculean proportions, works that might be measured by odes and roods—ponderous tomes by doctors of theology in learned and sonorous universities; folios that might be compressed into 32mos, and new and flying leaves few in number, but exquisite in fruitfulness, pervaded with spiritual sustenance, and sweet to the hungry scholar. Among the latter will soon appear about three thousand scattered essays and compositions of Luther and his contemporaries. Gentle Melancthon will be there, it is to be hoped; learned Reuchlin too, and even Erasmus' bitter and eloquent tongue. To make the collection essentially valuable Ulrich von Hutten, the wit and warrior, must figure among these gloomy theologians, a bright, trenchant, beaming spirit thundering against the Prince of Wurtemberg, and ditting, shadow-like, through Hauff's beautiful romance of Lichtenstein.

Though not strictly contemporaneous, the writings will be classified under the title of Flying Leaves of Luther and his contemporaries. Over five hundred of Luther's writings are among them, together with the original edition of his celebrated Theses.

No public library in Germany possesses a collection of such rare bibliographical worth.

The activity among the publishing houses of Leipzig, which only contains seventy thousand inhabitants, is amazing. It is one vast book store. Last year theological works were sent forth by hundreds, and books on philosophy, philology, natural science and school instruction in bewildering abundance. This year the harvest promises to be equally yielding. One might almost pray for Egyptian locusts to destroy it! When one unassisted German professor, in a moment of inspiration, sets to work to combine the philosophies of Schelling, Hegel and Schopenhauer into one harmonious circle, with his own criticisms and philosophy as its center—when, so to speak, he boxes Kant's ears, establishes his own theories triumphantly, and turns his back on Jacobi—you can have some faint notion of the wonderful industry of these Germans. The labor on one of the illustrated periodicals of Stuttgart or Leipzig—their reviews, statistics, musical and dramatic intelligence, architectural notices, scientific discussions, biographies, communications from remote lands, even religious and doctrinal dissertations—must be immense. And these admirable journals appear weekly, and reach to an incredible circulation. Their cheapness, too, might well abash an American journalist. The pictorial part is fine, clear and characteristic, the editorial management is intrusted often to an association of scholars, and the mechanical execution as near perfection as possible. Of the generality of Prussian dailies, the latter can surely not be predicated; but to the purely literary periodicals little can be added in point of elegant typography and copiousness and versatility of contents. The religious publications are the opposite of ours. Instead of the charming eclectic manner of their English and transatlantic brethren, the gleamings of white fields all over the world, the brief and pungent editorials, the delicate scrap from the portfolios of the clerical dilettanti, these weekly reviews rush headlong into "Dogmatik and Polemik," quarrel over Arabic and Sanscrit, wrangle about ecclesiastical law, descend into bottomless depths of metaphysics, and finally send forth the light and digestible result to the boudoirs and working rooms of the land! Poor Spinoza is pulled out of his grave quite frequently, and glimmers with his ghostly pantheism on the margin of many an article.

Compte is gored through and through by his wrathful antagonists in the lapse of a few victorious sentences. Voltaire is scourged with a few strokes of the pen, and even, perhaps, the dreamy sensualism of Madame Guyon. In short, instead of a living and luminous study of the age, its wants, its impossible yearnings, its religious manifestations, its spiritual troubles, its means of reclaim and regeneration, the corpses of rotten philosophical systems are given us as food; we languish under the tainted dish, and long for one whiff of fragrant air.

When the secular sheets are managed with such skillful adaptation to the tendencies of the times, it is somewhat remarkable to find the ecclesiastical so far behind, so stubbornly opposed to those times. Such publications certainly argue a doctrinal culture on the part of the people which is as certainly not to be found. A professor here and there, a circle of brilliant students, a country pastor deep in the secrets of the schoolmen, and the fathers would, perhaps, find delightful morsels; might pick out the jewels, like the fabulous bird, and fly away with them; but who else?

I hasten to communicate some interesting intelligence from the Holy Land, which, in all probability, may have already reached you. I translate the following announcement from a foreign newspaper:

An archeological monument of great importance has just been discovered by M. Charles Clermont Ganneau, dragoman chancellor of the French consulate at Jerusalem. It is a slab of basalt found to the east of the Dead sea, in the territory of the ancient Moabites. On this slab is engraved an inscription of thirty-four lines in Phœnician characters, beginning with the words: "I, Mesa, son of Chamos." Now Mesa was a king of Moab, mentioned in the Bible, and contemporaneous with the Prophet Elisha, with Josaphat, King of Judea, Ahab, Jehoram, Ahazias, kings of Israel. The third chapter of the second book of Kings gives a detailed account of the concert, undertaken in concert with Jehoram and Jehoshaphat against Mesa, King of Moab.

The Moabite slab equally recounts the struggle against the King of Israel, and enumerates the cities built and temples constructed by Mesa, and consecrated to the national gods of the Moabites at Chamos. The age of this monument is determined materially by the synchronism which it offers with Jewish history. It ascends nine centuries before Christ, and posterior about a hundred years to the reign of Solomon. It is anterior—almost two centuries to the celebrated sarcophagus of Echomonnazar, King of Sidon.

The Phœnician characters with which the inscription is written present an archaic aspect which we do not find in the same degree in any of the Phœnician monuments hitherto known. They have, meanwhile, been deciphered with almost absolute certainty, because all the words are separated by points, and all the phrases divided by vertical bars. The language is, save some slight differences of an orthographic kind, in pure Hebrew, and you would imagine in reading this text that you were reading a page from the Bible. The sections by verses and the parallelism of expression complete the illusion.

The Moabites appertained in other respects, as we know, to the same race as the Hebrews. This precious text, which permits us to authenticate the value of the historical recitals of the Bible by a document contemporaneous with the events, and which will bring to etymology, mythology, geography, linguistics and paleography, the richest contributions, has just been sent to the Academy of Inscriptions by M. Clermont Ganneau, with a dissertation which will be immediately published.

An English bishop writes from Jerusalem, under date of March 2, as to the scarcity of water existing there, as follows: "On the twenty-second our hopes revived; black clouds were rising, and the barometer falling; but not a drop of rain fell, and ever since the weather has been intensely hot, the air so filled

with dust as to render the mountains of Moab invisible. The cisterns are now empty. Birayeb, in the valley of Hinnom, and Kedron's Brook, have been seized by the government for the soldiers.

Water can—still, however, be brought, though we have reason to fear that the authorities are about to lay a tax on all water brought into the city.

It is pitiful to hear the cries and sobs of the poor destitute children, especially the emaciated Jews. Provisions are eight times dearer than a few years ago, and for the first time people are murmuring against travelers coming to Jerusalem, as they say, to drink up what little water there is." DALMEISCH.

MINISTERIAL SUPPORT.

MR. EDITOR: Having read the editorial remarks of the Baltimore and New Orleans Advocates on the subject of ministerial support, and the probability that it will come up as a question before the General Conference at its approaching session at Memphis, I desire to give a thought or two on the subject. The remarks of the Advocates named do not, certainly, hold up the churches, in a very complimentary light; and, to my view, there being two sides to this subject—as is the case with almost all subjects—I am anxious that both sides should be considered before a verdict is rendered.

I am quite free to admit that there is too much truth in all that you and our Baltimore friends say on the subject; but you seem to adopt the theory or supposition that the ministry perform their whole duty faithfully, and that the faithful laborer is denied a support by his flock. In this, I think, is your great and vital mistake. St. Paul said to the church: "Ye are God's building," "ye are God's husbandry." I do not pretend to know much about husbandry, but having had some experience about building, I can speak as to that. St. Paul called himself "a master builder," and of course all ministers of Christ are the same. Experience has taught me that a master builder often has but little choice as to the material he has to use, but is forced to work up such as comes to hand. And so it is with God's building. In skillful hands, however, I have often seen inferior material used to good purpose, and in unskillful hands I have seen good material utterly ruined. Now I am unable to carry out the comparison; for as I, as a master builder, would dismiss a workman for such delinquency, God bears with them, affording them time and opportunity for improvement. But it seems that God bears with them only in order to success. It requires energy, watchfulness, industry and close application for success in anything; and even with all these virtues the builder often fails. Yes, this is a world of failures. Men of all professions and all pursuits fail. Farmers fail, mechanics fail, lawyers fail, doctors fail, merchants fail, bankers fail, and even editors sometimes fail. Fail in what? Fail to make fortunes!—nay, fail to make even comfortable supports. All this being true, why should it be thought strange if ministers should sometimes fail in this regard?

My observation has been that ministers who have been faithful in their labors have succeeded as well, if not better than any other class of men; and it is my judgment that those who fail in obtaining a support in the ministry would fail, virtually fail, at making a support in any pursuit or calling whatever. I have known men—and so have you—to quit the ministry and engage in secular pursuits and become hopelessly bankrupt, and then return to the ministry again. The trouble is not a want of disposition on the part of the church to support the ministry, but a want of disposition on the part of the ministry to do their duty faithfully. "That's what's the matter." Why is it that some ministers seldom or never fail to receive their support? I could name many such, and can hardly omit the name of one who was sent last year on a circuit in this district which had become notorious as a "Post

Oak circuit." He could not get a house for his family on his work, and had to leave them in another county; and when it was suggested to him by a good sister that his support was doubtful, he replied: "I am not the least troubled about that, and shall not be if I do my duty faithfully." He called a steward's meeting, which thought they could raise \$700, all told. But, notwithstanding such gloomy prospects and hardships, he went to work, and did work, and had a glorious revival throughout his field of labor; and at the end of the year it was found that he had received \$1,200 in cash, and over \$300 in presents. I could record many other similar instances to the honor of the church and the ministry, which have come under my observation, but my time and your space will not allow of it. And why is it that others seldom or never succeed in getting a support? To answer this question square up is not so pleasant; and I would gladly be excused from doing so; but as you and our Baltimore friend will probably bring this subject before the General Conference, and some facts may be of service which seem not to have occurred to you, I must discharge the duty. The first reason is, the entire neglect on their part of pastoral work. Would you believe it, that in this district there are Methodist families whose door sills have not been crossed twice in fifteen to twenty years by a Methodist preacher; and that there are cases where preachers have remained on a circuit for two years, and some of their charge never laid eyes on them (age and physical debility having prevented them from attending church), while the said Methodist preachers have been notorious for willing away their time in the most pleasant company they can find, whether religious or not, and engaging in conversation and indulging in anecdotes that caused even worldly people to shake their heads in disgust. I have known such cases, and have known them to be followed by a great cry because the preacher was not bound fully supported by his neglected flock, to say nothing about their plight when they got into the pulpit to minister in holy things. And I see hints thrown out in high places that young men of "education" will not waste their attainments and talents on "such a church;" that they take business-like views of this subject. That may or may not be all right. They and the Judge of all the earth must settle that. But the church takes a business-like view of this subject too. I heard it remarked in a church meeting last year, when it was asked what the church proposed to do for the preacher the next year, and by a brother whose head showed age, "that will depend upon what we get."

But, perhaps, I have said enough, and will close by suggesting some questions proper to be propounded by the Bishop to each preacher at every Annual Conference, upon the examination of character, to wit: 1. How often have you visited each family of your charge during the past year? 2. How many families of irreligious persons have you visited with a view to bringing them to Christ? 3. How many members of your charge have you failed to see during the same time? And let satisfactory answers be required of the preacher himself, and not permit the thing to be blurred over and fixed up by the presiding elders.

And now, if what I have said should cause any one to undertake to give me a frazzling out, I bespeak the Baltimore Advocate and yourself, Mr. Editor, to defend me, as I am done.

MISSISSIPPI, April 13, 1870.

HE THAT unduly fears man cannot truly fear God; and he that lives much in the fear of God will not regard over-much what man can do unto him; the want of faith is the root of all such fear, which becomes less and less as faith gathers strength and increases in the soul.—Ambrose Serle.

SLOTH makes all things difficult, but industry all easy; he that rises late must trot all day, and cannot scarce overtake his business at night; while laziness travels so slowly that poverty soon overtakes him.—Franklin.

The Christian Advocate.

SATURDAY, APRIL 30, 1870.

TEN YEARS IN ROME.—NO. IV.
THE INQUISITION.

Many persons perusing the recent *Annals of the Inquisition* (which have been passed in the Ecclesiastical Council now sitting, and only await the Pope's signature,) have probably failed to see the full significance of Canon VI and Canon XII. These canons are as follows:

"Whereas, says the authority, which the Catholic Church possesses and condemns all religious sects separated from its communion is not prescribed by divine right; or that about religious truths only opinions, not certainties, can exist, and that therefore all religious sects are to be tolerated, let him be anathema."

"Whereas, says the authority, our Saviour and Sovereign, has conferred upon the church the power to direct only by advice and persuasion those who turn aside, not to compel them by orders, by coercion, and by external restraints and statutory punishments, let him be anathema."

Here is not only an approbation of all the means of repression which Rome has resorted to in the past, but the re-establishment of the system upon entirely new authority. Up to the present time the punitive discipline of the church has been tacitly received and acted upon, as the tenet of infallibility has. But henceforth, upon the pontifical ratification of these canons, the Index and the Inquisition become articles of faith. Henceforth Romanists must believe, under pain of damnation, that it is right to punish with torture and death those who dissent from papal teachings. The church has never relinquished her authority over all persons in all places. Repression goes hand in hand with conversion. Three millions of books and pamphlets stand on the lists of the Index Prohibitory and Excommunicatory. The Inquisition is an organized institution, whose chief is the Pope. He is represented by a prefect recently appointed, Cardinal de Luca, vice president of the council. He has a staff of seventeen ecclesiastics with official residences and archives.

I suppose every man has a forte in reading. Don Quixote loved romances; Tennyson chooses the Arthurian legends. For my own part, records of the past history of the church have a peculiar charm. From the Catacombs to the Crusades, through her vicissitudes of sorrow, triumph, crime, and holiness, there is not a scene but is full of instruction. With much leisure, and one of the finest libraries of the world at command, I indulged my taste fully. Every sincere Romanist hates a heretic as a personal enemy. To meet the records of the Inquisition had the zest of a novel of the sensation type. The documents from which transcripts and translations are made in this article passed into my hands as custodian of the library where they are deposited. I transcribed them because I felt interested in their contents. Let me preface them with one or two observations. The canons cited above, making the Inquisition a newly organized institution, are confirmations of the decree of the Fifth Council of Lateran, A. D. 1515, which was subsequently approved by the Council of Trent. Canon XII conforms all previous regulations on the subject, and puts the doctrine on an entirely new basis. Henceforth it will supplant the decrees of the Fifth Lateran Council as the fundamental authority for all such coercive measures as the Roman clergy can venture on in countries where they have any degree of power.

The conduct of inquisitors is regulated by the "Sextus Decretum Liber," containing the bull of Clement the Fourth, *De Hereticis*, a very vindictive filiation against all disbelievers in Rome. The "Sext Decretum" with the "Clementines" and "Extravagantes" comprise the body of canon law binding all ecclesiastics.

In the library of the Index, under the head of "Records," there exists a remnant of the archives of the Inquisition. The main bulk of the memorials, however, have been destroyed from fear of their falling into unfriendly hands. A notable volume, well preserved, is bound in black, with a red cross on the cover, and thus inscribed:

FRATRES SACRE ROMANE INQUISITIONIS.

From its appearance, it has been well used. The late Cardinal Mai informed me that its date was 1520 to 1540. It was the basis of the famous Spanish Cartilla, used by the Dominicans. In the inside of the cover is the word "Secreto." It is divided into two parts. The first treats of the mode of arresting and hunting out persons suspected of heretical pravity. The second prescribes the mode of questioning the accused, applying torture, and conducting executions and abjurations. The following is extracted from the

chapter entitled "Audience of Torture."

The criminal being brought into the audience, all the inquisitors and the ordinary being present, he shall be told that it is agreed for the sake of truth to question him, and his answers shall be carefully noted.

He shall be told that he already knows that often and at various times he has been admonished to tell the entire truth concerning all that he has done, or said, or seen other persons do, or heard them say, in offense against God, and against our Holy Mother the Roman Catholic Church, especially concerning that which is laid to his charge—which he has not chosen to do. It is evident after examination that he keeps back and hides many things, especially such and such (declaring to him wherein he is deficient, and why he is put to the torture, whether it be for things that he has done or said, or for his intention to do such things, or in case that he denies this, or for concealing (as complices.) And for greater justification it has been commanded to bring him to this audience, in order to admonish him again, as now he is admonished in the name of the Lord our God, and of his glorious and blessed Mother, the Virgin Mary, to tell and entirely confess the truth concerning that which is known from witnesses, and all besides that he has done, heard or seen other persons do or say, in offense of our Holy Catholic faith, without hiding anything that relates to himself or them, and not bring false witness either against himself or any other, because by this confession he will acquit his conscience as a faithful Christian, and there shall be used with him that mercy which may have place where justice shall not be done.

The criminal shall answer as he chooses. If negative, let him be told that his process has been seen by competent judges, who declared that he must be put to the torture that he might tell the whole truth.

If the torment is given him in *caput alienum* (on account of another) the monition only is made to him, giving him to understand how from his process it results that he knows of other persons, etc., and that he keeps it back and hides it; and it must not be said to him that he should speak of himself, neither in the monition nor in the discourse of torment, because he is held to be convicted, and in questioning him against himself there might arise a doubt of this if he cleared himself of any indications. (If, when this is said, he confesses anything, he must ratify it after twenty-four hours, as if he had said it in the torment.)

The scene of the following needs description. I saw it four years ago. It is an underground hall, divided into two aisles by six massive stone pillars, three in a row. At the upper end was a dais and a chair of state, decorated with red velvet and the arms of the cardinal prefect. On a table below the dais were laid the "Compendium" and other documents, also a crucifix and holy water. Round it sat four friars, Dominicans, masked frequently, and at a little side table sat the fiscal, attended by a sergeant-at-arms. A curtain hung along the first row of pillars, screening off the rest of the hall. Behind it was the torture chamber. Nothing remains in this hall at present but staples fixed into the wall to which the prisoner was fastened, eight similar ones in the roof to which the pulleys were attached, and the chain that held the prisoner condemned to death by flagellation. When the prisoner was sentenced to the torture the curtain was drawn back, and the executioner stepped forward. The cry of the "Ordo" before me tells the rest:

CHRISTI NOMINE INVOCO.
Pater Noster. Ave Maria.

We pronounce, after considering the acts and merits of the said process, the indications and suspicions that result from it against the said —, that we ought to condemn him, and we do condemn him to be put to the question of torment (declare whether it is to be by pulleys, or by water and cords, etc.) in which we command that he be and remain for so long a time as may appear well to us, that in it he may tell the truth concerning what is witnessed and laid in charge against him; with a protestation which we make, that if, in the said torment, he should die or be wounded, or if there be any effusion of blood or mutilation of member, the blame and charge must be his, not ours, because he would not tell the truth. And by this our sentence we do pronounce and command in these writings and by them.

(Signature of judge.)

Then the prisoner shall be taken to the chamber of torture, whither the inquisitors shall also go.

When there, he was admonished to tell the truth, and not let himself be brought into so great trouble. He said, etc. He was told to tell the truth, or

the executioner of justice would be called in.

He said, etc.

The executioner of justice was called in, and his oath was taken that he would do his business well and faithfully, and that he would keep the secret; all which he promised.

He was told to tell the truth, or orders would be given to strip him. He said, etc. He was stripped.

He was then examined by the doctor and surgeon, who said that they saw no reason why he should not be put to the torture.

He was told to tell the truth, or he would be commanded to mount the rack.

He said, etc. He was put on the rack.

He was told to tell the truth, or his body would be bound.

He said, etc. He was ordered to be bound.

He was told to tell the truth, or if not, they would command his right foot to be made fast for the torture *ultima condorsio* (an extreme tightening of the cords.)

He said, etc. They commanded it to be made fast.

He was told to tell the truth, or they would command his left foot to be fastened in like manner.

He said, etc. It was ordered to be done.

He was told to tell the truth, or they would order the binding of the right arm to be stretched.

He said, etc. It was commanded to be done.

And the same with the left arm. It was executed.

He was told to tell the truth, or they would order the fleshy part of his arms and thighs to be made fast for the *fimbria strictio* (compression with fine cords that cut into the flesh.)

He said, etc. It was done.

And the inquisitor shall urge the criminal to tell the truth, and not let himself be brought to so great torment; and the physician and surgeon were called in, who certified as to what class he might be placed in.

He was ordered to tell the truth, or they would order the first turn of the wheel.

He said, etc. It was ordered to be done.

He was ordered to tell the truth, or a lighted match would be applied to the soles of his feet.

He said, etc. It was done for ten minutes.

He was told to tell the truth, or they would order the second turn of the wheel.

He said, etc. It was commanded to be done.

He was told to tell the truth, or they would order the third turn of the wheel.

He said, etc. It was done.

This generally suffices for Class I and women.

Under the head of "Particular Directions" we find the following:

When the physician is called in he shall certify if the criminal is liable to die under the torture by reason of heart disease, etc., or is liable to epilepsy, or other fits, or is of weak constitution; or, if it be a woman, whether she be a virgin or pregnant; and, if the latter, whether premature delivery would result from the torture of the rack.

I omit two sentences here of the most revolting character, showing how women in this condition may be tortured without great risk. The work in question is supposed to be in the handwriting of Cardinal Caffra, and some idea of its nature may be gathered from his instructions to inquisitors respecting nuns suspected of heretical pravity: "*Ad domos religiosarum veniens, fecit e primis manibus carundem, ut sic physice si esset inter corruptela, eriperetur.*" A woman's hair was shaven before torture, and an additional ingenuity seems to have framed particular tortures for her which could not be inflicted on a man. This class of persons formed Class I. Class II were more robust, and able to endure anything.

In addition to the rack, there are directions for the *beretta*, or iron cap. This was a supplementary punishment to the rack. It consisted of a basin-shaped cap of iron, fastened by two bolts behind. It was heated, but not to burning heat, and the head of the victim was forced into it. It generally produced idiosyncrasy and blindness. The tortments *ad arbitrium* were used simultaneously with the rack, pulleys, etc. Some of them recall the days of Pagan Rome. Thus:

A woman might have her nipples burned off, but singly. The nails might be pulled out, but no more than three at once. Sharp nails might be placed between the toes, and the foot compressed. The same with the hand. The beard might be eradicated with forceps, etc. The "bed of anguish," fittingly so called, might be used for virgins and youths under nineteen. It consisted of two boards thickly studded with short, sharp iron points. The victim being stripped, was placed on one, and the other was laid upon him and pressed down by iron weights. A foot-note says: "This may be continued for twenty hours if water be thrown over the criminal."

The time during which the torture continued was not to be "inserted in the sentences, nor yet voted, but put in the ordinary form, *ad arbitrium.*" If the criminal died while actually under torture, the inquisitors were severely to absolve each other. If a woman went into convulsions during torture, she was to be restored to consciousness ere the torture continued.—*The Galaxy.*

Whisky.—Wholesale and Retail.

Mr. Editor: In your last issue there is a communication by J. Pipes, in which he suggests that

"when you get to General Conference, look on page 126 of the Discipline, and add, as a further sample of imprudent conduct, drinking intoxicating liquors as a beverage, that the church may know how to deal with habitual tipplers;" or, as you have it, "habitual tippling." If you do so, would it not be well to say simply "tippling," so that we may deal with all tippling?

If you look on page 34 you will see that "drinking intoxicating liquors as a beverage" is strongly forbidden, and with sufficient clearness, in the rule, "Drunkennes, or drinking spirituous liquors unless in cases of necessity." Does not the church know how to "deal with habitual tipplers" or "tippling" under that rule? But make another, if you think two will have more force than one, when both are to the same effect—anything to force whisky out of the church. He has been one of us long enough. Allow me to suggest that you add, instead of the clause suggested by J. Pipes, in that place, the *new rule*, immediately after the rule cited above: "The buying or selling spirituous liquors, either as wholesale or retail liquor dealers, or in any case, except as a druggist, and on a certificate from a physician." That would reach many a cold Christian (?) who makes whisky-selling respectable by his connection with the church. Men die by the hundred thousand annually, and entail untold misery upon millions, thus inflicting a universal wound upon the human family, all from "habitual tippling." So is the deleterious effect of this evil felt all over the "whole world." Can a church member be consistently allowed to aid in this work of destruction by selling whisky? See the inconsistency! "Messrs. A. and B., members of Christ's body, wholesale and retail dealers in wines and liquors, have just received a fine stock of whisky, brandy, etc., all which they propose to sell at greatly reduced prices, that the poor as well as the rich may 'drink and be healed.'" "Spirituous liquors" are a curse to humanity. And as it is the professed mission of the church to ameliorate the sufferings of this life, as well as to save eternally, can she be too explicit in her formal censure and prohibition of all dealing with such "liquors," whether to buy, sell or drink? Let us say, "Hands off!"

Among the names of the earnest opponents of papal infallibility within the Roman Catholic Church is the revered name of John H. Newman.

He is justly recognized as the first Roman Catholic theologian in English-speaking countries, and alone more than outweighs all the Anglican champions of the new papal doctrine taken together. Thus the master minds of the Catholic world agree in rejecting this new doctrine which is now to be imposed upon their church. Though some, perhaps most of them, may finally accept the unwelcome accomplished fact, their earnest opposition will not remain without good fruit.

Never quit your hopes. Hope is often better than enjoyment. It is certainly a very pleasant and healthy passion. A hopeless person is deserted by himself, and he who forsakes himself is soon forsaken by his friends and fortune.—*Berkeley.*

There more we fear crosses, the more reason have we to think that we need them. We ought to judge of the violence of our disease by the violence of the remedies which our Spiritual Physician prescribes for us. *Fenelon.*

Eighty-five Bible depots are already established in Spain. Torquemada once said: "If the heretic Bible is widely circulated, religion (i. e., popery) is lost."

In many cases it is very hard to fix the bounds of good and evil, because these part, as day and night, which are separated by twilight.—*Whitcomb.*

The Farm and Garden.

Application of Manure to the Surface.

There is a strong prejudice in the minds of farmers against applying manure to the surface for growing crops. Most of these have never taken a true philosophical view of the matter, nor experimented to obtain the evidence of facts. They have a theory, and on that they ground their faith: it is this: That being exposed to the action of the sun, the ammonia and other manurial salts are evaporated, absorbed by the atmosphere and float off into space. Now, take the animal droppings of a horse, cow, sheep or pig, let them dry in the sun and open air, break or pulverize the mass and apply it to a crop of grain, grass or other plant, on the surface. Then take double or triple the quantity of common barn-yard manure and turn it under four, five or six inches, so as to completely cover it, on an adjoining piece of land, and see which will produce the best result. Has not every farmer observed that the scrapings of his barn yard are worth double, bulk for bulk, of any other part of his manure heap? Has he not observed that the scrapings of his cow yard, where the cows are milked, are worth double the same bulk taken from the manure heap? Have not these scrapings been exposed to the sun long enough, according to the above theory, to have all their manurial qualities absorbed and carried off?

Talk of plowing manure under the same day that it is taken from the manure heap to prevent its exposure to the sun and atmosphere! Go on to a piece of fallow ground after this great engineering feat of plowing under has been performed and what do you see? Do you not see about one-half of it lying between the ridges of the furrows and not covered at all? Yet the farmer is satisfied that he has plowed down his manure all right. The partridge, when it can hide its head, is satisfied that the body is safe. Plants have different classes of roots, and each class has its specific purpose. One class penetrates deep into the soil or subsoil; they hold the plant in position and extract moisture from the subsoil, etc., but the roots that mainly feed the plant are near the surface; through these roots come the food that makes the growth, the bloom and the fruit.

Whatever is derived from the manure is absorbed by them. When the manure is applied to the surface it acts as a mulch; protects those roots from the extreme heat of the sun's rays; keeps the soil moist and encourages them near the surface, where they are fed by the juices of the manure washed in by rains, as well as from the manurial salts absorbed from the atmosphere.

If the manure is placed below this class of roots they cannot derive much benefit from it, because the rains carry the juices still farther down, quite beyond their natural position.

The theory of the sun setting free the ammonia, etc., is all bosh, as has been proved by experience. The surface soil, protected by the manure and kept in a friable state, absorbs far more from the atmosphere than the sun sets free. The food is placed to the months of the feeders in a state fitted to be taken up to feed the plant.

It has been proved over and over again that the body growth, and fruit of a tree or plant is principally derived from the atmosphere and not from the earth, however rich that earth may be. A quantity of earth has been dried in an oven until there was no moisture in it—then placed in a box and a small tree planted in it. After the tree had grown to considerable size and weight, it was taken out and the earth subjected to the same drying process until all the moisture was evaporated. It was then found to weigh about the same, as near as could be ascertained, as when the tree was planted in it, although the tree had gained many pounds in weight. Where did this additional weight of the tree come from? If not from the atmosphere, where else? Any one who doubts can try this experiment. Place the manure on the surface of well prepared soil, and the soil through it will absorb plant food from the atmosphere.—*American Stock Journal.*

THE GERMINATION OF SEED.—There are, doubtless, one million of dollars lost annually, on the American continent, by depositing seed so deep in the earth as to render their germination difficult; and, in many instances, enfeebling the life of the plant after germination, so as to make the yield unprofitable. The seed of wheat or Indian corn deposited at a depth of ten inches under the surface will not sprout at all—being below the influence of surface agitations, such as sun rays, showers, etc.; at seven inches some, probably ten per cent., of corn or wheat will force out, but will be so enfeebled as not to mature seed—as, from actual experiment, corn planted seven inches deep required twenty-one days to come up and

was so enfeebled that it grew to the height of three feet and died prematurely, not maturing a grain. A like experiment with wheat gave a few very imperfect seeds. At four inches the vitality of the plants seemed proportionately checked, the germination being effected in sixteen days. The same grain, corn or wheat, planted at a depth of three-fourths of an inch, or one inch, would germinate in eight days in a moderately cool soil, or in six days as the sun rays become warmer.

The natural function of the seed in germination is to support the body of the plant till it becomes sufficiently stout to throw out surface feeders sufficient for after support, when the powers of the germ are exhausted, which are wholly exhausted in germination when the seeds are so deeply deposited as to make the germination very difficult—lessening the support of the plant at a very critical period of its existence.

Counting the loss of seed that never germinate at all, and the proportionate loss by being too deeply planted, and one can very readily see the loss by neglect or carelessness of deep planting has not been over-estimated. Doubtless many planters, who have made extra efforts for a crop and had almost an entire failure, could, by experiment, ascertain the prime cause.

NEWS FROM THE CHURCHES.

CAHARA CT., MOBILE CONFERENCE, April 8, 1870.

Mr. Editor: We arrived, on the eighteenth of last January, at the field of labor assigned us by the Conference. Though we have had much inclement weather this spring we have been able to go forth in the discharge of our duties. One gloomy day on our way to one of our appointments, as we dismounted to lead up the mountain, we picked up a piece of poetry that almost seemed to have been handed to us by an encouraging angel:

"Go forth, though weary and wan with care;
There is no field so lonely and bare
But you may gather sweet flowers there."

This being a new circuit, we soon found that the harvest was truly great, and the laborers few; not even those great helps that older circuits have—church papers, Sabbath schools, etc. But we found the members of the church and church attendants anxious for the prosperity of Zion. And we have succeeded in getting some subscribers for the Advocate, and have organized Sabbath schools at every appointment, and have made arrangements to furnish them with all the books, etc., necessary for the present. Our first Quarterly Conference was held March 26 and 27, notwithstanding the inclement weather. Brother J. M. Boland, our self-sacrificing presiding elder, arrived in time to fill his appointment. We are looking hopefully for the fulfillment of the prediction made by Brother R. at the last session of our Conference. Pray for us, etc.

THE PASTOR.

A Boy's BELIEF.—"I was once called," said Dr. Macleod, "to the city of Glasgow to see a boy who was attended by a relative of mine—my brother. That boy was very weak, and in great distress. I never, in the whole course of my ministry, saw a boy who bore all his pains with such marvelous meekness, and such bright cheerfulness. He was the sunbeam of the house. I never knew any one endure such agony for three years. I was amazed at him; and feeling I was to be taught and not to teach, I bent over that boy and said: 'I feel deeply for you; I feel deeply for your sufferings.' He looked up with his pale, smiling face, and said: 'Sir, I am strong in him.' Not another word did I ever hear that boy utter. He went to his God next morning. But I know few things which took such possession of my heart, and few things of that kind have influenced me more in times of difficulty and times of trial than these words uttered by a boy who was feeble, but at the same time stronger than all the navies of Great Britain, and all her armies—'I am strong in him.'"

ONE HOUR of solitude passed in sincere and earnest prayer, or the conflict with and conquest over a single passion or bosom sin, will teach us more of thought, will more effectually awaken the faculty, and form the habit of reflection, than a year's study in the schools without them. *Coleridge.*

HE WHO PRAYS as he ought will endeavor to live as he prays. He that can live in sin, and abide in the ordinary duties of prayer, never prays as he ought. A truly gracious praying frame is utterly inconsistent with the love of any sin.—*Owen.*

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, APRIL 30, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—Rev. J. C. KEENER, 112 Camp Street, New Orleans, La.
AGENTS—All the members of the patronizing Conference.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, Register the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

A GOOD AGENT.

One of the most prominent members of the Mississippi Conference, and a member of the General Conference, writes under date of the twenty-fifth: "This makes \$100 50 sent you since our Conference. Will you allow me to suggest that as a premium you send the Advocate to a very poor old brother in my charge?" Let our young men take a lesson if they wish to know how to get to General Conference—attend to all the work of a Methodist preacher. We doubt if any other Advocate can show as much from any agent who is also a delegate. It should be no matter of surprise if, with such friends, the New Orleans one day stands side by side with the Nashville, Southern or any other of our first rate Advocates.

Texas Educational Convention.

The delegates, lay and clerical, to the General Conference from the Texas, East Texas, Trinity, North-west Texas and West Texas Conferences, were appointed by their several Annual Conferences commissioners to meet at Galveston on the twentieth of April, and to consider and arrange for the endowment and the location of a Southern Methodist University in Texas. They accordingly met and agreed upon raising the sum of \$500,000, \$100,000 of which is to be appropriated to building, and the rest to the purposes of endowment.

They did not locate the university, but determined that so soon as \$100,000 of the endowment fund and \$50,000 for building shall have been raised, the location shall be made. The convention appointed one minister and one layman from each of the Texas Conferences, who shall fix the location of the university so soon as the conditions are realized.

The convention, after electing a board of trustees, adjourned to meet at Memphis, during the General Conference.

THE "MOLLIE ABLE."—General Conference.—This noble steamer agrees to take the delegates to General Conference at half price. The steamers generally upon the Mississippi and the Western waters are, we notice, as ready to extend facilities of this kind to the public as are the railroad companies.

The way to fame is like the way to heaven, through much tribulation. Sime.

IMITATION is the sincerest of flattery.—Colton.

THE SABBATH SCHOOL.

The presence in the city of Drs. Kavanaugh and R. Alexander, of Texas; of Revs. R. S. Trippett, N. A. Cravens and J. T. Daves, of Louisiana; of Rev. J. J. Grace, of Alabama; of Rev. R. Lane, of Trinity; and Rev. Dr. Marshall, of Mississippi, gives indication that the Sunday School Union of New Orleans, will be a time of no ordinary interest. The children are getting ready to give the audience on Sabbath a rich treat. We much regret the probability of not being able to be present to enjoy it.

The Sabbath school department of Methodism is exciting an unusual interest in our church just now, and questions in connection with it of great moment are coming up in a concrete form. This we do not regret. In two cities, one in Alabama and one in Missouri, there have developed strongly conflicting opinions between the preacher in charge and the Sabbath school managers. It seems somewhat late in the day for the General Conference to be called upon to determine the organic place of the Sabbath school in our church—to whom it is properly responsible; who has the right to appoint the superintendent, and who to select the teachers. But so it is. The missionary society and the Sabbath school both sprang up collaterally, rather than directly out of our societies, and have, therefore, had a government each of its own, along with an official church relation. Of late the missionary society has become fully incorporated into the church, but the Sabbath school still occupies a quasi independent position. The Discipline constitutes the superintendent a member of the Quarterly Conference, but fails to define how he shall be elected; the still more important matter of who shall select teachers it leaves undetermined. How much is left for the preacher to determine is clearly stated in that part of the Discipline which treats of the pastor's duty; as, "What is the written report of 'the pastoral instruction of children?'" Section 4, chapter 2. It is made the duty of the presiding elder "to inquire at each Quarterly Conference whether the rules respecting the instruction of children have been faithfully observed."—Section 6, chapter 2. A preacher in being received into the Annual Conference is pointedly asked, "Will you diligently instruct the children in every place?"—Section 8, chapter 2. It is made the especial duty of preachers in charge "to see that Sunday schools are found in all our congregations;" "to engage the co-operation of as many of our members as they can; to visit the schools, to preach every six months on the subject, to form Bible classes, and to appoint suitable leaders thereof."—Section 4, chapter 3. In the ordination of a deacon it is specially charged upon the person to be ordained by the Bishop, "to instruct the youth." So that the Discipline would seem to place the matter largely, if not wholly, in the hands of the preacher in charge. Indeed it must of necessity remain there in many parts of the work, or else be unattended to.

In chapter 3, section 3, we suppose that we have an incomplete statement of the opinion of the last General Conference, that the Quarterly Conference should control, as far as possible, all Sunday schools that are in full operation: "Each Quarterly Conference shall be deemed a board of managers, having supervision of all the Sunday schools and Sunday school societies within its limits." Why "deemed" so? Why not, "shall be" a board of managers, etc.? "Having supervision"—why not say squarely, having control of all Sunday schools, etc.? Evidently the law makers were not fully persuaded in their own minds what it was they wished to have done. The Louisiana Conference has sent up a resolution on this subject, asking the General Conference "to so modify the laws pertaining to Sunday schools that the superintendent shall be nominated by the preacher in charge, and be elected or rejected, as the

case may be, by their respective Quarterly Conferences." Doubtless the same general suggestion will be presented from many sources.

The school and the class room are important aids to the pastorate, if not parts of it. Analogy would seem to indicate that the superintendent should be appointed in the same way that stewards, class leaders and trustees are. The Discipline very properly makes a distinction, however, between the term of the office of the steward and that of the class leader. The former is not removable at the will of the preacher, but at the will of the Quarterly Conference; the latter may be displaced at any time by the preacher without the concurrence of the Conference; nor is a confirmation of the appointment necessary to constitute the class leader. Probably if the term of the office of the superintendent was fixed, and if the nomination and election was made annual, it would satisfy the present conditions of the problem. Now as to changing a superintendent who might be inefficient, or for other good causes, it might be done upon motion of the preacher in charge, by the vote of the Quarterly Conference.

The appointment of teachers is a much more difficult matter to determine—how far it shall be in the hands of the superintendent to select his own teachers, and what check, if any, shall be placed upon his selection. A workman should, as a general principle, choose his own tools. Much more should one who is held responsible for the conduct of a school be permitted to surround himself with teachers after his own heart. There may occur instances where very unsuitable persons are employed to teach the children of the church—persons worldly or intellectually incapable, or manifestly having other ends in view than the teaching youth the way to the Saviour, and yet the superintendent may lack either the nerve or the inclination to remove them. What shall be done in that case? Suppose, too, the pastor and everybody else but the superintendent is convinced of the unfitness of such teachers—we put an extreme case. The only way to prevent these difficulties, which is much better than to remedy them, would be to give the superintendent the right to nominate his own teachers, subject to election by the official meeting of the circuit or station, and when there is no regular meeting of the officials, by the society itself.

This constitutes the Sabbath school an organic part of the church, and not an appendix. The art of voting a large body of young people in a teachers' meeting so as to get any desired result, has been learned by most superintendents, where such meetings have the determining voice, and is usually practiced. The machinery is much like that which is inside of Melzel's automaton chess-player; when exhibited it satisfies the audience, but has really nothing to do with the player. This parade of small and large wheels can be substituted, without any serious damage, by a section in the Discipline embodying the above suggestions, or others which the wisdom of the General Conference will doubtless supply.

The most difficult question to settle, if not the most important in connection with the Sabbath school, is how to secure a large attendance of the children at church. After sitting for two hours under a teacher, it is a great strain upon the nerves of a child to sit an additional hour under a preacher. But thousands of children have survived it; thousands may survive it still. The dismissing children to their homes, while father and mother remain at church, is a very questionable policy. It fosters a habit, quickly learned, of not going to church—one that, we fear, more than balances for any good usually derived from Sunday school teaching. Children are accustomed to sit in school, during the week, three hours per day, with but little intermission while learning how to spell, write, and cipher, and might endure somewhat in learning the rudiments of a better knowledge.

But we have extended this article sufficiently, and are glad to know

that the whole theme is about to be subjected to a far more exhaustive analysis.

THE PYRAMIDS AND CHURCH FINANCE.

Here are two problems of difficult solution. We have never met with an estimate of the service one will render to his race who shall solve the wonder of Egypt; but Dr. Chalmers has said that he who discovers how to extract the wealth of the church, and make it available for advancing the kingdom of Christ, "will produce a greater change in the condition of the church and the world than the discovery of the law of gravitation and the application of steam to its manifold uses have produced on the philosophy and physical condition of mankind."

Aristotle said the Pyramids were the work of tyrants; Pliny thinks they were built for ostentation and to divert the public mind; some moderns suppose for astronomical purposes—the sloping entrance, descending at an angle of twenty-six degrees, just suits for observation on the North Star when it passes the meridian below the pole; and some suppose them to be only the tombs of kings. There are three great Pyramids and six small ones near Cairo; then there are ten Pyramids of Sakkarah of medium size. The summit of the second large one is still covered with the highly polished granite which once formed a smooth covering over all the Pyramids. Enveloped in this hard polished casing, which hid the gradation of the blocks of granite, we can imagine the dazzling splendor of their sides at midday, when they cast no shade. In a climate in which there were only two days of rain during the whole of 1869, we can conceive that they become pyramids of fire.

We think that just here is probably the solution of the problem of their object. They stand among sacred avenues and temples, and must have been for religious purposes. In that country where cities were named in honor of the sun, and great temples dedicated to his worship; where, too, the hereditary titles of its monarchs were "offspring of the sun—son of the sun," such a structure would have been the grandest possible offering to their deity. It caught the first beams of his light in the morning; it held the last at its setting; and during the whole day it was all ablaze with his fierce beams reflected from its smooth, mirror-like sides. It was an offering worthy of a king. No wonder that the Pharos, claiming to be the immediate offspring of the monarch of day, should covet such an altar for a sepulcher. It was a perpetual offering which went up from the giver, and even after death from over his body; his works followed him.

When we consider the building of such a structure as Cheops is an act of religious worship, we may well pause to contemplate the grandeur of such devotion. It stands seven hundred and eighty feet high, rising from a base seven hundred and sixty-four feet each way. It required one hundred thousand men for ten years to make the causeway from the Nile to the Pyramid, for the purpose of conveying the stone; and three hundred and sixty thousand men twenty years to build it. It was not the task of a tyrant, but the self-imposed toil of a nation in honor of its deity. Every workman felt that he was contributing somewhat to a great and infinite being, by whose favor he hoped to be happy. The cost, therefore, of this work was carefully noted on its sides—the food consumed and muscle employed.

While we pity the idolatry of ancient Egypt, we cannot but admire so grand an evidence of its religious convictions. The whole nation combined in one stupendous act of worship. The structures which are scattered along the banks of the Nile even in their ruins look down upon us in their unapproachable greatness, not more to convict us of our inferior architectural genius than to demonstrate the comparative narrowness of our gifts and offerings to the one true God. If the

fearful pagan could make so huge a sacrifice as the toil which combined to build Karnak, Luxor and Cheops, shall not the joyland grateful child of God lay upon the altar the whole sum of his labor, his influence and his property? We know no other solution to the financial problem than a truer view of the extent of our obligation to our heavenly Father—that a weighty sense of gratitude should, in the unity of the faith, and of the knowledge of the Son of God, seek to do something, in common with the whole church, worthy of him who, for the salvation of men, delivered up his only Son.

JULIAN L. ANDREWS.

The following private note from Dr. Andrews, of Mobile, we take the liberty of inserting, for the information of the friends of the family, and as a tribute, from one who knew him best, to a dear youth who had already awakened in us a profound interest upon the acquaintance of but a few days. By what a frail tie do we hold to the most precious gifts of our lives! The consolation of the Saviour's presence be with our dear brother and his wife!

MOBILE, April 23, 1870.

MY DEAR FRIEND AND BROTHER: I have just buried my handsome, gifted and noble boy, Julian Leach Andrews, who died on Thursday, the twenty-first, one month lacking one day before his sixteenth birthday. He was all that father, mother, sister, brother and friend could desire in one of his years. The Sunday preceding his death had been fixed upon by him and his faithful Sunday school teacher, James Malone, as the time for his formal admission into the church. Before the day came he was attacked by measles, and laid upon his bed, from which he never rose until carried to his bier, and thence to the grave. When the cold waters of death were first touched, he seemed to be momentarily afraid; but a few minutes of prayer and self-examination restored him to full confidence, and he died a most triumphant death, telling us that our separation was best for a short time, and that we would soon come after him, and be an unbroken family in heaven. My talented and noble son rests in the bosom of God, and I submit to the divine will; but, O, how my heart bleeds for the loss of my child! I love the Lord more than ever before, though I am now so deeply bereaved! When you see your own sons around you, remember and pity and pray for me.

Yours, etc., A. S. ANDREWS.

THE STATE FAIR.—Crowds daily attend this exhibition of the arts and agriculture of the country, now open at the Fair Grounds. We shall notice more particularly hereafter some of the very ingenious contrivances there displayed for saving human muscles. Wherever we see evidences of Southern ingenuity we feel additional hope in the South.

General Conference Delegates.

F. H. Tally, D. E. Goodyear, Thomas Leonard, R. W. Blew, B. F. Smith, J. B. Sharpe, T. D. Eldridge and W. C. Rutland were appointed, with the secretary, Ben. K. Pullen, a committee of reception, and were authorized to appoint sub-committees to facilitate the reception of delegates. Those coming Monday and Tuesday on the through day trains of the Memphis and Louisville, the Memphis and Charleston, and the Mississippi and Tennessee railroads, will be met at the several depots, and from thence be directed to their lodgings. Those arriving by trains before or after Monday and Tuesday, and such as come by steamer, will please report at the Court Street church, where they will be received and their lodgings assigned them.—Memphis Christian Advocate.

A CORRESPONDENT of the Crockett (Texas) Central Journal, who resides in Bryan City, Texas, writes to that sheet as follows:

"I see that you are advertising J. P. Hild's piano in the Journal. When I was in New Orleans, a few weeks since, I called on Mr. Philip Werlein, 80 and 82 Baronne street, and was so much pleased with the piano he had on exhibition that I bought one of the Hild pianos for my daughters. I paid for the same only \$500 in currency. My family and all our friends are much pleased with it. I could sell it to-day for double what I paid for it, but I do not believe I could buy, for double the money I paid for this, a piano that would give equal satisfaction. If mine is a fair specimen of Hild's pianos, you cannot recommend them too highly."

THE SABBATH IN NEW ORLEANS.

MR. EDITOR: I would call the attention of Protestants to the question of Sabbath observance in our city, and urge them to labor to improve matters in this regard. I have been a somewhat careful observer of the moral and social condition of things here for eighteen years past, and am satisfied that the desecration of the Lord's day is one of the greatest hindrances to the progress of Protestant Christianity in this city.

There is a vast population in this city entirely cut off from the domestic and religious privileges of the Sabbath. There are numerous large public markets. In these are some thousands of our fellow-citizens who have no Sabbath repose, no devotion. There are some thousands of licensed retail drinking houses, employing from one to five men. Perhaps there are, at a moderate statement, six or seven thousand men in these houses who have no Sabbath. There are also hundreds of oyster and fruit stands, restaurants and confectioneries, all open on the Sabbath. To this array must be added the museums, theaters, operas, circuses and balls. Then our horse races, our balloon ascensions, our firemen's races and exhibitions of skill are on the Sabbath. The new game of base ball occupies on the Sabbath day, as participants and spectators, several thousand of our youths and young men.

It is patent to all that nothing so strikes and shocks strangers coming to our city from Protestant communities as this general and flagrant desecration of the sanctity of the Lord's day. This Sabbath desecration, we are satisfied, does not benefit any substantial interest. It is a clear mistake to suppose it does. Does any thoughtful man believe that we would consume a dollar's worth less of meat, bread, fruit or groceries if we kept the Lord's day as a day of rest and devotion? Do not the citizens of Sabbath-observing cities live as well and consume as much as we do? We repeat, there is no financial advantage in our present habits. It would not be hard to show that the loss of public health, and as a consequence, of productive labor, not to speak of the cost of crime superinduced by Sabbath desecration, causes a far greater actual loss than all the fancied gain of Sabbath labor and Sabbath traffic. We insist that our reputation for Sabbath desecration does a heavy and damaging financial injury. Many religious and substantial people are restrained from settlement and investment here solely on account of our Sabbath habits. They dread the influence of what appears to them a non-religious and immoral population upon the habits, the happiness and the future destiny of their families.

We institute no comparison between New Orleans and other cities. New Orleans has many noble charities, and always generously responds to every legitimate call of benevolence—has thousands of devout and God-fearing citizens, who delight in the law of the Lord. It is due to this God-fearing minority to say that they are not to blame for the moral odium that attaches to this city for its legalized and irreligious disregard of the day of which Jehovah has said, "Thou shalt remember to keep it holy." But it may be we can, if we will, bestir ourselves to create a public opinion that shall result in a better Sabbath observance.

We would be the last to make the Sabbath a weariness, to mar the happiness of our neighbors. We would not, if we could, arbitrarily force our views upon our fellow-citizens; but we would, by our example, provoke them to love and reverence the Sabbath. We certainly believe the teaching of the Master, that "man was not made for the Sabbath, but the Sabbath was made for man," and its observance, so far from damaging any interest or marring any innocent joy, is in the highest sense promotive of man's material and temporal good. In an active commercial population the Sabbath is almost the only day in

the week that the teachers of religion can hope to reach the public ear; but if the Sabbath is turned into a day of revelry and traffic that hope is cut off, and the masses must live and die without religious instruction, restraint or hope. If then, as Christian men, we wish to do our fellow-citizens religious good, we must make it a leading purpose to secure, by all proper and Christian means, a higher respect for the Lord's day. How shall we do this? First of all, by a more faithful observance of the Sabbath's sanctities and privileges ourselves.

The very fact that we as Protestants are in the minority in this city should make us more prompt and earnest to bear a faithful testimony. If we do nothing more, we can at least vindicate ourselves from the charge of a silent acquiescence in the great moral and social wrong, and through the blessing of God do something by the light of our example. There are some things we can do that we believe will effectually tend toward the promotion of a better Sabbath observance, and at the same time relieve large classes of our fellow-citizens from the burden of unceasing toils and cares, and confer upon them the boon of religious privileges and higher social joys. We can, and we should as Protestant people, whether in or out of the communion of the church, refrain from Sabbath marketing as not necessary to our comfort, and a great wrong to thousands of our fellow-citizens, whose livelihood is secured by the business of the markets. Why can we not here, as in other cities, have our markets on Saturday evening and night? There is no good reason why we should not, but many why we should. We should with equal unanimity, and for the same reasons, refrain from purchasing any supplies from the family groceries, the fruit stands, oyster saloons and confectioneries on the Sabbath day. If Protestants, as a class, would adopt this policy the effect upon public opinion and public practice could not be otherwise than socially and religiously good. All of these classes of Sabbath workers, as physical and intellectual beings, need the repose of the Sabbath, and as moral and immortal beings need the opportunities and benefits of religious instruction and worship. The golden rule requires that we should do unto others as we would have them do unto us.

If society, by its usages, debarred us from the rest and religious observance of the Sabbath, we should complain against it as an act of oppression and wrong. Thousands in our midst, who are debarred from the needful repose and domestic pleasures of the Sabbath, would hail with delight such a change in our usages as would give to them God's gift to a working and weary world.

In behalf of these oppressed classes; in behalf of the thousands of young men thronging to our city in pursuit of business; in behalf of the good name of the place of your residence and the home of your children; in behalf of our common Christianity, and above all, in the great and holy name of God, we earnestly and affectionately appeal to Protestants to lift up a standard for the Sabbath, and resolve to "keep it holy."

THE ATTENTION of our readers is directed to the advertisement of the American Watch Company of Waltham, Massachusetts, in another column.

This company is the oldest and the largest watch manufacturing company in the United States, and their watches are so well known that they need no aid to their merits. The company desire especially to caution the public against buying cheap watches bearing colorable imitations of the trade marks of Waltham watches. On the dial of the watches made by the Waltham Company, the words "American Watch" are plainly marked.

Local dealers are everywhere supplied with these watches, (the company declining to retail under any circumstances,) and as they are sold at moderate profits purchasers are referred to local dealers everywhere.

Modesty is to merit, as shades to grace in a picture, giving it strength and beauty.—Bryce.

BISHOPS' SUPPORT.

We beg leave to call the attention of the preachers and members of the church to this subject once more before the close of the fiscal year, which will be the thirty-first of May.

The salaries of the Bishops should be promptly met.—The receipts, however, up to this date are inadequate to meet the claims. The preachers in the several Annual Conferences will please place in the hands of their respective delegates to the General Conference any amounts they may have, or may be able to collect, for this purpose; or contributions from any persons to meet the deficiency may be sent to me in post office order or in check.

A. H. Revoun, Agent.

KOSKOO.—This medicine is rapidly gaining the confidence of the people, and the numerous testimonials of its virtues, given by practitioners of medicine, leaves no doubt that it is a safe and reliable remedy for impurity of the blood, liver disease, etc.

The last Medical Journal contains an article from Prof. R. S. Newton, M. D., president of the Medical College, city of New York, that speaks in high terms of its curative properties, and gives a special recommendation of Koskoo to the practitioners of medicine. This is, we believe, the first instance where such medicines have been officially indorsed by the faculty of any of the medical colleges, and reflects great credit upon the skill of Dr. Lawrence, its compounder, and also puts "Koskoo" in the van of all other medicines of the present day. *Norfolk Daily Journal, Dec. 11, 1869.*

Married.

On the thirteenth instant, in Jefferson county, Mississippi, at the residence of J. J. Griffing, Esq., by Rev. John G. Jones, Mr. J. B. HANNA to Miss C. ANNA GRIFING.

By Rev. J. Nicholson, on the thirteenth of March, at the residence of Mrs. Elizabeth Gordon, in St. Helena, Mr. N. M. VANSADE, of Tangipahoa parish, Louisiana, to Mrs. ALZADA McDONALD, of St. Helena parish, Louisiana.

By the same, on the fourteenth instant, at the residence of the bride, Mr. J. R. FOREST to Mrs. ZEMILY C. CONANT, all of St. Helena parish, Louisiana.

By Rev. J. D. Hays, on the sixth instant, at the residence of Mr. J. D. Jones, Miss M. R. BENNETT, of Scott county, to W. J. BIZZ, of Smith county.

Obituaries.

CHARLES HAMILL rests from his labors. A patriarch has fallen—rather risen to the home of the good. He sweetly fell asleep at the residence of Dr. J. B. Tullis, in this city, on the twenty-first of February, of paralysis, in the eighty-fifth year of his pilgrimage.

He was born in Belfast, Ireland; emigrated with his father's family to America in his seventh year, and settled in York district, South Carolina, where he was raised to manhood. He embraced Christ and joined the Methodist Church in his sixteenth year. He remained a faithful, laborious member to the day of his death. He afforded material aid to two brothers in entering the ministry—Hugh H. Hamill, of the North Carolina, and Andrew Hamill, of the Georgia Conference. He raised six sons to manhood, five of whom became Methodist preachers. Harvey and Charles were members of the East Texas Conference. He raised three nephews, sons of a deceased brother, two of whom were preachers, viz: J. N. Hamill, of the Trinity Conference, now deceased, and the Rev. Dr. R. G. Hamill, of this city.

Venerable man! His house was a miniature school of the prophets. Of these Methodist preacher sons, six preceded him to the better land; while one, and only one, carries to close up the earthly mission of this remarkable Christian family.

R. S. FINLEY.

JEFFERSON, TEXAS, April 1, 1870.

TYN HENDERSON was born in Giles county, Tennessee, April 13, 1817, and died at his residence, near Meridian, Mississippi, March 11, 1870.

Brother Henderson, with his parents, removed from the State of his birth to Washington county, Alabama; from thence, with his parents, to Lauderdale county, Mississippi, when he was in his twenty-first year. The next year he attended a camp meeting, became concerned about his soul's salvation, sought the Lord, obtained pardon, and joined the Methodist Church, of which he lived a consistent member to the day of his death.

He was a great lover of the church to

which he belonged, thoroughly established in her doctrine and economy, and ready at all times to administer to her wants.

He was confined to the bed of affliction nearly four months. When asked as to the future, he said his affliction was a great blessing; that the Lord was with him to enable him to suffer without murmuring or complaining. He was thoroughly reconciled to the will of God, and bore his illness with great patience. The day previous to his death he wished to know what his physician's opinion was. When informed, without the movement of a muscle or the least excitement—calm as he ever had been—he remarked that he would like to stay with us longer, but if it was God's will, he was ready. The next morning, a few minutes after four o'clock, he bade farewell to family and friends, shaking hands with all. In a few minutes Jesus closed his eyes, and he fell asleep in his arms.

Brother Henderson leaves a large family and many relatives to mourn his loss.

Ms. ANN L. BUTT, relict of Cary Butt, died suddenly, in Mobile, April 9, 1870.

Sister Butt's maiden name was Forsythe. She was born, reared and married in Portsmouth, Virginia. The family moved to Mobile in 1836. Our departed sister professed faith in Christ and united with the church in the years of girlhood, and continued a consistent and worthy member of it to the day of her death.

In 1844 Sister Butt was left a widow, with a large and nearly helpless family. The care and anxiety incident to their raising and education devolved upon her. This burden she bore with quiet fortitude and courage that were admirable; and worthily has she been rewarded by the filial attention and tender affection of her family. Few children have been more favored in a mother, and few have been more sensible of that blessing, and few mothers have received more grateful returns in evidence of their appreciation and filial affection. To enter into particulars would not be proper in a notice like this. To her family her loss is irreparable. The safe, consoling, the sympathizing friend, and the tender mother has been taken away.

Possessed of those domestic and social virtues that at once adorn and ennoble female character, and refine and purify all the relations of life, Sister Butt leaves a large circle of friends to lament their loss.

Her piety, like her disposition, was not demonstrative, but uniform and consistent—never falling below just Christian expectation. Cheerful and peaceful she lived, and peaceful she has passed away. The circumstances of her sickness and death were unfavorable for a dying testimony of her faith and hope; but none was needed. A life of over half a century in the Master's service is her testimony; and by it, "being dead," she "yet speaketh." And remembered by this, long will her memory be fragrant with those who knew her, and especially with the church. "Blessed are the dead who die in the Lord."

Richmond Christian Advocate will please copy.

Died, of fire-burns, at her residence in Jamestown, Smith county, Texas, on the twenty-ninth of March, Mrs. MOLLY P. HALL, wife of Rev. Thomas H. Hall, and youngest daughter and child of Thomas S. and Charity Holt, formerly of Macon county, Alabama. Deceased was sixteen years, eleven months, and eight days old.

She caught fire accidentally in her own house. She lingered for fifteen days in intense suffering, without a word of complaint, when her spirit fled in peace. She died in the faith. We have had her almost cooked frame in our old grave yard; but, thank God, we know her soul rests in glory.

She was married to Mr. Hall in Caldo parish, Louisiana, on the first day of July, 1867. Happily, very happily have they traveled life's prosperous path, each sharing greatly in the other's joys, and willingly dividing life's sorrows, until unexpected death entered and severed the happy pair. She had been a member of the Methodist Episcopal Church in this place from childhood. Faithful, to strict promptness, in the discharge of every Christian duty, she was a bright light here, and has her reward in heaven. She leaves a husband weeping on the sands of time, perhaps soon to follow; she leaves a bright-eyed little boy, aged five months; she leaves a step-son, aged three years and six months, whom she trained thus far for God, and whom she loved as her own. She has gone to be with a bright-eyed little boy above, who preceded her one year to the better land. Best of all, she is gone to be with Jesus. Our loss is gain to her. Then let us be resigned until we can

brace her in heaven. 'Twill not be long. JAMESTOWN, TEXAS, April 9, 1870.

DR. DAVIS ON DEAFNESS. Sent Forty cents, and get the NOTES ON DEAFNESS, by W. L. Davis, M. D. To be had of Steel & Co., 72 Camp street; Elynn, 130 Canal street; Ellis, opposite the Post Office; also, by mail, of the author, Glass Box 329, New Orleans.

OBSEIVE.—Dr. D. has removed to No. 19 Baronne street, where he holds himself in readiness to attend to the treatment of persons in cases of Deafness—a special branch of his profession, to which he gives his whole attention. f-12 11

NEW ADVERTISEMENTS.

WALTHAM WATCHES.

The extensive use of these Watches for the last three years by Railway Conductors, Engineers and Expressmen, the most exacting of watch-wearers, has thoroughly demonstrated the strength, sturdiness, durability and accuracy of the Waltham Watch. To satisfy that class in all these respects is to decide the question as to the real value of these time-keepers.

More than 450,000 of these Watches are now speaking for themselves in the pockets of the people—a proof and a guarantee of their superiority over all others.

The superior organization and great extent of the Company's Works at Waltham enable them to produce Watches at a price which renders competition futile, and those who buy any other Watch merely pay from twenty-five to fifty per cent. more for their Watches than is necessary.

We are now selling Waltham Watches at less prices in greenbacks than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

These time-pieces combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country or in Europe, only those were finally adopted which were tested by the most skillful artisans in our works, and long use on the part of the public, demonstrated to be essential to correct and enduring time-keeping.

Among the many improvements we would particularize:

The invention and use of a center pinion of peculiar construction, to prevent damage to the train by the breakage of main springs, is original with the American Watch Company, who, having had the refusal of all other contrivances, adopted Fogg's Patent Pinion as being the best and faultless.

Hardened and tempered hair springs, now universally admitted by watchmakers to be the best, are used in all grades of Waltham Watches.

All Waltham Watches have dust-proof caps, protecting the movement from dust and lessening the necessity of the frequent cleaning necessary in other Watches.

Our new patent stem-winder, or keyless Watch, is already a decided success and a great improvement on any stem-winding Watch in the American market, and by far the cheapest Watch of its quality now offered to the public. To those living in portions of the United States where watchmakers do not abound, Watches with the above mentioned improvements, which lead to insure accuracy, cleanliness, durability and convenience, must prove invaluable.

Every Watch guaranteed by the Company. To prevent imposition, buyers should see that every Watch should bear either of the following trade marks:

American Watch Co. Waltham.
Appleton, Tracy & Co. Waltham.
P. S. Barlett Waltham.
William Kiley Waltham.
Home Watch Co. Waltham.

For sale at retail by all respectable dealers. A descriptive circular, giving much useful information, sent to any address on application.

No Watches retailed by the Company.

Address
ROBBINS & APPLETON,
General Agents,
182 Broadway, New York.

Ask to see the new FULL-PLATE WATCH bearing the trade mark "AMERICAN WATCH CO., Crescent St., Waltham, Mass." It is by far the best Full-Plate Watch made in the United States, and surpasses anything heretofore made in this country for Railway Engineers, Conductors, etc. ap30 3m cow p

TEACHER.—WANTED, IN SEPTEMBER next, by a lady of six years experience, a situation as MUSIC TEACHER, Vocal and Instrumental, in a Female College. WEEBON'S EXCELSIOR LAUNDRY-SAVING WASHING COMPOUND.

No Rubbing Necessary.—No Washing Machine Needed. (Patent granted September 22, 1868.)

REASONS FOR PREFERRED THIS SOAP.

1. It is not only the best, but the cheapest yet offered to the public.
2. It may be successfully used in any kind of water—cold or hot, hard or soft.
3. It so modifies the action of boiling water on woolen goods that their fibers do not contract under its influence, and the garment is left bleached, soft and as large as originally made.
4. It will not destroy colors; on the contrary, renders them bright and beautiful.
5. The goods do not require any rubbing with the hands, washboard or washing machine; all that is necessary is soaping, boiling and rinsing.
6. It will not injure the hands; on the contrary, renders them soft and smooth.
7. Without boiling it will bleach clean and white the flannel handkerchiefs, lace, curtains, etc. Simply dampen them in warm water, soap them, place them in a dry vessel and next day, then rinse and dry them; curtains very much soiled may require boiling.

We guarantee all the above facts, and will refund the purchase money to any one not satisfied with their trial of the Soap. We also guarantee to pay for any injury done to clothing by the Soap, on proof of such injury. It is hardly necessary to inform the public that two-thirds of the wear and tear of clothing results from rubbing, which may be saved by the use of this Soap.

W. G. LATTING, Manufacturer. A. T. BENNETT & Co., Wholesale Agents, Cor. Common and Tchoupoulas Sts.

For sale by most all retail grocers. Price List: 3-lb boxes, 25 cents; 8-lb boxes, 50 cents; 25-lb boxes, \$1 50; 50-lb boxes, \$2 50. A liberal discount to the trade. ap23 1m

The Child's Corner.

URSULA SWAYNE'S TROUBLE.

BY THE AUTHOR OF "THE FRENCH DOLL."

Ursula Swayne's face was not pleasant to look at as she came home from her French lesson on Saturday afternoon. It was not a pretty face, but its intelligence made it remarkable; and usually the frank, open expression of the eyes and mouth made it pleasing too.

Now the straight, well-cut brows were contracted, the under-lip was so pinched upward that the corners of the mouth drooped, and a sort of restless quiver in the long, dark eyelashes gave warning that the poor little troubled heart belonging to the pale, brown-eyed child had hard work just then to keep the tears from springing.

When she reached the small house her father lived in, she went straight up stairs, threw her books and hat on her bed, and then stood pushing some straggling hairs off her forehead.

Ursula did not go to regular school—only twice a week for French lessons. She had a singular aptitude for languages, a good memory, and showed intelligence as well as diligence in preparing her exercises, and yet she had come away from Mrs. Smith's school with a troubled, sorrowful face.

"I hate Monsieur Jeannoton," and there was something very like a stamp on the bare wooden floor as she spoke—"and yet I would rather do lessons for him than any one; he is so clever; he knows exactly what is difficult, and shows where it comes, and why it is difficult; he is so different from Miss Grey. Miss Grey! Why, when I ask her to explain, she only makes things more confused; she says: 'Well, I'm sure I don't know; it always has been so; you ask too many questions, Ursula; but then—' the child paused and reflected reflectively—"Miss Grey is an idiot. I could teach just as well as she does, poor silly thing. Yes, Monsieur Jeannoton is very, very clever, but he is unjust, and I hate people to be unjust; of course I do my lessons as well as I can; I don't choose to be beaten; but he has a spite against me, or—"

The color rose up to her forehead, and tears came along with it, crimsoning and swelling the slender throbbing throat; till they forced away the pride that had held them back. Ursula sat down, and, hiding her face in her hands, had an unrestrained sobbing fit.

Poor little wounded heart! Monsieur Jeannoton would scarcely have believed that this humbled, tear-stained face was that of the proud, unaccountable pupil who made such strangely clever but intolerably insolent comments on his teaching.

"Yes, madame," he had said to Mrs. Smith, "the young ladies are charming, so amiable, so bien élevées, except M^{lle} Ursule; and yet, for ten years, she is of an intelligence quite remarkable; but she has not a heart."

And the polite Frenchman went his way quite unconscious of the tempest he had raised, or of the vanity he had fed; for Ursula's trouble was not only because the faultless exercise at which she had worked so resolutely had been given back to her with a "bien, Mademoiselle," said in the master's gravest tones, but that Mary Halket, the silliest, least clever girl at Mrs. Smith's, should be almost always the object of Monsieur Jeannoton's warm praise.

There was a strange under-current of generosity in Ursula. She hated herself even for the passing thought.

"Why should I grudge Mary praise? She cannot do her exercises, but she is a good sort of girl enough."

"Lully, are you never coming down? Do make haste."

A boy about two years older than Ursula shouted this from the bottom of the stairs.

"What do you want, Willie? I suppose I may have time to wash my hands and take off my things?"

"That's right, fire up, young n! I don't think French agrees with you, Lully, you are so precious cross when you come home. Are you coming to play cricket with Fred and me, or aren't you? Just say yes or no."

Ursula's heart was very full now. "If I'm cross you can't want me, so I say no."

"All right, cross-patch; and Willie ran off to join his eldest brother."

Ursula's heart seemed bursting. She could not stay in-doors. She wanted to get into the air away from every one.

She stood at the glass door leading into the garden. She did not want to fall in with her brothers; but they were not to be seen on the lawn.

At the end of the lawn came the kitchen garden, fenced off by a thick shrubbery, and beyond this gain was a field; on one side of the field was a bit of waste ground, with a good-sized lillock in one corner of it. There was a sort of cave here; and the twisted roots of an ash tree

growing above made a groined roofing, and this place Ursula called her den. She had planted it with ferns, and usually it was a favorite play-place for her and Willie. Now she sat cowering at the mouth of her den, lost in her sad thoughts.

"Lully!" She started. Willie was in the field on the other side of the hedge. She had forgiven him by this time, but she felt too sorrowful to give him a welcoming smile. Willie could not guess her thoughts; he only saw a swelled face and red eyes.

"Sulking here, eh, Lul? Well, I never saw such a mull. I wanted you to come and tag for us at cricket; but I hate sulka."

"I'm not sulking," said Ursula indignantly.

"I say, Fred, she says she's not sulky; isn't that a joke? Come on, Lul will find her temper if she's left alone; she's dropped it in the field, perhaps."

Fred laughed heartily at this, and they went back to their cricket.

"How wretched!—how shamefully unjust!" Her eyes sparkled and her cheeks flamed up with anger. "How dare they say I'm sulky?"

"She went in-doors, but her afternoon seemed doomed to trouble."

She was reading a book when the rest sat down to tea, and answered haughtily when reproved for her delay—so haughtily that her mother looked serious and her father angry.

She felt miserable, and was glad when bed-time came.

"Good night, Ursula," her father held her hand a minute when she went to kiss him—"but if you don't keep your tongue in better order, you must go to boarding school. I can't allow disrespect."

Little Fanny slept in the same bed with Ursula, but Fanny went up stairs first, and was sound asleep before her sister reached her bedroom.

Her father's words had frightened Ursula, but they had not softened her pride.

She was too full of restless, troubled thoughts to go to sleep.

"It doesn't matter what I do," she said to herself, nestling her dark brown curls into the pillow; "I'm sure to be scolded. I wonder if I shall always be scolded and found fault with even when I'm a woman like mamma; but then, grown-up people don't say insolent things, and they are always right; so I suppose the rightness comes of its own accord." There was some comfort in this reflection, but it did not last. Her thoughts soon went on again.

"I used to think it was only at home I got scolded, because the boys make me cross. I know I'm cross, and then the words slip out without my knowing. Oh, I wish I wasn't cross!" and then came a deep sigh. But it was not a pleasant reflection to stop at, so the little agile brain traveled on. "But I never get scolded at home lessons, unless I ask Miss Grey too many questions. Mamma always looks pleased if she comes in the room when I'm saying my lessons. I'm so glad when she comes. Then why does Monsieur Jeannoton dislike me? At first he seemed to me to be a genius—a hero of cleverness; and I care for cleverness more than anything. If Willie and Fred cared more for cleverness, we should not quarrel, and they wouldn't call me 'Minerva.' It's shameful of them; just because I like lessons. Boys are so idle; they don't stick to things as girls do. Perhaps Monsieur Jeannoton's like them? Doesn't he like cleverness? and is that why he praises Mary, and excuses her faults? Perhaps if I were always mumblance when he speaks to me, and never asked questions, he would praise me too. Oh, if he would only praise—"

Here she fell asleep, but broken sobs told her mother when she came to give a last look at her little girl that Ursula's trouble had not left her. She kissed her, and then, kneeling down beside the bed, prayed for help and guidance for herself and Ursula.

But Ursula was an elastic nature, and when she came down stairs next morning, she looked so bright that no one could have remembered yesterday's trouble. Plainly the Swaynes did not; they were very loving people, and but for Ursula's provoking tongue the peace of the household would probably have been untroubled. Besides, next day was Sunday, and Mr. and Mrs. Swayne made Sunday a very happy day with their children. It was a holiday in the true sense of the word; a day of joy and gladness, not of sad restraint. The children gathered nosegays from their little gardens for their mother; then came church, and after dinner amusing story books or a walk with papa; or else, perhaps, they played in the garden, or sat quietly there while their mother read aloud. Then came tea, and papa never was so amusing as at Sunday tea time; and then the great treat of the day, when all who were old enough went to evening church.

Monday, too, went smoothly with Ursula; but on Tuesday Mrs. Swayne met Mrs. Smith, and asked how her

little girl got on with Monsieur Jeannoton.

On Wednesday, just as Ursula was starting off for her French lessons, her mother called her into the dining room.

"Lully, I want you to be very respectful to your French master."

"Respectful! Mamma, who says I'm not respectful?"

Mrs. Swayne only looked gravely at her little daughter.

Ursula's head drooped; her heart was telling her already that it was worse to be rude to her mother than to Monsieur Jeannoton, and it was rude to answer in that way; but she was not going to own her fault. She waited a minute, and then, as her mother continued silent, she hurried off to Mrs. Smith's.

There were two faults in her exercise, and three in her dictation. Ursula's cheeks burned, and as she looked up she saw Mary smile at one of the other girls. She stretched out her hand impatiently for the dictionary to correct her misspelt words, and upset the inkstand.

"Ah, M^{lle} Ursule," said the professor, in his suave, polite voice, "it is pity you are *maladroite*. Why do you not help?" for Ursula stood with wide eyes and mouth gaping at the black stream on the table.

"Thank you, M^{lle} Mary," he said, as the self-possessed, neat-handed Mary Halket wiped up the ink and set the books in their places; "a young lady should always be careful and graceful. Awkwardness is not pardonable in a woman."

Ursula shrugged her shoulders. She was deeply mortified, and the effort to hide it made her manner still more harsh.

"Am I to read now?"

Monsieur Jeannoton started at the rude, abrupt question; it seemed to him that this child was recalling him to his duty. A flush came into his face.

"No, Mademoiselle," he said; "I wish you all to make a translation of this fable instead."

It was La Fontaine's "the Grasshopper and the Ant," and most of the children found it an impossible task; but Ursula, troubled as her mind was with anger, was determined to succeed—and she did.

But though she had finished, she would not hand up her copy book with the others. She kept her head bent, as if she were still writing.

"Let him find it out," she said to herself; "he will be ashamed of blaming me for an accident when he sees how well I have done the fable."

Monsieur Jeannoton waited patiently, and then looked at his watch.

"You may go, young ladies; I must stay and speak to Mrs. Smith."

The girl who sat next to Ursula had been looking over her shoulder. She was one of the elder pupils, and a favorite with the master.

"Monsieur, Ursula has done it better than any of us—"

A glow of triumph rose on the child's face, but as she glanced up at Monsieur Jeannoton all her anger came back.

He looked so very grave, almost sorrowful.

"Ah, M^{lle} Ursule, if you would study little things as well as large things, how happy you would be!" And he handed back the copy book.

He bowed round the table, and in a few minutes the girls were all in the playground.

"Little things," thought Ursula; "what does Monsieur Jeannoton mean?"

There was a buzzing cluster of girls in one corner of the playground, and as she passed by them Ursula stood still, spelled by the most intense admiration she had ever felt. She had often seen fairies in her waking and sleeping dreams, for Ursula had a bad habit of dreaming in the daylight, and I believe it was the being roused abruptly from these "blue moons," as her brothers and sisters called them, that often drew out her insolent words. I don't say made her cross. No one can make us speak crossly unless our better will gives way, but the sight she now gazed at banished every sore and angry feeling. Ursula dearly loved beautiful things, and she had never seen anything so beautiful as the tiny, fancifully dressed little girl in the center of the group.

As she looked more closely, something in the bright dark eyes and rich complexion reminded Ursula irresistibly of Monsieur Jeannoton.

Till now she had not thought whether her French master was handsome or not. She knew that she liked to look at his white forehead and curling brown hair, and that his eyes were bright and seemed to see into her heart, but it was absurd to think of likeness between a grown-up man and a baby child.

"Come along, little Aimee," said Mary Halket; "come and see the meo-cows."

Mary's wishes were always obeyed. She led the child by the hand toward a large gate on one side of the playground, and the other girls followed—Ursula among the last. She did not dislike Mary, but she was unwilling to submit to her sway.

She followed in one of her waking

dreams, wondering at the secret of Mary's influence. Mary was not clever. She was often really unkind in a light, merry way she had of ill-ensuing the failings and infirmities of her companions without regard to their feelings.

"It is her pretty face and the way she smiles when she speaks; that's why they are all so fond of her," sighed Ursula. "I can never have the first, and I should feel a hypocrite if I smiled at every one alike."

She had not noticed, as she moved mechanically along, that they had passed across the first field, and had reached the gate of another which was usually left open. It was shut fast now, and a heavy chain was fastened on to the staple and then wound round and round the gatepost. There was a halt and a short discussion, but the little Aimee pointed eagerly forward, and Mary and another of the elder girls succeeded in opening the gate.

Ursula could not tell how it all happened. She was following the rest when a deep sullen roar roused her from her reverie, and, before she could well look round her, her companions were running back as fast as they could toward the gate they had unfastened.

They had some distance to run. The field they were now in was very large, and before they turned they had reached the farther end of it—reached almost to another gate, behind which appeared some pretty cows and calves.

But Ursula did not see the cows and calves. She saw only two things. She saw Mary, left behind the others, trying to drag the tiny, fancifully-dressed child along with her; but the child would not stir; it stood paralyzed by the other sight, that made Ursula's heart, too, stand still an instant and then beat so fast that it nearly choked her.

A huge white creature much larger than any cow was standing at the farther gate, and again came the deep sullen roar, which had so suddenly alarmed the school girls. The bull had been half hidden till now in the dry ditch beneath the hedge which separated the two fields. Mary loosed Aimee's hand and ran past in wild terror.

"Come, Ursula, come; she will not move, I tell you."

Mary cried out loud in her frantic fear, and the bull, disturbed by the sound, turned slowly round from the gate and faced Ursula.

Ursula was a great reader; I cannot tell whether stories of people who had faced wild animals came to her mind; or whether the Help that dwells in every little Christian child mastered her fear; I can only tell you what she did. She caught up little Aimee in her arms, and moved slowly away. The bull followed, and gave another deep, dull roar.

Ursula looked on toward the unfastened gate—how far it was, and the bull was not four yards behind her! She knew by instinct that if she ran the bull would run too, and would overtake her in an instant, laden as she was. She took a few more steps, and then she stopped again, for Aimee grew heavier and heavier; the bull stopped too, and, lowering his head, gave another roar.

"Only God can save us now!" burst from Ursula's lips.

Once more she slowly retreated, always keeping one side toward the bull; he followed more quickly, and his eyes looked fierce and red.

Aimee began to cry.

"Hush, darling," Ursula said firmly, "we're quite safe." She stood still, exhausted. This time she felt sure the bull would not spare; his angry, prolonged roar seemed her doom.

Something brushed by her, and then she felt Aimee taken from her arms, and the whole field went round and round.

"Ah, mon Dieu!" was all she heard, and she was lifted off the ground by a strong arm.

When Ursula opened her eyes she found herself in the drawing-room at Mrs. Smith's, lying on a sofa; her mother sat by her; but Monsieur Jeannoton was there too, on his knees, holding one of her hands.

She opened her eyes widely at this sight.

"Ah, M^{lle} Ursule, what must I say to you? You are a brave, heroic little girl, and I owe to you an eternal gratitude," and the Frenchman bent down and kissed her on both cheeks.

Ursula felt strangely tired; she could not answer, but she looked up gratefully and began to cry.

"That was my child, my little girl—my only one; and she has no mother now, poor little angel, and you have saved her for me."

"No, monsieur," said Ursula, "you saved us both; I only tried. Monsieur," she said, so simply and earnestly that the tears rose in Monsieur Jeannoton's eyes, "you are giving me more praise than I deserve now; why did not you praise me when I really did deserve it?"

He rose up and looked at her, but he did not answer her at once. Presently he looked at Mrs. Swayne.

"Madame"—he bowed—"in your presence it is not my business to give advice to M^{lle} Ursule, and yet my heart is so full of love for her that I seem to feel a fatherly right in her to-day. My dear child," he said, and he took Ursula's little hand in both his, "to-day you have shown me for the first time your true nature, and I confess that all this while I have been judging you wrongly; but it has not been a fault of mine. People are judged by the temper they show; life is not made up of large things, my child; you may perhaps never again have the occasion given you to save another of God's creatures by your own self-denial, but in the little things of which daily life is made you may do this every hour if you will. My good little friend, I cannot believe that your own tongue and your own temper are not as worthy of conquest as the sullen, roaring bull."

Ursula put her hand over her eyes, as if to shut out the remembrance, and she shivered violently.

"She must sleep, madame, and—" Monsieur Jeannoton bent down and whispered to Mrs. Swayne—"she must not be left alone."

Monsieur Jeannoton was right. Ursula passed a fevered, delirious night, and some days went by before she was allowed to return to her lessons.

A habit which has grown little by little is only rooted out little by little; and Ursula, though she tried in earnest, had often to repent of cross words and looks and deeds. But never toward Monsieur Jeannoton; he was her friend now as well as her master; he often walked home with her from school, satisfying her ardent thirst for knowledge from his own stores of reading.

"Ah, monsieur," she said one day long afterward, as she parted from him at her father's door, "how much sunshine would have been hidden from my life, if I had not been frightened by the bull!"

Katharine S. Macquoid in Good Words.

A GREAT DEAL OF TIME IS CONTRACTED IN OPPORTUNITY—which is the flower of time.—W. H. C. H. C.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, combining all the new and important improvements; also the extra height of the Oven under the fire chamber, the Patent Air Chamber, Front Doors, and Patent White Enamelled Iron Knobs, the improvements in the covers and centre pieces, all of which have been covered by Letters Patent, and are used in no other Stove. They are warranted to stand fire, or others sent free of charge in all cases. We have all sizes of this justly celebrated Stove, both

PLAIN AND EXTENDED BACKS, the Extended Back with cast Iron Enamelled Reservoir and Fastet, Tin Warming Closet, Gridiron Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, as in the case of most of the Stoves now used, and the heat is forced directly against the whole surface of the bottom of the Reservoir. The Reservoir, being detached from the pipe, can be removed at pleasure, thereby forming a six-burner Stove—the best in use, as the back holes will heat as well or better than the middle ones. For sale by

G. W. W. GOODWYN, 62 Camp street.

ALSO, THE MOST Complete and Perfect Cooking Stove FOR BITUMINOUS COAL OR COKE

over Invented, in the estimation of all who have yet seen it. Patented in 1869.

THE MONITOR, which can be seen at 62 Camp street. The advantages possessed by this Stove over all the other Coal Cooking Stoves are so numerous, and so patent to every sensible observer, that it is only necessary to examine it in order to be convinced of its superiority.

All of the above Stoves are fitted with extra care. Oven Doors lined with tin, and furnished with William Resor's Patent Air Chamber, sliding front doors, patent centre covers and White Enamelled Knobs.

The operation of every Stove guaranteed. Directions for putting up and using same accompany each Stove.

G. W. W. GOODWYN, 62 Camp street, Sole Agent for States of La. and Texas.

THE TIMES.....THE TIMES.

THE IMPROVED LARGE OVEN COOKING STOVE, with extended Fire Chamber and Feeder Top—one of the best Baking and most economical Stoves made.

The Flues are constructed so as to insure the most perfect draft. The heat of the Oven is so equal that when baking there is no need for removing anything until done.

THE TIMES is made of a superior quality of Iron, very heavy, of neat design and fine finish. The Top Plate is put together in sections, to permit of the greatest expansion without cracking.

We invite the attention of Housekeepers to the advantages of this Stove. Remember, we guarantee them to give entire satisfaction. Duplicate parts can be had at all times, at small cost, by which repairs can be made which will frequently save the price of a new Stove.

SATURDAY, APRIL 30, 1870.

MISSIONARY NEWS.

ASSAM.—The Wild Mountain Tribes. Colonel Henry Fournet, and other gentlemen who have lived in the East, have formed a small society in England for the purpose of sending missionaries to the Nagas and other wild tribes in the mountain regions of Assam. How greatly they need the gospel may be seen from the following extracts from a recent letter of Colonel Fournet: "They are ignorant of the use of letters, or the art of writing. Their government is decidedly democratic, for although each community has a nominal head, their chiefs have no absolute power over the people. Every man is his own master, avenges his own quarrels, and innumerable murders and quarrels frequently occur. The crime of murder cannot be expiated; the relatives of the murdered person instantly, if possible, spear the murderer. He may escape for years, but he is never safe. Years after the deed has been committed he may be surprised and murdered, for revenge is considered a sacred duty, never to be neglected or forgotten. Adultery is also an offense that admits of no compromise.

"The Nagas appear to have no idea of a future state, of good or evil; they imagine there are gods, or good and evil spirits, residing in their hills, to whom they offer sacrifices of cows, dogs, cocks, and spirituous liquors. Each spirit, they believe, has power to afflict or to prosper. When a respectable man dies in a village the inhabitants do not quit it for three days, and keep the body in the house, after which the whole community partake of a feast; the body is then conveyed to the burying ground, where it is interred, and a stone tomb is built over the grave three or four feet high, and all the men, being dressed in their own habiliments, make a great noise and jump about, vociferating, 'What spirit has come and killed our friend? Where have you fled to? Come, let us see you, how powerful you are? If we could see you, we would spear you, and kill you with these spears!' and with similar speeches and war whoops, continually repeated, they curse the spirit and strike the earth with their spears. They then place on the grave all the articles of dress, as well as arms and ornaments, won by the deceased. In cases of sickness, a fowl is offered in sacrifice, and after placing the feathers and entrails in the road, the chief person in the house or family calls out, 'O spirit! restore to health the person you have afflicted. I offer you the entrails of a fowl.'

"One of the most barbarous customs of this tribe is that of cutting off the head, hands and feet of any one they meet with, without any provocation or pre-existing enmity, to stick them up in their fields, and to secure a good crop of grain."

POLYNESIA.—Native Christians. The expenditure of the American Board in the Pacific is now limited almost entirely to the running expenses of the *Morning Star*, and the support of the families of American missionaries, some of whom have grown grey in the service, while others have retired from active duty. The sixty native churches, and the entire body of native pastors and preachers in the home and foreign field, receive no aid from the board. Nearly \$30,000 in gold, given last year for various Christian objects, the sending forth of five foreign missionaries to the regions beyond, and the employment of a native Chinese to labor among his immigrant countrymen; express the love and devotion to the cause of Christ of the native Christians of Hawaii.

NEW ENGLAND VILLAGE LIFE.—Whatever life still exists in the rural portions of New England, now rapidly becoming deserted from their worn-out soil—which finds no renewal in the general absence of limestone and shale, and the persistent outcropping of a granite which rains and winds cannot disintegrate, or springs and snows wash into the valleys—is a life of solitary outdoor toil, or sordid storekeeping, or monotonous factory-drudgery, interchanged with an unsocial, uncheerful, serious life at home, in a wooden castle inaccessible to the nearest neighbors, except under rigid conditions or on state occasions. Five dwindling churches perhaps starve and mope in some village where one might enjoy an animated and cheerful existence. Life is serious, intelligent, self-respectful, morbidly aspiring, thoughtful—but lonely, sad, discontented, in revolt against it knows not what; questioning everything, ready for radical changes, doubting what it wishes to believe, craving the stimulus of the most radical thought—the pepper and mustard of spicy literature, and satirical poetry and free religion. The most cultivated and gifted men

are apt to be the least interested public-spirited citizens; the least interested in worship, the least social, the least cheerful. The women, with brains that topple above their slender frames, are reading metaphysics, or studying German literature, or making copies of the antique, or forming societies and uttering speeches in promotion of female suffrage or woman's rights. Marriage grows less frequent and of more doubtful value, while serious complaints against husbands as faithless in affection, and wives as incompetent to household cares, are freely disclosed. Insanity, suicide, infanticide become common; crime increases among women, while diminishing among men.—H. W. Bellows.

He that would relish success to purpose, should keep his passions cool, and his expectations low; and then it is possible that his fortune might exceed his fancy; for an advantage always rises, and is almost always doubled by being unlooked for.

BELLS—BELLS.

CHURCH BELLS.—We are prepared to furnish Church Bells, of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

Weight.	Wt. of Bell and mountings.	Price.
28-inch Bell...	250 lbs 400 lbs	\$65 00
36-inch Bell...	650 lbs 800 lbs	135 00
40-inch Bell...	800 lbs 1000 lbs	175 00
48-inch Bell...	1200 lbs 1500 lbs	265 00

These Bells are warranted for one year against breakage in ordinary use.

191 01y No. 9 Perdido St., N. Orleans.

CENTENARY MALE INSTITUTE.

SUMMERFIELD, ALABAMA.

The twenty-eighth annual session of this school will begin on the first Monday in OCTOBER, 1870, and continue three months.

The expense for tuition, incidental fees, board, washing, fuel and lights, for the session, will be \$31 50, one-half to be paid on entrance and one-half on the 14th of February, 1871.

Persons wishing to patronize this school may address JOHN MASSY,
191 21y Principal, Summerfield, Ala.

MEDICINE—MEDICINE.

KOSKOO......**KOSKOO.**
New Orleans, La. Memphis, Tenn.
G. P. HARRISON, New Orleans, La.

THE GREAT REPUTATION.

which Koskoo has attained in all parts of the country

AS A GREAT AND GOOD MEDICINE.

AND THE LARGE NUMBERS OF TESTIMONIALS

which are constantly being received from physicians, and persons who have been cured by its use, is conclusive proof of its remarkable value.

As a Blood Purifier it has no Equal.

BEING POSITIVELY

THE MOST POWERFUL VEGETABLE ALTERNATIVE YET DISCOVERED.

DISEASES OF THE BLOOD.

"The life of the flesh is in the blood," is a Scriptural maxim that science proves to be true. The people talk of bad blood as the cause of many diseases, and like many popular opinions this of bad blood is founded in truth.

The symptoms of bad blood are usually quite plain. Bad Digestion causes imperfect nutrition, and consequently the circulation is feeble, the soft tissues lose their tone and elasticity, and the tongue becomes pale, broad, and frequently covered with a pasty, white coat. This condition soon shows itself in roughness of the skin, then in eruptive and ulcerative diseases, and when long continued results in serious lesions of the Brain, Liver, Lungs or Urinary apparatus. Much, very much, suffering is caused by impure blood. It is estimated by some that one-fifth of the human family are affected with Scrofula in some form.

When the Blood is pure you are not so liable to any disease. Many impurities of the Blood arise from Impure discharges of large cities. Eradicate every impurity from the fountain of life, and good spirits, fair skin and vital strength will return to you.

KOSKOO AS A LIVER INVIGORATOR

STANDS UNRIVALED.

BEING THE ONLY KNOWN MEDICINE

that efficiently stimulates and corrects the hepatic secretions and functional derangements of the Liver, without debilitating the system. While it acts freely upon the Liver, instead of copious purging it gradually changes the discharges to a perfectly natural state.

SYMPTOMS OF LIVER COMPLAINT AND OF SOME OF THOSE DISEASES PRODUCED BY IT.

A sallow or yellow color of the skin, or yellow-brown spots on the face and other parts of the body; dullness and drowsiness, sometimes headache; bitter or bad taste in the mouth; internal heat; in many cases a dry, leathery cough; uneasiness at night; sometimes sour stomach, with a rising of the food; a bloated or full feeling about the stomach and sides; aggravating pains in the sides, back or breast, and about the shoulders; constipation of the bowels; piles, flatulence, colicness of the extremities, etc.

KOSKOO

is a remedy of wonderful efficacy in the cure of diseases of the Kidneys and Bladder. In these affections it is as near a specific as any remedy can be. It does its work kindly, silently and surely. The relief which it affords is both certain and perceptible.

DISEASES OF THE KIDNEYS AND BLADDER.

Persons unacquainted with the structure and functions of the Kidneys cannot estimate the importance of their healthy action.

Regular and sufficient action of the Kidneys is as important, "any" even more so, than regularity of the bowels. The Kidneys remove from the blood those "effete" matters which, if permitted to remain, would speedily destroy life. A total suspension of the urinary discharges will occasion death in from thirty-six to forty-eight hours.

When the Urine is voided in small quantities at the time, or when there is a disposition to urinate more frequently, than natural, or when the Urine is high-colored or scumming, with weakness in the small of the back, it should not be trifled with or delayed, but Koskoo should be taken at once to remedy the difficulty before a lesion of the organs takes place. Most of the diseases of the Bladder originate from those of the Kidneys; the Urine being imperfectly secreted in the Kidneys, proves irritating to the Bladder and Urinary passages. When we recollect that medicine never reaches the Kidneys except through the general circulation of the blood, we see how necessary it is to keep the Fountain of Life pure.

KOSKOO

Meets with great success in the cure of

DISEASES OF THE NERVOUS SYSTEM.

Almost nine-tenths of our people suffer from nervous exhaustion, and are, therefore, liable to its concomitant evils of mental depression, confused ideas, softening of the brain, insanity, and complete breaking down of the general health. Thousands are suffering today with broken-down nervous systems, and, unfortunately, tobacco, alcohol, late hours, over-work, (mental and physical,) are causing diseases of the nervous system to increase at a fearful rate.

The symptoms to which diseases of the nervous system give rise may be stated as follows: A dull, heavy feeling in the head, sometimes more or less severe pain in head-aches, periodical headache, dizziness, noises or ringing in the head; confusion of ideas; temporary loss of memory; delirium of sleep; starting during sleep; loud dreams; hesitation in answering questions; dullness of hearing; twitching of the face and arms, etc., which, if not promptly treated, lead to Paralysis, Delirium, Insanity, Impotency, Apoplexy, etc., etc.

KOSKOO

is not a secret quack remedy. Formulas around each bottle. Recommended by the best Physicians, eminent Divines, Editors, Druggists, Merchants, etc. The

Best and Most Popular Medicine in Use.

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S

COMMERCIAL COLLEGE.

61 CAMP STREET.

Open day and evening the entire year.

Pennsylvania, Book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from twelve to thirty years of age attend. The instruction is given to each student. Persons who have neglected their education can here speedily qualify themselves for good situations in business. Some from the country may obtain board in the family of the principal.

William Walker, a late graduate of the Southern University of Alabama, and son of the Rev. Dr. J. B. Walker, of New Orleans, has charge of the Mathematical department. Terms for twenty per cent. less than other colleges in this city.

A liberal deduction made when three or more enter together. The principal has been a practical teacher in New Orleans since 1851. For circulars, giving terms, etc., address J. W. BLACKMAN, New Orleans.

METHODIST FEMALE COLLEGE.

TUSCALOOSA, ALABAMA.

Under the Patronage of the Mobile Conference.

The regular scholastic year will begin on the first Monday in OCTOBER next, and end the last of June. It is divided into two terms of four and a half months each.

EXPENSES.

Primary department, per term.....\$20 00

Collegiate department, per term.....25 00

Latin and Modern Languages, each.....10 00

Music on Piano and Guitar.....25 00

Use of Instruments.....5 00

Drawing and Painting.....\$20 to 25 00

Contingent fee.....3 00

Board, including washing, lights and fuel, per month.....22 00

Young ladies must furnish their own towels, sheets, pillow cases and table napkins.

Payments for each term in advance. Pupils entering within the first month will be charged from the beginning. Itinerant students charged no tuition in the Literary Course.

Strict attention given to the manners and morals of the young ladies, and to their habits of study.

For information address the President, or Mr. D. M. OLIVER, Principal.

TUSKEGEE FEMALE COLLEGE.

TUSKEGEE, MAON COUNTY, ALABAMA.

REV. GEO. W. F. PRICE, PRESIDENT.

1. Institution permanent and successful.

2. Full faculty of experienced teachers.

3. Music made a special feature.

4. A full and thorough course.

5. Fine Scientific Apparatus in good order.

6. Finest department excellently kept.

7. Pupils under control of President.

8. Attention to health, manners, morals.

9. Vocal music gratuitously to all.

10. Languages taught, ancient and modern.

11. Particular care given to Penmanship.

12. Object Lesson system adopted.

13. Discipline thorough and efficient.

14. Literary culture unsurpassed.

Music Department.—Dr. S. M. Bartlett, principal. Dr. Bartlett has been a successful teacher of vocal and instrumental music for nearly twenty years, much of the time in female colleges in Alabama. The institution has excellent instruments for instruction. Pupils practice under the professor's eye. Vocal music is a gratuitous daily exercise. Vocalization taught thoroughly.

Boarding Department.—Capt. J. H. Poonse, steward; Mrs. E. R. Willingham, housekeeper.—The gentleman in charge of this department is of late of Marianna, Florida, and is of elevated character and social standing. The President resides in the college, and has charge of the boarders. Young ladies must furnish one pair blankets, one pair sheets, towels, pillow cases, toilet soap and lights. Fees for each term in advance. Four weeks make a scholastic month.

Next year begins September 15, 1869. Two terms, twenty weeks each.

CHARGES FOR YEAR OF FORTY WEEKS.

Primary department.....\$25 00

NEW ORLEANS MARKETS.

From the N. O. Price Current.
We have nothing to notice a fair degree of animation in most branches of the wholesale trade, but only a moderate movement in other departments. The receipts of sugar and molasses have been to a moderate extent, and met a brisk demand at previous rates. Western produce has been without any material change. Flour is held at about 12½¢ above the limits of foreign orders, and the business in it, as well as in other articles, has been confined to the local trade and the execution of orders for the gulf ports.

We have nothing of importance to notice in our accounts from the interior. The general statement is that planters have planted or are planting a wider breadth of cotton, but are at the same time preparing for increased crops of corn.

The river is three feet seven inches below high water mark.

Cotton.—The following are the arrivals since the twenty-second instant:

Louisiana and Mississippi	7150
Louisiana	2092
Arkansas	835
Florida	7
Texas	85
Total	10168

On Saturday, with a light supply and an equally moderate demand, the movement was languid throughout the day, and the sales were confined to 1,500 bales, mostly taken in trifling lots, at prices showing some irregularity, but, on the whole, no quotable variation. On Monday the demand continued limited and the offerings moderate, while from the want of competition among buyers, factors were unable to realize unless, at some concessions, and the business was again of moderate extent, summing up only 2,850 bales, while prices exhibited an irregular falling off of ¼ to ½¢. On Tuesday the market opened with a fair inquiry, but a reluctance on the part of buyers to go on unless at some concessions, while the supply was light and factors unwilling to give way, which checked the movement; but as the demand was better than on Monday, the movement showed rather more animation, and 3,250 bales changed hands, partly at previous rates, but mostly at figures indicating a decline of ¼ to ½¢. This applies mainly to mixed lots of average quality. Even-running and, in fact, all clean white cottons were wanted, and the supply of such kinds being limited, they commanded comparatively full prices. In one or two cases buyers paid even more than on Monday, but as a general thing the advantages were very decidedly on the side of the buyer.

This makes an aggregate for the past three days of 7,100 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 1,005,057 bales, against 752,279 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 612,777 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 332,218 bales to Great Britain, of 94,743 to France, and of 114,665 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	174 to 183
Good ordinary	201 to 204
Low middling	214 to 216
Middling	221 to 223
Strict middling	223 to 225

COTTON STATEMENT.

Stock on hand Sept. 1, 1869, bales	770
Arrived past three days	10168
Arrived previously	105052-1060750
Total	1061520
Exported past three days	6792
Exported previously	910618
Burned	1347-918727
Stock on hand and on shipboard	142793

SUGAR.—A good demand has again prevailed since our last review, and the sales on Saturday and Monday embraced 600 hogsheds, at 6½ to 8¢ per pound for inferior, 8½ to 9¢ for common, 9½ to 9¾¢ for fair, 9¾ to 10½¢ for good fair, 10½ to 11¢ for fully fair, 11½ to 11¾¢ for prime, 11¾ to 12¢ for choice, 9½ to 10¢ for seconds, 11½ to 12½¢ for yellow clarified, and 12½ to 15¢ for white.

MOLASSES.—The supplies are small. City refinery reboiled commands 50 to 75¢; sirup, \$1 per gallon.

MONEY.—Gold, 113½ to 113¾. American silver half dollars, 107½ to 107¾. Mexican dollars, 115½ to 116 in currency.

Nothing has been reported in bonds.

City Treasury notes, 13 to 14.

STOVES, GRATES AND HOUSE FURNISHING GOODS.
The undersigned would call the attention of city and country buyers of Cooking Stoves and the following list of Stoves manufactured by Mr. M. L. Filley:
The Philanthropist.
A first class Cooking stove, having all of the latest improvements that have so far been invented. Has an arrangement for boiling; also an Ash-pan. The casting is heavier than any Stove sold in this market. Sold under a full guarantee in every respect.
The Diamond Rock.
A Stove well known in this market. Thousands of this Stove are in constant use throughout the country, which is a very good recommendation. Sold under a full guarantee. Besides the above named Stoves, I have on hand the celebrated Canton Plant, Charter Oak, True Kentucky, Maid of Orleans, Queen of the South, Delta and others, all of which I offer at a low price.
J. H. CAMPBELL.
nol3 6m 133 Poydras st., New Orleans.

LAMPS.
The largest and best assortment of
COAL OIL LAMPS AND LANTERNS
IN THIS CITY,
AT THE LAMP STORE,
74.....CAMP STREET.....74
New Orleans, Louisiana.
CHANDELIERS, HALL LAMPS, COOKING LAMPS,
Or various styles and sizes.
Wicks, Chimneys, Brushes, Trimmers, Cans, and everything pertaining to the Lamp business, at wholesale and retail.
Always on hand, Downer's Kerosene or Refined Coal Oil, guaranteed pure, non-explosive and non-luminate.
HILL & VRAZIE,
No. 74 Camp street.
D. J. WASSON, BUILDER.
OFFICE—251 CARONDELET ST., N. ORLEANS.
Will contract for or superintend the construction of Sugar Houses and other buildings in the country. Plans and specifications furnished if desired.
Refers to H. F. Given and C. L. Walmsley mh12 01y

WALSH, SMITH & CO.,
GENERAL COMMISSION MERCHANTS
IMPORTERS OF RIO COFFEE,
And Exclusive Authorized Agents for the sale of
Phospho Peruvian Guano,
Ammoniated Alkaline Phosphate,
Ammoniated Super Phosphate,
Lime Plaster, etc., etc.,
MOBILE, ALABAMA.
Orders will meet with prompt attention.
We are importing our Coffee direct from Rio, and are offering buyers a great inducement as any other market presents, while shorter lines of communication by rail with the West, Mississippi, Alabama, Tennessee and Georgia give us material advantages, in low rates of freight, to supply these sections.
The Fertilizers we offer are of the most reliable character, and may be confidently relied upon by planters.

VOL. XVI.

NEW ORLEANS, SATURDAY, MAY 7, 1870.

NO. 16.

NEWS OF THE WEEK.

DOMESTIC.

RICHMOND, April 28.—The *Dispatch* says: "One man relates how he was buried on the top of all others so that he could not move, while he received the last words of a man and dying one under him, who turned out to be an old friend. Just before Patrick Henry Aylette entered the capitol, he was conversing with a friend about the death of a friend, and remarked, on leaving, 'We are all passing away.' Mr. Aylette was borne to the plateau north of the capitol, where he expired. A friend started a prayer before death forever sealed his lips." Major Calvert, late State treasurer, makes the following statement: "I was in the clerk's office under the gallery, looking through the window into the court room. Standing by my side were Maury, Roberts and Baldwin. I was nearest to the door leading out. A friend started to come in, but he remarked, 'I will not stay here; it is much safer outside than inside.' He went outside the door, and had hardly disappeared when the crash came. I started to get near the door, and almost made my escape when I was borne down into the darkness below. I hardly remember anything but a confused din of voices and falling timbers. I found myself entirely covered; my left side seemed nearly crushed, but my right arm was free, and with this I removed the rubbish from about my head, and was enabled to breathe a little. I was released in about three-quarters of an hour; my left leg was badly broken, and left side bruised."

A member of the Legislature describes his fall as follows: "I heard a low, rumbling sound, and felt myself sinking rapidly. I was facing the gallery, and saw it falling toward me. I saw men scrambling over each other in the gallery, and heard what seemed one unearthly yell of agony. Then came a crash, and I sank into darkness. I found myself under a mass of rubbish, with a dead body over me. There was a wounded man under me and another at my side. A poor fellow under me said: 'Ah, me, but if I could only fear God always as I do now. How wicked I have been all my days. Oh, God, forgive me; spare me, and I will be a true follower of Jesus.' A man at my side exclaimed: 'Oh, death, where is thy victory? Oh, grave, where is thy victory?' I heard a number of cries on all sides of me. Some were speaking about their wives, others of their children, while others were begging for air."

I believe many died from suffocation, for, although little hurt myself, I should have died from suffocation. I had not been removed when I was. Mr. Jaynes tells the following touching incident concerning Dr. Brock: "I was sitting behind Dr. Brock and under him. I lay with my mouth close to his cheek, and could feel him growing cold. He asked my name and I told him. He said, 'I am dying; tell my poor wife how much I loved her, and thought of her in my last moments.'"

WASHINGTON, May 2.—A resolution was offered to pay J. A. Sypher \$5,000 for expenses incurred in prosecuting his rights to a seat. Referred to the Committee on Elections by a vote of 85 to 57. Also, a resolution to pay Frank Morey \$4,400. Same reference made.

The House Select Committee on the Decline of Commerce have agreed to report Sheldon's bill subsidizing a steamship line from New Orleans to Mexican ports. DeCrestro's name is inserted as an incorporator.

WASHINGTON, May 2.—The Committee on Credentials of the American Medical Society of the United States, which assembles here tomorrow, at a preliminary meeting tonight, rejected the credentials of about twenty-five delegates from medical societies and colleges of this district, on the ground that they had consulted with colored physicians.

Majority and minority reports will be presented tomorrow, and an exciting time anticipated in view of the fact that the rejected delegates, together with a number of delegates from the North, held an indignation meeting this evening.

WASHINGTON, May 2.—T. F. Moore, special agent of the post office department for Louisiana and Texas, departs for his post tomorrow.

The case of Newsham vs. Ryan comes up tomorrow. Mr. Kerr is absent. The case will be argued by Mr. Voorhies and Judge Ryan in

behalf of Ryan's constituents, and by Stevenson and Burdett in behalf of Newsham.

WASHINGTON, May 2.—House.—A bill was offered to amend the act declaring the railroad bridges of the New Orleans, Mobile and Chattanooga Railroad Company a post road.

The bill allowing \$3,000 a year to the widow of President Lincoln passed. Yeas, 72; nays, 51.

A resolution declaring it to be the sentiment of the American people that immediate reparations should be made by England for vessels destroyed by the Alabama, and requesting the President to press the Alabama claims to immediate settlement; was referred to the Committee on Foreign Affairs.

A joint resolution passed declaring the thirtieth of May a perpetual public holiday, to be observed by the people of the United States in decorating the graves of Union soldiers.

The tariff bill was taken up and progressed as far as the eighteenth page. The bill contains fifty pages. Bills were introduced to enable claimants not connected with the rebellion to enter the court of claims without prior proof as to loyalty, and to enforce the fourteenth amendment, prohibiting any coercion or intimidation by refusing to employ or discharging from employment or otherwise injuring any citizen with the intent to restrain him from the exercise of the rights meant to be secured to him by the fourteenth amendment, or because of his having exercised the same.

The bill makes such offenses punishable by a fine not exceeding \$10,000, and imprisonment not exceeding ten years. It empowers the President to employ the land and naval forces to enforce its provisions, and to disband all combinations.

The bill to pay loyal citizens in the rebel States for taking the United States census in 1860, passed, with an amendment to require proof of loyalty of the person who performed the service, including the oath of the party, if living.

Also, House bill extending the time within which persons elected to office in Texas may take the oath prescribed by the act admitting the State to representation.

Senate.—Numerous petitions for relief from political disabilities were presented.

Mr. Sawyer introduced a bill to enable claimants, in cases not connected with the rebellion, to go into the Court of Claims without proof of loyalty. Referred to the Judiciary Committee.

House.—States called for bills.

A bill passed giving a pension of \$3,000 to Mrs. Lincoln.

WASHINGTON, May 3.—Several Cubans, who were prominent in the insurrectionary movement, have lately made overtures to the Spanish minister in this city, in order to come to a direct understanding with his government, through him, preparatory to their giving up the contest. No definite conclusion has been reached, but it is understood that a most conciliatory disposition was manifested by the Spanish minister.

WASHINGTON, May 3.—It is the intention of the House to dispose of the remaining Louisiana contested election cases this week. Ryan will speak in his own behalf. Forney, this morning, comes out in favor of striking Newsham an exception, and advocates his seating.

The President has returned, and a full cabinet meeting was held at noon.

General Jordan, it is expected, will arrive here on Saturday, as the accredited representative of the Cuban insurgents.

To-morrow will be observed as a day of prayer throughout Maryland, on account of the recent Richmond calamity.

The President to-day signed the following bills: A bill to extend the time thirty days within which persons elected to office may take the oath prescribed in the act entitled an act to admit Texas; joint resolution to provide for the survey and estimates of cost of removing obstructions from Bayou Teche, Louisiana.

WASHINGTON, May 4.—Forney, this morning, announces a coming caucus of Radical Senators, to take measures for conducting the political campaign, particularly with reference to the Southern States, where the Radicals fear Conservative success.

NEW YORK, May 4.—Sales of cotton for June delivery are reported at 21½c.

Receipts of cotton are estimated at fifty-five thousand bales; receipts

same time last year, twenty-two thousand.

Prominent banking houses are selling cotton short.

Sterling is in moderate demand. Duncan, Sherman & Co.'s rate for sixty-day bills on London is 94.

FOREIGN.

ROME, April 11.—The following highly important document has been adopted by many of the bishops in attendance at the Ecumenical Council, and presented to the Pope, on the subject of infallibility. The paper is headed by the name of the most Reverend Archbishop Purcell of Cincinnati—a fact which gives its promulgation, if possible, additional importance:

Most Holy Father: Humbly prostrate at the feet of your holiness, we most earnestly supplicate that the question on the definition of the infallibility of the sovereign pontiff as a dogma of faith may not be proposed to the Vatican Council.

Among other reasons of this supplication we beg to adduce only three, which appear to be sufficient:

1. Because the discussion of this question will evidently show a want of union, and especially unanimity among the bishops.

2. Because on account of the circumstances in which we are placed in countries where heresies not only exist with impunity, but are dominant, this definition, instead of attracting, would alienate those whom we seek by all Christian means to lead to the true fold of Christ.

3. Because we anticipate endless questions will arise which may interfere with and prevent the work of our ministry, and cause the fruits of this council to be lost to those who are members of the holy Catholic Church. Having laid bare our hearts and sincere intentions, we implore Almighty God to avert all evil from the church, and that he may illumine and direct you with his Holy Spirit.

J. B. Purcell, Archbishop of Cincinnati.

Peter R. Kenrich, Archbishop of St. Louis.

John McCloskey, Archbishop of New York.

G. Errington, Archbishop of Trebizond, (in part.)

Thomas Connolly, Archbishop of Halifax.

Richard Wheelan, Bishop of Wheeling.

Augustine Verot, Bishop of Savannah.

James R. Bayley, Bishop of Newark.

John Sweeney, Bishop of St. John, New Brunswick.

Bernard McQuade, Bishop of Rochester.

Tobias Muller, Bishop of Erie.

Francis McFarland, Bishop of Hartford.

James M. O'Gorman, Bishop of Omaha, (in part.)

James Rogers, Bishop of Chattanooga, Canada.

Michael Domenie, Bishop of Pittsburgh.

Patrick Lynch, Bishop of Charleston.

Thaddeus Binat, Bishop of Monterey.

David Moriarty, Bishop of Kerry and Agadol.

William Clifford, Bishop of Clifton, England.

Edward Fitzgerald, Bishop of Little Rock.

John Leahy, Bishop of Droimore.

John Hennessy, Bishop of Duquaque.

Patrick Fochan, Bishop of Nashville.

John Hogan, Bishop of St. Joseph, Missouri.

John Henni, Bishop of Milwaukee.

David Bacon, Bishop of Portland.

Joseph Melcher, Bishop of Green Bay.

Ignatius Mark, Bishop of Sault Ste. Marie.

DUBLIN, May 2.—Cardinal Cullen has issued another pastoral letter, renewing his condemnation of Fenianism and Freemasonry, and reproaching Mr. Newdegate's Parliamentary measure for an investigation into monastic institutions.

ROME, May 2.—Cardinal Antonelli in his reply boldly tells M. Darn that the Pope declines to submit the French note to the Ecumenical Council. The prelates opposed to infallibility, and who absented themselves because that dogma had been passed upon by the council, have been communicated with by telegraph, and urged to return to Rome.

LONDON, May 2.—It is intimated that General Lindsay, who commands the expedition to the Red River country, will remain there as Governor of the Northwestern Territory after order is restored.

PAIS, May 2.—The Journal Offi-

ciel contains publication addresses presented to the emperor, congratulating him on the discovery and frustration of the conspiracy against his life. The person arrested yesterday on the race course is an Englishman, and proves to be insane. He had nothing whatever to do with the conspiracy.

A number of bombs have been seized at the foundry of M. Lepay. An order had been received there for four hundred bombs, but owing to the strike, only twenty-two had been delivered. The police continue to make arrests and searches in connection with the conspiracy.

LONDON, May 2.—A dispatch from Florence, just received, confirms the report of the assassination of the Italian Consul Pappaleone at Buenos Ayres.

SEVENTHAMPTON, May 2.—The steamship Hermann, which arrived to-day from New York, reports that on the tenth of April she passed a wreck painted black, with white stripes around the stern, deckhouse painted yellow, and foremast, which was still standing, white. She was evidently a bark.

PARIS, May 2.—Public meetings in different parts of Paris yesterday were very exciting; some were consequently dissolved by the authorities. In many instances the audiences departed amid shouts of "Vive la Republique." No rioting occurred. One of the Radical journals this morning published a document pronouncing the expulsion of the Italian banker Corniselli, for violation of the country's laws, to be done in the interest of a political party, and the protest is signed by M. M. Arago, Crémieux, Jules Favre, J. Ferry, Peletan, Jules Simon, and many others of the equally known Radicals.

Ecole de Medicine was reopened to-day. Dr. Tardieu was present, and delivered his lecture without interruption, owing to the great precaution taken by the authorities; but on leaving the college he was insulted by a crowd of students in the streets, and was compelled to call the police for protection.

At LaCrenot yesterday, as a leader in the last strike was being arrested, the workmen attempted to release him, but did not succeed. Nine of them were made prisoners. Several of the soldiers were wounded during the struggle.

Bishop Evereux died while on his way home from Rome.

Carniselli, the Republican banker expelled from France, has gone to Geneva.

LONDON, May 3.—The House of Commons defeated the bill for the investigation of nunneries, but passed a bill for a committee to investigate monastic property.

Several amendments to the Irish land bill were defeated.

LONDON, May 3.—Dispatches from India report that a rebellion has broken out among the Khirgish tribe, on the shores of the Caspian sea.

Dispatches from Athens state that M. Smolenski has been appointed to succeed M. Sontzos as minister of war.

The troops are still hunting for the survivors of the band of brigands who murdered the members of the foreign legations.

DUBLIN, May 3.—The Freeman denounces Disraeli's new novel, "Lathair," for gross immorality.

LONDON, May 3.—In the House of Lords a movement for a select committee on the renewal of the commercial treaty with France provoked a long discussion. It was opposed on the ground that a discussion would alarm France.

PARIS, May 3.—The following is a description of the infernal machines which were captured at the house of the conspirators against the emperor's life:

They resemble quills; the ring is divided into several small chambers, each of which contains a vial of nitrate of potash. Percussion caps were ingeniously fitted and slightly raised from the surface, so that in falling upon any hard substance the machine is nearly certain to explode. A ring is attached to the periphery to aid in throwing the missile adroitly.

La France says that the recently discovered conspiracy makes the amnesty of forty-two persons now in custody improbable.

Some disorder, but no violence, has occurred at the public meetings.

PARIS, May 3, P. M.—A serious riot occurred yesterday at Quenit, caused by the arrest of a member of the International Society of Workingmen. Two thousand workmen attacked the National Guard and gens d'armes stationed around

the prison. The guards held their ground, though a number were wounded.

The prefect, commanding general and procureur came to their relief with a detachment of regular troops, when the mob was dispersed and order restored.

The prefect and general held a review to-day, at which they thanked the troops and National Guard for causing the laws to be respected.

M. Olivier has addressed a letter to the *Moniteur*, in which he assures the editor that the government will not fall into the policy of reaction, though obliged to take oppressive measures against its enemies. He hopes this frank answer will dissipate the fears expressed by the *Moniteur*.

Rappel publishes a manifesto from Garibaldi to the French army, calling on soldiers to raise the flag of revolution. The police are searching for M. Ballot, who they say is implicated in the conspiracy. Ballot was an officer of Garibaldi's, and is a friend of Gustave Flourens. The maker of the bombs seized by the police explains that they were ordered for America, and it was represented that they were to be used as wheels for patent velocipedes.

MANCHESTER, May 3.—At a meeting of the Chamber of Commerce, last evening, much satisfaction was expressed at the production of cotton, which is now commensurate with its consumption.

MAISELLES, May 4.—The chiefs of the International Workingmen's Association here have been arrested; also a prominent person who escaped from Paris.

COPENHAGEN, May 4.—The present council promises to promptly submit to the delegates the reasons for the delay of the ratification of the St. Thomas treaty, on the part of the United States.

LONDON, May 4.—The Marquis of Bute has purchased the *London Sun*, which hereafter will advocate Catholicism.

The *Times*, discussing the plot against the emperor's life, says the most remarkable thing about the plot is its opportuneness for official electioneering.

PARIS, May 4.—It is asserted that M. Thiers will advise Frenchmen to vote "no." The emperor's proclamation is in the hands of every voter.

The committee in favor of the plebiscite issued their last address, declaring that electors must set aside by a strong vote the irreconcilable majority which resorts to bombs and infernal machines.

PARIS, May 4.—The committee's manifesto concludes: "You must go to the polls next Sunday, and vote as in 1848 with banners flying, and shouting 'Vive Napoleon.' If you desire liberty, order, stability, prosperity, you must vote for plebiscite."

LOSS OF STEAMER ANNIE WAGLEY.—Mr. D. M. Shapley, carpenter on board the steamer Annie Wagley, arrived here last evening, from Lafourche Crossing, on the line of Morgan's Louisiana and Texas Railroad, and informs us that the steamer Annie Wagley, Captain O. L. Blanchard, which left this port on Saturday last, for Lockport, struck a log on Sunday night, between nine and ten o'clock, opposite Labadieville, and, notwithstanding all efforts of the crew with syphons and bilge pumps to keep her afloat, sank after reaching the shore. While settling down she slid off to the channel of the bayou, and in so doing caused a lamp in the captain's room to topple over, which set her on fire, and soon consumed all that was left of her above the water. The boat and cargo are a total loss. We regret to say one life was lost. The chambermaid, in trying to get ashore with the balance of the crew, fell overboard from the sinking boat and was drowned.

The Annie Wagley has been engaged in the Lafourche trade for many months past, and was only chartered by Captain Blanchard. Captain M. Kenison was the owner, and we understand had her insured, but for what amount we did not learn. Our informant also stated that the crew had lost everything they had with the exception of what they had on, and having no money by which they could defray their expenses by rail to the city, they called on Captain Blanchard, who made application to an agent of Morgan's Louisiana and Texas Railroad for transportation for himself and crew to the city, stating the condition he was placed in, etc., when the agent informed him that he had no authority to net in the matter; where-

upon Captain Blanchard managed to procure enough to pay the fare of himself and crew to the city.—*Times*, May 3.

General Conference Business.

MISSIONS.—Reference was made last week to the missionary and Sunday school societies as connected with our church. Waiving details and argument, we may do no more than indicate the outlines of what was referred to. The zeal of the church in the Sunday school and missionary interest should not be abated, but rather increased. It is the organization which should be considered. There is a way for both the missionary adjunct and the Sunday school appendix to be absorbed in the church, and thereby give symmetry simplicity and efficiency in all the operations of the church. By transferring the work, peculiar to the present boards of managers, to the College of Bishops, and constituting the presiding elders the board of managers for an Annual Conference, both men and money will be saved to the church, and no little amount of "fifth-wheel" timber usefully appropriated. By this arrangement all missions in the bounds of Annual Conferences will fall to the care of the latter board, and all others to the former.

SUNDAY SCHOOLS.—In reference to the Sunday school interest, let the ground-work of our church organization be laid with a juvenile and an adult department, with teachers over the one and leaders over the other, and the preacher over both, availing himself of the counsels of the officials in each in his oversight of the interests of each department. When the children are baptized, let them be entered in the juvenile department; this and this alone answers the oft-repeated question—the relation of children to the church. Let the juveniles be graduated from their department into that of the adults when their age, proficiency and experience, in the judgment of the pastor and the teachers, will justify it.

EXTENDING THE TERM.—The time of the pastoral term may be indefinitely extended, provided, 1. The Bishops can reasonably know when changes are necessary. 2. And have the courage to change accordingly. 3. A devotion to our economy which will secure acquiescence in these changes from preachers and people. 4. The limit of the term of a Bishop's oversight of a particular field to four or eight years. If these conditions can be, in reason, safely assumed, we are inclined to believe this to be the best arrangement. The substance of the plan is, to change the preachers on the ground of expediency, and to change the Bishops by law. *Christian Neighbor*.

GREAT REVIVAL AT CEYLON.—There is a great awakening in connection with the Wesleyan missions in Ceylon. This movement has chiefly taken place in the district of Panthura and Morotto, where in five months the conversions are said to have amounted to five hundred and fifty. They began last September in connection with a week of prayer, which the missionaries resolved to hold. Some of the incidents of the movement are characteristic and touching. We read of a notoriously wicked man having been seen in the dark in company with two boys, who were pleading with God on his behalf. In the chapel was seen a little boy on his knees by the side of his father, pleading with tears, with and for him, for several hours, that he might be saved. The latter, it is said, was touched and converted to God. A man comes from a distance of six miles to scold his wife, when she calmly tells him what has happened to her, and he drops down on the floor in anxiety for himself. A woman dreams that the missionary comes to her house and appeals to her on the greatness of eternity. A man dreams that his son tells him that he is infected with smallpox, and beseeches him to get cured. Both become earnest in seeking salvation. The intensity of the desire among the awakened for the spiritual welfare of their relatives indicates one of the best and most blessed features of a religious awakening.

HUMILITY cannot be degraded by humiliation. It is its very character to submit to such things. There is a consanguinity between benevolence and humility. They are virtues of the same stock.—*Burke*.

The soul and body are as springs of two musical instruments, set exactly at one height; if one be touched the other trembles. They laugh and cry, are sick and well together.—*L'aveil*.

The Christian Advocate.

SATURDAY, MAY 7, 1870.

THE TWO WORKERS.

Two workers in one field
Tolled on from day to day;
Both had the same hard labor,
Both had the same small pay;
With the same blue sky above,
The same green grass below,
One soul was full of love,
The other full of woe.

One leaped up with the light,
With the soaring of the lark;
One felt it ever night,
For his soul was ever dark;
One heart was hard as stone,
One heart was ever gay;
One worked with many a groan,
One whistled all the day.

One had a flower-clad cot
Beside a merry mill,
Wife and children near the spot
Made it sweeter, fairer still;
One a wretched hovel had,
Full of discord, dirt and din,
No wonder he seemed mad,
Wife and children starved within.

Still they worked in the same field,
Tolled on from day to day;
Both had the same hard labor,
Both had the same small pay;
But they worked not with one will,
The reason let me tell—
Lo! the one drank at the still,
And the other at the well.

CHINESE ORPHAN SCHOOLS.

SHANGHAI, CHINA, March 12, 1870.

Mr. Editor: Allow me again to trouble you with a few lines. I have to acknowledge the receipt of another appropriation of one hundred and fourteen Mexican dollars, to be divided between Brother Allen and myself for schools, from the Felicity street Sabbath school of New Orleans; at least we presume it to be from that Sabbath school. Please say to them they have my heartfelt thanks for the interest they have manifested in the education of these poor deluded Chinese children. There are twelve little girls under instruction, some eight of whom have been at school near two years. They are all improving rapidly, and are learning the word of God and the story of the cross. I trust all these children in the Sabbath school remember these heathen girls in their prayers to God, that he would direct their minds and hearts to seek the Lord Jesus. We have great hopes of their learning to love God, and becoming humble followers of the Lord Jesus. I see by the last report of the Mississippi Conference that there are now one hundred and twenty-three Sunday schools within the bounds of the Conference. I do not know how many Sabbath schools there are in the Louisiana Conference.

Now I propose to establish two orphan schools in Shanghai, a male and female, the Lord prospering the good work, which, I trust, shall redound to the glory of his name and the good of these people. I have already in hand some funds for the purpose of building, and I expect from my Conference, by the next mail, a further sum, which, when it arrives, will be some two hundred and fifty Mexican dollars or more—together with what I have on hand, will be between four and five hundred Mexican dollars. I now propose this plan, which, I hope, will be adopted. There are one hundred and twenty-three Sabbath schools in the Conference. Let each Sabbath school contribute the small sum of \$15 currency per annum, and we shall have the sum total of \$1,845 currency, or about \$1,200 in gold or Mexican dollars. That sum sent to me will support thirty boys for one year, giving them their food, clothing and teaching. Let the Sabbath schools of the Louisiana Conference do the same, and they can aid in the support of the same number of girls. By this means the children will be interested, and know what they are doing. At present the sum which is sent Brother Allen and myself from one of the Sabbath schools in New Orleans would more than support two of these boys, one in Brother Allen's school and one in mine. Will not our Christian friends undertake this noble work? I am sure when once you set the ball to rolling it will not stop. Our young people want something of that sort to interest them in the salvation of the heathen.

A Sabbath school in Baltimore sends us enough to support one boy.

or girl each year. It may be they will continue their subscription. I hope they will, and I hope others will follow their example. It may be there are some of our wealthy Sabbath schools who would like to send enough each year to support one boy or one girl. They are to be orphan children, and are to be trained up for usefulness in the church. Please let me hear at once from you on this subject. My dear friends, I shall never cease to talk about these schools until you take it in hand and help us. Will you help us now? Commence the work at once, and send the money to Rev. H. H. Montgomery, Sharon, Mississippi, or to Rev. J. C. Keener, and let them know where it comes from, and where it is to go. Do not delay one day about it. I send the *Missionary News* and the *Heathen Woman's Friend*. Can we not have such a publication or publications? It would be the means of doing a great deal of good. I hope some one, some good brother or some good sister, will commence such a publication immediately. Hoping I may hear some good news about these things, I remain yours in the bonds of Christian love.

J. W. LAMBETH.

Short Method with High Churchmen.

Mr. Editor: I have just completed a re-reading of the trenchant articles from the pen of Rev. Dr. Evans, of Savannah, Georgia, which were first published in the *Southern Christian Advocate* in 1868, and are just out of our Publishing House at Nashville, Tennessee, in the form of a pamphlet of eighty-eight pages.

I have read the whole of this controversy, from Bishop Beckwith's sermon on "The Unity of the Church," preached by him in Columbus, Georgia—and which was the cause of the controversy—to the last reply of Dr. Evans to the fourteenth letter of the Bishop's shoeing-horn, Rev. Mr. Fulton, of Columbus, Georgia.

According to my recollection of those letters of Mr. Fulton, Dr. Evans deals, as he is only capable of doing, fairly and logically with his opponent.

I am sorry he has condensed so much, and yet, when I see the arguments which he has chosen as his tools, I see no need of making it a long job. You have heard of a weapon which "is sharper than any two-edged sword," and of "wisdom which cometh down from above," but in these brief articles of Dr. Evans you can see how these things are used by a skillful tactician.

At the time the fifteen letters of Rev. Mr. Fulton were going through the press, I read each one, beginning at number one and continuing to number fourteen, taking notes as I read.

I had hoped that Dr. Evans would demolish Mr. Fulton in strict accordance with the rule by which he wrote; not that I wished Dr. Evans to come down to Mr. Fulton's senility and low personalities, but that I wanted to see a little of the practical working of the "lex talionis." Having seen the peculiar beauty of Dr. Evans' style, however, I give in, and now profess to be "loyal to the core" as regards "low personalities," in which a certain class of disputants delight to deal. I hate them. Indeed, it is only by comparing the good with bad that we can determine upon the distortedness of the one and the symmetry of the other. The style of these writers affords a fine contrast. But herein is not the only beauty in Dr. Evans' pamphlet. He avoids all low hits at his antagonist, and at the same time grants to him all sincerity. He deals with him sincerely and scholarly. Nor is his scholarship that which is displayed in "Vashti," the poor self-made "grass widow" of Miss Evans, but that of the Bible—pure, unassuming, logical. His arguments prove it; but those arguments are put forward in "plain English."

I have been a great deal among a certain class of public men, who delight in slaying men with their own weapons. Lawyers, you know, are fond of that; but I have never seen any execution of that kind so effectually done as Dr. Evans has done

it in this case. With the weapons of the Protestant Episcopal Church, the doctor runs it back to the Council of Nice, and, with its own spear, nails it to the wall. Individual right to decide a point is emphatically denied by her. She yields to nothing but the decisions of an Ecumenical Council. There has been no such council for nearly fifteen hundred years. She is not more than three hundred years old, and hence has not been vitalized or canonized by twelve hundred years.

If the Anglican Church had never been in the Romish Church, if the Bishop and Mr. Fulton could go around the Roman Catholic to get to the Grecian Church, there might be some hope for the Bishop; but as it is, his case is hopelessly lost.

What a pity that Macaulay wrote an history, or that Hallam or Mosheim wrote histories. Henry the Eighth could read history as it had been written, but did not read it as it was to be written, and I so conclude, because if he had read it as it was to be written, and has since been written by many historians, he would have managed his church matters in a very different way.

It is a great misfortune to the Episcopal Church that the canons of the Nicene Council were violated in the ordination of their first Bishop (?) The source whence all order and succession must come is out of order!

"Alas! for the rarity
Of Christian charity
Under the sun."

By their own laws the Protestant Episcopal Church is unchurched, and would gladly unchurch all beside.

But I forbear. Let these words of wisdom, words of sharp reproof to bigotry, written by Dr. Evans, go to every house. Let the clamor for union be forever hushed, and prosecuting return to him from whom it came.

Let Methodists be "steadfast, unmovable, always abounding in the work of the Lord, for as much as they know, their labor is not in vain in the Lord."

Respectfully, etc.,

J. A. PARKER.

MILTON, FLA., APRIL, 1870.

THE FRUITS OF GAMBLING.—Every winter gambling rages like an epidemic in this city. Thousands come from the interior, and many of them are either veterans at the business, or they are in just the condition to become victims. Happening not long since into a prominent store, we found that the book-keeper was under police surveillance, he having just been detected in a defalcation amounting probably to some thousands of dollars in all. He had been visiting gambling houses, first as a spectator, and then as a gambler. He staked his own money and lost. Then he staked his employers' and lost that. If he had not been detected he would have gone on staking his employers' money until the latter would have been ruined. The number of such defalcations, which never get to the ears of the public, is very great. When a clerk, book-keeper or other young man holding a position of trust, goes into a gambling house as a spectator, he is more than half gone. The robbing of his employer is only a question of time. The one radical step taken, he will take another. There are scores of persons serving in these relations of trust, who frequent gambling houses now, not one of whom would be trusted were the facts known to their employers. If a young man is so far infatuated as to become the witness of games in a gambling house, he will be more infatuated and try his luck at the gaming table. Having lost his own money, he will become still further infatuated, and will stake his employers' money. If he loses he is ruined. The young man who goes to look on in a gambling den, goes there to rob his employer. He will do it none the less certainly that he is not conscious of any such purpose. There must be a law of restraint strong enough to keep him away from such dens and cause him to detest the whole business, or failing in this, he will fall an easy prey to those whose business is robbery and ruin.—*The Pacific*.

A NOBLENESS and elevation of mind, together with firmness of constitution, gives luster and dignity to the aspect, and makes the soul, as it were, shine through the body.—*Jeremy Collier*.

If the way to heaven be narrow it is not long; and if the gate be straight it opens into endless life.—*Beveridge*.

Other Methods of Travel in India.

BY BISHOP KINGSLEY.

In a former number I have named some things which strike an American traveler as novelties, but which by long familiarity cease to be so. In this, I propose to enlarge the catalogue.

And first, the methods of travel enumerated in my last, by no means exhaust the subject.

In addition there is the babbli, which consists of a cart drawn by bullocks. This with the rich natives is a very stylish way of traveling. The carts are covered with a rich canopy of gorgeous colors, and trimmed with gold. The bullocks used for this kind of traveling are much more fleet of foot than the cattle of our own country. They are usually of a deer color—have a high hump on the fore shoulder, are very compactly built, have slim straight limbs, and are really beautiful. They trot while traveling like our horses. I have seen in Bombay, the vast crowd of people returning from the races on Saturday night, where hundreds of these teams competed with as many horses in trotting through the streets. The bullocks hold their own very well in company with horses. The driver sits on the tongue of the cart between the bullocks, and guides them by means of reins put through their noses.

Europeans also make use of this kind of team for their marching, as they call it. This marching is a method of traveling with tents, which are also hauled by bullocks, or carried on the backs of camels and elephants. In this way the missionaries itinerate four or five months in the year, pitching their tents near some native village, and preaching for a few days to the people, and then removing to another town to repeat the same operation. This tent life, during the winter season, tends to reconvert those who, as all do, become very much debilitated by the terrible heat of the hot season. Civilian and officers of the army, all avail themselves of the advantages of tent life during the cool season, in so much that it is said all India live in tents for four months each year. This applies only to the foreign population.

Another method of traveling is on the backs of elephants. I have tried this in several instances in my journeys through India, and the more I have got accustomed to it the better I have liked it. An elephant walks faster than a horse or camel, and is more sure footed than either. They are saddled with a howdah, a kind of chair that will accommodate several persons. But the most common method is to put a huge mattress on the animal's back, and make it fast by straps, and set flat down on this cushion in true oriental style. A native drives the elephant by setting astride his neck, just behind his ears, and he directs the course of the animal by punching one ear or the other, pricking the left ear when he desires the animal to go to the right. The elephant is very cautious in crossing a bridge, or going over marshy ground, and will carefully try the path before him before venturing his weight where there is any danger. I have occasion to notice this repeatedly. On great occasions, like the late arrival of the Duke of Edinburgh, sometimes as many as five hundred elephants are seen together. I have seen fifty at a time. These animals are used by the Europeans for tiger hunting, which has become as much of a mania among the officers of the British army in this country as baseball has among a class of Americans. But the elephant sometimes becomes frightened and then the rider is very likely to come to grief. To see a caravan of elephants moving off, each carrying his own provision, consisting of corn stalks and other similar coarse fodder, is a sight that impresses an American.

Another method of traveling is by riding the camel, and to me a very unsatisfactory method. The brute seems never to be satisfied, and never knows when he is well used. He will look round back at you most complainingly and reproachfully when you are doing the best you can, and will take extra pains to fall down if the road is rough or slippery. I tried riding on one to the great disgust of the camel, and truth requires me to say that the disgust was mutual. But to see a long caravan of these creatures moving silently along by moonlight, each with a rope through his nose, which is fastened to the tail of the one before him, is a solemn, impressive sight, for there seems to be a kind of inherent solemnity about the animal himself, which the silence and darkness enhances. Neither the camel nor elephant make any noise with their feet in walking.

When provoked the camel will bite, and is a dangerous creature. Horseback riding is much resorted to in India so far as I observed, except in ascending the mountains. In going to Nynetel, and from there to the top of Mount Chenier, I had

a horseback ride of some thirty miles; quite enough to satisfy me under the circumstances. The ascent in many places was frightfully steep, and the path such that one false step would precipitate the rider hundreds of feet nearly perpendicular. But the sight at last which is afforded of the mighty Himalaya range from the top of Mount Chenier, will repay all the toil. You then have before you the loftiest mountain range on earth. At your feet, one thousand seven hundred feet beneath you, lies Nynetel with its crystal lake like a jewel on the brow of the mountains. Before you rises in awful majesty the great snowy range with its towering mountain sentinels. You look away upon the plain of the Ganges, nine thousand feet below you, and up to snow-capped domes, twenty thousand feet above you. As the sight suddenly bursts upon you, emerging from a thick forest of trees covered all over with long moss, you seem, as never before, to be standing in the presence of God. The most stupendous works of man dwindle into insignificance in the presence of such a sight as this, and you gaze in mute silence upon a scene of undecipherable grandeur. Thank God for the privilege of seeing this greatest display of mountain scenery on this earth. But words are poor to convey to others the impressions made on one's mind by this awful presence. The natives worship these sublime peaks. I can well imagine how upon their rude, ignorant minds a feeling can thus be kindled akin to religious devotion.—*Chicago Advocate*.

THE MONARCH AND THE INDIAN.—Soon after the conversion of the Indians on the Bay of Quinty, as a converted Indian was passing through the white settlement, he heard preaching in a school house. Being very desirous to learn more about the words of the great Spirit, he went in and took his seat near the door. He listened. "But instead of hearing about the good old Bible, the preacher was highly praising another book more than the Bible, a book he called the Mormon Bible, which he said was much better and plainer than the old one. He then entered into an explanation as to its origin, telling how Joe Smith had dug it up out of the ground, and was inspired to translate it. When the preacher had finished his discourse he gave permission for any one in the congregation to say what they thought of the things they had heard. All sat still, and no white man was found to speak for the Bible, the Indian at length rose up and said: "May Indian speak?" The Mormon preacher replied: "Yes, Indian may speak." The Indian then said: "A great many winters ago the great Spirit gave his good book Bible to the white man, over the great waters. He took it and read it, and it made his heart all over very glad. By and by white man come over to this country, and brought the good book with him. He gave it to poor Indian. He hear it, and understand it, and it make his heart very glad too. But when the great Spirit gave his good book to white man, the evil Spirit try to make one too, and he tried to make it like the one the good Spirit made. But he could not, and then he got so ashamed of it he go into woods, dig a hole in the ground, and then he hide his book. After lying there many winters, Joe Smith go and dig it up. Now, my white brethren, this is the book this preacher has been talking about. Me no believe the Mormon Bible. Me hold fast on the good old Bible, which has made my heart so happy. Me nothing to do with the devil's book."—*Spirit of Missions*.

THE REFINED OR PHILOSOPHICAL VIEW OF IDOLATRY.—Now, let us understand what this idolatry really is. I have met with this objection—"Oh, but you do not know what idolatry is entertained. You suppose these people worship stocks and stones; and I assure you that you are mistaken." I am quite aware of this argument; and I will tell you how the matter stands. The Hindoo does not, I admit, worship a mere stock or stone in the sense of saying, "This is my God, and I worship it." I remember very well—my friend Dr. Watson will remember—that in the very first Hindoo temple which we entered with an intelligent interpreter, when we put the question, the priest said: "Certainly not; I worship the God in the stone." "What was the stone before the God came into it?" we next asked. "It was a stone," he said, smiling. "And what brought the God into it?" "It was the prayer of the priest, and we worship the God in it." Of course, I have proofs of this. I have here, for example, extracted from a pamphlet I have, a lecture given in the Benares Institute, in splendid English, by a man who defends Hindoo idolatry, quoting the poet Cowper, and quoting also from Sir William Hamilton and other metaphysicians, in speaking about the impossibility of forming any idea

of the unseen God, and the necessity of having it symbolized—quoting Cowper's beautiful lines to his mother's portrait, and how this portrait recalled the past. You are quite familiar with the argument. It is the argument constantly applied to the mass and the worship of pictures—that it is not the bread and wine or the pictures which are worshipped, but the unseen Christ in the bread and wine, or the person represented. This is the argument you hear in Hindostan in regard to idolatry. But what I want you to notice is this, that there never was any kind of idolatry except this which was absolutely condemned and cursed by Almighty God. Do not suppose that this refined view, as you may take it, of idolatry is anything different from that idolatry which, throughout the Old Testament dispensation, is condemned by God. The idolatry condemned is seeking to make symbols of the living God, which, instead of elevating God, degrades him—which, instead of opening men's eyes to the invisible, becomes a means of clouding men's eyes to the invisible, so that they lose the spiritual power of comprehending the unseen object. I make this assertion, that the idolatry that is comprehended in the most philosophic system of the Hindoos is neither more nor less than the idolatry against which the living God lifted up his voice—on account of which the people of Israel were cleared out of their land and sent to Babylon in order to be purified.—*Rev. Dr. Macleod*.

PERSIAN SPLENDOR.

Persia seems to have always been the country of pompous monarchies. To-day, although greatly fallen from its ancient splendor, it still concentrates its riches around the throne. Charlin, who visited Persia in the time of Louis the Fourteenth, in describing the wonders of Isfahan, says that the chamber of state was built in the central portion of the royal residence, which, with its gardens and various structures, covered an area of not less than one and a half leagues in circumference. This building was isolated in a central garden, and was divided into one large hall, with three smaller halls or chambers in the rear, in one of which was the throne. It was placed in the center of the room, and was of such a height that the monarch could see the crowd of his subjects admitted into the principal chamber. The walls of the edifice were covered, in the interior, one-half of the distance to the ceiling with white marble, painted or gilt, while the space above was filled with windows, the glass being of various colors. The throne was in the form of a bed, square and very low, covered with cloth embroidered with pearls, and was placed on a platform some three or four feet high, and twenty-four by thirty-six feet square. There the monarch sat, in the manner of the Orientals, with his back and arms supported by cushions, under a canopy, the two front uprights of which were surmounted by a large apple of pure gold. Behind the shah stood four or five young slaves, the handsomest of the palace. When the throne, being too much exposed to the attacks of usurpers, was transported to Teheran, the present capital of Persia, some slight modifications were made in the ceremonies observed at receptions, which tended to remove the person of the sovereign still further from the people, and to add to the theatrical pomp by which he was surrounded. Jambert saw, in our time, Feth-Ali Shah seated on a terrace, some eight or ten feet high, in the form of a stage, at the further end of a hall, ornamented like those of the palace of Isfahan, with arabesques and inscriptions on a ground of white cloth, while the floor of the audience chamber was covered with a cashmere carpet, as rich and as fine as the most beautiful shawls worn by our ladies. The throne, with its white satin cover and cushions embroidered with pearls, was supported with four columns inlaid with enamel and gold. The light entered from the rear, through colored glass, passed over thousands of precious stones, and was reflected in a peculiar manner, behind the head of the shah, by an image of the sun, formed exclusively of diamonds. The monarch wore a robe of white silk, bordered with precious stones, and a giraffe of large pearls, that passed twice around his body. He also wore bracelets set with diamonds, some of which were of immense value. Finally, his belt, sash and poniard were similarly ornamented. This profusion of jewels is a characteristic of Oriental society, where the instability of affairs prompts the possessors of fortunes to invest their wealth in such manner as to enable them most easily to secure it against public and private rapacity.—*Appleton's Journal*.

BEAUTY, though it is a pretty vanity, yet is of a frail constitution, liable to abundance of accidents, and is but a short-lived blessing at the best.—*Jeremy Collier*.

The Christian Advocate.

SATURDAY, MAY 7, 1870.

THE COSMIC EGG.

An exchange thus epitomizes the theories of Huxley and Darwin. It is the first time we have seen anything resembling vermicelli made of materialism.

Upon the Rock yet increase,
Amid a Chaos incubate,
An uncreated Being sate—
Beneath this rock,
Above him cloud,
And the cloud was rock,
And the rock was cloud.

The rock soon growing moist and warm,
The cloud began to take the form,
As though a something would be born—
A form chaotic, vast and vague,
Which issued to the Cosmic Egg.

Then the Being nucleate
Upon the Egg did incubate,
And thus became the Incubator;
And the Egg did alligate,
And thus became the Alligator;
And the Incubator was Potentate,
And the Alligator was Potentator.

TEN YEARS IN ROME.—NO. V.
THE INQUISITION.

The degrees of punishment may be seen in what remains of the prison of the Holy Office at Rome. Lesser delinquents had cells on the ground floor, miserably ventilated and lighted feebly, but still large enough to move about in. A graver class were lodged in a floor below—close, wholly dark cells, and scarce space enough to take two steps in. A lower depth was reserved for the worst kind, and appropriately called "little ease," a misshapen pit wherein there was no place for standing upright or lying at length, where the captive was bent double and fed with just enough to sustain life. In set proportion of weight and number fetters and manacles were added. The worst was an iron girdle from which chains were attached to the legs and arms, the latter being additionally secured by a second chain attached to an iron collar. A staple in the floor kept the miserable captive in one spot. The sworn jailer might not speak to him, however summoned. To no call, or entreaty, or cry of despairing agony might he answer by word or sign.

The disquietude in Rome was so great in consequence of the spread of Reformation that every one was suspected. Cardinal Morone, who had been one of the apostolical legates at Trent, was imprisoned, as was Foscherini, Bishop of Modena. Two more cases deserve special mention. Dr. Thomas Wilson, afterward principal Secretary of State to Queen Elizabeth, took refuge in Rome, to escape the displeasure of Queen Mary. He was informed against for having written an objectionable book on rhetoric, and another on logic. It is true that Julius the Third had granted absolution to all the realm of England, but Dr. Wilson was nevertheless accounted amenable to the Inquisition. He was imprisoned and sentenced to death. But, a few days preceding his execution, Paul the Fourth died, and the inhabitants of Rome gave full vent to their abhorrence of the system. The people, as one man, forced the gates of the prison of the Inquisition, released the prisoners and burnt the building to ashes. With the greatest difficulty they were prevented from wreaking the same fate on the Convent of the Minerva, the abode of the Dominicans, who, more than any order, were active persecutors. The crowd broke off the head of a fine statue of the late Pope, rolled it about the streets for three days, and finally threw it into the Tiber. They sought to treat the Pope's corpse in a similar manner, but it was hastily hidden in a vault. The commissary of the Inquisition was wounded, and his house burnt down. The arms of Caraffa were everywhere defaced, for it was Cardinal Caraffa who was mainly instrumental in erecting the Congregation of the Inquisition. The present building was erected by Pius the Fifth, and an inscription attests the year of its completion, 1563. At that time, a letter conveys the intelligence that persons were every day burnt, strangled or beheaded, that all the jails and places of confinement were full. Pius the Fifth was the first Pope who bore the title of *Supreme Inquisitor*. It has been assumed by all his successors to the present time.

In the destruction of the prison of the Inquisition Dr. Wilson escaped. The second case is still more interesting. Fra Tommaso Fabiano di Miloto, a Franciscan friar, was sentenced December 16, 1564, at Rome, and, I grieve to say, by the excellent and saintly Cardinal Borromeo. He denied the papal supremacy, priestly celibacy, purgatory, the necessity of confession and transubstantiation. This was his sentence: "You shall be walled up in a place surrounded by four walls, where, with anguish of heart and abundance of tears, you shall bewail your sins and offenses." The four walls were built up around

him, leaving sufficient space to kneel down. A small opening was left at the top, for food to be dropped in, and in this place the prisoner was to be kept to putrefy and expire in his own filth. Such a place was found in the Inquisition at Rome, and the soil was analyzed. It proved to be a horrible compost of human bones, hair and filth! In 1855 an English gentleman describes the finding of one of these prisons in Spain. "I had often heard talk in Spain of the *emparedados*, or persons walled up, and doubted about them; but, at length I saw it. About fifteen years ago (1840) the building of the Inquisition of Seville, being in ruins, was inhabited by a poor man, with his wife and child. This last, knocking about one of the rooms, moved a brick in the wall, where there proved to be what is called *un-cámaron*, covering or marking a space in the wall about a yard and a half wide by a foot or more in depth. At the bottom of this place were found, and I saw, the bones of two persons." At Rome there was found, in 1848, the horrible quicklime bath, which certainly excelled in sensation any story of the New York *Ledger* type. It was a square pit about five feet by two and a half. It was entered by a trap door fastened by a spring which gave way at the touch of the foot. The condemned was deluded by hope of pardon, and told to go to the father commissary. His way lay directly over this stone, which at the least pressure gave beneath him. The pit was then filled up with quicklime. In 1848 a basket was found in this cell full of skulls, the skeletons belonging to them being on the floor.

I am glad to relate the escape of Fra Tommaso from his frightful prison. He was subsequently burned in effigy, November 8, 1565.

Throughout northern Italy the progress of the Reformation seemed coincident with that of letters. A famous academy flourished at Modena, and others at Bologna and Ferrara. Maratori speaks of the contempt exhibited by the students toward priests and friars. Among them was the famous Castelvetro, who was ordered to appear at Rome. He obeyed, but, frightened by the aspect of things, escaped from the city under cover of the night. He was excommunicated for contumacy, and died at Chiavenna, 1574. Among the philosophers of this age was Giordano Bruno. He traveled in France, Germany and England, making open profession of the Reformed faith. After a while he returned to Italy, and stopped in Padua, where he thought himself safe from the Inquisition. He was, however, arrested and carried to Venice. Bellarmine was the Inquisitor, and with this most astute controversialist Bruno waged a stubborn conflict. Two years passed, and then the inquisitors unable to overcome his firmness, he was brought into the presence of the cardinals of the Congregation of the Holy Office, and after being degraded from his priesthood, was delivered over to the civil power. He replied to all their statements: "Perhaps you feel greater pain in pronouncing the sentence than I do in receiving it." From the hall of the Inquisition he was conveyed to a city prison, and after a week brought out for execution. The stake was erected opposite the Dominican convent, Santa Maria sopra Minerva. He was solicited again to recant, but in vain, and on a crucifix being brought him, he turned away his head with an expression of great aversion. Thus, on the seventh of February, 1600, one of the first scholars of Europe was done to death. The case of Galileo Galilei belongs to this period, and is too well known to need repetition. I have seen his recantation, forced from him despite his convictions.

Baronius advised Paul the Fifth that the ministry of Peter was "to feed and to kill," and the Pope acted up to it thoroughly. His pontificate is disgraced by cruel persecutions. Among many examples, the following may be cited: About 1595 an Englishman, thirty years of age, met the host carried in procession, and, seized with an utter revulsion at what he deemed blasphemy, knocked the pyx out of the priest's hand, exclaiming: "It is an idol!" Five days after he was led from the prison of the Inquisition back to that spot, where his hand was cut off, and his tongue cut out; then he was scorched with blazing torches, and finally burnt alive.

Want of space compels me to omit the record of the Quietists and Molinists, and we come to the final overthrow of the Inquisition throughout Italy. Resistance was made in all directions. The rise of Freemasonry counteracted the secret society of the Inquisition, and, from attending to heretics, the inquisitors turned to Masons. Clement the Twelfth condemned them by a bull, A. D. 1738, and in 1739 the cardinal vicar of Rome issued an edict, denouncing capital punishment of all Freemasons—detected within the Papal States. When the Empress Maria Theresa, in common with other sovereigns, abolished many

dangerous ecclesiastical privileges, she required the archbishop and the inquisitor in Milan to refrain from prohibiting books. The papist failed to satisfy her, and she abolished his power, and placed it in the hands of the judiciary. The Inquisition was abolished in Parma, February 21, 1769. Similar measures were taken in Tuscany by the Grand Duke Pietro Leopoldo. Ferdinand the Sixth, king of the Two Sicilies, abolished the Sicilian Inquisition in 1782, declaring "that it had ever been hateful to the people, disobedient to the sovereign, and hostile to the laws." The vice-roy Caraccioli entered the hall of the Holy Office in state, and ordered the prisoners to be set at liberty. The ill-gotten wealth of the office was forfeited to the crown. The iron cages containing human skulls were taken down and split asunder, in order that every trace of the odious institution might be blotted out of memory. The archives were ordered to be burnt, and the ashes scattered to the wind. In 1809, in the pontificate of Pius the Seventh, the French troops entered Rome. They demolished in part the prison of the Inquisition. But on the fall of Napoleon the First, when the Pope returned to Rome, it was revived in full force, and at this moment a cardinal enjoys a salary of five thousand scudi per annum as its prefect.

Finally, for the third time, on a bright June morning, in 1848, while yet the tramp of pontifical and cardinalial carriages was burning in the Piazza di S. Pietro, an armed crowd presented themselves at the gates of the Inquisition. They were soon battered down, and a rush of awe fell on the assemblage as it entered those sinister portals. There was nothing very revolting, however, in the pleasant, luxurious apartments of the custode, abodes of secret licentiousness and cunningly devised cruelties. The contents were quickly destroyed, and a pike being thrust through the two portraits of Paul the Fourth and Pius the Seventh, they were solemnly consigned to the flames amid general execrations. The instruments of torture humanely destroyed by the French had not been restored, except the cudron previously described. Down below, in cells not eight feet square, dripping with damp and overrun with rats, two prisoners were discovered alive, half demented with silence, darkness and famine. They were unable to speak or comprehend that they were free. With tears in their eyes, and low murmurs of pity, the crowd conducted them up stairs on their shoulders, first discovered was a man, about thirty-five years old, and still bearing traces of beauty and comeliness. Her monastic habit was so worn and ragged that it scarcely covered her. She had had no change of linen for over five years, and in winter and summer the same food and bedding. The former consisted of a loaf of black, sour bread per day, weighing a pound, and at noon a small paninquin of stewed haricot beans. The bedding was laid on an erection of brick, and consisted merely of a heap of straw perfectly rotten and mildewed, with a blanket in like condition. The other prisoner was a bishop, and still wore his faded purple soutane. He was nearly seventy, and it was a pitiable sight to see his wretched, unrecalled age, and the settled expression of hopeless despair on his countenance. His left side was paralyzed. The multitude that only a few hours before shouted, "Down with the priests!" knelt and kissed the old man's hand with passionate fervor. They hoisted the two victims in chairs, and carried them through the city, with the hair and other relics of torture. Dreadful as the sight was, it was a full proof that the Court of Rome does not consider it safe to follow its own rules, or, instead of two, how many more might have been found.

The Roman Parliament decreed the erection of a pillar opposite the palace of the Inquisition, to perpetuate the memory of its destruction. But before that or any other monument could be erected, the French army besieged and took the city. With the gallant fight at the gate of San Pannazio terminated the hopes of freedom, the significant manifestation of the Roman Committee announcing five days afterward, "By the help of treachery the enemy has conquered. Romans, wait patiently; the hour of freedom will come."

As he was led by the excited crowd back to the Vatican, the Pope said to Monsignor Borromeo: "It is said, 'put not your trust in princes'; but I would say, Princes, put not your trust in the people." A true reading of events. The Romans have been too much trifled with to be trusted; consequently the first act of his restoration was to restore the palace of the Inquisition, and to place within its walls his most prominent opponents.—*The Galaxy*.

OBSERVED duties maintain our credit, but secret duties maintain our life.—*Flavel*.

THE CITY OF BOSTON.

ONLY ONE TENABLE THEORY.—ADMIRAL BELCHER'S OPINION.

The steamship *City of Boston* left New York on the twenty-fifth of January, and was off Halifax on the twenty-eighth, since which time nothing has been heard of her. She has been out sixty-seven days, and looking to the large number of steamships now plying between Europe and America, and to other circumstances, we fear it is hoping against hope to expect any tidings from her. Had the *City of Boston* been a vessel whose length exceeded her breadth by more than ten to one, we might have still looked for her. With her proportions she would be a manageable vessel under canvas, and being full rigged as a ship, with square yards on all three masts, she ought to have worked her way into the tracks of ships weeks ago, unless dismasted; and, even in this disabled state, she could not have knocked about the Atlantic so without being seen by those on board some of the hundreds of vessels navigating that ocean.

A strongly built ship like the *City of Boston*, whose length was but equal to eight breadths molded, if her lower masts only were left standing, and her rudder not carried away, should have got on the lines of trans-Atlantic steam navigation and received assistance before this. Without masts, rudder or screw propeller, the gales would have drifted her where she must have been fallen in with, unless she foundered from the violence of the winds and waves, by heavy and continuous laboring in the trough of the seas. In this case her boats would be adrift, and—if they lived in the sea—picked up. The Atlantic is traversed by so many steam lines that it is almost impossible for a large steamship to knock about for more than two months without being reported.

The *City of Boston*, if afloat, would, in our opinion, have been signalled at sea and reported before this. Looking upon her, therefore, as a lost ship, the cause must be looked for, and we think it is easily found. The *City of Boston*, on the twentieth of January, was off Nova Scotia, and on that night a hurricane set in from southeast to southwest. As already mentioned in this journal, Captain Bulmer, of the *Helena* Marion, on arrival at Spithead, reported that he left New York with the *City of Boston*, that his ship fell in with the hurricane, and while he was lost his ship's foremast and jibboom, although no canvas was on her at the time, and his new sails. This hurricane was a great calamity in that part of the Atlantic for several days, so that the *City of Boston* could not have escaped it. In the *Shipping and Mercantile Gazette*, of February 23, the following appeared in the maritime intelligence:

"HALIFAX, Feb. 11.—The master (Hackett) of the *Charles Tupper*, schooner, arrived here, but just reported that on the thirty-first of January he saw, to the southward of Sable Island, a steamer, which threw up rockets three times and shifted her position round all points of the compass, so that he could not make out her position; at eight P. M. it was latitude forty-three degrees thirty minutes."

On the eleventh of February the *City of Boston* was then behind time, but the terrific weather alone was enough to account for a few days overdue. When fears began to be entertained the paragraph just quoted was canvassed; and so confident were all parties that the steamer in distress could not have been the *City of Boston*, that the report was discredited. It was stated that search had been made for the wreck between Sable Island and the main land, but none could be discovered. Captain Hackett, however, it will be seen, speaks of the southward, which would be to seaward of the island. Bearing in view the fact that the gale veered around to northwest, the steamer in distress would be about where the *City of Boston* might have been expected to be fallen in with on the thirty-first, particularly if the machinery broke down, and the captain determined to put back.

The only theory, therefore, that we can revert to as a last resort, is that of a collision with ice in heavy weather. Larger quantities of drift ice and bergs have been encountered in the Atlantic this season than for many years past, and the ice has got detached, and thus fetched a way to the southward and westward much earlier than usual.

There is no great stretch of imagination required to conceive that the *City of Boston* may have received such injury from the ice as to cause her to founder rapidly. She was certainly one of the first vessels this season to cross when the ice appeared, and may have been caught in a dangerous position for ships and boats. As to the ship being in such a high latitude as to be out of the drift or eastward navigation of the Gulf stream, where she would find but little, if any, current

to carry her toward Ireland or the Azores, we give no credence to it. If the *City of Boston* did not go down in the hurricane of the thirty-first January, or founder from contact with ice, she would have been heard of before this; and her passengers and crew are, we fear, beyond human aid.

Vice Admiral Belcher, of the British navy, and an officer enjoying a high reputation for knowledge in reference to storms and prevailing winds at sea, has written a letter to the *London Times*, stating that he has not yet given up all hope of the safety of the steamer *City of Boston*. Admiral Belcher says that if the *City of Boston*, by reason of the icebergs, was obliged to sail on a southeasterly course, she may have fallen into the "horse latitudes," where she is now detained. He cites the instance of a transport which was detained one hundred and fifty days in the regions mentioned, and believes that, if the *City of Boston* has been caught in the region of calms, she will at last, by means of the trade winds, find her way to some port of Florida or the West Indies. The region of the trade winds extends on both sides of the equator to twelve degrees of latitude; between the trade winds and the poles there are belts twelve degrees broad where calm prevails or light tantalizing breezes blow. This region on the north side of the equator, which had to be passed over by the vessels with live stock aboard, sailing from New England to the West Indies, was called the "horse latitudes," in consequence of the large number of horses thrown overboard from the failure of water and bay during the long calms.—*Mitchell's Maritime Register*, April 2.

THE ORATOR OF SPAIN.

BY REV. J. I. BOSWELL.

* Of Castelar's early career little is known. He was for some years professor of history in one of the universities, and has traveled extensively through Europe. The revolution called him into active life, and as a member of the Spanish Cortes he soon achieved a world-wide reputation. The first great debate in which he took a prominent part was in regard to religious liberty. It was proposed to insert an article in the constitution to the effect that, though the nation should maintain the Roman Catholic religion, yet the public and private exercise of every other form of religion should be guaranteed, "without any other formality and right." So important a measure could not pass unchallenged. A great multitude assembled to hear the debate. The nobility, the clergy, and the representatives of the large cities who form the Cortes or Parliament of Spain, were in their places. Rev. Father Manterola spoke at some length and with much feeling against the measure. He spoke like a true representative of the Roman Catholic Church and of the middle ages. He was clearly frightened at the prospect of allowing liberty to worship God. He feared that "religions of every kind would introduce themselves in Spain, bringing with them their sacrifices of human blood," and, blind to the facts of history in other nations, gravely uttered this solemn warning: "If Spain cast herself into the arms of 'free worship, abandoned by God, she would utterly perish, and her name would disappear from the list of civilized nations." It is a pity indeed that he did not point to Germany, England and the United States as examples to prove the truth of his prophetic utterances!

Castelar rose to reply. He aimed to show, by the nature of the case and by the facts of history, that the church should not control the civil powers which belong to the State. "The State," he boldly said, "has no religion; it cannot have any; it ought not to have any." Independence of church and state without antagonism was, he held, the true position for Spain to take. Very finely did he show that the free people of England and Switzerland kept the "festival of Sunday," while the "enslaved" people of Spain and France made it a "sabbath," a day of social dissipation. We cannot refrain from quoting a few sentences which illustrate the clearness and force of Castelar as a debater: "Senor Manterola has asked what I have to say of the church when she has created great universities. I am just. Once the church was the only intellectual element in the 'chaos' of barbarism. Then were born the universities under the favor of the church. But compare the universities of the sixteenth and seventeenth centuries with the most illustrious of ours—Salamanca, for example. We have retrograded, not because we are inferior in intelligence and in talent to the Germans or the English, but because they acquired before us the great moral treasure of liberty of thought; because they have not remained as we did so long without light in the conscience, buried in the depths of

the Inquisition." Brave words, for a Spaniard to utter before the nobility and clergy of Spain. Certainly the world is moving!

The close of this masterly oration was remarkably eloquent. The effect was wonderful and indescribable. The applause was renewed again and again. Many of the deputies wept in the intensity of their emotion, and it is said—though we doubt it—that the reporters of the press were moved to tears. To crown all, the president, with a tap of his bell, declared the session over, descended from the tribune, embraced Castelar, and kissed him with great enthusiasm on both cheeks!

More recently Castelar has made another important speech. Fearing the revolution might not be complete, but that a wave of popular reaction might reinstate one of the house of Bourbons, he was one of six persons to offer a resolution that not only those of the first but also those of the second branch of the royal family should be forever ineligible to the throne. The anxiety to hear him speak on this question was intense. An eager multitude besieged the doors several hours before the time of the session. The speech—of which a translation is before us—was of great length, and from it we are able to see the faults as well as some of the excellences of the orator. Part of it—the main part—is a historical discussion of the reign of the Bourbons. He shows that from the end of the sixteenth to the beginning of this century, that house fomented revolutions, and that it was its destiny to die by them. "None of the Bourbons," he affirms, "have been such great enemies of the country as the Spanish branch which existed before the revolution." He then hastily cites the mean and wicked deeds of Philip the Fifth, Charles the Third and the Fourth, and Ferdinand the Seventh, and makes an appeal which reminds us of the most celebrated passage in the great Athenian's oration "On the Crown." "These, gentlemen, are horrible records. The thought of them even yet fires our cheeks with shame and our hearts with wrath. By those records I conjure you, heroes of Alcañices, legislators of the country! you who have given to the memories of our martyrs the expulsion of their cruel executioners, the Bourbons, never consent that a Bourbon, a Frenchman, should ever come back to rule again this land of Spain."

It seems strange that after such a speech the Cortes should have voted mine. What may be the future of Spain no man can tell. But we read that England, after bringing one king of the house of Stuart to the block, not many years after welcomed back from exile his profligate son, and crowned him with shouts and tears of rejoicing. We have yet to see whether Spain will follow that example.—*New York Methodist*.

A FRENCH "REVUE" ON WESLEY.—In the *Revue des Deux Mondes*, the greatest literary journal of France, M. de Remusat has written an article on Wesleyanism. Having fallen in with a volume in French on the life of Wesley, written as a prize essay in reply to an invitation by some who thought Wesley ought to be known better among French Wesleyans, the philosopher was induced to extend his reading by perusing Southey's "Life," Stevens' "History of Methodism," Wesley's own "Journals," and other works. The result is a very fair, dispassionate and appreciative paper of nearly forty pages in the *Revue*. His general estimate of Wesley is thus expressed: "Whatever one may think of the form given by our mind to the mysteries of the invisible, there cannot be any better spectacle for the soul than to see how completely human nature can be transformed by a pure idea and a strong will in a healthy conscience. John Wesley is assuredly one of the most perfect models of holiness in active life—that is, of true holiness, of the religious ideal of mankind. It becomes us better, however, to consider in him the man of nature than the man of grace, and to acknowledge in him a union of great qualities, the like of which can scarcely be found unless we go back to the apostolic ages. Luther, with more genius, more imagination, more daring, more of those talents which carry men away, is not so pure, not so simple, not so devoted; in a word, he is not so blameless. The immortal model of the Lutherans and the Wesleys, 'Saul of Tarsus,' superior to both, rises higher among great men; but who knows if his all-powerful energy and impetuosity might not have envied something from the meekness and patience of his humble followers?"—*Sunday Magazine*.

Next to the immediate guidance of God by his Spirit, the counsel and encouragement of virtuous and enlightened friends afford the most powerful aid in the encounter of temptation, and in the career of duty.—*Robert Hall*.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, MAY 7, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—Rev. J. C. KEENER, 112 Camp street, New Orleans, La.
AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.**FOR MOBILE CONFERENCE:**

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

DEPARTURE.

Our editor-in-chief left on Monday for the General Conference. The doctor will be on the ground—quadrant and prepared to furnish us with fresh and discriminative correspondence in his usual style. Our readers, therefore, will be gainers by his temporary absence. Besides this correspondence, the proceedings of the General Conference will be published in full. Persons subscribing for our paper within the coming month, if they desire it, so as to embrace the entire proceedings of the General Conference.

PERSONAL.

Our city has been favored during the past week by the presence of ministerial brethren on their way to the General Conference. Our pulpits were generally occupied by them on Sabbath, and the churches were edified. Dr. B. T. Kavanaugh was with us in labors abundant, and Dr. Marshall also, in characteristic vigor and power. We were particularly glad to greet our conferees of the Texas Christian Advocate, the Rev. I. G. John, looking not older than when we met him at the General Conference of 1866. His editorial and pastoral labors, though severe, seem to agree with him wonderfully. We were gratified again to meet that Nestor of Texas Methodism, Rev. Dr. Alexander, and Brothers McCarver, Lane, Belvin and J. W. Whipple. If those brethren are faithful representatives of Texas, we should judge it to be the healthiest country in the world.

GENERAL CONFERENCE AND THE N. O., J. AND G. N. RAILROAD.—The New Orleans, Jackson and Great Northern Railroad Company, in response to a letter addressed to the president, General Beauregard, by the presiding elder of the New Orleans district, very kindly agreed to pass the members of the General Conference of the Methodist Episcopal Church South, which convened in Memphis on the fourth instant, free on their return, and having paid full fare in going, and having a certificate of membership.

NEW ADVERTISEMENT.—Attention is called to the card of Dr. John G. Angell, who is prepared to perform all operations in dentistry in the most skillful manner. The doctor's office is at 152 Julia street, where he is prepared at all hours to serve his friends and patrons.

He that doubts the existence of mind, by doubting, proves it.—Colton.

"THE PREPARATION."

By this term the day before the Sabbath was known and described. The Jewish Saturday was "the preparation." It was not holy time exactly, but akin to it. The observance of the Sabbath was of such obligation that provisions must be made beforehand. These could not be postponed without entailing either great inconvenience and suffering or guilt. Genuine reverence for the holy day was therefore exhibited by this devout forethought. Those who desired to keep the commandment and to enjoy the blessed rest and spiritual profit of the sacred institution made ready. The afternoon especially was given to this pious forecast, so that by the setting of the sun the sincere Jew was prepared for the duties of the Sabbath. We may suppose that affairs of business were arranged so as to leave nothing for the evening and the morning of the day. Everything appertaining to domestic matters, housewifery, the comfort of the family, was duly attended to, so that the law in its strictness might not be violated. How particular and exacting the law was! "In it thou shalt not do any work, thou, nor thy son, nor thy daughter, thy man-servant, nor thy maid-servant, nor thy cattle, nor thy stranger that is within thy gates." The real observers of the Sabbath were those who began the day before; the Sabbath breakers were those who spent their Saturday evenings, forgetful of the sacred hours which were approaching. Some hours of preparation were absolutely necessary. To neglect this was to make the observance impossible.

The lesson and its suggestions should not be lost upon us. The Christian Sabbath must have its preparation if we would keep and enjoy it. Much must be done the day before, by way of anticipation. The business man will have occasion to remember the Sabbath day on Saturday, if he wishes or expects to keep it holy. The housekeeper will have need of forethought in her department, if she would avoid being careless and troubled about many often a day of worry and unholy toil because no practicable and judicious provisions have been made.

But, apart from the question of mere work, there is a farther preparation of the soul which is most desirable. Could Saturday evening be thus devoted in quiet thought, pleasant reading and cheerful domestic society, mind and body would be fresher and stronger for the duties of Sunday. If earlier repose could be secured on this night there would be less trouble in keeping awake through the services of the morrow. If Saturday night, up to a late hour, has been spent in the toils of business and labor, or in dissipating amusements, a weariness and stupor follow which wholly unfit the mind and body for the house of God. We do not advocate the turning of Saturday evening into a time of devotion exclusively, but it would be well if the soul were put in tune, and adjusted to the spiritual harmonies of the sweet and delightful morn. This spiritual preparation is most important, and for the want of it, God's appointed means of promoting the divine life in the soul often proves as vain as it is tedious. To spend "the preparation," as many do, at the theater, in the ball room, or in other less objectionable pleasures, is a sin, in fact, against the law of the Sabbath. To voluntarily push the business of the week to the midnight hour, so as barely to save the letter of the precept, is, in most cases, to unfit the soul for a profitable day in the courts of the Lord.

We should be glad to see Saturday evening generally recognized as exempt from the usual engagements of business and society, in order to its improvement as the preparation for the Sabbath. The profitable religious enjoyment of the Lord's day depends very much upon it. Too often, however, the last hours of the week are devoted to the most exhausting toil and the most dissipating amusements, and a dull and sleepy day follows as a matter

of course. Exemption from business and social intrusion may not always be practicable, but we may endeavor after it, and in time, perhaps, make it the usage of religious people, and, to some extent, of society at large. Family worship on Saturday evening might be expanded more than usual; the children examined and reviewed in their catechism, and the whole service shaped so as to herald the coming of "the day which the Lord hath blessed."

This our "preparation" be:
Lord! our hearts we bring to thee;
May they to thyself be won
While "the Sabbath draweth on."

Sunday Schools.—New Orleans District.**THE CONVENTION.**

An abstract of the proceedings of the convention which met at the Carondelet Street church, on the evening of Thursday, Friday and Saturday, will be found in another column. The time of each evening session was fully occupied, and, we trust, most profitably spent. The addresses of Drs. Kavanaugh and Marshall were listened to with the greatest interest. Dr. Kavanaugh's theme was the importance of a systematic course of Sabbath school instruction, and the preparation of text books adapted to such a course of instruction. The convention has sent a memorial to the General Conference on the subject, and it is to be hoped that some measures may be taken to secure so desirable a consummation. Dr. Marshall's subject, "the relation of infancy to the church," was discussed with much ability; and the discussion by various members of the convention was prolonged until the time of final adjournment. We cannot say that clear and harmonious conclusions were reached on this subject especially, nor on some other questions which engaged the attention of the convention; but the general result was to stimulate thoughtful and renewed interest in the Sunday school cause. We regret that statistical reports from the various schools were not presented, as these would have shown what is being actually done in our midst. They were probably crowded out by want of time.

THE ANNIVERSARY.

The anniversary of our church in the city was held in the Lyceum Hall. The exercises were conducted by the president of the Union, W. H. Foster, Esq., and consisted in singing and speaking by the children. Everything passed off delightfully; the singing was sweet and melodious, the speeches and dialogues were selected with taste and delivered with effect. The valedictory, by Master Caswell Ellis, was very fine indeed. The delighted auditory were left spell-bound. May the Holy Spirit lead him, and many more of the gifted boys who were there, to places of highest usefulness in the church. The sight of so large a company of the children and their friends is encouraging to the people of God. Surely there is in this throng of youthful beings the assurance of a glorious future to the church. To secure them to the church and to God should be the study and prayer of all.

PIONIER.

We acknowledge the reception of an invitation to participate in a picnic which took place on the fourth instant, in celebration of the twenty-fourth anniversary of Pelican Division, No. 1, Sons of Temperance. We thank the Committee of Arrangements for their courteous remembrance, and regret that it was not in our power to be present on the occasion. We are with the order, heart and soul, in the great principles which they advocate, and we wish to battle with them against the fearful evil of drunkenness. We have long since unfurled the banner of total abstinence, and under it we expect to live and die. The pulpit and the press cannot be too distinctly pronounced upon this question. We are in favor of banishing alcoholism from the world. May God prosper all judicious organizations having this end in view.

The man who loves truth with all his heart likewise loves those who suffer for the sake of truth.

CHANGE OF NAME.

The following, from the Richmond Christian Advocate, expresses the views which we entertain in regard to all propositions looking to a change of name likely to come before the General Conference. In the present temper of the North, the South and the border there is nothing to be gained by an experiment in that direction. Our church will be known as the Southern Methodist Church to the end of time, no matter what name may be taken. It records a division of the original Methodism of the United States into two halves, made by its own legislation with remarkable unanimity, and, we may add, with a depth of wisdom which time and results have abundantly vindicated. If the General Conference has nothing more important to consider than a change of name, it can afford to adjourn at a very early day.

CHANGE IN THE NAME OF OUR CHURCH. The singular silence of nearly all our Conferences and papers on this subject has led us to think that our people generally are very well satisfied with the title we have borne, through evil and good report, for the last twenty-five years. The mind of the church has swung round from the point at which it stood a few years since. Many that voted for a change of name then would not vote for it now, either in a General or Annual Conference. Without newspaper discussion, without social discussion, this change in sentiment has been wrought. The reasons for it are obvious to our mind, but we shall not state them now, as we are not disposed to open a discussion on the subject on the very eve of the General Conference.

Changing the well established title of a great denomination is not so easy a matter as some people imagine. It may seem to be so on a superficial view, but the gravest questions underlie such action, and must be fully considered before a single step can be taken. We seriously doubt whether we are now prepared to entertain any propositions looking to a change of name. Our mission to the world can be as well fulfilled under our present title as under any other that we might assume. Since the war we have not only lived, but flourished and spread, to the amazement of our foes and the joy of our friends. Let us let "well enough" alone.

NEWS FROM THE CHURCHES.

EDITOR: The occasional visit of a ray indicates that there is light behind the darkness, and saves from utter despondency and hopeless despair. To the faithful, waiting soul such give assurance and cheer, and for this these promises of better things should be noted. Among these indications we wish to record the recent completion and dedication of a new church at this place. It is a beautiful building, well and tastefully finished, and elegantly furnished with sofa, communion table and service, organ, chandelier, stoves, carpets, matting, etc. The building, with outfit, was executed under the superintendence of Brother Morrow, a member of the church, and an energetic and successful merchant of the place, to whose activity and energy the community and church are greatly indebted. Through his influence very material aid was secured from Philadelphia, New Orleans and New York. This, with his own and the contributions of the members' and friends at home, enabled him to complete the whole in good style, and the minister to announce at the dedication that the entire expense had been met, which announcement doubtless caused a disappointment to many who were expecting a collection for that purpose. On the fourth Sabbath of April the church was formally and solemnly dedicated to the worship and service of the true God. Brother W. Harrington had been selected by the friends of his youth to preach the sermon, and, although present, he was prevented from doing so from indisposition. His place was well supplied by Rev. H. F. Johnson, president of Whitworth College, who was unexpectedly but very fortunately present. The congregation was large and serious, and there was a feeling that the Lord had accepted the offering. At the conclusion of the sermon at night several young persons, the children of some of those who had made the offering, came forward to the altar, willing to

dedicate themselves with the church, to the service of God.

R. J. JONES.

RICHMOND, MISS., May 2, 1870.

FOREIGN MISSIONS.

The Indian Mission Conference includes four tribes of Indians: Cherokees, Choctaws, Chickasaws and Creeks. It is divided into four districts. In these districts there are 22 circuits or appointments. In the Conference are 16 traveling preachers, and 11 preachers who are employed—making 27 preachers in the field. In the Conference are 59 local preachers, 3,079 native members, 60 white members and 131 colored members—an increase, during the past year, of 6 local preachers, 853 native, 12 white and 6 colored members. The total number of members is 3,329. During the past year 320 infants and 472 adult persons were baptized. At the last session of the Conference 3 Sunday schools, with 15 teachers and 200 scholars, were reported. The libraries connected with these schools are small.

In the Conference we have 3 houses of worship—1 at Park Hill in the Cherokee nation, 1 at Fort Gibson in the Cherokee nation, and 1 in the Choctaw nation. The church at Park Hill is built of brick, and is worth about \$3,000. The church at Fort Gibson is a frame building, and worth about \$2,500. This church was built this year. The church in the Choctaw nation is built of logs, and is worth about \$300. This church was built also this year. There are many school houses in which our preachers preach, but they were not built exclusively for the Methodist Episcopal Church South.

The Methodist Episcopal Church South has within the boundary of this Conference one school, called the Asbury Manual Labor School. It is located at North Fork, in the Creek nation. The principal building occupied by this school was burnt on the twenty-second day of last July. The council of the Creek nation has entered into a contract with the Board of Foreign Missions to furnish \$10,000 for the rebuilding to rebuild it. The board has appropriated the remaining \$1,200.

The appropriation for the Indian Mission Conference, made by the board in March, 1869, was \$7,550. Of this appropriation \$7,410 33 have been paid. This is, indeed, the whole amount contemplated in the appropriation.

The appropriations for Indian missions this year are as follows:

For the missionaries	\$7,900 00
For Asbury Manual Labor School	1,200 00
For building a church at Webster's Falls	500 00
For building church at Oakknidge	750 00
For widows of deceased missionaries	300 00
Total	10,650 00

I will send you shortly the statistics, etc., of our mission in China. The appropriation for the China mission for this year, ending March, 1870, was \$6,000. The amount paid, besides some special sums which are enumerated below, was \$6,110 33. We paid all the appropriations for the year, except some special ones in connection with our Indian missions, which the law of the church was sufficient, at least, to prevent us from paying. (See my report as published in the Christian Advocate at Nashville.) We paid on the old debt \$11,376 18. The revenue of the board for the year approximated \$35,000. As small as this amount is, it is larger than the aggregate sums of the three preceding years. The Board of Foreign Missions, practically, has no natural revenue. Thank God! the General Conference meets next week. The Board of Foreign Missions will be on hand, asking for a seat, for the next four years, inside of the ecclesiastical coach. If it cannot get such a seat any other way, it will have to propose a matrimonial alliance with that thrifty old gentleman, the "Domestic Board," who has the coach all to himself, except the top, and piling his baggage on the front seat, sits gravely on the back one counting his assets. The dear old man; I would not put him out in the cold and rain for all the world; but certainly there is room, upon some

terms, for two in the inside—if not, we had better buy a new coach!

The appropriation for the China mission this year is \$7,000—\$4,000 salary for the two missionaries, and \$3,000 for other purposes.

The following sums for specific purposes have been sent to China, in addition to the appropriation, as given above: \$50, contributed by two ladies of Baltimore, for "Bible Woman" in China; \$50, contributed by Mrs. William R. Stuart, of New Orleans, for the same purpose; \$50, contributed by Masters Shepherd T. Murray, James H. Murray and Richard B. Murray, of New Orleans, for the same purpose. May God bless these three boys. Let the church say amen; \$60, contributed by the Mobile Conference, for women colporteurs in China.

W. E. MURPHY,
Sec. Board of For. Missions.

NEW ORLEANS DIST. SABBATH SCHOOL CONVENTION.**THURSDAY EVENING.**

The Sabbath School Convention of the New Orleans District Sabbath School Union met in the Carondelet Street Methodist Episcopal Church South, on Thursday, April 28, and was opened at 6.45 by the Rev. N. A. Cravens, with reading the Scriptures and prayer, and singing and prayer until 7.30, when the convention was organized. On motion of W. H. Foster, Esq., the Rev. J. C. Keener, D. D., was called to the chair as permanent presiding officer of the convention, and Richard Jones was appointed secretary.

All ministers, all official members, all officers and teachers in the Sabbath schools of the church, who were in the audience, were declared members of this convention.

Dr. Kavanaugh addressed the convention on "The Importance of Senior Classes in Sunday Schools." The address pointed to the deficiency of an organized system of study, the absence of proper books to teach in Sabbath schools the whole doctrine of the Bible, and the true idea of experimental religion—the thought being: commencing with the "infant class" carrying up a Sunday school scholar through a regular, fixed system of books and teaching, to a class that may be to them a complete system of pure, practical theology, comprehensive for practical life.

The doctor suggested on the Old Testament, history, chronology, prophecy, antiquities, law, and then centering all, as on a focal point, on the spirituality of Christianity as taught in the New Testament, of which all the former was either type or shadow or prediction, and extended by church history as to the conflicts for the faith and government of the church.

The following resolution was adopted:

Resolved, That this convention approve of a systematic course of Sabbath school instruction, and that a committee of three be appointed to prepare a memorial to the General Conference on the subject; said memorial to be reported to this convention for approval.

It was decided by the convention that addresses should be limited to thirty minutes; and speeches to five minutes.

Question.—How can we best rivet the lesson on the minds and hearts of the children?

The following resolution was adopted:

Resolved, That in the opinion of this convention the best method of riveting the lesson on the minds of the children is to repeat in simple forms a few prominent ideas, and to eschew generalization as being unsuitable to a child.

Question.—How can we most effectively lead children to Christ?

The following resolution was adopted:

Resolved, That in the opinion of this convention the most effectual method of leading Sabbath school children to Christ is to take them by the hand and go with them there.

And pending the discussion of this resolution, the convention adjourned to meet at seven o'clock tomorrow, Friday evening.

The chair announced the committee to memorialize General Conference as follows: Rev. Dr. Kavanaugh, Rev. Dr. Parker, and W. H. Foster, Esq.

FRIDAY EVENING.

The convention met, according to adjournment, on Friday evening, at seven o'clock P. M.

Reading of Scriptures and prayer by the Rev. J. L. Wright, of Louisiana Conference.

The minutes of the preceding meeting were read and approved.

On call for reports by the chair, the Rev. Dr. Kavanaugh, from committee appointed to prepare a memorial to the General Conference, on the subject of a more systematic course of Sabbath school instruction, presented the report of the committee, and, on the same being read, it was, on motion of the Rev. N. A. Cravens,

Resolved, That the memorial as presented be adopted, and the secretary be instructed to furnish a certified copy of same for presentation to the General Conference.

The convention took up unfinished business from yesterday.

Question.—How can we most effectively lead children to Christ?

The original resolution was read. A substitute was offered by Rev. Dr. Marshall, as follows:

Resolved, That this convention considers that it is the highest duty of life to lead the young to the knowledge of Christ as the Redeemer of the world, and that we regard the Sabbath school as an agent designed to co-operate with parents in accomplishing this great end.

Resolved, That we solemnly believe it the first and chief obligation of parents to devote their young children to Christ, and that the most effectual way this duty can be performed is by exemplifying before them the blessedness of a life devoted to God.

Resolution and substitute were laid on the table, and the following resolutions, offered by Richard Jones, were adopted:

Resolved, That as leading children to Christ involves their conversion, then the story of Jesus dying for sinners must run like a golden thread through all the lessons of the teacher.

Resolved, That as the work of conversion is the work of the Holy Spirit, then to make effectual the teaching it is a necessity that the teacher make the children the subject of special prayer for the work, office and ministry of the Holy Ghost.

On motion, the meeting then adjourned to meet to-morrow evening at seven o'clock, and the announcement made that the address would be delivered by the Rev. Dr. C. K. Marshall.

SATURDAY EVENING.

The convention met Saturday evening at seven o'clock. Opened by reading Scriptures and prayer by the Rev. Philo M. Goodwyn, of the Louisiana Conference. Reading of the minutes of the preceding meeting. Singing by the choir. Address by Rev. Dr. Marshall, of Vicksburg.

Question for discussion—Infancy in its relations to the church. Pending the discussion of which, and after a lengthy debate, the convention adjourned sine die, with the announcement that at four o'clock to-morrow, Sabbath, the Sabbath School Union of the Methodist Episcopal Church South would hold its anniversary meeting.

Richard Jones, Sec.

BISHOPS' SUPPORT.

We beg leave to call the attention of the preachers and members of the church to this subject once more before the close of the fiscal year, which will be the thirty-first of May.

The salaries of the Bishops should be promptly met. The receipts, however, up to this date are inadequate to meet the claims. The preachers in the several Annual Conferences will please place in the hands of their respective delegates to the General Conference any amounts they may have, or may be able to collect, for this purpose; or contributions from any persons to meet the deficiency may be sent to me in post office order or in check.

A. H. Raymond, Agent.

MANY a time when we stand in the pulpit some sinners may be present to whom we are addressing our last message; who will never hear the gospel or be exhorted to take care of their souls again. Should we not wish to pour upon such an one the whole force of our powers of persuasion—to speak to him emphatically in the words of Richard Baxter; "as a dying man to dying men?"

WILLIE F. NEWELL.

We greatly regret the death of this estimable and promising youth. He is remembered by us as a child, beautiful and fresh as the dew-washed flower. He is now, we trust, in the home of the blessed. The bereaved mother and other kindred have our heartfelt sympathies. The following resolutions, adopted by the Sunday school of which Willie was a member, show how completely he had won the affection of his associates. He was the nephew and bore the name of our esteemed brother, William H. Foster, of this city.

On the twenty-fifth of April, 1870, the Wesleyan Academy Sunday School passed the following resolutions:

Whereas, The Giver of all life in his wise providence has taken from us one whom all have loved, and whose memory all now cherish:

Resolved, That in the death of Willie F. Newell we have lost a kind schoolmate and loved friend, whose endearing qualities had won our regard.

Resolved, That we extend our heartfelt sympathies to the bereaved mother and many friends, and commend them in this, their deep grief, to him who alone raiseth them that are bowed down, to him in whom Willie had such implicit trust.

Resolved, That we sympathize with the many friends in New Orleans, and the Felicite street Sunday school, of which he was a former member.

Resolved, That a copy of these resolutions be sent to Willie's mother, and published in *Zion's Herald*, New York and New Orleans Christian Advocates, and Springfield papers.

RICHARD MONTAGUE, LESTER S. HILL, LOU. M. HOBKINS, WILBRAHAM, MASS., April 26, 1870.

Prayer for the General Conference.

This council of the church meets next Wednesday in Memphis. Its session excites unprecedented interest, as it is the first in which lay representatives have been called to participate. The occasion will be one of vast importance. We feel less inclined to speculate on what the Conference will do, or what it will forbear doing, than to entreat the entire convention to besiege the throne of grace with earnest prayer and supplication that the Holy Spirit may preside over all its deliberations, and conduct them to a successful issue. We fear that the absurd and arrogant pretensions of papists, who claim plenary inspiration for a council held by a pope, may have induced some Protestants to verge to the opposite extreme, to some extent ignoring the assistance of the Divine Paraclete, in the deliberations of their representative assemblies. We do not, indeed, claim either Scripture precept or precedent for our church councils—it is a saving somewhat of popery to speak of them as courts of Jesus Christ, whose decisions are binding upon the conscience, like the decrees of the apostles in their so-called council at Jerusalem. But, do not our assemblies convene in the name of the Lord Jesus—to transact business in his interest—for the promotion of his cause? What other object have they in view? And can this be successfully accomplished without the aid of his Spirit? His grace is needed to inspire all hearts with zeal for the divine glory, to purge them from all unhalloved motives, to restrain from the development of insatiable passions (the bane of such bodies,) and to inspire them all with those sentiments of peace and love without which the mind is incapable of wise counsel and judicious action.

The Spirit, like a peaceful dove, flies from the realm of noise and strife.

Hence, our minds must be first calmed by his influence that we may be susceptible of his suggestions, and be controlled by his agency. Let the whole connection, therefore, pray fervently and importunately for the outpouring of the Holy Spirit upon the Conference. Let us pray in our closets, our families, our social meetings, our public congregations—let the church at large pray, and especially let those pray on whom the great responsibility has been devolved of representing the church in this highest court, that they may be filled with the spirit of love, and of power, and of a sound mind. If all the delegates come to Memphis under such an influence, and if the whole church continue constant in prayer for the divine blessing on their deliberations, we shall not have to endorse the mournful complaint of Gregory Nazianzen, who said that he had never known any council attended with good effect, nor to say in reference to our General Conference what Martinus of Bremen said of the iniquitous Synod of Dort: "I declare, as well as my father, that I will never set my foot in any synod again. O

Dort! O Dort! would to God that I had never seen thee!"—*Nashville Christian Advocate*, April 30.

St. John's Church, GALVESTON.—We are happy to be able to report that the work on this noble church edifice is rapidly advancing. The walls are ready for the roof, and the scaffolding necessary to raise the huge timbers to their place is complete. A six-foot, purple, wall will be added after the roof is in its place, and the interior arrangements will be rapidly pressed to their completion. It is expected that it will be ready for the congregation by October next.

It is located on the corner of Bath avenue and Broadway, and when the contemplated track on Bath avenue is laid it will be accessible by street cars from all portions of the city. The lecture and Sunday school room, in the basement, will be large enough to meet all the wants of our Sunday school, which has been so long cramped within the walls of the old chapel. The audience room, on the second floor, will be large and well ventilated. When complete, it will be one of the largest and most elegant church buildings in the State.—*Texas Christian Advocate*.

Koskoo.—This medicine is rapidly gaining the confidence of the people, and the numerous testimonials of its virtues, given by practitioners of medicine, leaves no doubt that it is a safe and reliable remedy for impurity of the blood, liver disease, etc.

The last *Medical Journal* contains an article from Prof. R. S. Newton, M. D., president of the Medical College, city of New York, that speaks in high terms of its curative properties, and gives a special recommendation of Koskoo to the practitioners of medicine. This is, we believe, the first instance where such medicines have been officially endorsed by the faculty of any of the medical colleges, and reflects great credit upon the skill of Dr. Lawrence, its compounder, and also puts "Koskoo" in the van of all other medicines of the present day. *Norfolk Daily Journal*, Dec. 11, 1869.

Married.

April 26, 1870, by the Rev. J. T. M. Gregory, at the residence of the bride's father, in Aberdeen, Mississippi, Mr. K. A. CARTER, of Hamilton, Mississippi, to Miss LEXONA GOLIGHTLY, of Aberdeen, Mississippi.

On the twentieth of April, 1870, at the residence of the bride's father, by Rev. Joseph D. Newsum, Mr. JAMES L. STEINBACK to Miss SARAH K. TRIMMELL, all of Holmes county, Mississippi.

Obituaries.

Mrs. MATTIE JEMISON, wife of S. M. Jemison, and daughter of J. E. and Sarah Grace, was born in Lincoln county, Georgia, April 7, 1834, and died in Talladega county, Alabama, April 19, 1870.

She embraced religion and joined the Methodist Episcopal Church South in Washington, Wilkes county, Georgia, when a school girl, under the ministry of the Rev. William H. Evans, of the Georgia Conference. She was married to S. M. Jemison March 6, 1856. She leaves seven children, the oldest only thirteen years, the youngest but two weeks.

Mattie was a good child, a kind mother and an affectionate wife. She had a great many friends. Many of the preachers of the Alabama Conference will regret to learn of her early death, having often partaken of the kind hospitalities of her home. She loved our church, loved our ministers, and was always ready to do her part in advancing the Redeemer's cause.

She died very unexpectedly to us all. She expressed herself as being perfectly resigned to the will of her Master. She leaves a distressed family. That God may take care of her broken-hearted husband and motherless little children is the prayer of

HER FATHER.

Mrs. MARY L. PRINCE, wife of John W. Prince, died at Union Springs, Alabama, March 25, 1870. She was the daughter of Hartwell B. Green, and was born October 24, 1834.

Mrs. Prince was a member of the Methodist Church from early girlhood. Her husband lost, in common with our people generally, all he had of worldly goods by the robbery lately perpetrated upon the South; yet all undimmed she lent her energies in aiding him to provide for those dependent upon them. The genial, cheerful manner in which she presented her duties was most remarkable. Kindness of heart was a marked characteristic of her nature. Her afflictions were severe, her sufferings very great; yet as the hour of death approached she had a noble fortitude and a most admirable self-possession. She whispered out directions as to the disposition to be made of her

children, and directed other matters according to a very accurate and judicious judgment. She laid farewell to her weeping husband and her little daughters, asking them to meet her in heaven. Her whole manner and spirit were most gratifying and consoling. She sent messages to her relatives, asking them to live for God. She said she "would prefer to live to help John (her husband) raise the children, but was resigned to God's will." She passed away in peace, and rests from the labors and sufferings of a painful life. JOSEPH B. COTTELL.

Sister SARAH C. SALE was born February 16, 1792, and died March 31, 1870, aged seventy-eight years.

She was a native of Maryland, but her parents removed to Virginia when she was only three years old, where she was reared and educated.

After her marriage with the Rev. Alexander Sale, then an itinerant preacher, they removed to north Alabama, where they made a permanent home for forty years.

In 1857 they removed to Arkansas, where the most of their children had gone and made a new home, and lived there until the country was occupied by Federal troops. With the prospect of being broken up, they removed, in 1863, to the residence of Mr. V. H. Jones, a son-in-law, who lived near Greenwood, Caddo parish. Bro. Sale, overcome with age, fatigue and anxiety about the unhappy state of the country, expired the day after he arrived there. This daughter rejoices that she was privileged to minister to him in his last moments, and to receive her father's parting blessing. Sister Sale remained at the home of her daughter, Mrs. S. A. S. Jones, till the day of her death, beloved by all, and blessing the household with her gentle, genial Christian spirit.

Sister Sale was raised in the Episcopal Church, but when she professed religion she joined the Methodist Episcopal Church; and though no bigot, and entertaining the most charitable feelings toward all Christians, the Methodist Episcopal Church was emphatically the church of her choice. For fifty-eight years she was a devoted member of it, adorned its doctrines by leading a new life, following the commandments of God, and walking in his holy ways, steadfast in faith, unwavering in confidence, and always abounding in the work of the Lord. Many of the older itinerant preachers who knew her will embody her memory in their hearts' warmest affections.

As a Christian she was cheerful, confident and happy. A few days before her death we visited and prayed with her. It was apparent that her strength was failing. She was growing worse. On taking leave of her we said: "Sister Sale, is your faith still constant and unwavering?" She repeated with tears, "Yes, constant and unwavering," as if those words expressed just what she wished. To others she quoted Scripture promises, such as: "Though I walk through the valley and shadow of death, I will fear no evil, for thou art with me." They told and staff they comforted. She then added: "I need but the rod for discipline and the staff for support." When Christian friends sang the songs of Zion her soul was inspired with the theme, and when she could no longer utter words she raised her hands in token of heavenly aspirations. She has filled all the various stations of life which she was called in the providence of God to occupy, with dignity and reverence, glorified God in her body and spirit, and has gone up to behold the trophies of a well fought day.

She has done well, and it will be said of her: "Well done, thou good and faithful servant; enter into the joy of thy Lord." She died in the midst of children and kind friends. The Rev. L. Clegg, her pastor, preached her funeral from the text: "Be ye also ready." Her mortal remains rest in the family grave yard; and while I perform the sad but pleasing task of writing this, my prayer is: "Let me die the death of the righteous, that my last end may be like hers." J. P. Nashville Christian Advocate please copy.

DR. DAVIS ON DEAFNESS.

Send Forty cents, and get the NOTES ON DEAFNESS, by W. L. Davis, M. D. To be had of Steel & Co., 72 Camp street; Eyrich, 130 Canal street; Ellis, opposite the Post Office; also, by mail, of the author, Glass Box 399, New Orleans.

OBSERVE.—Dr. D. has removed to No. 19 Racine street, where he holds himself in readiness to attend to the treatment of persons in cases of Deafness—a special branch of his profession, to which he gives his whole attention. 602 11

WEDDON'S EXCELSIOR LABOR-SAV-

ING WASHING COMPOUND.

No Rubbing Necessary.—No Washing Machine Needed.

(Patent granted September 22, 1868.)

REASONS FOR PREFERRED THIS SOAP.

1. It is not only the best, but the cheapest yet offered to the public.

2. It may be successfully used in any kind of water—cold or hot, hard or soft.

3. It so modifies the action of boiling water on woolen goods that their fibers do not contract under its influence, and the garments are left bleached, soft and as large as originally made.

4. It will not destroy colors; on the contrary, renders them bright and beautiful.

5. The goods do not require any rubbing with the hands, washboard or washing machine; all that is necessary is soaping, boiling and rinsing.

6. It will not injure the hands; on the contrary, renders them soft and smooth.

7. Without boiling it will bleach clean and white the finest handkerchiefs, laces, curtains, etc. Simply dampen them in warm water, soap them, place them in a dry vessel until next day, then rinse and dry them; certainly very much soiled may require boiling.

8. We guarantee all the above facts, and will refund the purchase money to any one not satisfied with the trial of the Soap. We also guarantee to pay for any injury done to clothing by the Soap, on proof of such injury. It is hardly necessary to inform the public that two-thirds of the wear and tear of clothing results from rubbing, which may be saved by the use of this Soap.

THE HIPPOPOTAMUS.

This is the well known hippopotamus or river horse, as he is sometimes called.

It is an enormous quadruped, a native of various parts of Africa, and is always found either in water or very near to it. Its height is not very remarkable as its legs are extremely short, but its body is long, and very bulky indeed. The average height of a full-grown hippopotamus is about five feet. The color of its skin is a dark brown, curiously marked with innumerable lines like those on "crackle" china or oil paintings, and is dappled with a number of sooty-black spots, which cannot be seen except by closely looking. A vast number of pores in the skin supply a thick oily liquid, which effectually protects the animal from the bad effects of the water in which it lives most of the time. The mouth is enormous, and its size is greatly increased by the odd manner in which the jaw is set in the head.

Within the mouth is an array of white, gleaming tusks, which have a terrible appearance, but are solely intended for cutting grass and the other vegetable substances on which it feeds. With those teeth the hippopotamus can cut the grass as neatly as if it were mown with a scythe, and is able to sever, as with shears, a pretty thick stem.

Its appetite is enormous, and with a stomach capable of holding five or six bushels of food it is a terrible nuisance to the owners of farms near to the river in which the animal lives. During the day it sleeps in its hiding place, but as soon as night comes on issues from its den, and tramping its way into the cultivated lands, makes sad havoc among the growing crops; and the worst of the matter is, the hippopotamus damages vastly more than it eats, by the clumsy, waddling way it walks. It is a gregarious animal, and generally goes in herds numbering twenty or thirty.

All manner of traps are set to catch them by the land owners, who hunt them without mercy, and find no little profit from their teeth, which are of the very finest and whitest ivory, weigh from five to eight pounds, and are valued at from four to six dollars per pound.

The young hippopotamus is not able to stay under water as long as its parents, and the mother carefully brings it to the surface every little while to breathe. During the first few months of the little animal's life it takes its stand on its mother's back, and is borne by her above or through the water just as she thinks wisest and best.

The creature is generally harmless, and need not be dreaded, unless molested, when it will violently attack whatever object has roused its anger.

Dr. Livingstone, the celebrated African missionary, tells us of one of these animals, whose little calf had been speared by his men the day before. "She made at the boat," he says, "in which I was sitting, with such force that she lifted the forepart of the boat completely out of the water, capsized one of the black oarsmen fairly into the river, and forced the whole crew to jump ashore."—*Child's Paper.*

A LITTLE BOY'S REBUKE.—There was once a very old man, who lived in the house with his sons. The old man was deaf, his eyes were dim, and his legs weak and thin. When he was at the table he could hardly hold his spoon, so much did his hand shake, and at times he would spill his soup on the table cloth. All this vexed his son's wife; and they made the old man sit in the corner, behind the stove. There he ate his food from an earthenware dish, and he had not always too much to eat, as you may guess.

Well, one day his trembling hands could not hold the dish—it fell to the floor and broke! At this his son and son's wife were so vexed that they spoke harshly to the poor old man. His only answer was a deep, sad sigh. Then they brought him a bowl made of wood, out of which he had to eat his food. Not long after this his grandson, a boy about seven years of age, was seen at work hauling out a log of wood. His parents could not guess what he was trying to do. The little boy said nothing to any one, but kept at his work on the log, and looked very grave, as if he had some great work on hand.

"What are you doing there?" asked the father.

The little boy did not want to tell. His mother asked:

"What are you doing there, my son?"

"O," said he, "I am only making a trough such as our pigs eat out of."

"But what are you making it for?"

"I am making it," said he, "for you and father to eat out of when I grow up."

The parents looked at each other, and burst into tears. From that

time forth they treated the old man well. He had the best place at the table, a nice dish, and plenty of food.

PROUD OF HIS MOTHER.—It was a cold night in winter. The wind blew, and the snow was whirled furiously about, seeking to hide itself beneath cloaks and hoods, and in the very hair of those who were out. A distinguished lecturer was to speak, and, notwithstanding the storm, the villagers very generally ventured forth to hear him.

William Ammendale, buttoned up to his chin in his thick overcoat, accompanied his mother. It was difficult to walk through the fallen snow against the piercing wind, and William said to his mother:

"Couldn't you walk easier if you took my arm?"

"Perhaps I could," his mother replied, as she put her arm through his, and drew up as closely as possible to him. Together they breasted the storm, the mother and the boy, who had once been carried in her arms, but who had now grown up so tall that she could lean on his. They had not walked very far before he said:

"I am very proud to-night, mother."

"Proud that you can take care of me?" she said to him with a heart gushing with tenderness.

"This is the first time you have leaned upon me," said the happy boy.

There will be few hours in that child's life of more exalted pleasure than he enjoyed that evening, even if he should live to old age, and should, in his manhood, lovingly provide for her who, in his helpless infancy, watched over him.

The Farm and Garden.

EXPERIMENTS IN FEEDING SWINE.

The following letter from Prof. Johnson, farm superintendent of the Maine Agricultural College, will be read with interest by those of our readers who raise pigs:

DEAR SIR: As several inquiries have reached me in regard to our experiments in feeding swine, I conclude to send you the result of the past three months' trial.

Weight of the two pigs in pen No. 1, November 15, 93 pounds; in pen No. 2, 76 pounds. Gain of the two in No. 1, in 30 days, fed on whole corn, 35 pounds; of those in No. 2, fed on uncooked meal, 47 pounds. A little more than one bushel was fed to each pen.

From December 15 to January 15, 31 days, the two pigs in No. 1, fed on uncooked meal, gained 57½ pounds, and those in No. 2, fed on whole corn, gained 52½ pounds. A little less than two and one-half bushels were fed to each pen. We called 54 pounds of corn one bushel, and equal to 50 pounds of meal.

From January 15 to February 16 the gain in each pen was, just 75½ pounds, the average gain to each pig being 37½ pounds in 32 days. The pigs in No. 1 were fed on meal thoroughly scalded, and those in No. 2 on raw meal. Equal quantities of meal and swill were given to each. During the 32 days about 75 pounds of meal were fed to each pig.

The object of these experiments has not been to ascertain how much pork a given quantity of feed will make. The question asked the first two months was, will it pay to grind corn into meal? and the answer was, yes.

The question the third month was, will it pay to scald the meal? and the answer was, no.

Two other pigs of the same breed (Chester) and nearly the same size, kept in pen No. 3, have been fed during the three months on raw barley meal. The meal has not been weighed out. The intention has been to give them in their swill what they could eat readily. These two pigs were found to weigh, February 19, 267 pounds—6 pounds more than the pigs in No. 1, and 16 pounds more than those in No. 2. My impression is that at present prices barley meal is cheaper for swine than corn meal. To prove it, however, barley meal will this month be kept on trial and the six pigs will be fed as follows, viz: Just as many pounds of barley meal will be fed to No. 3 as No. 1 and No. 2 have each of corn meal. No. 1 will have raw corn meal and No. 2 scalded meal. The swill fed to these swine is about equal in quality to skimmed milk.

WHO WOULD NOT PLANT FLOWERS? It is hardly worth while now-a-days trying to winter any but easily kept varieties of flowers. Gladioli, dahlias, cannas and such things may be wintered in a dry cellar in sand, but verbenas and other tender budding plants are now sold so cheaply by commercial florists that it does not pay those having no green houses to winter them. With gladioli and dahlias at twenty-five cents each, every family should have them in their garden. With a canna (Indian shot), a Ricinus (castor oil bean), or some other pretty foliage plants about the lawn,

some roses, a climber or two, verbenas, pansies, and a few annuals, the garden will soon put on a gay appearance and give untold enjoyment to the wife and children.

With proper assistance in preparing the beds and planting, their care may safely be left to them, and they may perhaps give you a lesson also in flower culture. Among annuals for the flower garden asters, balsams, clarkias, convolvulus (*major* and *minor*), larkspurs, lobelia, marigold, mignonette, nasturtium (*dwarf*), sweet peas, portulaca, tagetes and zinnia should be in every garden. The new asters, balsams, convolvulus and portulaca are beautiful. Few or many, they will amply repay the care bestowed upon them. Do not, however, neglect the kitchen garden. If you tend it as well as the children will the flowers, you will not have many doctors' bills to pay.

Disease seldom lurks where there are plenty of fruits and vegetables, and every farmer or villager can better afford to raise them than either to buy them or go without them. After you have got the kitchen garden in shape and your beginning in floriculture made, you can add to them from time to time something more tender and delicate.

There are but few villages or country places but may with a little care support at least a few of the more hardy winter blooming flowers. The only mystery about their cultivation is a little care and common sense. Try at all events some of the hardy summer blooming ones.

MARKING LAND FOR CORN.—The majority of farmers who mark land do so by driving stakes. A much better and quicker method is to attach a re-mark or guide to the marker, so as to leave a line over which the team will go astride in returning. It is made by arranging a light shoe or runner which may be attached to the marker by an arm and hook, and which is let into an eye on the marker. A cord running from this shoe to the outside hancoring of the team—and so arranged as to be easily reversed from side to side, each time across the field—completes the preparation.

If your rows are forty-four inches wide, and your marker makes three rows at a time—and more cannot usually be well made—the re-mark should extend over twice the number of rows, or eighty-eight inches. This will allow you to drive the tongue of your marker astride the re-mark, and enable you to keep the rows perfectly straight and parallel, a correct line having been first established. A re-mark for a corn-planter should be once and one-half the width of the planter. Thus, if your planter makes rows forty-four inches wide, the re-mark should be sixty-six inches on one side; or if the rows are forty-six inches—the usual width of planters—the shoe of the re-mark must travel sixty-nine inches on one side, to enable the tongue of the marker to stride the mark in returning. The cord is necessary to be attached to the hancoring, to enable you to keep the re-mark in line.

THE APIARY.—At a recent Bee Convention held in Albany, New York, the following information was brought out, relating to honey-producing flowers, their season and comparative value. Bees first get pollen in the spring from alder, skunk-cabbage and cat-tail willow. From the yellow willow they take honey, but no pollen. Next in order come fruit blossoms—apples, pears, peaches, etc. If the weather is favorable a large quantity of honey is obtained from these. The dandelion and sugar maple also produce largely of honey; red maple is earlier, and consequently more exposed to frost. The honey yield of clover depends much on the weather. Its pollen is dark-colored. Red raspberries were spoken of as yielding large quantities of honey for four or five weeks together, and in all sorts of weather. Black raspberries yield pollen, but not so much honey. Basswood or linden was considered to furnish the best and most aromatic honey. Clover honey is like it, if gathered and deposited quickly, but if gathered slowly it is inferior. Buckwheat is poor in quality and untrustworthy in New York. In the West, in consequence of the lateness of the autumn, it is more productive. The golden rod was thought to stain the bees by some, but others had known it to furnish honey in abundance without any peculiar color. The poplar (tulip tree) at the West furnishes large quantities of honey, but the quality is like that of buckwheat, poor. The locust tree was also spoken of as producing plenty of honey, of good quality.

SAN FRANCISCO people were dreadfully frightened and excited recently by a sharp earthquake shock. The large buildings were vacated, there was a panic in the hotels, and the people crowded the streets. No damage of note, however, was done.

I ENVY no man that knows more than myself, but pity them that know less.—*Sir T. Browne.*

The Lord's Supper as a Means of Conversion.

Not long since a minister of the gospel said: "Of all Christian ordinances, the Lord's Supper enters most vividly into my early recollections. Whenever that sacrament was observed, my father aimed to have every inmate of his household present, either as a partaker or a witness. We were taught to look forward to it as a holy occasion. As the day came there was an impressive gentleness in his tone and manner, and a fervency in his prayers. I knew the meaning of the tear that gathered in my mother's eye as she read once more the record of what the Lord did on the same night when he was betrayed. But her boy wished that he was sick, wished that the house needed him to stay and watch it, wished that it was the custom for non-professors to leave the church while the guests of Jesus were taking their places at his table—indeed, wished anything rather than to sit apart and view the scene; for conscience was then asking why I was not a Christian? The very love of my parents silently rebuked my aversion, and I could not think of requesting to be absent from the feast."

"Four times a year I must leave my father's pew, and take my place among the spectators. To rise—to part with father and mother—to sit among unbelievers! How hard it was! It seemed like going away from Christ, as a wandering, willful lamb, even when he was calling me to his fold. It seemed like rejecting him, and choosing the world. I seemed to be making a public profession of my disregard of the Saviour. But did it harden me? Did it provoke me to rebellion? Nay; the effect was to mellow the heart, to awaken the conscience, and to fix the mind on Calvary. Never did I have set forth more vividly, before my eyes, Jesus Christ crucified for me. How often I said to myself, 'Surely the Lord is in this place! This is none other but the house of God, and this is the gate of heaven.'"

"And yet it was to me the unhappiest place on earth. Its air was too pure for me. Its solemnity was painful. Amid the silence came the still, small voice to my soul. My thoughts ran back and forth between Christ and myself. That broken body! My sins had helped to break it. That shed blood! My sins ought to be washed away by it. The love of Christ was almost painful to me because I was resisting it. And still how wonderfully was that sacrament adapted to set forth the only love which could meet the wants of a sinner! I began to feel that the Lord's Supper was a means of grace to spectators, and that there was a propriety in those arrangements which kept me there as a witness of the ordinance. If Christians needed all that was visible in it, much more did we who were not yet of Christ's fold. My convictions were those of duty undone, mercy still refused, grace still resisted, and privilege unaccepted."

"The question with me was, not what to do, but when to do it? More than once I almost resolved that when another communion season should come I should be found sitting at the Lord's table. If anything hardened my young soul, it was not the Lord's Supper. It was almost the only thing that kept me from indifference. It came every three months, as a spring time, to melt the snows and thaw the frozen garden of the heart. At length, on one of those solemn days, the Holy Ghost so took 'the things of Christ' and showed them to me, that I 'received the atonement.' How I then looked forward to the next occasion, when I might obey that inviting command, 'Do this in remembrance of me,' and take the cup of the New Covenant! Family training, preaching, all other means had their power, yet as I look back it seems to me that the Lord's Supper was the ordinance most effective in my conversion."

If this were the only known case of its kind, would it not be sufficient to raise the question—Whether enough importance is now given, in most of our churches, to the effect of this sacrament upon those who merely witness its observance?—*Chicago Interior.*

IN INDIA there are 20 societies of Great Britain, the United States and India at work. They have 540 white and 225 native clergy, 18,000 native catechists working in 400 central stations, with 2,300 branches. They have 80,000 boys and 30,000 girls in their schools. The annual cost is \$1,500,000, of which \$250,000 are given by the people of India, and \$100,000 by the natives themselves.

That all who are happy are equally happy is not true. A peasant and a philosopher may be equally satisfied, but not equally happy.—*Johnson.*

As the fire-fly shines only when on the wing, so it is with the human mind—when at rest, it darkens.—*Anon.*

BELLS—BELLS.

CHURCH BELLS.

We are prepared to furnish Church Bells, of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

Weight.	Wt. of Bell and mounting.	Price.
24-inch Bell... 250 lbs	400 lbs	\$65 00
30-inch Bell... 650 lbs	800 lbs	135 00
40-inch Bell... 800 lbs	1000 lbs	175 00
48-inch Bell... 1200 lbs	1500 lbs	265 00

These Bells are warranted for one year against breakage in ordinary use.

THOS. B. BODLEY & CO.,
619 9 ly No. 9 Perdido st., N. Orleans.

BELL—BELL—BELL.

BUCKEYE BELL FOUNDRY.

Established in 1837.

VANDUZEN & TIFT.

Church, Academy, Factory, Farm, Fire-Alarm Bells, etc., made of pure Bell Metal (copper and tin), warranted in quality, tone, durability, etc., and mounted with our Patent Improved Rotating Hangers. Illustrated catalogues sent free.

B. J. WEST, Agent,
119 and 121 Magazine street,
New Orleans, La.

BELLS, STEEL COMPOSITION.

For Churches, Schools, Etc.

BLUMER, NORTON & CO., Manufacturers,
Cincinnati, Ohio.

These celebrated Bells (not Cast Iron or "Amalgam") rival in purity and volume of tone those of copper and tin, are more durable, and cost only one-third as much. Send for descriptive circular. sep 25 ly

STOVES AND TINWARE.

THE BEST-COOKING STOVE FOR WOOD.

NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, combining all the new and important improvements; also to the extra height of the oven under the fire chamber, the Patent Air Chamber, Front Doors, and Patent White Enamelled Iron Knobs, the improvements in the covers and centre pieces, all of which have been covered by Letters Patent, and are used in no other Stove. They are warranted to stand fire, or others sent free of charge in all cases. We have all sizes of this justly celebrated Stove, both

PLAIN AND EXTENDED BACKS,

the Extended Back with cast Iron Enamelled Reservoir and Funnel, Tin, Warming Closet, Giddron Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, as is the case in most of the Stoves now used, and the heat is forced directly against the whole surface of the bottom of the Reservoir. The Reservoir, being detached from the pipe, can be removed at pleasure, thereby forming a six-hole Stove—the best in use, as the back holes will heat as well or better than the middle ones. For sale by

G. W. W. GOODWYN,
62 Camp street.

ALSO—THE MOST

Complete and Perfect Cooking Stove

FOR KITCHENS COAL OR COKE

ever invented, in the estimation of all who have yet seen it. Patented in 1869.

THE MONITOR.

which can be seen at 62 Camp street. The advantages possessed by this Stove over all the other Coal Cooking Stoves are so numerous, and so patent to every sensible observer, that it is only necessary to examine it in order to be convinced of its superiority. All of the above Stoves are fitted with extra care, Oven Doors lined with tin, and furnished with William Rees's Patent Air Chamber, sliding front doors, patent centres, covers and White Enamelled Knobs.

The operation of every Stove guaranteed. Directions for putting up and using same accompany each Stove.

G. W. W. GOODWYN,
62 Camp street.

Sole Agent for States of La. and Texas.

STOVES, GRATES AND HOUSE FURNISHING GOODS.

The undersigned would call the attention of city and country buyers of Cooking Stoves to the following list of Stoves manufactured by Mr. M. L. Filley:

The Philanthropist.

A first class Cooking Stove, having all of the latest improvements that have so far been invented. Has a new arrangement for heating—also an Ash-pail. The entire is heavier than any Stove sold in this market. Sold under a full guarantee in every respect.

The Diamond Rock.

A Stove well known in this market. Thousands of this Stove are in constant use throughout the country, which is a very good recommendation. Sold under a full guarantee. Besides the above named Stoves, I have on hand the celebrated Canton Plant, Charter Oak, True Kentucky, Maid of Orleans, Queen of the South, Delta and others, all of which I offer at a low price.

J. H. CAMPBELL,
no 13 6m 133 Poydras st., New Orleans.

THE TIMES.

THE IMPROVED

LARGE OVEN COOKING STOVE.

with extended Fire Chamber and Feeder Top—one of the best Baking and most economical Stoves made.

The Flues are constructed so as to insure the most perfect draft. The front of the Oven is so equal that when baking there is no need for removing anything until done.

THE TIMES

Is made of a superior quality of Iron, very heavy of new design and in the double. The Top Plate is put together in sections, to permit of the greatest expansion without cracking.

We invite the attention of Housekeepers to the advantages of this Stove. Remember, we guarantee them to give entire satisfaction. Duplicate parts can be had at all times, at small cost, by which repairs can be made which will frequently save the price of a new Stove.

ZABIE & DALTON,

NEW ORLEANS MARKETS.

From the N. O. Price Current.
We have no material change to notice in the general market since our last issue. The wholesale trade has continued to exhibit a fair degree of animation. Sugar and molasses have been in good demand, the receipts meeting a ready sale at full prices, and Western produce generally has shown more animation, with a tendency in favor of sellers, but the movement is mostly confined to the local trade and the execution of orders for the gulf ports. We hear of 50,000 bushels wheat being on the way from St. Louis, and hope the receivers will be at liberty to offer it at prices which will enable shippers to take it for export; or, if their views are too high for foreign limits, that they be prepared to ship it without delay either to Liverpool or New York, and thus save local charges.

The weather has been cloudy and showery, with a heavy storm on Sunday. The presumption is that the rains have extended throughout the interior. All the tributaries being in good navigable condition, cotton has poured in even more freely than had been anticipated.

The river is three feet seven inches below high water mark.

Corros.—The following are the arrivals since the twenty-ninth ultimo:
Louisiana and Mississippi bales 14654
Lakes 23
Florida 350
Texas 86
Total 15203

On Saturday the movement commenced with a moderate degree of spirit, at about previous rates, but after the receipt of the unfavorable dispatches from Liverpool the demand subsided, and figures were accepted, showing an irregular decline of 1/4 to 3/4c, while the sales were confined to 2,000 bales. On Monday buyers came forward with more spirit, but offering inside rates, and prices exhibited increased irregularity, even running lists being scarce and commanding extreme rates, while mixed lists, especially if dusty and stained, sold at inside figures, or a fraction less, good ordinary closing at 20 to 20 1/2c, low middling at 20 1/2 to 21 1/4c, and middling at 21 1/4 to 22c. The business, however, was of fair extent, summing up 3,500 bales. On Tuesday the market opened with a fair inquiry, but the movement checked by the supply being moderate, and buyers offering prices a fraction below the views of factors. Later in the day, however, parties came together more freely, offers being accepted which had been previously refused on the one hand, and buyers coming up to the claims of factors on the other, at least for even running or otherwise desirable lists, and 4,200 bales changed hands, at prices showing some little irregularity, but on the whole more steadiness than on the day previous.

This makes an aggregate for the past three days of 9,700 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 1,032,621 bales, against 757,523 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 647,368 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 333,417 bales to Great Britain, of 98,344 to France, and of 115,919 to other foreign ports.

Referring to our remarks above, we quote as follows:
Ordinary 17 1/4 to 18 1/4
Good ordinary 20 to 20 1/4
Low middling 20 1/4 to 21 1/4
Middling 21 1/4 to 22
Strict middling 22 to 22 1/4

MISCELLANEOUS.
DU BOIS & CO.,
MANUFACTURERS OF COTTON GINS.
We now offer to the public a new and improved COTTON GIN,
so constructed that stems and hulls will not be cut up by the saws, thereby preserving the teeth of the saws from injury by hard substances getting into the Gln, and consequently making a cleaner sample out of roughly picked Cotton. It is also constructed to gin the Peeler and any other kind, except the Sea Island Cotton.
Wherever our Gins have been in use they are known to give
—Faster than Other Gins—
In common use, by the flange keeping the Cotton in contact with the teeth until stripped of the fiber, and then preventing them, after being cleared, from being carried up into the box by the upward motion of the roll. Thus, by keeping a free and white roll, as it is called, the amount of Cotton ginned is increased. They are not complicated and not easily put out of order.

CERTIFICATE.
MESSRS. DU BOIS & CO.: We ginned the latter part of our crop of Cotton on the 58-Saw Gin bought of you, and in the presence of Captain J. A. Wemyss, Colonel L. D. Hatch, Edward Shackelford, Anderson Walker and E. T. Taylor a bale of Cotton, weighing 532 pounds, was ginned in one hour and thirty minutes. It makes a good sample, and carries a free and perfect roll.
GORDON & ROBINSON.
JANUARY 7, 1870.
This Gin will be on exhibition at the next Agricultural Fair.
All orders promptly attended to. Address

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, MAY 11, 1870.

NO. 17.

PROCEEDINGS OF THE GENERAL CONFERENCE OF THE METHODIST E. CHURCH SOUTH.

FIRST DAY.

WEDNESDAY, MAY 4, 1870.

The sixth General Conference of the Methodist Episcopal Church South was held in the Court Square, Cumberland Presbyterian church, Memphis, Tennessee, beginning Wednesday, May 4, 1870. The following Bishops were present: Bishops Andrew, Paine, Kavanagh, Pierce, Marvin, Doggett, Wightman and McTear.

Bishop Paine opened the session by singing hymn 259:

"Draw near, O Son of God, draw near."

After which Bishop Kavanagh led in prayer.

Bishop Pierce then read Isaiah 41, 17-38.

Bishop Doggett then announced hymn 264:

"How rich thy bounty, King of kings."

After singing the hymn Andrew Monroe led in prayer.

Bishop Paine then called on the secretary of the last General Conference to call over the Annual Conference, that the delegates might present their certificates of election.

T. O. Summers, the last secretary, called the roll.

Before calling the roll of the delegates the secretary stated that a great many of the delegates had not their certificates with them, but that he had been furnished with a list of delegates and wished to know if there was any objection to his announcing them as furnished him by authority.

There being no objection the secretary called the roll of the Conference, and certificates of election of the delegates were handed in.

Thomas O. Summers, of the Mobile Conference, was nominated and elected secretary.

Dr. Shipp moved that the secretary be allowed to choose his own assistants.

Dr. Green thought that they had better be elected by the Conference, as they might have to be used officially.

The secretary nominated John S. Martin, of Baltimore Conference, in consideration of his previous able services; and he was elected accordingly.

The secretary then stated that as James Wickham, of the Arkansas Conference, was favorably known as the first layman who was ever secretary of an Annual Conference, he would also nominate him, together with George N. Lester, of the North Georgia Conference, as assistants, and they were elected accordingly.

Bishop Paine stated to the Conference that they were now organized, and competent to do all business. He suggested that they should proceed to fix the bar of the Conference room, to fix the time of meeting and adjournment, and to take some measures in regard to rules of order.

Dr. Shipp moved that they adopt the same rules as they had at the last Conference, with the exception of Rule 9, which he moved to be amended so as to require all members, when the Conference is called to order, to take their seats according to order, to take their seats according to the Conference which they represent, and that in debates members confine themselves to the question. He stated that the object was to preserve order, which, in as large and unwieldy a body as this, is a very material matter.

Bishop Paine suggested that the simplest method is to bring in the amendment—which was done.

Dr. Hamilton wished to know if this applied to delegates when speaking, requiring them to stay in their places. He said that it would be necessary to advance in order to be heard; and if they were not allowed to move out of their places a great deal would not be heard.

Bishop Paine stated that a man must be recognized as seated with his delegation, but that he would be allowed to advance while speaking.

Dr. J. B. McFerrin said that he was opposed to the motion. He said that he belonged to an itinerant body and expected to move about; and that they had come to cultivate a spirit, which could only be by moving about among the churches in friendly intercourse.

Moran said that he was opposed to the latter part of Dr. Paine's motion, requiring members to confine themselves to the question, as in all deliberative bodies it is a law that a speaker is not recog-

nized who does not keep to the question, as the president can at any time call him to order.

Colonel Lester said that he was opposed to the first part of the motion, fixing members to one place. Some are aged; some hard of hearing, and may be out of place trying to hear the speakers, and might wish to rise up there. On the whole, he thought it was not necessary to set them apart. He thought that every man who rises and calls the president's attention ought to have the floor, as it is sometimes very difficult to get the attention of the president. On these grounds he was opposed to the motion.

Dr. Green said that he fully appreciated Dr. Shipp's wishes to have order and prevent crowding; but that he was opposed to sitting in delegation. He was for fusing a little, and the Bishop would have to study geography a while before he could get the Conference straight and know each member in his delegation, and you would have to have some one to sit by you and prompt. The old rule is good enough.

The venerable Andrew Monroe opposed the motion, after which it was put to the house and lost.

H. A. C. Walker suggested an amendment to Rule 10, to the effect that Mr. President is the only proper form of address to the chair, and that the fifteen minutes' rule should not be suspended or rescinded by less than three-fourths of the Conference.

John B. McFerrin stated that Brother Walker could not furnish a precedent for any such motion in any legislative body.

E. H. Myers said that he had been convinced that the operation of the fifteen minutes' rule delays the proceedings of the Conference; that if one who has prepared himself on all the points of any subject, will speak until he has exhausted it, it would save time which would otherwise be wasted in useless discussion. He did not suppose that he would make a fifteen minutes' speech himself, but that they had not to compare ideas and facts, and could not do it in fifteen minutes' speeches. If all that had to be done was thus limited the body would lose what character it over had as a deliberative assembly. There are other remedies for long speeches. The previous question can be called and cut off a debate at any time. He was for laying the rule on the table, and if afterward it was found that they were likely to be overrun, then take it off and act upon it.

J. B. Cottrell said that he was opposed to the motion. He conceived that their business was to speak and spread spiritual healing over the land. Seed was scattered here that would bear fruit in after days. If we have only to transact our business without speeches our work will be done before commenced. When the subject of the pastorate was up at the last Conference—a most important subject—they had to leave off before it was discussed. Salient points must be discussed. This law will be unsatisfactory, and we will return home dissatisfied with our work.

Dr. Rush said that he hoped that they would proceed to adopt it at once, and if afterward it was found to be impracticable it could be changed. They had found them satisfactory, and he was opposed to any change and in favor of the rule.

Dr. Green said that he was in favor of Dr. Myers' proposition. Some might say that it was on account of the fact that he was a long-winded fellow and wanted it on that ground. That rule consumes time. It arrests the speech, which will be finished by consent, whenever opportunity is granted.

Dr. Schen said that in an emergency the rule could be set aside. He thought it was a good rule and was greatly in favor of adopting it.

Dr. Mitchell said the motion was to lay the rule on the table. He was willing to vote for that, but not to strike it out.

E. H. Myers said that if it was in order he would make a motion to lay on the table that part of the rule—"nor speak longer than fifteen minutes," and that the rest be adopted.

Bishop Paine allowed it; and then asked if the Conference was ready for the motion.

J. B. McFerrin said that he was not ready. He was opposed to laying it on the table. Let it stay. Why lay it on the table?

J. B. Cottrell said that it could be reinstated at any minute.

Dr. Myers said that the question was embarrassing the Conference, and he would withdraw the motion.

Dr. Green made a motion to strike

out the fifteen minutes' clause, which was seconded by R. Abbey.

The motion was put to the Conference and lost, and the rule stood unaltered.

The first rule was amended so that the Conference is to meet at nine o'clock A. M. and adjourn at one o'clock P. M.

Dr. Keener moved that Rule 17 on previous question be amended to read thus:

"Whenever a member shall move the previous question the vote on such a motion shall be taken without a debate; and if the call shall be sustained by a majority of those voting, the president shall put the question in the following words: 'Shall the main question be now put?' when the vote shall be taken without debate, and if carried by two-thirds of those voting, the president shall proceed to put the main question, with its several amendments, as it then stands before the house."

"J. C. KEENER."
"J. HAMILTON."
"W. M. BYRD."

Dr. Keener said that by our rule the previous question could be called by a mere majority. This was contrary to usage in all deliberative bodies. Important questions are determined by this usage in a way to impinge upon the rights of minorities.

R. J. Morgan explained how the rule operated in other bodies.

R. S. Moran said that time was lost by first demanding the seconding of the call, for previous question by a majority vote; and then calling the question by a two-third vote. Let it require a two-third vote to second a call for previous question and we got all we want, with voting once.

James Jackson said the naked question is, Shall one-third of the Conference continue a debate which two-thirds are ready to stop? Ought not a mere majority, when tired of it, to stop the debate?

A. A. Gilbert agreed with him. He thought it arbitrary to require a two-third vote to carry a previous question.

L. C. Garland said Dr. Keener was right in demanding that the call be seconded by a majority; or else, if individuals could call, there would be constant interruption by such calls.

E. H. Myers objected to the doctrine that a bare majority should close debate, cut off all amendments, and on important questions, at any moment. The rule of a majority was frequently tyrannical. These rules are the result of the combined wisdom of ages to protect minorities, and this body should do this.

George N. Lester agreed substantially with Judge Jackson; said that the effect of call of previous question was greatly modified recently. It is not so savage a rule as formerly. The laymen wish to stay to the end, but do not wish to remain too long. Therefore, he would have the majority able to close a debate.

J. C. Keener's motion was lost.

R. S. Moran moved to amend the rule so as to require a two-third majority to second the call for the previous question.

Dr. Hamilton urged the necessity of protecting the minority against the operations of a call for the previous question. This call was devised for this purpose. A majority of one can stop a debate and cut off all amendments, when a little discussion would change the entire result in a few minutes.

I. P. Garvin argued that the parliamentary rule was made for political parties. We have no parties here. Let the rule stand.

A. R. Winfield was for taking ample time to do our work. If you let the majority control in the matter we will be always in feverish excitement. He sustained the amendment, which was carried.

The rules as amended, on motion of J. E. Evans, were adopted, as follows:

RULES OF THE GENERAL CONFERENCE.

1. The Conference shall meet at nine o'clock A. M. and adjourn at one o'clock P. M., but may alter the times of meeting and adjournment at their discretion.

2. The president shall take the chair precisely at the hour to which the Conference adjourned, and cause the same to be opened by reading the Scriptures, singing and prayer; and, on the appearance of a quorum, shall have the journals of the preceding day read and approved, when the business of the Conference shall proceed in the following order, viz:

(1) Reports of the standing committees.

(2) Reports of the select committees.

(3) Petitions, memorials and appeals.

3. The president shall decide all questions of order subject to an appeal to the Conference; but in case of such appeal the question shall be taken without debate.

4. He shall appoint all committees not otherwise specially ordered by the Conference; but any member may decline serving on more than one committee at the same time.

5. All motions and resolutions introduced by any member shall be reduced to writing, if the president, secretary or any two members request it.

6. When a motion or resolution is made and seconded, or a report presented, and is read by the secretary, or stated by the president, it shall be deemed in possession of the Conference; but any motion or resolution may be withdrawn by the mover at any time before decision or amendment.

7. No new motion or resolution shall be made until the one under consideration is disposed of, which may be done by adoption or rejection, unless one of the following motions should intervene, which motions shall have precedence in the order in which they are placed, viz: Indefinite postponement; laying on the table; reference to a committee; postponement to a given time; amendment or a substitute; provided that a motion to lay on the table shall be put without debate.

8. No member shall be interrupted when speaking, except by the president, to call him to order when he departs from the question, or uses personalities or disrespectful language; but any member may call the attention of the president to the subject, when he deems a speaker out of order, and any member may explain, if he thinks himself misrepresented.

9. When any member is about to speak in debate, or to deliver any matter to the Conference, he shall rise from his seat and respectfully address himself to the president.

10. No person shall speak more than twice on the same question, nor more than fifteen minutes at one time, without leave of the Conference; nor shall any person speak more than once until every member choosing to speak shall have spoken.

11. When any motion or resolution shall have passed it shall be in order for any member who voted in the majority to vote for a reconsideration.

12. No member shall absent himself from the service of the Conference without leave, unless he be sick or unable to attend.

13. No member shall be allowed to vote on any question who is not within the bar at the time when such question is put by the president, except by leave of the Conference, when such member has been unnecessarily absent.

14. Every member who shall be within the bar at the time the question is put shall give his vote, unless the Conference, for special reasons, excuse him.

15. No resolution altering or rescinding any rule of discipline shall be adopted until it shall have been at least one day in the possession of the Conference.

16. A motion to adjourn shall always be in order, and shall be decided without debate.

17. Whenever a member shall move that "the question shall now be put," the vote on such motion shall be taken without debate; and if a majority of two-thirds of the members voting shall sustain the call, the president shall put the question then pending, and the vote shall be taken immediately without debate; and if the pending question shall be an amendment or a substitute, and shall be rejected, the president shall then put the main question, and the vote shall be taken at that without debate.

J. E. Evans moved that the following standing committees be appointed, to consist of one member from each Annual Conference, each delegation to nominate its own member on said committees, viz:

1. On Episcopacy. 2. On Itinerancy. 3. On Books and Periodicals. 4. On Boundaries. 5. On Missions. 6. On Revision. 7. On Sunday Schools. 8. On Education. 9. On Religious Interests of the Colored People.

On motion of P. A. Peterson, John Moss, E. C. Slater, L. D. Mullins, W. M. Patterson, A. H. Thomas, D. R. S. Rosborough, Guilford Jones, R. J. Morgan and S. Watson were appointed a Committee on Public Worship.

Bishop McTear, chairman of the Committee on the Rearrange-

ment of the Discipline, appointed by the General Conference of 1866, presented a report in printed form, a copy of which was given to each member of the Conference.

[See report of book agent on second page.]

The Conference then adjourned with benediction by the Bishop.

SECOND DAY.

THURSDAY, MAY 5, 1870.

Conference met at the stated time. Bishop Paine in the chair.

Religious services were conducted by Bishop Andrew.

The minutes of the last meeting were read, corrected and approved. Bishop Pierce then took the chair.

The delegates who were not present yesterday responded to their names and took their seats.

The Bishop then called for the Standing Committees that were appointed by the various delegations. [See list of Standing Committees on fifth page.]

The Conference then proceeded to fix the bar of the house, and it was decided that it should be the lower end of the third window.

W. M. Prottzman moved to reconsider the motion which had been adopted with reference to adjournment, which was put to the Conference and lost.

A. G. Brown stated that he had a message from Bishop Early. No objection being offered, he said that on the evening he left Lynchburg the Bishop requested him to express his deep regret at not being able to be present with his brethren at the opening session of the Conference, but that he expected, God willing, to join them before its close; that he desired the Conference to be assured of his tender affection toward them, and that he would pray continually that the "peace of God, which passeth all understanding, would keep their hearts and minds in the knowledge and love of God and of his Son Jesus Christ;" and that in all their deliberations they may be guided by that wisdom from above which is "first pure, then peaceable, gentle, easy to be entreated, full of mercy and good fruits, without partiality and without hypocrisy." The venerable Bishop said: "In all my infirmities and afflictions, I have never yet doubted a gracious Providence; the best of all is, God is with me."

Dr. Boring moved the appointment of a committee on "Orphan's Home." The motion was carried, and, at the suggestion of Dr. Boring, it was left with the chair to appoint the committee.

A. H. Redford proposed the appointment of a committee to get up a hymn and tune book for Sunday schools. He stated that such a book was greatly needed; that the church had been using publications from various authors, and it was highly important that this be under our own supervision. On this ground he asked for a special committee to devise some active measures on this important point. He suggested that brethren from the Annual Conferences be appointed who are connected directly with this work, and it was likely that they would know better what is needed than any one else.

Dr. Redford's motion was put to the house and carried, and the chair was requested to appoint the committee.

Dr. Winfield moved that a committee of seventeen be appointed to take the subject of temperance under consideration, and explain definitely what is meant by the general rule referring to the use of spirituous liquors.

Dr. McAnally hoped that they would keep clear of outside issues—when once entered upon there was no telling where or when they would stop, and hence they had better never begin.

Dr. Winfield replied that it was no outside issue; that intemperance is the great evil of the land, and we want it to come forth as the voice of the General Conference, and let it be known what is strictly and literally meant by the rule in question. He could not see that it was an outside issue.

Mr. Potter said that he did not see that it was the duty of the Conference to appoint a special committee to report on this special vice, any more than any other.

Dr. Winfield's motion was then put to the Conference and lost.

H. H. Montgomery stated that he believed it was the desire of the lay members of the Conference to have a committee appointed on the finances of the church, to consist of one lay member from each Conference.

The secretary wished to know why it should be confined to the laity.

H. H. Montgomery said the lay members so desired it.

The Conference ordered the committee to be appointed by the several delegations.

J. B. Cottrell moved a reconsideration, on the ground that the laity should confer with the ministers of the church, which motion he substituted by a proposition to enlarge the committee by adding clerical members.

H. A. C. Walker said that when he was sent to a station he placed all the financial business of the church in the hands of stewards, except that which he was compelled to attend to himself, and he did that because the laity knew how to manage money matters; and as they were kind enough to offer to do it, he thought it should be turned over to them exclusively; their report had to come before the Conference at any rate, and could be received or rejected.

J. B. Cottrell said that he was confident that it was necessary to have ministers on that committee. He thought that Methodist preachers were the best financiers in the world, and that there ought to be some ministerial element on the committee.

W. Shapard said that if there would be one minister and one layman from each Conference the committee would be too large.

J. B. Cottrell then fell back upon his previous motion to reconsider the vote, which was put to the Conference and carried.

Dr. Shipp moved that the committee be organized by appointing one member from each delegation, at their own discretion.

Dr. Evans moved a substitute to the motion limiting the committee to nine, which was put to the Conference and lost.

The original motion of Dr. Shipp was then put to the Conference and carried.

Bishop Wightman then read the Bishop's address, which was listened to with profound attention. It is as follows:

ADDRESS OF THE BISHOPS.

To the General Conference of the Methodist Episcopal Church South.

BELOVED BRETHREN—We would join you in devout thanksgiving to God that another quadrennial session of your body has occurred. Representing, as you do, all parts of our wide field of labor, conversant with their conditions and wants, and invested with authority over the whole church, we beg respectfully to remind you of the importance of prayerful, vigilant and impartial attention to the duties of your delicate and responsible position. We trust that the subjects which may be brought before you will be discussed and decided as in the immediate presence of God, and with direct reference to the welfare of the whole church.

With profound emotion we announce to you that since your last session our venerable and beloved colleague, Joshua Soule, has departed this life. His death occurred in Nashville, Tennessee, March 6, 1867, in the eighty-seventh year of his life, and the seventieth year of his itinerant ministry. In many respects Bishop Soule was a remarkable man. At the time of his death he was, probably, the oldest traveling preacher in America, if not in the world; and was thus the connecting link between the Methodism of Wesley and Asbury and that of the present day. Throughout his whole ministerial life he was eminently devoted to God, and employed exclusively in the service of the church; often filling positions of the highest responsibility, and always honorably and usefully. His mind was clear and vigorous, his deportment dignified, and his whole course was marked by consistency, purity and unswerving fidelity to principle.

Whether viewed as a man, a Christian, a minister, or as filling the highest office in the church for forty-three years, his character deserves to be held in the highest esteem, and his memory to be perpetuated in the history of the church. We devoutly thank God for such a man, and for the gifts and grace which rendered his eventful life so useful, his declining years and closing day so beautifully serene, so sublimely triumphant.

The past four years have abounded with trials to the church you represent, especially in those portions of the country which suffered most by military devastation during the late war, and by ecclesiastical interference with our church property. But it is matter of devout gratitude that poverty and persecution—even unto stripes and death, in some

(Continued on fourth page.)

The Christian Advocate.

SATURDAY, MAY 14, 1870.

REPORT OF THE BOOK AGENT
TO THE GENERAL CONFERENCE.

A. H. Redford laid on the table his quadrennial exhibit as agent of the Publishing House.

EXHIBIT OF THE PUBLISHING HOUSE OF THE S. M. CHURCH SOUTH, FOR THE FOUR YEARS ENDING APRIL 30, 1870. BY A. H. REDFORD, AGENT.

SOUTHERN METHODIST PUBLISHING HOUSE, NASHVILLE, TENN., APRIL 30, 1870.

To the Bishops and Members of the General Conference of the S. M. Church South:

DEAR BROTHERS—The period having arrived for the quadrennial exhibit of the affairs of the Southern Methodist Publishing House, I beg leave to present the following:

On the twenty-sixth of April, 1866, I was elected to take charge of the Publishing House, and on the twenty-fourth of May following I entered upon the duties of the agency.

I deemed it proper at once to take a careful inventory of the assets and liabilities of the House, and deputed James W. McFerrin, the son of the former agent, our principal clerk, to take an account of the merchandise on hand; while the real estate, stereotype plates, presses, type and furniture, were estimated at their cash value. The liabilities were copied from the ledger by Mr. Hugh Carroll, who had been the book-keeper previous to April, 1862, and who now occupies that position in the House.

After such an examination as we could make, we presented, on the first of June, 1866, the following exhibit:

ASSETS.	
Real estate in Nashville.....	\$43,223 66
Fixtures—presses, type, etc.....	36,875 00
Stereotype plates.....	47,539 69
New Orleans Depository.....	17,858 68
Merchandise.....	10,326 67
Furniture—desks, tables and safe.....	275 00
Cash.....	2,420 55
Total.....	\$168,519 25

LIABILITIES.	
Bills payable.....	\$39,227 69
Book accounts.....	\$9,255 86
Total.....	\$48,483 55

Balance in favor of the House..... \$7,165 70

In entering upon the discharge of the duties devolving upon us, we met with but little to offer us any encouragement. The history of publishing houses in this country shows that, under the most favorable circumstances, but few comparatively have succeeded; while no example has been furnished us where the fortunes of any so greatly improved as ours have ever been resuscitated. In addition to these facts, the Southern Methodist Publishing House had but little active capital without trade—with no place to look for patronage, except a country prostrated by misfortune—with but little hope of its success, on the part of either the ministry or membership—and with a debt hanging over it sufficient to paralyze every energy.

Under these circumstances we called a meeting of the Book Committee on the first day of June, when views were freely interchanged, which resulted in the determination to place the House at once upon a broad commercial basis, and trust for its success to the prosecution of a general book and stationery trade, added to the sale of our own publications; avoiding, however, all light literature.

The policy of the House, since the war, had been to confine itself to the sale of our publications. The only examples in this country where publishing houses have confined their business to the sale of their own publications, so far as we know, are the American Bible, American Tract and American Sunday School Societies. These houses are kept up by an active traveling agency, by which appeals are made to the charity of the people for contributions; and without these constant appeals they would become bankrupt. Believing that the Publishing House could not be sustained, much less resuscitated, unless we returned to the old policy, we thought it proper to adopt the course we have followed.

The occupancy of the Publishing House during the war, by the Federal government, rendered it necessary to remove the entire stock to the second story in the building, where the business was conducted until late in August, following the General Conference of 1866, when we removed to the large room on the first floor, which had been previously occupied as our salesroom; and which, in the meantime, had been refitted.

The church at once, sympathizing with the House, rallied to our support, and with the gradual increase of our stock, the business of the House improved; and on the first of July, 1867, we were able to make the following exhibit to the several Annual Conferences:

ASSETS.	
Real estate in Nashville.....	\$44,319 74
Fixtures—presses, type, etc.....	35,429 82
Stereotype plates.....	47,534 24
Merchandise.....	24,242 00
New Orleans Depository.....	19,242 00
Debits due.....	5,540 10
Furniture—desks, tables and safe.....	305 00
Cash on hand.....	206 00
Total.....	\$171,597 03

LIABILITIES.	
Bills payable.....	\$35,269 12
Book accounts.....	32,787 34
Total.....	\$68,056 70

Balance in favor of the House..... \$103,540 27

Balance in favor of House last year..... \$7,165 70

Making a difference of..... \$16,374 57

In the exhibits of 1866 and 1867 you will perceive a difference of \$1,095 78 in the value placed upon the real estate. The money expended in fitting up the salesroom, which was added to the estimate of 1866, accounts for this difference.

On the first of July, 1868, our exhibit was as follows:

ASSETS.	
Real estate in Nashville.....	\$44,319 74
Fixtures—presses, type, etc.....	36,556 00
Stereotype plates.....	47,500 00
Merchandise.....	23,814 00
N. Orleans Depository—merchandise and fixtures.....	14,911 50
Debits due on new account.....	6,210 20
Furniture—desks, tables and safe.....	305 00
Cash on hand.....	151 17
Total.....	\$173,509 01

LIABILITIES.	
Bills payable.....	\$34,451 27
Book accounts.....	15,371 15
Total.....	\$49,822 42

Balance in favor of the House..... \$124,075 59

Balance in favor of House last year..... \$103,540 27

Increase..... \$20,535 32

From the first of July, 1868, to the thirtieth of June, 1869, the business of the House was much more prosperous than it was either of the previous years. The proposition to the preachers and laymen of the church to purchase \$60 worth of our publications, as a means of relief to the Publishing House, while they would receive value for the money thus expended, met with a very prompt and timely response, and greatly increased the circulation of our books, and enabled us, on the first of July, 1869, to make the following exhibit:

ASSETS.	
Real estate in Nashville.....	\$44,319 74
Fixtures—presses, type, etc.....	35,456 00
Stereotype plates.....	49,200 00
Stereotype foundry.....	2,500 00
Merchandise.....	45,686 02
N. Orleans Depository—merchandise and fixtures.....	18,363 41
Debits due on new account.....	13,037 09
Furniture—desks, tables and safe.....	505 00
Cash on hand.....	592 44
Total.....	\$212,759 73

LIABILITIES.	
Bills payable.....	\$32,386 17
Book accounts.....	10,189 59
Total.....	\$42,575 76

Balance in favor of the House..... \$170,183 97

Balance in favor of House last year..... \$124,075 59

Increase for this year..... \$46,108 38

The condition of the affairs of the Publishing House at present is as follows:

ASSETS.	
Real estate in Nashville.....	\$44,319 74
Presses, engine, boiler and fixtures.....	33,965 00
Composing room.....	5,705 00
Stereotype plates.....	51,493 40
Stereotype foundry.....	3,710 00
Merchandise.....	54,550 13
N. Orleans Depository—merchandise and fixtures.....	20,906 48
Debits due on new account.....	14,939 44
Furniture—desks, tables and safe.....	505 00
Cash on hand.....	210 38
Total.....	\$230,224 24

LIABILITIES.	
Bills payable.....	\$40,311 93
Book accounts.....	1,550 19
Total.....	\$41,862 12

Balance in favor of the House..... \$188,352 65

Balance in favor of House last year..... \$170,183 97

Increase for this year..... \$18,168 68

By referring to the several exhibits we have made to the Annual Conferences, it will be seen that there has been a regular annual improvement in the financial condition of the Publishing House since the General Conference of 1866.

We reported in our exhibit, after the deduction of all liabilities:

June 1, 1866.....	\$57,165 70
July 1, 1867.....	103,540 27
July 1, 1868.....	124,075 59
July 1, 1869.....	170,183 97
April 1, 1870.....	188,352 65

This exhibit shows a difference in favor of the House, the last four years, of \$101,186 95.

In our exhibit for 1866, after reporting the reliable assets of the Publishing House, we also stated that "in the exhibit made by Dr. J. B. McFerrin and Rev. R. Abbey, at the late General Conference, they reported, as a part of the assets of the House, as

Due from Tract Society.....	\$32,165 71
Due from Richmond Depository.....	24,145 89
Due from bills receivable.....	39,983 92
Due from individual accounts.....	72,881 23
Due from Nashville subscription.....	4,387 00
Total.....	\$173,563 75

"It will be perceived that I have in my exhibit taken no account whatever of the debts due the House by either the Tract Society, Richmond Depository or Nashville subscriptions, because these debts are entirely worthless, and actually form no part of the assets of the House. Nor have I taken any account of bills receivable or individual accounts due the House, only to show you the amount, because most of these can never be collected. On our books we place them as suspended assets, and, if collected, will be reported hereafter as a portion of the original capital."

From the Tract Society, the Richmond Depository and Nashville subscriptions no collections have been made. From bills receivable and individual accounts we have collected \$4,269 24. We have also been paid from the Vauhatch estate, \$2,483 39. There have also been donated to the House \$500 by Miss Margaret Grimmer, and \$65 15 by sundry persons for benefit of stereotype foundry. We also realized \$400 from the sale of a house

and lot in Shelbyville, Tennessee, of which we make the aggregate of \$7,717 78. After deducting this amount from the \$101,186 95, it leaves a balance, realized as net profits resulting from the business of the House, in four years, after deducting the interest we have paid on the heavy debt we have carried, and all incidental expenses, of \$94,469 17, which is an excess of the entire liabilities of the House, as reported in—1866, of \$23,015 62. We cannot tell what proportion of debts, due the House previous to 1866, may yet be collected. Though a small amount may be collected, yet the claims are too uncollectible to be placed among the available assets, and hence we still class them with suspended assets.

NEW ORLEANS DEPOSITORY.

For the condition of the Depository at New Orleans we refer you to the exhibit of its affairs by the active and energetic agent, the Rev. R. J. Harp.

During the past four years about \$20,000 worth of our publications have been sold by the House in New Orleans, besides its other business. Whether or not this will justify the continuance of this Depository as such, must be determined by the General Conference.

EMPLOYEES.

The number of employees we found at the Publishing House in May, 1866, was six. This included the principal clerk, the mailing clerk, the folder of the Advocate, and three printers. We now have seventy-nine, including all departments.

OUR PRESS ROOM.

We have in our press room seven book, one cylinder, three hydraulic, and one screw press, all in good condition. We have also printers' sheet boards, chases, stereotype blocks, paper cutter, sheet racks, imposing stone and table, sufficient for all our purposes.

The engine is a very superior one, and, with the boilers, is complete, having all necessary fixtures, shafting, hangers, belting, tools, workbenches, etc.

To sustain this department of the House has always been attended with difficulty. If all the power the engine possesses could be constantly employed, there would be no difficulty, as the expenses would be relatively diminished.

On the twenty-fifth of June, 1866, our press room was reopened. The work done from this date

To July 1, 1867, amounted to.....	\$3,940 20
To July 1, 1868, amounted to.....	5,138 40
To July 1, 1869, amounted to.....	7,495 20
To Apr. 1, 1870, (nine months).....	7,197 60
Total.....	23,771 40

The press room, during this time, cost the House, from the twenty-fifth of June, 1866,

To July 1, 1867.....	\$6,476 04
To July 1, 1868.....	5,805 42
To July 1, 1869.....	5,942 51
To Apr. 1, 1870, (nine months).....	5,276 37
Total.....	23,500 34

In four years the profits arising from press room amount to \$211 06. We lost in press room,

During year ending July 1, 1867.....	\$2,535 84
During year ending July 1, 1868.....	607 02
During the year closing July 1, 1869, the press room yielded a revenue of.....	\$1,552 69
For year ending April 1, 1870, (nine months).....	1,561 23

In the periodical literature, published by the book agent, we have rigidly adhered to the instructions of the General Conference of 1866, which may be found in the Discipline, pp. 272, 273:

"General Conference—Periodicals and Editors.—The general book agent shall be authorized to publish a weekly periodical, or newspaper, to be called the Christian Advocate, and a child's paper, to be called the Sunday School Visitor; said editor to be elected by the General Conference. It is provided that if the business of the Publishing House shall increase so as to require additional editorial labor, the Book Committee, with the general book agent and one of the Bishops, in the interval of the General Conference, shall have the authority to elect an additional editor or editors, who shall come under the same rule as to salary with the general book agent and book editor. It is further provided, that should the general book agent and Book Committee find it necessary and expedient to publish a monthly periodical, they may engage in such publication upon the recommendation of three or more Annual Conferences and the College of Bishops. But should any of the above named periodicals, except the Sunday School Visitor, after a fair experiment, fail to meet expenses, the book agent shall be authorized to discontinue the publication of the same."

At the time we were placed in charge of the Publishing House the subscription list to the (Nashville) Christian Advocate amounted to about sixteen hundred, which was not sufficient to meet the current expenses. The press-work was executed at the offices, first of the Gazette, and subsequently of the Union and American, as our press room had not been placed in working order. The General Conference had instructed the book agent to discontinue its publication, unless the patronage it received should meet the current expenses. The importance of its continuance could not but suggest itself to every Methodist heart. It was the central organ, and the only paper that belonged to the church, and over which the General Conference had unlimited control.

Impediments confronted us in every direction. The postal department of the government afforded no facilities in many sections of the country, which cut off from us a large patronage, while much of the territory to which we looked for support had already been preoccupied by other papers. The instructions of the General Conference were so stringent that, for a time, it seemed impossible to continue the Advocate; and but for the provision in the instructions, "after a fair experiment," to which we gave the broadest construction, we should have felt it our duty to withdraw the Advocate from the field.

Feeling that the success of the Publishing House was closely identified with the continuance of the Advocate, and unwilling to withdraw so powerful an influence for good, contrary to our wishes, we proposed to devote a portion of the paper to advertisements, hoping, by this method, to be justified, under the restrictions thrown around us, in continuing the publication. However reluctant we were to give a single column to other than reading matter, we deemed it far preferable to do this rather than deprive the church of so valuable a contribution to our literature, and so able an exponent and defender of our doctrines and polity.

We were not surprised that many brethren, zealous for the church, and feeling a conscious pride in the appearance and character of the central organ, expressed their dissatisfaction, because too much space, in their judgment, was given to advertisements. We fully sympathized with their views, and only regretted that necessity was laid upon us.

We further regretted the injustice that this necessity inflicted on the editor. The Advocate was his, and any undue occupancy of its columns was an invasion of his rights. Sympathizing, however, with us in the burden we were bearing, and co-operating fully, he willingly shared with us in every responsibility, and we are gratified to be able to report that the weekly balance which existed against the paper for some time after the General Conference of 1866 was overcome, and a net profit, after paying a fair proportion of editor's salary, and all the incidental expenses connected with it, of \$11,100 25.

I think it will not be improper to suggest that the enlargement of the Advocate claims your attention. Neither the editor nor the agent deemed it proper to take any step in this direction without the advice of the General Conference, and, indeed, it would not have been safe, in a financial point of view, to make any change at an earlier period, as it would have necessitated the purchase of a new press.

The interest of the church now demands that this paper be not only enlarged, but, being the property and official organ of the church, in its dimensions it should be equal to any religious paper in the country.

SUNDAY SCHOOL VISITOR.

The publication of the Sunday School Visitor was resumed January 1, 1867.

The instructions of the General Conference were that it should be published without any reference to its cost to the Publishing House. The church at once rallied to its support, until it has attained a circulation of about thirty thousand. The General Conference did not deem it proper to elect an editor whose entire time should be devoted to the Visitor. This duty has devolved on the editor of the Christian Advocate and of books, who has performed this work, in addition to his other editorial labors. If in appearance and dress the Visitor has not been equal at any time to the demands of the church, it has been because our financial condition would not allow it.

We were not prepared to make the necessary outlay for new engravings, and hence we could not make the illustrations as attractive as we desired, nor has the paper on which it is printed been equal to our wishes. We have gradually improved it from time to time, as we have been able, both in the material on which it is printed, and in the illustrations which beautify it.

SUNDAY SCHOOL TEACHER.

We would suggest the propriety of publishing a monthly paper for teachers in Sunday schools. We have been called upon by many brethren to devote a portion of the Visitor to lessons for teachers. The General Conference, however, instructed us to publish "a child's paper," and we have not felt authorized to occupy any portion of its columns only for children.

With the facilities the Publishing House can afford, the Sunday School Visitor and a monthly paper for teachers may very properly be placed under the supervision of one editor.

A REVIEW AND MAGAZINE.

We also ask the attention of the General Conference to the propriety of authorizing the publication of a monthly periodical, combining the features of a review and magazine. Some of the Annual Conferences have instructed their delegates to bring this question before the General Conference, while there seems to be a very general desire throughout the church for such a periodical.

The Publishing House, in our opinion, has reached the point when the General Conference may safely entertain the proposition to publish a first class monthly. The ablest writers, both in America and Europe, can be commended, and such a periodical will receive the general patronage of the church.

SUNDAY SCHOOL LITERATURE.

The Sunday school interest has special claims on your attention. During the past few years a greater number of books for children have been issued from the Northern press than in a quarter of a century before. In order to arrest the attention of children these publications are gotten up in attractive styles and with handsome illustrations. Many of these books are excellent, and may safely be placed in the Sunday schools. The large majority of them, however, are not only offensive to the tastes of our people, but corrupting in their influence; while many of them abound, though in the most insidious manner, in the advocacy of erroneous and strange doctrines. From their titles no idea can be formed as to their contents. Extraordinary efforts are being made to place these books in our Sunday schools, and, in many instances, with too much success. We have endeavored to guard against this evil by adding to our own publications a large eclectic catalogue of the most attractive and instructive books for children that we could find. We hope that the House will soon be able to furnish new works of this class.

BINDERY.

The bindery has never been the property of the church, but belongs to Mr. John Locken. In 1846, previous to the establishing of the Publishing House, Dr. Early, then the general book agent, contracted with Mr. Locken to bind such books as he might publish.

This contract was renewed in 1854, by Messrs. Stevenson & Owen, successors to Dr. Early; and, in 1858, by Dr. McFerrin, who, at that time, came into office as the successor of Stevenson & Owen. We thought it advisable, in 1866, to continue the same arrangement. The cost of the work done in the bindery during the past four years for the Publishing House has averaged about \$15,000 per year. Additional work, however, has been done for outside parties.

STEREOTYPE FOUNDRY.

Previous to the war we had connected with the Publishing House a stereotype foundry, which, for its completeness, was unequalled in the West. During the occupancy of the House by the Federal government it was so nearly destroyed that it was entirely useless. There being no other foundry in Nashville, we were compelled to have our Discipline stereotyped in another city. The imperfect and unsatisfactory manner in which the work was done, the many errors which required correction, together with the great inconvenience, induced the necessity of reviving this department as early as practicable. We were able to open it in May, 1867, and have gradually increased its furniture and facilities, until it is now equal to all our demands. It has cost us \$3,710. The work performed in the foundry, after paying all expenses for labor, has entirely liquidated the cost, leaving a surplus of \$641 49, less \$65 15, which was donated for this purpose.

BUILDINGS.

The buildings owned by the church, and occupied by us, in the city of Nashville, require to be improved. The rear portion of the establishment is well adapted for the purposes for which it is used. The front buildings, however, demand an entire remodeling. Perhaps to take them down and rebuild will be more satisfactory than to attempt any improvement on the present house. We think an amount requisite to meet the expenses of all necessary improvements may soon be realized from the proceeds of the business. Neither the Book Committee nor an agent would feel free to incur this expense without the advice of the General Conference.

CLAIMS AGAINST THE GOVERNMENT.

We desire to call your attention to the claim we hold against the government of the United States. From about the first of January, 1864, the Publishing House was occupied by the Federal government as an army printing office. For the use of the house, presses, printing material, and for damage to the property and stock, the government is largely indebted to us.

THREE WORD PICTURING.—Accurate

and vivid speech may be gained, and that is always impressive. It is of less consequence how much shall be said than what shall be said. There is as much danger of too many words as of too few. The orator's pauses are as vital as his vehement words. He makes his silence help him as well as his sonority. He must know when to stop as well as when to begin. It is not the amount of paint which the artist puts on which determines the quality of his work. He must use the right colors and dispose them judiciously. And when he has produced just the right shade for the needed effect, another stroke of his brush would mar or ruin the whole work. And with such a skill must the teacher-artist paint with words. Can any inherited garrulosity furnish such an ability as this? Can the persistence of patient study wholly fail of attaining it?

It was no small praise which Theodore Parker awarded to Webster when he said, "He could make a statement better than any man in America." That was rather a doubtful compliment which a plain Christian paid to a commentator, whose exposition of John's Gospel had been recommended to him. Being asked how he liked the volume, he naively replied, "I think I understand John very well; and I hope by and by to be able to understand Dr. —'s Notes." And only when a teacher uses his words as so many elements of the picture by means of which he is to put his thoughts into contact with his pupils, will his instruction elucidate instead of mystify the topics with which he deals.

Let the teacher realize that nothing is really done till he has transferred the distinct conceptions of his own mind to the sphere of the pupil's vision; let him remember that each statement is an artistic effort which can be successful only when the verbal colors are rightly blended and disposed; let him learn to estimate his prospective success by the vividness which he imparts to every representation, and his work will rise in dignity and command new devotion. For his pictures are to constitute the furnishings of that spiritual gallery where the by-gone experiences are to look down forever from the walls, and where the life is to be spread out in an illuminated panorama for the inspection of immortal eyes.—Free will Baptist Quarterly.

THE HANGING GARDENS OF BABYLON.

The great Babylonian king, Nebuchadnezzar, (died B. C. 561), when he had completed his conquests, as he found himself in possession of treasures uncounted, and captives by tens of thousands, determined also to signalize his reign by some of the triumphs of peace. He built a new palace of colossal dimensions, and surrounded it with a triple wall, the outer one of which was some seven miles in extent; he inclosed the city of Babylon with a wall, which, Herodotus says, was about three hundred and thirty-five feet high, and made the Hanging Gardens. This last work was undertaken to gratify his wife, Amyitis, a Median princess. Having passed her younger days in a mountainous region, she disliked the uniform level of the country about Babylon, and pined for the woods and hills of Media. The lofty rocks and various trees of this wonderful paradise were an attempt to imitate Median scenery. These gardens were high enough to overlook the walls of the city, and occupied a square four hundred feet on a side.

It has been a question how these gardens were supported at this great height, as it was, until lately, taken for granted that the Babylonians did not understand the principle of the arch. But it is now known that very perfect arches were built in Egypt, in Assyria, and in Babylonia, centuries before Nebuchadnezzar's time, and so the question is simplified.

The ancient Romans, when they had to carry a stone aqueduct across a deep ravine, sometimes built three or four tiers of arches, one above another, till the acquired level at which the water was to be carried was reached. In the same manner, only on a larger scale, was this mound of the gardens raised. They built one story of arches, covering the required space; on this was placed a second story; and thus was story after story raised. A great mass of earth covered the top, and water was supplied from the Euphrates through pipes. Not only flowers and shrubs grew there, but trees of the largest size; some of them so large that their trunks, according to Quintus Curtius, were twelve feet in diameter. The ascent to the gardens was by steps, and on the way up, among the arches, were stately apartments, whose pleasant coolness the heat of the climate could little affect.—Oliver Optic's Magazine.

The Christian Advocate.

SATURDAY, MAY 14, 1870.

ORIGIN OF DENOMINATIONS.

Extract from a sermon on that subject. Published by request. Text, Mark 12, 38, 39, 40.

There were sects or denominations in the church—as the Pharisees, Sadducees and Essenes—when Jesus lived and preached on the earth; yet we do not read that he ever said that denominations were injurious to the cause of religion. He charged that some of them substituted tradition for the word of God. The beloved John let his zeal for purity go so far as to forbid a man casting out devils in the name of Jesus, because he followeth not us. Jesus corrected him in this mistaken zeal by assuring him, "There is no man which shall do a miracle in my name that can lightly speak evil of me; for he that is not against us is on our side." He is for true religion, for the right, for the truth, and is on our side; though he may not be in our particular company, or meet just where we do.

But the question for this evening's discussion is, How came about, or what gave rise to so many denominations in the Christian state of the church?

At the first the apostles and other ministers were equal in office and authority. The apostles remained at Jerusalem mostly for a number of years after the ascension of Jesus; while the other disciples—deacons and elders—went everywhere preaching Jesus and the resurrection.

The apostles and elders at Jerusalem were appealed to by the brethren at Antioch as to whether they should continue to circumcise as well as baptize.—Acts xv. This is the first and only instance that we have any account of an appeal being made to them on any question.

As converts to the faith that Jesus was the Christ were multiplied, and ministers increased, the exercise of proper discipline became necessary. Hence in cities where there were several synagogues or churches and ministers they elected an overseer or superintendent or bishop to preside at their meetings for deliberation, counsel, etc. Sometimes this officer decided questions submitted to him. But still he was a pastor; and in many instances he was the bishop of one congregation or church where there were several ministers or elders.

As to order in the ministry, those bishops were no more than elders. Peter claimed to be an elder. In Paul's first letter to Timothy, third chapter, he speaks of the office of a bishop. He speaks also of deacons. In his letter to the Philippians he speaks of bishops and deacons; so that there were but two orders in the ministry—the bishops being, properly speaking, but an officer of the church or Christian association for that church or city. He was generally the oldest minister or pastor in the church or city.

In process of time, the bishops having charge of the churches in the principal cities acquired considerable dignity. They claimed superiority over those in the smaller towns or in the country; and this dignity or superiority was generally tacitly conceded to them. Not that they had any legal right that others had not; but their station was esteemed higher, and in many ways they were deemed to be superior. The bishop of the largest and most influential church must be president at their synods or conferences, which they began to hold early in the second century; and then at the councils, which were a still larger convocation of churches, there began to be contentions as to which church had the right to have its bishop for president. These councils were first begun in Greece about the middle of the second century.

The delegates, too, from the churches began to be delegates by right, or rather regular members of these synods; and instead of representing the will and interests of their respective churches, they attended chiefly to their own affairs; and so, one step upward in the scale of dignity and power made another so much the more easy, and necessary in their estimation.

It is not difficult to see that as these various offices—which were certainly badges of distinction—would pass from one man to another, as age succeeded age, at a time, too, when popular ignorance and superstitious notions respecting ecclesiastical dignity were so prevalent that what was regarded as only a mark of honor at first, would after a while become nearly, and then altogether, a vested right.

The bishops, especially those of the cities, began to be bishops indeed, with no little assumption of authority. The city churches always took the lead. Those in the country had derived their existence from them, and they naturally looked to them for support, counsel, encouragement, etc. In case of doubt or dispute in or among the country or village churches, the question would naturally be referred to the city churches, and then after a while to the city bishop.

This advice and counsel soon acquired the character of oversight, superintendence, and jurisdiction. So that it is easy for the mind thus to trace the gradual, almost imperceptible progress of authority from the humble and pious pastor of a handful of Christians, on through several ages, and upward to the prerogatives of episcopal rule and dominion of the clergy and laity of a whole country surrounding a city.

At length, as time advanced, questions arose between these city bishops as to the extent of their several powers and jurisdictions. These questions did not proceed far, however, before they became settled, so far as the smaller cities were concerned, by the metropolitan question.

The Council of Nice, in A. D. 325, and of Antioch, in A. D. 341, concentrated and extended episcopal rule still further. The former declared, "Bishops in the provinces shall be subject to the metropolitan;" and that "no one shall be appointed bishop without the consent of the metropolitan." This regulation was followed up in the Western at a somewhat later period; so episcopal rule became vested in the bishops of Jerusalem, Antioch, Corinth, Cesarea, Alexandria, Ephesus, Rome, Carthage, Lyons and a few other cities that claimed to be metropolitan; and wars grew out of the high claims of these metropolitans.

But the ambition of ambitious men was not yet satisfied. Episcopal rule was not sufficiently centralized for those in the larger cities. The metropolitans had already acquired more or less of civil power, which tended still further to stimulate their ambition. In the fifth and sixth centuries the patriarchal government obtained; and Constantinople, Rome, Antioch and Alexandria became the seats of those primates who bore the title of patriarchs. Each one had all the episcopal authority he could grasp, and all the civil power he could wrench from the seats of political jurisdiction, which was no little in some instances.

But the end was not yet. Power was still divided; and in the strife for supremacy, Alexandria and Antioch had to give place to Rome and Constantinople. Here was the bitter and long-contested strife for universal power.

This contest mingled with the greatest political events of the age. In the fifth and sixth centuries it ran high, resulting in wars in which much blood was shed.

Now a decision is made in favor of Constantinople, and then in favor of Rome. Finally the Bishop of Rome had the largest number of bishops and the greatest amount of political power in his favor. But the patriarch of Constantinople would not yield. So finally the church separated into the Eastern and Western, or Greek and Latin Churches. So by these circumstances two large denominations were produced in the church.

In the midst, too, of these contentions many smaller denominations sprang up, all of them brought about by some circumstance of doctrine, form, mode, or rejection of some bishop who had been ordained under some circumstances which resulted in controversy. So that a

circumstance has brought about each of the denominations of Christendom.

The disputes about ordaining bishops in those early centuries ran so high that magistrates were called in to ordain them. Then where is the uninterrupted succession of the ordination of bishops by bishops, running back to the apostles, eliminated by some? It is a fable!

PRUSSIAN CORRESPONDENCE.

GERMANY, April 4, 1870.

MR. EDITOR: This week there comes to us a charming piece of chit-chat about the physiognomies of antique busts, from one of the thousand sojourners in the Eternal City. Its not least interesting characteristic is the mention it makes of a statue of Tiberias, discovered some years ago, and which is recognized among scholars as identical in date and feature with the image on the penny presented to Christ by the wily Pharisee. I think I can see now the keen, wolfish, inquisitive countenance of the latter in Titian's exquisite picture—the uplifted eye bright with intense intelligence, and fixed on the Son of Man—the look of anticipated yet guarded triumph in having put a decisive question; and over against it Christ's grave, gentle face, all glorified in the royal coloring, for which Titian was celebrated, and with an expression of such mild and piercing reproach. The marvelous aptness of his answer seems prefigured in the power and dignity of his countenance.

If you have ever dipped into Lavater's Physiognomical Fragments, the two salons of the Capitoline Museum, which are filled with busts of the Cæsars and the celebrated men of antiquity, offer an almost inexhaustible fund of amusement in this line. The busts and statues of Tiberias have always been highly interesting. I read once—I forget in what memoirs—that Napoleon the First set several professors and generals in the greatest astonishment by boldly affirming that Tacitus and Suetonius had done Tiberias injustice; that the latter was a finely gifted statesman, an admirable administrator, in short, a great emperor; and he demonstrated this better than I can relate it after him. I smiled over this imperial presumption, contrary to historians and history, and Tiberias continued to remain to me the malignant, refined tiger-nature, the contemptible old voluptuary of Capri.

How astonished is one standing before a statue or a bust of Tiberias with this inner picture in his mind! Either not a word of Lavater's Physiognomy will stand the test, and even Dr. Piderit, who lately desired to elevate physiognomy into a science, lapses into vague twilight, or Napoleon the First was right. Here we see throughout an open, genial countenance in the youthful casts of Tiberias—stout, healthful cheeks, a lovely small mouth, wonderfully tender in its lines, a broad sculptured brow, beautifully shaped ears, and a head of noble proportions.

It is beautiful Livia's beautiful boy. The mouth alone would make Herder of Napoleon's opinion, who wished to see all the vices and virtues of man in the lines of this feature.

Even as an old man Tiberias' face has this maiden-like mouth, but on brow and cheeks hard and sharp lines appear. He looks really as he represents himself in a letter to the Senate—unhappy, base; a misanthrope, tormented by evil recollections, yet ever possessing an intellectual, significant head, in which there were capabilities of ruling the Roman empire. The contrast between the bust of the youth and the old man touches us painfully. Such can become of a richly-dowered being on the throne of the world!

I wish Lessing, Winckelmann, Goethe, had seen the statue of Tiberias found at Vei in 1831, and now in the Chiaramonti Museum in the Vatican. This was the "image" of Cæsar, which Christ contemplated on the tribute-penny—the only human countenance of which we know with precision that Christ saw it, and that we can fix the features in our eye on which his gaze rested. And

innocent as his weak procurator in Jerusalem was this Cæsar on the Palatine of the blood of the just.

Some other lusts of the capital give physiognomical riddles to be resolved. Only to remain by the Cæsars, I must mention Augustus, whose face, wherever I meet it, continues unsolvable; not grand, not little, not good, not bad, not intelligent, not stupid; he appears to me really to have been the actor which he revealed himself to be in the last hour of his life.

Nero's features are by no means those of a tyrant and a profligate, but those of a silly coxcomb. Horribly ugly, terrifying are Caligula's and Constantine's Chlorus. The contemplation of their busts makes it highly probable that something better might have been made out of the monsters, Caligula and Commodus, by better training and surroundings. Both heads have a wild energy in their regular forms and lineaments; Commodus peers clear and questioning into the world, eager for answer and instruction; and Caligula's head seems to me to have quite a modern passionateness among the quiet antiques. The story instantly occurred to me, as I stood by Caligula's bust, about how he had his mistress, Cæsonia, tortured to force out of her wherefore he loved her so devotedly. Another phase of the Cæsar madness!

Among the Roman portraits I must, of course, refer to that physiognomical riddle which has puzzled the world two hundred years—the Beatrice Cenci, painted by Guido Reni. Can it be true that every ignoble passion moves an invisible chisel which engraves it legibly in the features, as Dr. Piderit so clearly explains? The seraph-like, soft, languishing, infantile loveliness of the sixteen-year old murderer, Beatrice, puts all these theories to scorn; and at the sight of this art work of Guido Reni's (now in the Barberini Gallery) we must be well on our guard, lest the enchantment art distort our clear perceptions of duty, and our horror of vice, so seductively does she go to work. This beautiful girl and her step-mother undoubtedly murdered the old Cenci, their father and husband. He was a monster—granted! He made his house a hell for wife and child—but can that justify the abominable assassination? The bribed murderers could not execute their deed in the open street, as Francesco Cenci watched them in his annual journeys to his mountain castle on the boundary of the kingdom of Naples. So Beatrice and her mother led the bandits into the sleeping chamber of the old man; the assassins shuddered at the hideous thought of crushing the sleeper; they hesitated; they yielded when this lovely girl fired them on with words that fired the imagination of quails. The murderers struck two nails into the temples of Count Cenci. Three months later, in September, 1599, Beatrice's beautiful head, and that of her step-mother, fell by the hand of the executioner on the scaffold, before the Castle of St. Angelo, at Rome.

It is said that Guido Reni saw Beatrice for the first and only time, as she was led to execution, sitting on the cart in her white malefactors' dress, and caught the single glance from her which he has perpetuated for all succeeding generations with imperishable beauty. In that glance lay terror at approaching death, supplication for sympathy, for deliverance through the struggling thousands of the indifferent who surrounded her; and the flash of delight at finding one sympathizing, admiring, glowing eye! No copy could render the paleness of the death-agony, the weeping and yet fiery eyes of the original. It is Guido Reni's masterpiece, "painted con amore, absolutely unmaneuvered, powerful, antique, intellectual, like many of his other pictures, which, in Rome, stand far behind burning Domenichino, thoughtful Guercino, noble Daniel de Volterra.

In the same Barberini Gallery the portrait of Beatrice's mother and step-mother exist, but by less famous painters of the same age. The mother is gloomily beautiful; the step-mother, in spite of her rich

ornaments and haughty bearing, looks discontented and bitter. Two of Beatrice's brothers were executed at the same time; and the Cenci family in this line died out after the tragedy. A curse seemed to weigh even upon the Palazzo Cenci in Rome; it remained uninhabited, and became ruinous. Even at the beginning of this century it stood without doors and windows, and footsteps sounded meanly in the great halls; unreconciled shadows, said the people, permit no rest to those living there. The unpleasant situation of the Palazzo, at the entrance of the Ghetto, contributed to its desolation.

Some decades ago the devout German artist, Overbeck, established his atelier and his dwelling in this haunted Palazzo; and out of the rooms where the slain Francesco Cenci lived, and his daughter and wife cherished their murderous intentions, now went forth grave, calm, pale saints, virgins and apostles—until the noble painter himself, a few weeks after, was borne forth to his last resting place. It is related that Overbeck fasted, confessed and took the holy communion before he began a painting. He wanted to force the pious, fanatical mysticism of a Fiesole, a Perugino back into the midst of the nineteenth century; he did not succeed; the spirit of time beats and stirs even in the Vatican and the Collegio Romano. * * * Overbeck himself, meantime, in his long white hair, with his ascetic features and mysticism in word and picture, may appear to many of us as a personality transported from medieval times into our own sunny, impetuous and irreverent day.

It is late; yonder over the Palatine stand Vega and Cassiopeia, blinking as luminously upon the Tiber as in that night when two tiny boys lay abandoned and weeping on its bank, and forced a wolf to sympathy. The wolf, however, appears in this our day as the sovereign pontiff in the chair of St. Peter, and the two little boys have multiplied into an Ecumenical Council.

DALMETSCH.

COLUMBUS DISTRICT MEETING, MOBILE CONFERENCE.

MR. EDITOR: The District Meeting for Columbus district, Mobile Conference, was held at Yorkville, Alabama, April 21, 22 and 23. In the absence of a Bishop Rev. Thos. C. Wier, presiding elder, was elected chairman. A good number of delegates and very respectable assemblies of the people were in daily attendance.

The preachers' reports gave evidence that they had entered with zeal upon their year's work, but had been much hindered by uncomfortable houses of worship during the inclement weather. Sunday schools were being reorganized, with good prospects of success, and financial matters not absolutely disheartening. The usual committees were appointed, and their reports gave rise to some very interesting discussions. Resolutions were adopted favoring State lines for Conference boundaries. The report on Sunday schools, avoiding "glittering generalities," discussed the best plans for organizing, managing, sustaining and improving these great nurseries of the church.

Rev. B. F. Lannabee, from the Committee on Education, presented a report favoring the establishment of a great central university for the church, supporting it in a speech of unusual ability and power. He was requested to present the scheme to the General Conference in our name, and was intrusted with a memorial on the subject.

The Advocate was remembered, and the brethren pledged themselves to obtain each four new subscribers within the following month. I presume you will hear from them soon.

The colored people were represented in some places as better disposed toward us, and resolutions were adopted to aid them so far as we may.

The importance of class meetings was admitted, and much time given to a discussion of the best plans for reviving them. The encouraging success of Brother Bush, on Bear

circuit, determined the brethren to adopt his plan of holding class meeting at each appointment immediately after preaching.

Delegates were elected to the next session of the Mobile Conference, as follows: Rev. B. F. Lannabee, Stephen A. Brown, Nolly Gore, James Sullivan. Reserves: J. F. Tarrant, Dr. W. L. Lipscomb, J. T. Terry.

The preaching was earnest, practical and awakening. On Sabbath a very large congregation listened to the preaching of the word, and we hope went away with new resolves to follow the way of life. As I know your columns will be crowded I have made this report as brief as possible, and have necessarily omitted much of which I would gladly have written.

S. A. BROWN, Sec.

The Cannibal Fish of South America.

The book of Don Ramon Paez, on life in the Llanos of Venezuela, describes the strange fish of the waters of that country. The gymnotus, or electric eel, can stun a man by a single stroke, so that his contact is fatal to the solitary swimmer. The payara has two or more large, sharp teeth, which cut like a razor, and inflict a gash almost as severe as that of a sabre. But the most dreaded of all is a little creature of the shape and size of a carp, called, from its ferocious habits, the caribe, or cannibal. Its vast numbers and insatiable appetite render the rivers in many parts impassable to men who would face the crocodile without flinching. The author on several occasions amused himself by endeavoring to secure specimens of this extraordinary fish. Hooks were useless. The strongest tackle was bitten through in an instant; even the hooks themselves were easily severed by the shark-like teeth, which can penetrate iron or copper wire with apparent ease. But dipping a strip of tough ox hide into the water, he succeeded in hoisting a number of the voracious caribes into his canoe; and then found himself seriously embarrassed, if not endangered, by the savage attacks of his untamable captives. We give the description of this aquatic cannibal in the author's own words:

"Each time the nets were hauled in shore, half a dozen or more of these little pests were to be seen jumping in the crowd; their jaws wide open, tearing whatever came in their way, especially the meshes of the nets, which they soon rendered useless. Their sharp triangular teeth, arranged in the same manner as those of the shark, are so strong that neither copper, steel nor twine can withstand them. The sight of any red substance, blood especially, seems to rouse their sanguinary appetite; and as they usually go in swarms, it is extremely dangerous for man or beast to enter the water with even a scratch upon their bodies. Horses wounded with spur are particularly exposed to their attacks, and so rapid is the work of destruction that, unless immediate assistance is rendered, the fish soon penetrate the abdomen of the animal and speedily reduce it to a skeleton; hence, doubtless, their appellation of *Mendiguero*—tripeater. There are other varieties of the caribe in the rivers of the Llanos, but none so bold and bloodthirsty as this glutton of the waters. So abundant is this species in some rivers of the Apure, that it is a cunning saying among Llaneros, 'There is more caribe than water.'

"Every feature of this miniature cannibal denotes the ferocity and sanguinary nature of its tastes. The piercing eye, surrounded by a blood-looking ring, is expressive of its cruel and bloodthirsty disposition. Its under jaw, lined with a thick cartilaginous membrane, which adds greatly to its strength, protrudes considerably beyond the upper, giving, as this formation of jaw does to animals possessing it, likewise an expression of ferocity. Large spots, of a brilliant orange hue, cover a great portion of its body, especially the belly, fins and tail. Toward the back it is of a bluish ash color, with a slight tint of olive green, the intermediate spaces being of a pearly white, while the gill covers are tinged with red. The inhabitants, being often compelled to swim across streams infested with them, entertain more fear of these little creatures than of that world-renowned monster, the crocodile. This last, although a formidable antagonist in the water, can be easily avoided, and even conquered in single combat by daring men."

LALANDE, the French astronomer, often ate caterpillars and spiders, affirming that the former tasted like almonds and the latter like walnuts.

ENVY PURSUES its victims through life; it causes to know only when the grave-worm, its brother reptile, begins

REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office ORDER, DRAFT, or by EXPRESS. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

THE GENERAL CONFERENCE.

This week we publish two days' proceedings of the General Conference. Next week we shall devote nearly all our columns to editorial correspondence and the General Conference. Home editorials, communications, secular news and miscellaneous selections will give place. Correspondents and contributors will know the reason of delay, and wait patiently for two or three weeks. In this issue will be found the exhibit of the book agent, and the address of the Bishops. We have noticed a dispatch in the daily papers to the effect that the General Conference has resolved to adjourn on the twenty-third instant. A resolution to that effect was introduced on Saturday, but laid over for final action until Monday, when it was taken up and adopted.

The following dispatch is taken from the telegrams of the twelfth. The Conference will probably waste but little time on the subject of union with the Northern Church.

MEMPHIS, May 11.—At the Methodist Conference, to-day, Bishops James, Daniel Curry, Levi Scott and others of the Northern Methodist Church, submitted a memorial to the Southern General Conference, as follows:

By the action and authority of the General Conference, held at Chicago, 1868, we were appointed a commission to co-operate with a like commission from the Church South as subject of a union.

A commission met in Philadelphia in 1869, when resolutions were adopted, approving of the action of the contemplated union of the two churches; but it is proper to make this further communication.

The appointment of this commission shows that, in the judgment of the Northern Church, there is not sufficient reason why a union may not be effected on honorable terms. Hoping that you may all see the subject in the same light, and that you may appoint a similar committee to confer with us previous to the Conference to be held in 1872, and praying that you may be prospered in all that pertains to the welfare of the Christian church, and desiring your prayers in behalf of the church.

The letter was referred to a committee of nine. It is thought the proposition will be approved.

The excesses of youth are drafts upon old age; payable, with interest, about thirty years after date.—Colton.

The University of Vienna has decided to open its medical lectures and confer medical diplomas on women.

A provident and yet improvident man—the baker; he kneads much, but sells everything he kneads himself.

THE GENERAL CONFERENCE.

FIRST DAY.

At the hour of nine A. M. the Conference met in Memphis, at the Cumberland Presbyterian church. This church has a large and well arranged audience room, without side galleries, and is about of the capacity of Carondelet Street church of New Orleans. The altar has a Methodist breadth, and affords excellent sitting room for the secretary and his assistants. The Bishops are sitting in the pulpit—all present excepting Bishop Early, who is expected to be present during the session. They all look to be in good health. Bishop Andrew, the aged servant of the Master, no longer able to bear the burdens of office, moves about the Conference room as among his sons, beloved and revered of all.

The body is a remarkably fine looking one. A large proportion of its members are over forty years of age, and the maturest wisdom and experience are represented in the person of many elders, some of whom, with heads white as snow, next to the Bishops, are the most noticeable feature of the assembly. To one who considers the influence exerted by Southern churches in sustaining their people amid the most trying situation in which a white race was ever placed, the grave and solid character of this body should be a matter of special thankfulness. Here is the salt of the South—salt that has not lost its savor. The lay element of the body is large, and is composed of men distinguished by services, intelligence and influence in every department of life and in every part of our territory.

Not the least delightful part of this occasion is in the meeting with brethren beloved. Some one has pronounced the shaking of hands to be a means of grace. It certainly could never be more so than in the first morning of a General Conference. As the session advances all men become more or less mortal; indeed one lay brother has already observed that some of the clergy have given symptoms in a committee room, even at this early stage, of having like passions with other men. Church legislation is not exactly as favorable to spiritual improvement as a love-feast would be, even though one may be trying to do everything "as in the immediate presence of God."

One hundred and sixty of the two-hundred and forty members answered to their names to-day. The morning was occupied in fully organizing.

SECOND DAY.

A large addition of members appeared in the Conference room this morning; there are over two hundred present and voting. Among others we noticed the person of Dr. Lovick Pierce, of Georgia, now in his eighty-seventh year—not quite as arrow-like in his form as at the last General Conference, yet wonderfully erect, with all the ancient fire in his eye and power in his voice. He grandly represents an entire generation of great spirits, who, having toiled in the vineyard of their Lord, now reap their reward. Among the laymen appeared that most apostolic looking man, Darcy Paul, of Virginia. We have never seen in any assembly three more venerable men than these two and Rev. Thomas Madden, of Tennessee. The mere presence of such men gives weight to the deliberations of the body. The introduction of the lay element has certainly not taken anything from the expression of the chief council of our church. We have been surprised with the conservative good sense of these brethren. A few at first seemed a little "brash," as we say in the South; but that was before they came to know the profound qualities and shining parts of the assembly as here gathered. Yet in the main the speeches made by the laity, both in the Conference at large and in the committee rooms, have been highly valuable contributions to the legislative elements of the body.

Soon after Dr. Pierce took his seat the Bishops' address was read to the Conference by Bishop Wight-

man. This address will be found in this number of the ADVOCATE. It speaks first of the death of Bishop Soule; then of our general unity and harmony; then of the new element of the laity in the councils of the church; it then deprecates too much legislation; spiritual life and power are urged as the true source of strength in the church of Christ; class meetings, prayer meetings, family and secret prayer, fasting and self-denial are set forth as among the most important means for obtaining and strengthening the divine life in the soul; family religion and an increase in scriptural holiness are dwelt on as the peculiar marks of Methodism in the times of our fathers; the cause of missions, foreign and domestic, is considered; the cause of education—the impolicy of multiplying colleges, the necessity for concentration, a higher grade of scholarship, and the proper training of young ministers—it presents us worthy of "your most thoughtful consideration;" the inadequate support of the ministry—"We must perpetuate an itinerant ministry, separated to the holy office and consecrated to the care of souls;" the inadequate supply of young men offering themselves for the work of the ministry, either for the home or the foreign missionary work; the Sunday school interest, its magnitude and importance; the enlargement of our Sabbath school literature; the organization of the colored Conferences; and the working of the District Meetings—these are the themes of this highly suggestive official paper.

Directly upon its conclusion Dr. Pierce arose, and in a pertinent and forcible speech commented especially upon that part which enforced attention to the spiritual condition and welfare of the church. "While all we have to do here is religious, it is not all necessarily and directly spiritual." He had observed at many General Conferences that our "outside business" was so great that, after spending four weeks legislating, we go home with our eyes closed, as if we had no knowledge of our wants. "I am in the sixty-sixth year of my labors in this glorious field. I have observed that just so far as we give up Wesley's original general rules we break down Methodism." The speech was uttered in that fine earnest voice which inspires both speaker and hearer. Grand old man! a generation rise up to do him honor.

A MODEL REPORT.

The report of the Columbus District Meeting, published this week, is a model in its way. It is short and yet comprehensive, embracing the items of general interest to our readers, and leaving out matters of merely local importance. As the District Meeting season is at hand, we commend to all secretaries this example of condensation and comprehensiveness. We thank the courteous secretary, Brether Brown, for the items so promptly furnished, and hope to hear from all the District Meetings after the same style.

PERIODICALS RECEIVED FOR MAY.—Good Words for the Young; The Galaxy; Lippincott's Magazine; The Eclectic Magazine; The Manufacturer and Builder; The Home Monthly; Burke's Weekly, monthly part, for April; The Southern Farm and Home; The Sunday Magazine, comprising altogether a rich and varied feast of fresh and choice periodical literature. Want of space prevents particular and extensive notice of them this month.

NEWS OF THE WEEK.

PARIS, May 9.—Full returns of the vote have not yet been received, but it is quite certain that the government has been sustained by an immense majority, estimated at five millions. The city is still tranquil.

PARIS, May 9, 6 P. M.—Returns received foot up—yes, 7,126,288; no, 1,485,844. The vote of the army, as far as known—yes, 219,200; no, 36,598.

One of the longest sentences on record may be found in Lippincott's Magazine for April, in the article on "Florida." It contains over eight hundred words.

(Continued from first page.)

cases—have only tested and increased the attachment and fidelity of our ministers, and the general body of our membership, to the church. The itinerant preachers, although very meagerly supported, have, in general, been faithful to their eradication views, and have persevered, as best they could, in performing their duties. By the blessing of God this has resulted in the maintenance of our itinerant system, and the steady and increasing prosperity of all the enterprises of the church. Even where we had suffered most we are rapidly regaining our former ground, and in many sections extending our borders and multiplying our membership. Seasons of refreshment from the presence of the Lord have come upon the people, and thousands have been converted and added to the church.

We rejoice, also, to report that the greatest unity and harmony exist throughout the whole connection. It has been truly said that "Methodists, all over the world, are one in doctrine;" so that, however widely scattered and differing in other respects, they present the peculiarity of agreeing cordially in the great doctrines of Christianity. And as the members of our communion are a unit in faith, so also there is scarcely any disagreement among them as to our church policy. Their prevalent desire is that both be preserved—the former intact, the latter, if altered at all, to be modified so far only as to make it more effective in accomplishing the original purposes of Methodism. This is seen in the fact that we have quietly passed what is justly regarded in all forms of government a great crisis, in the adoption of a new element into our system. We allude to the introduction of lay representation into the Annual and General Conferences. This important change in our economy was not a peace-offering, rendered necessary for the preservation of the unity and peace of the church from the attacks of a dissatisfied and refractory membership, but was proposed and effected by the nearly unanimous voice of the ministry, and the acquiescence of the laity—both believing that the time had fully come when it would enhance the effectiveness of the church and the glory of Christ.

In attestation of the approval of the whole church of this measure, we are gratified to see in this body so large a number of lay delegates, representing the intelligence, piety and strength of the connection. We are sure that we express the feelings of their clerical associates, and of the entire church, in welcoming them to their seats; and we shall gladly share with them the labors and responsibilities of this chief council of the church.

It may not be amiss in this connection to suggest that excessive legislation is too common in all deliberative bodies. Laws and usages, generally understood and approved, should not be changed hastily; or, if changed at all, only from a conviction of the greater utility of the change. Nor is it prudent to alter even a recent enactment until it is practically demonstrated to be necessary to do so. This caution we would respectfully apply to the regulations under which lay representation has been introduced. Would it not be judicious to learn by experience what modifications, if any, may be necessary, rather than risk the success of the system by hasty attempts to improve it?

The efficiency of the church of Christ must result from his gifts and grace, and the General Conference can reasonably expect to do but little to increase it by merely prudential means, except as these tend to increase its spiritual life. It is your first duty, therefore, to ascertain the real condition of the church in this respect, in order to correct what may be wrong, and supply what may be needed for this great end. Your attention is earnestly invited to a careful examination into its spiritual state, and of the means and measures likely to contribute to this, its highest, most vital interest.

Without intending a disparaging comparison between the piety of the present day, and of our fathers in the early days of Methodism, we feel it right to say that we are deficient as to several matters which were formerly regarded as aids and tests of Methodist piety. We allude, especially, to the neglect of class and prayer meetings, of fasting and abstinence, of family and secret prayer, and the indulgence in worldly pleasures. In some, if not all of these things, we fear our people, not to say our preachers too, fall below the pattern set us by the piety of our fathers in other days. We do not mean that this declension is universal, but gladly admit that there are large numbers who exhibit the ancient marks of Methodist piety in an intelligent and ardent devotion to God, and in firm attachment to our doctrines and discipline. The action of the last General Conference modifying the rule on class meetings, so that attending them should not be a con-

dition of church membership, has been construed, unfortunately, by some as abetting them; and we regard these meetings to be so promotive of the spiritual prosperity of the church, and so essential, to the efficient working of our economy, that we are very reluctant to see them fall, in any measure, into disuse. While attendance upon these meetings is not a condition of membership, yet we do not consider that pastors have been released from the appointment and oversight of leaders, classes and at least a quarterly visitation, and report. We recommend to the General Conference the consideration of this subject in connection with a pastor's duty.

We invite your attention, especially, to the subject of family religion and the Christian training of children. Its importance cannot be overestimated. Regular family worship, morning and night, accompanied with the consecutive reading of the Scriptures, is so morally fit, reasonable and salutary, that to us it seems strange that the heads of Christian families can feel guiltless in neglecting it. While we rejoice in the greatly increased interest exhibited in behalf of Sunday schools, we are sure that there can be no substitute for religious training in the family. The impress, whether for good or evil, made by family instruction and example is indelible. In the home circle is found a domestic and patriarchal church; the training school of the kingdom of Christ; the pledge and foretaste of the bliss of the kingdom above.

Indulgence in worldly and fashionable diversions is another great enemy of earnest piety which is invading the church, and threatening to estrange our children from us. Dancing, in particular, whatever plausible excuses may be pleaded for it, is destructive to the growth, not to say the very existence of spiritual religion in those who delight to indulge in it. Generally, it is a species of "reveling" condemned and forbidden by the word of God; and its tendency is evil only.

In immediate connection with the spiritual welfare of the church, the great and only effectual remedy for most if not all our deficiencies as a Christian people, is an increase of inward, genuine, scriptural holiness. We fear that the doctrine of perfect love, which casts out fear and purifies the heart, and is the "measure of the stature of the fullness of Christ," as taught in the Bible and explained and enforced in our standards, as a distinct and practicable attainment, is too much overlooked and neglected. This was a prominent theme in the discourses of our fathers; and alike in their private conversations as in their public ministrations, they urged religious people to "go on to this perfection" of sanctifying love. The revivals which followed their ministry were not superficial or ephemeral. Their genuineness and power were proved by the holy lives and triumphant deaths of the converts. If we would be like them in power and usefulness, we must resemble them in holy consecration. Nothing is so much needed at the present time, throughout all these lands, as a general and powerful revival of scriptural holiness.

We regret that we have not been able to extend our foreign missionary work, since your body assembled last, owing to the want of funds. Indeed, after all the efforts which have been made, we have not liquidated in full the old debt contracted during the late war. There is, however, a strong probability that this very desirable result will be accomplished before long. Our domestic missions have multiplied, and with increasing usefulness. Your attention is particularly invited to the great and effectual door now open in the West. From the mouth of the Kansas river to the Golden Gate, and from the Rio Grande to Pingo's Sound, there is a field becoming populous more rapidly than any in which our fathers labored in their day. No louder call has ever fallen on the ear of the ministry than that which comes to us from this vast region. Other forms of religion, some of them corrupt, are pressing their missions with astonishing vigor. All along the line of the Union and Pacific Railroad they have secured real estate; and at many places they already have church edifices on commanding sites. They lavish money in gaining a foothold there, where, in the course of a few years, as they foresee, there will be populous and enterprising communities. Much of this population will be from our own country, and in sympathy with us; yet, up to this moment, we have done nothing toward the occupancy of the country. Your Bishops are receiving repeated and most urgent calls for men. But in the very nature of the case, we can send no men unless the church at home will send money to meet the first expenses incurred. This is all properly missionary ground at present, including Oregon and southern California. In central California the work is, for the most part, self-sustaining—and, indeed, prepared

to aid the common enterprises of the church. We feel well assured that money expended on this great field will yield as rich a harvest as has ever been gathered from such sowing.

The subject of education is one of general interest and prime importance, and no intelligent philanthropist, patriot or Christian can feel indifferent to it. Viewed either in its intellectual, moral or religious aspects, it rises into grand proportions and is invested with powerful influence. The impolicy of multiplying colleges, under the patronage of the Annual Conferences, must be evident to those who are acquainted with the present condition of many of those already in existence. In wielding aright this great agency there must be more foresight, and concentration of effort and liberality. Let those institutions to which we are already committed be encouraged with increased effort to sustain and endow them. Let a higher grade of scholarship be established in them; and the most earnest spirit of religion be cultivated by officers and students. If there be these which cannot sustain the rank of collegiate establishments, they must be content with a lower position.

The proper training of young ministers is a matter of high and acknowledged importance. How this may be best and soonest accomplished will claim your most thoughtful consideration. We commend the subject to your earnest attention.

The inadequate support furnished, in many parts of the connection, to the preachers regularly engaged in the pastoral work, and the consequences which must follow if this evil be not remedied, will not fail to be noticed by you. We must perpetuate an itinerant ministry, separated to the holy office, and consecrated to the care of souls; with all of time and thought and energy devoted to their sole and appropriate work. But to enable them to do this the church must make provision for a proper supply of their wants. While it affords us pleasure to say that in most of our wide field of operations there has been witnessed a decided improvement, yet there is no doubt of the fact that in some sections there is still a great deal of negligence in raising the means of support, and of consequent privation and suffering among the preachers. Do not the members of the church need to be specially instructed and trained in this class of religious obligations?

Our attention has been, of late years, arrested by the inadequate supply of young men offering themselves to the work of the ministry, either for the home or the foreign missionary work. May we not assume that Christ, the Redeemer of all men, the intercessor for all, does call men to the holy office, in numbers sufficient to the demands of his cause in the world? The fault must be with us. How soon would an increase of piety and zeal in the church supply the remedy for this deficiency! What can be done to arouse our whole communion to united, fervent prayer to "the Lord of the harvest that he will send forth laborers into his vineyard?"

You will consider, of course, with great care, the whole Sunday school interest, which, we are happy to say, has assumed a magnitude and importance never before known in the history of the Southern Methodist Church. We think you may find it practicable to adopt measures that will secure a uniform scheme of instruction, with texts furnished at our own Publishing House; together with the enlargement of the *Sunday School Visitor*, and possibly, in addition to that paper, the publication of a monthly journal adapted to teachers and the older classes of pupils. It is very desirable that there should be an improvement both in the character and price of the books prepared for the use of Sunday school libraries. We recommend the appointment of a suitable person to be specially intrusted with the oversight of these vital interests.

The literature of the church will not be overlooked by you. We can not consent to surrender to others the vast power and influence wielded by the press; no church can safely do so. In proportion to the potency of this influence is the solemn obligation resting on us to guard and guide the press. It must maintain a high religious tone—neither subsidized by wealth or power, nor perverted by an ambition to partisan and political purposes. It should aim steadily at conserving the national character of the church; and be committed to trustworthy and competent men who love the whole church too well to put in peril her unity and peace. We should hail with rapture the day that saw a first class religious and literary newspaper in every Methodist family, and our standard works in every library.

There is, allow us to add, pressing need of greater facilities for procuring our standard literature on the Pacific slope. Our church has suffered greatly from the difficulty of obtaining even a hymn book and Discipline. If, in your wisdom, any

relief can be afforded; a great want will be supplied.

We congratulate you upon the ability and fidelity of those to whom the journal of the church has been intrusted during the past four years; and especially upon the energy, ability and success of the agent and of the editor of the Publishing House. They deserve the highest commendation. The prosperous condition of the publishing interests under the control of the General Conference is matter of special gratification, and of high import to the future development of the church.

Soon after the last session of your body the Bishops proceeded to carry into effect the plan adopted for the religious benefit of our colored members. The effort met with the approval and concurrence of many of them, notwithstanding the prejudices which were attempted—too successfully in many instances—to be instilled into their minds against us. A great number of them still retain their attachment to the church and ministry that had in the past bestowed so much attention and labor upon their religious instruction, and through whose instrumentality they had been enlightened and converted. Still, it is true, that many, thus disposed, have been alienated from our communion by political and ecclesiastical influences.

Conformably to the wish of the last General Conference, we have organized and presided over five Annual Conferences, composed exclusively of colored members; have formed forty-five districts, with circuits and stations, in all of which, with a few exceptions in which white preachers have volunteered to act as supplies, our colored brethren are performing the duties of presiding elders and pastors. The principal field of these operations extends through portions of Georgia, Tennessee, Kentucky, Mississippi, Arkansas, Louisiana, Alabama, South Carolina and Florida; and is widening by applications for organization of new Conferences. The colored preachers have conducted themselves, both in their Annual Conferences and in the exercise of their pastoral duties, so as to win the confidence and co-operation of those of their white brethren who have become best acquainted with their deportment. It is our purpose, unless otherwise advised by your body, to call a General Conference, to be held next winter, for the purpose of organizing them into an entirely separate church, and thus enabling them to become their own guides and governors. The suggestion of district meetings, originating at the last session of the General Conference, has been practically adopted, under the sanction of the Annual Conferences, with signal benefit to the cause of religion. At these meetings the lay representatives to the Annual Conferences have been elected; the leading minds of the church, lay as well as clerical, have been brought together, impressed, and moved with new zeal; the Bishops, as far as they could find the opportunity to attend, have had a new and important field of influence opened to them, and the results have been of great value to all the prominent interests of the church, spiritual as well as economical.

In conclusion, dear brethren, we pray earnestly that the plentiful enrichment of the "Spirit of power and of love and of a sound mind" may rest upon you in all the deliberations and decisions of the present session—the first of the kind in the annals of Methodism. Could we take you up the shining mount of vision, and show you the vast and grand future before the Methodist Episcopal Church South—the sublime possibilities which await development in the ages to come, and which, as their condition, ask for unwavering fidelity to Christ and the solemn trust he has placed in your hands for the world—you would need no loftier inducement to the patient, resolute, prayerful discharge of the duties imposed upon you as representatives of the entire church. That the divine counsel may guide you in all things is our devout and constant prayer.

D. S. DOUGLASS.
H. N. McTAVISH.

MEMPHIS, TENN., May 5, 1870.
W. I. Green arose, after the delivery of the address, and said that the address had the ring of the right metal, and he moved that it be put in the hands of every member of the church from the Atlantic to the Pacific coast. He wished every one to see that our chief shepherds condemn those practices indulged in by some members of the church. The venerable Dr. Lovick Pierce then arose and addressed the Conference as follows:

"I feel a strong desire, by a few remarks, to impress upon you the sentiment of that address. At this time of life I do not propose to take any part in those matters which belong to young men and young minds. This is the fifteenth General Confer-

ence at which I have had the honor to be present as a delegate. I have never been troublesome, but rather unfaithful than bold. Perhaps I ought to have said more. To my private friends I have remarked that fewer hours have been devoted to matters of the deepest interest than are absolutely necessary—I mean to spiritual religion. The deliberations may be imperfect, but yet the machine might run with great success if more time was devoted to the promotion of spiritual religion. Every system of religion must feel that this is more necessary to the traveling of such a machine than steam to the fastest locomotive. All our business is not necessarily nor directly spiritual, but our outside business has been so great and so necessary and valuable that often we spend four weeks in these deliberations and go home with our eyes as much closed to the real wants of Methodism as if we had never been here. I hope we will recognize nothing so important as the sentiments embodied in that address. If there be friction and trouble here, there will be a failure at last. I believe this grand machine can be put in grander motion than ever before. God is with us, but, as in Ezekiel, I behold the Shekinah hanging above the ark that is about to be forsaken. Begin to-day to act upon this. What little strength I may be able to command, I shall devote to the consideration of these subjects. I am in the sixtieth year of my labors, and I am perfectly satisfied that in as far as we give up the rules of Wesleyan Methodism we break Wesleyan Methodism down. Methodism is identical with Wesley's General Rules of the United Societies. In conclusion, I pray you keep your minds and hearts fixed upon that which is expressed in that address, henceforth and forever."

Dr. Green said that it was with profound interest that he listened to the reading of the Bishops' address. He thought the best plan to have it circulated was that it should be put in all the church papers, which, of course, would be done. On his motion the various subjects brought to notice in the Bishops' address were referred to the several appropriate committees.

Mr. Monroe said: "I have heard with pleasure the address of the Bishops, and also the remarks of Dr. Pierce, and especially those upon that all-absorbing subject, spiritual religion. I indorse most cordially every remark made to that point. A glorious prospect is before us if we keep our minds and hearts fixed upon this." He moved that a committee be appointed to which should be referred those subjects contained in the Bishops' address referring to the spiritual condition of the church.

Dr. Green thought that it should be referred to the church at large.

Mr. Monroe's motion was carried.

A. S. Andrews thought that they should have a large committee.

J. B. Cottrell suggested a committee of five. He did not wish to refer this to the whole church; that "the quality of this mercy must not be strained."

He had rather that matter would inanimate itself into every community. To refer it to the church would imply that it had backslidden, which was not the case. Let it be like dewdrops that come in their own form, and are not intended to be raked up and analyzed.

Judge Groce hoped that this committee would consider especially the subject of class meetings, and take measures to have them and love-feasts restored to the church.

D. Morton suggested the oldest preachers to be put on that committee.

Bishop Pierce thought that might make some rather delicate disclosures.

A. S. Andrews insisted that this committee be made up from each delegation. He wished it to permeate the church, and by selecting one from each Annual Conference they would go home warned with the impressions made here, and would better infuse them into the church.

Dr. Green said that he believed that they had formed an anomalous committee. "For us to appoint a committee on spiritual religion, I don't like the view. I don't believe the church is declining in spiritual religion. You can't legislate men into religion, happiness or riches. A better communication than that of the Bishops' address will never be furnished by any committee."

The Bishop decided that the remarks of Dr. Green were out of order.

Dr. Myers said: "If Dr. Green had made his speech before that committee had been ordered it would have been well, but it is now time to stop doing things one minute and undoing them the next. Let the committee prepare a pastoral address, to be read in this Conference, and then sent out to the church. I do not think that we ought to be continually see-sawing between doing and undoing the same thing."

The Bishop called particular attention to this last remark of Dr. Myers.

The motion to reconsider was carried.

Dr. Myers moved that a committee of one be appointed from each Conference to prepare a pastoral address, and let it go from this Conference to the church.

Mr. Monroe indorsed the views of Dr. Myers.

N. H. Lee moved a substitute to Dr. Myers' motion. He wished five clerical and five lay delegates, united with the Bishops, to prepare this address.

Dr. Myers accepted the substitute, which, being put to the Conference, prevailed.

The Bishop asked how the committee should be appointed, and it was decided that it should be done by the Bishops.

The following resolution was then offered, read and adopted:

Resolved, That the Committee on Missions are hereby instructed to report to this Conference, as early as practicable, the amount of money contributed, since the last General Conference, for the two missionary boards, what amounts have been expended by each board in the support of missions, and what amounts have been expended in supporting the officers and conducting the operations of each board.

W. W. BENNETT.
A. R. WISEFIELD.

The Bishop then appointed the following Committee on Sunday School Hymn and Tune Book: W. M. Leftwich, Missouri; Asa Snyder, Virginia; T. J. Magruder, Baltimore; J. R. Rodgers, Montgomery; W. H. Foster, Louisiana; R. J. Morgan, Memphis.

The Conference then adjourned with benediction by the Bishop.

OBITUARIES.

JULIAN LEACH, son of Rev. Allen S. and Margaret Andrews, was born May 20, 1854, and died in Mobile, Alabama, April 21, 1870.

Julian was always a boy of prayer. True, he was early deprived of the instruction of a most excellent and pious mother; yet others undertook with success his religious training, and he was thus in the very morning of life, taught to walk in wisdom's ways.

In temperament he was singularly ardent and affectionate, while his love of truth and candor was remarkable. Having a mind of much more than ordinary activity and brilliancy, he showed himself capable of ripe scholarship, and as a student his teachers attest that he was diligent and industrious. As a son he was always dutiful to his parents; and in the home circle, amid brothers, sisters and friends, he was always lively and affectionate.

Before his death his father conversed freely with him about eternal things, and he assured his deeply bereaved parent that he had fully committed himself to God. When he knew that death had actually come he was at first somewhat startled at the nearness of his departure from loved and cherished ones; but soon recovering mental composure, he requested the members of the family and his physician to kneel around his bed and commend his spirit to God.

in solemn prayer. No one being able to pray audibly because of emotion, he prayed thus himself. "While I am crossing the dark river, put the light in the window for me."

Just before he breathed his last he exclaimed, "I see the light in the window! It's coming; the darkness is now all gone." Embracing his father, he said, "We will not be parted long. Come, and bring all the family with you."

Kissing his mother and sister again and again, he assured them that they were precious to him. He also spoke to his attending physicians, beseeching them in tones of tenderness to be men of God, and assuring them that he had no fear of death.

Addressing himself specially to a member of the family, he besought him to look up, right up, to the radiant world to which his happy spirit was about going; and thus, with words of glowing ardor and love upon his lips, died the lovely, cherished and gifted Julian Leach Andrews, while yet in the sweet, fragrant morning of life, and amid the fond and lively hopes of early years. May we all have the light put in the window for us!

J. BASCHOFF.

KOSKOO.—This medicine is rapidly gaining the confidence of the people, and the numerous testimonials of its virtues, given by practitioners of medicine, leaves no doubt that it is a safe and reliable remedy for impurity of the blood, liver disease, etc.

The last Medical Journal contains an article from Prof. R. S. Newton, M. D., president of the Medical College, city of New York, that speaks in high terms of its curative properties, and gives a special commendation of Koskoo to the practitioners of medicine. This, we believe, the first instance where such medicines have been officially indorsed by the faculty of any of the medical colleges, and reflects great credit upon the skill of Dr. Lawrence, its compounder, and also puts "Koskoo" in the van of all other medicines of the present day. *Norfolk Daily Journal, Dec. 11, 1869.*

LET THE DEAF HEAR.

WALTHAM WATCHES.

The extensive use of these Watches for the last fifteen years by Railway Conductors, Engineers and Expressmen, the most exacting of watch-makers, has thoroughly demonstrated the strength, steadiness, durability and accuracy of the Waltham Watch. Testimony that class in all these respects is to decide the question as to the real value of these time-keepers.

More than 450,000 of these Watches are now speaking for themselves in the pockets of the people—a proof and a guarantee of their superiority over all others.

The superior organization and great extent of the Company's works at Waltham enable them to produce Watches at a price which renders competition futile, and those who buy any other Watch merely pay from twenty-five to fifty per cent. more for their Watches than is necessary.

We are now selling Waltham Watches at less prices in greenbacks than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

These time-pieces combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country or in Europe only those were finally adopted which seemed to be the most skillful artisans in our works, and long use on the part of the public, demonstrated to be essential to correct and enduring time-keeping.

Among the many improvements we would particularize:

The invention and use of a center pinion of peculiar construction, to prevent damage to the train by the breakage of main springs, is original with the American Watch Company, who, having had the refusal of all other contrivances, adopted Fogg's Patent Pinion as being the best and faultless.

Hardened and tempered hair springs, now universally admitted by watchmakers to be the best, are used in all grades of Waltham Watches.

All Waltham Watches have dust-proofs, protecting the movement from dust, and lessening the necessity of the frequent cleaning necessary in other Watches.

Our new patent stem-winder, or Keyless Watch, is already a decided success and a great improvement on any stem-winding Watch in the American market, and by far the cheapest Watch of its quality now offered to the public. To those living in portions of the United States where watchmakers do not abound, Watches with the above mentioned improvements, which tend to insure accuracy, cleanliness, durability and convenience, must prove invaluable.

Every Watch guaranteed by the Company. To prevent imposition, buyers should see that every Watch should bear either of the following trade marks:

American Watch Co. Waltham.
Appleton, Tracy & Co. Waltham.
P. S. Bartlett. Waltham.
William Ellery. Waltham.
Home Watch Co. Waltham.

For sale at retail by all respectable dealers. A descriptive circular, giving much useful information, sent to any address on application.

No Watches retailed by the Company.

Address
ROBBINS & APPLETON,
General Agents,
184 Broadway, New York.

Ask to see the new FULL-PLATE WATCH

bearing the trade mark "AMERICAN WATCH CO., Crescent St., Waltham, Mass." It is by far the best Full-Plate Watch made in the United States, and surpasses anything heretofore made in this country for Railway Engineers, Conductors, etc. ap30 3m cov p

THE ONLY TRUE AND PERFECT HAIR

COLORER.

The Mystery, or Turner's Hair Tint.

A harmless, beautiful and permanent Hair Dye, in one preparation!

It is the only preparation ever invented where the shade can be controlled at the will of the operator, and at the same time easy of application. It is now used in the principal Hair Dressing Saloons of New Orleans, and all over the South. A sample box will be sent, postage paid, to any address or Post Office in the United States, upon receipt of price, \$1, by JAMES TURNER & CO., Chemists and Druggists, No. 20 Camp street, under City Hotel, New Orleans. ap23 3m

A STANDARD REMEDY.

Such an article is DR. THOMAS' VENETIAN LINIMENT. It has stood before the public for twenty-two years, and has never failed giving satisfaction in a single instance. Every drop of this valuable compound is mixed by Dr. Thomas himself, therefore it can be relied upon. It is warranted superior to any other for the cure of Chronic Rheumatism, Toothache, Headache, Sore Throat, Vomiting, Frosted Feet, Mumps, Croup, Burns, Cuts, Sea-sickness, Insect Stings, Sprains, Cholera, Colic, Spasms, Dysentery, Bruises, Colds, Coughs, Old Sores, Swellings, pains in the Limbs, Back and Chest. There is no medicine in the world that stands more on its own merits than the Venetian Liniment. Thousands of certificates can be seen at the Doctor's office, attesting to its rare virtues. Sold by Druggists and Storekeepers throughout the United States. Price, fifty cents and \$1 per bottle. Depot, 10 Park Place, New York. ap23 2t

The Christian Advocate.

SATURDAY, MAY 14, 1870.

TRAVELING TOWARD SUNSET.

SAN FRANCISCO.—EARTHQUAKES.

I have spoken in a former letter of the unbounded admiration of the Christian for every thing in this city of his adoption. We meet every day, in every place, and on all occasions. If it rains, we are asked to notice how much harder it falls than it does in the States. Our attention is hurried to notice the sky, the pure blue through which we can see the mountain-top so distinctly; the beautiful complexion of the men and children; the robust energy, the vigor of the men, and their general stirring, bustling way of going about the city. Sometimes from sheer laziness, but distinguished with its persistence, we inquire, "How is it about earthquakes?" The effect of the first time it was reported to me was so entirely satisfactory that I have not neglected to resort to it very frequently since. But it is an entirely different effect on different persons. For instance, a man will receive it as a personal attack, much as if you had inquired of the health of a near relative who was ill. Another received it calmly, as if to convey the idea that earthquakes are trifles, and when one grows accustomed to them, but I never met with but one person who tried to face me on this subject, and he insisted that he would rather live here and be struck twice a week than live in any city on the Atlantic coast.

Speaking of earthquakes reminds me there is little danger of my ever getting it—that we were so fortunate as to feel a shake the other day, though not one of the most violent, was still severe enough to be remembered, and to drive everybody from the street, where, by the way, the rain was falling in torrents. We noticed several of the parties who had been affected to have become accustomed to such trifles, yet their cheeks and active movements indicated a degree of uneasiness which left room for doubt as to the soundness of their theory. So universal was the rush to the street as it seemed as if they had practiced it often before, as if it undoubtedly required a great deal of practice for the population of a city to rush from their homes into the street in the space of five or ten seconds. Hence to yourself the people of your city at a certain hour of any day, as if by magic, shake out of their houses into the streets—no one for any change of apparel, any washing of hands or faces, any arranging of "back hair," nor for any of the nameless and numberless trifles of the toilet over which the other sex delight to linger, and you will imagine what these streets look like under the influence of a shake. Do not imagine for a moment that you enjoy the ludicrous appearance of the crowd at the time! So from it, that it is about the most glorious gallery of woe-begone countenances anywhere ever saw. The enjoyment of the scene begins when the earth "settles," and the thousand incidents of the great scene are recalled and laughed over, and the wish food for merriment to the whole city until the next shake. Our party has resolved unanimously that we do not wish to remain here long enough to see another similar occurrence, yet I do not believe of us any worse frightened than the oldest inhabitant, who has been regularly getting frightened out of his wits, and rushing into the street in abundant terror and alarm for twenty years. The fact is, that with the memory of the fate of cities continually recurring, it is not probable that any man will grow accustomed to earthquakes.

As a result of earthquakes people under wooden buildings, and in districts where wooden structures are not prohibited by municipal enactment, but few brick or stone houses are to be seen. The other day one of the newspapers here published the report of the prohibition, seeming to prefer in the danger from fire, if by doing they could decrease the danger from earthquakes.

There is something indescribably fatal in one of these shakes, and the animals seem to partake of the general terror. The shake is preceded by an awful noise like the rushing of many waters, or like the great steam escaping from a boiler under great pressure. This noise is heard by persons in the streets for seconds before the shake begins, and seems to be approaching from a distance. Then the earth seems to roll like the waves of the sea, and the houses creak and totter—bricks and chimneys, fire walls and cornices come rattling into the street—crowds, altogether forming a scene not apt to be forgotten by a spectator. We grow to feel in

the Eastern States that, come what may, "old mother earth" is something on which we can always rely when storms come and dangers threaten. But out here we miss even that comfort, and have nothing to "tie to."

Yet these people seem really to care but little for these shakes, or rather they make no lasting impression on them, for in a few hours business is resumed, theaters, churches and schools are crowded as if there were no danger whatever of the buildings tumbling about their ears. After our experience the other day I shall not be surprised any day—after I get home—to hear that San Francisco has been swallowed up by an earthquake. We have been stopping at a five-story brick hotel, which can hardly be regarded as a desirable location during a sharp shock. Coming over the mountains in the cars, I asked a gentleman which was the best hotel. His reply sounded strangely to one who has lived all his life on solid earth. Said he: "I prefer the 'O—House' as a hotel, but they have so many earthquakes that I have been stopping lately at the 'L—House,' because it is only three stories high, and is therefore safer." We stop at the "O—House." Imagine a man in the East choosing a hotel with a view to immunity from danger from earthquakes!—C. W. Borne in Western Christian Advocate.

SAN FRANCISCO, April, 1870.

Mrs. EMMA WILLARD, the well known educator, died at her residence, Troy, New York, April 14, aged eighty-four. She was the author of many useful treatises, several of which hold their places as text-books in many of our best institutions of learning. She had fine poetic taste, and some of her verses are familiar as household words throughout the country; especially the devout and expressive hymn, "Rocked in the Cradle of the Deep," which was actually composed by her during a storm at sea.

In the New York Central Conference, which met recently at Syracuse, New York, when the roll of supernumerary ministers was called, Rev. J. Arnold reported himself ninety years old. He had been a Christian seventy-four years, and a minister sixty. Sunday, April 10, he walked three miles and preached twice. He made a very feeling speech. Several other interesting cases were reported, among them Rev. G. Harrison, who was the only member living of those who organized the Conference in 1810, having been for several years previously a member of the Philadelphia Conference.

CENTENARY MALE INSTITUTE.

SUMMERFIELD, ALABAMA.

The twenty-eighth annual session of this school will begin on the first Monday in OCTOBER, 1870, and continue nine months.

The expense for tuition, incidental fees, board, washing, fuel and lights, for the session, will be \$21.50, one-half to be paid on entrance and one-half on the 14th of February, 1871.

Persons wishing to patronize this school may address

JOHN MASSEY,

Principal, Summerfield, Ala.

MEDICINE—MEDICINE.

KOSKOO.

THE GREAT REPUTATION

which Koskoo has attained in all parts of the country

AS A GREAT AND GOOD MEDICINE,

AND THE LARGER NUMBERS OF TESTIMONIALS

which are constantly being received from physicians, and persons who have been cured by its use, is conclusive proof of its remarkable value.

As a Blood Purifier it has no Equal,

BEING POSITIVELY

THE MOST POWERFUL VEGETABLE ALTERATIVE YET DISCOVERED.

DISEASES OF THE BLOOD.

"The life of the flesh is in the blood," is a Scriptural maxim that science proves to be true. The people talk of bad blood as the cause of many diseases, and like many popular opinions this of bad blood is founded in truth.

The symptoms of bad blood are usually quite plain. Bad Digestion causes imperfect nutrition, and consequently the circulation is feeble, the soft tissues lose their tone and elasticity, and the tongue becomes pale, broad, and frequently covered with a pasty, white coat. This condition soon shows itself in roughness of the skin, then in eruptive and ulcerative diseases, and when long continued results in serious lesions of the Brain, Liver, Lungs or Urinary apparatus. Much, very much, suffering is caused by impure blood. It is estimated by some that one-fifth of the human family are affected with Scrofula in some form.

When the Blood is pure you are not so liable to any disease. Many impurities of the Blood arise from impure diseases of large cities. Eradicate every impurity from the fountain of life, and good spirits, fair skin and vital strength will return to you.

KOSKOO AS A LIVER INVIGORATOR

STANDS UNHAILED,

BEING THE ONLY KNOWN MEDICINE

that efficiently stimulates and corrects the hepatic secretions and functional derangements of the Liver, without debilitating the system. While it acts freely upon the Liver, instead of copious purging it gradually changes the discharges to a perfectly natural state.

SYMPTOMS OF LIVER COMPLAINT AND OF SOME OF THOSE DISEASES PRODUCED BY IT.

A sallow or yellow color of the skin, or yellow-brown spots on the face and other parts of the body; dullness and drowsiness, sometimes headache; bitter or bad taste in the mouth; internal heat; in many cases a dry, teasing cough; indigestion; some times sour stomach, with a raising of the food; a bloated or full feeling about the stomach and sides; aggravating pains in the sides, back or breast, and about the shoulders; constipation of the bowels; piles, flatulence, coldness of the extremities, etc.

KOSKOO!

Is a remedy of wonderful efficacy in the cure of diseases of the Kidneys and Bladder. In these affections it is as near a specific as any remedy can be. It does its work kindly, silently and surely. The relief which it affords is both certain and perceptible.

DISEASES OF THE KIDNEYS AND BLADDER.

Persons unacquainted with the structure and functions of the Kidneys cannot estimate the importance of their healthy action.

Regular and sufficient action of the Kidneys is as important, may even more so, than regularity of the bowels. The Kidneys remove from the blood those effete matters which, if permitted to remain, would speedily destroy life. A total suspension of the urinary discharges will occasion death in from thirty-six to forty-eight hours.

When the Urine is voided in small quantities at the time, or when there is a disposition to Urinate more frequently than natural, or when the Urine is high-colored or scalding, with weakness in the small of the back, it should not be trifled with or delayed, but Koskoo should be taken at once to remedy the difficulty before a lesion of the organs takes place. Most of the diseases of the Bladder originate from those of the Kidneys; the Urine being imperfectly secreted in the Kidneys, proves irritating to the Bladder and Urinary passages. When we recollect that medicine never reaches the Kidneys except through the general circulation of the blood, we see how necessary it is to keep the Fountain of Life pure.

KOSKOO

Meets with great success in the cure of

DISEASES OF THE NERVOUS SYSTEM.

Almost all the evils of our people suffer from nervous exhaustion, and are, therefore, liable to its concomitant evils of mental depression, confused ideas, softening of the brain, insanity, and complete breaking down of the general health. Thousands are suffering today with broken-down nervous systems, and, unfortunately, tobacco, alcohol, late hours, overwork, (mental and physical), are causing diseases of the nervous system to increase at a fearful rate.

The symptoms to which diseases of the nervous system give rise may be stated as follows: A dull, heavy feeling in the head, sometimes more or less severe pain or headache; periodical headache, dizziness, noises or ringing in the head; confusion of ideas; temporary loss of memory; delusion of spirits; starting during sleep; bad dreams; hesitation in answering questions; dullness of hearing; twitching of the face and arms, etc., which, if not promptly treated, lead to Paralysis, Delirium, Insanity, Impotency, Apoplexy, etc., etc.

J. W. BLACKMAN'S

COMMERCIAL COLLEGE.

61 CAMP STREET.

Corner Commercial Place, N. O.

Open day and evening the entire year.

Pencmanship, Book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from twelve to fifty years of age attend. The instruction is private to each student. Persons who have neglected their education can here speedily qualify themselves for good situations in business, some from the country may obtain board in the family of the principal.

William Walker, a late graduate of the Southern University of Alabama, and son of a practical teacher in New Orleans since 1851. For circulars, giving terms, etc., address

J. W. BLACKMAN, NEW ORLEANS.

Ja2 1y

METHODIST FEMALE COLLEGE.

TUSCALOOSA, ALABAMA.

Under the Patronage of the Mobile Conference.

The regular scholastic year will begin on the first Monday in OCTOBER next, and end the last of June. It is divided into two terms of four and a half months each.

EXPENSES.

Primary department, per term.....\$20 00

Collegiate department, per term.....25 00

Latin and Modern Languages, each.....10 00

Music on Piano and Guitar.....25 00

Use of Instrument.....5 00

Drawing and Painting.....\$20 to 25 00

Contingent fee.....3 00

Board, including washing, lights and fuel, per month.....22 00

Young ladies must furnish their own towels, sheets, pillow cases and table napkins. Payments for each term in advance. Pupils entering within the first month will be charged from the beginning. Inmate ministers charged no tuition in the Literary Course.

Strict attention given to the manners and morals of the young ladies, and to their habits of study.

Refer to Mr. Keener.

For information address the President, Mr. J. M. OLIVER, Principal.

Ja2 1y

TUSKEGEE FEMALE COLLEGE.

TUSKEGEE, MACON COUNTY, ALABAMA.

REV. GEO. W. F. PRICE, PRESIDENT.

1. Institution permanent and successful.

2. Full faculty of experienced teachers.

3. Music under a special feature.

4. Art taught thoroughly and cheaply.

5. Fine Scientific Apparatus in good order.

6. Boarding department excellently kept.

7. Pupils under control of President.

8. Attention to health, manners, morals.

9. Vocal music gratuitously to all.

10. Languages taught, ancient and modern.

11. Particular care given to Primaries.

12. Object Lesson System adopted.

13. Discipline thorough and efficient.

14. Literary culture unsurpassed.

MUSIC DEPARTMENT.—Dr. S. M. Bartlett, principal.—Dr. Bartlett has been a successful teacher of vocal and instrumental music for nearly twenty years, much of the time in female colleges in Alabama. The institution has excellent instruments for instruction. Pupils practice under the professor's eye. Vocal music is a gratuitous daily exercise. Vocalization taught thoroughly.

BOARDING DEPARTMENT.—Capt. J. H. Pomeroy, steward; Mrs. E. R. Whitehead, housekeeper.—The gentleman in charge of this department is late of Marietta, Florida, and is of elevated character and social standing. The President resides in the college, and has charge of the boarders. Young ladies must furnish their own towels, sheets, pillow cases, toilet soap and lights. Purses for each term in advance. Four weeks make a scholastic month.

Next year begins September 15, 1869. Two terms, twenty weeks each.

CHARGES FOR TERM OF FORTY WEEKS.

Primary department.....\$25 00

Academic department.....40 00

Collegiate department.....50 00

Music department.....60 00

Art department.....\$20 to 40 00

Languages, each.....20 00

Diploma fee.....5 00

Board per month, without lights.....20 00

No incidental charges of any kind. Fees for each term in advance. Total expense, without extras, about \$200.

REV. GEORGE W. F. PRICE,

Pres. Tuskegee Female College,

Tuskegee, Macon Co., Ala.

NEW ORLEANS MARKETS.

From the N. O. Price Current.
We have again to notice a fair degree of animation in the general market, most branches of the wholesale trade participating in the prevailing activity. Sugar and molasses have continued in good demand, the receipts meeting a ready sale at full prices, and Western produce generally has shown a fair degree of animation, with a tendency in favor of sellers, but the movement is mostly confined to the local trade and the execution of orders for the Gulf ports. In flour, however, we notice a cargo completed for Rio de Janeiro.

The weather has been clear and pleasant, but rather cool for the season, with the prevailing winds from the north. The flood in the tributaries is subsiding, but most of them are still at a fair navigable stage. The bulk of the cotton in the upper Red river district having come forward, the receipts show a marked falling off, quite as much as was expected, notwithstanding liberal arrivals from the Mississippi river landings and by the Jackson railroad. From all points we hear of a wider area of cotton planted. Although the season is manifestly backward, there appears to be a general anticipation of an increase in the crop.

The river is two feet five inches below high water mark.

Cotton.—The following are the arrivals since the sixth instant:

Louisiana and Mississippi	bales	7070
Lake	15	
Mobile	360	
Florida	9	
Texas	38	
Total	7492	

On Saturday the movement was much more animated. Buyers operated freely throughout the day, and under their spirited competition and a slight improvement at New York, factors were enabled to establish an advance of $\frac{1}{8}$ to $\frac{1}{4}$ ¢, low middling closing at $21\frac{1}{4}$ to $21\frac{1}{2}$ ¢, while the sales summed up 7,350 bales. On Monday buyers came forward with unabated spirit, and although the movement was checked by scant supplies of the styles most in request, and decidedly more stringent pretensions on the part of factors, yet as there was a further advance of $\frac{1}{4}$ ¢ at New York, and the Liverpool accounts were encouraging, 6,250 bales changed hands mostly on the basis of $20\frac{1}{2}$ to $21\frac{1}{2}$ ¢ for good ordinary, and $21\frac{1}{2}$ to $21\frac{3}{4}$ ¢ for low middling, showing a further improvement of about $\frac{1}{4}$ ¢. On Tuesday the market opened with a good demand, which continued lively throughout the day, and although factors were more stringent in their pretensions, and the supply was only moderate, especially of desirable descriptions, yet the business comprised 5,600 bales, at a further improvement of $\frac{1}{4}$ to $\frac{1}{2}$ ¢, good ordinary ruling at $20\frac{1}{2}$ to $21\frac{1}{2}$ ¢, and low middling at $21\frac{1}{2}$ to $22\frac{1}{2}$ ¢, but with very little to be had at the inside rate, the outside figures, of course, being for strict classification. Some even-running of this description brought $22\frac{1}{2}$ ¢.

This makes an aggregate for the past three days of 19,200 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 1,053,865 bales, against 763,040 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 677,534 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 324,596 bales to Great Britain, of 105,696 to France, and of 115,394 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	18 to 19
Good ordinary	20 to 21
Low middling	21 to 22
Middling	22 to 23
Strict middling	23 to 24

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, MAY 21, 1870.

NO. 18.

PROCEEDINGS OF THE GENERAL CONFERENCE OF THE METHODIST E. CHURCH SOUTH.

THIRD DAY.

FRIDAY, MAY 6, 1870.

The Conference met at the stated time. Bishop Pierce in the chair. Religious services were conducted by Dr. Hamilton.

The minutes of the last meeting were read and approved.

The following delegates, who were not present yesterday, appeared and took their seats:

Thos. E. Bond, lay, Baltimore Conference; Lewis D. Palmer, lay, North Georgia Conference; A. W. Lampkin, lay, Mobile Conference; Thomas Madden, clerical, in place of J. B. McFerrin, and Joseph D. Palmer, lay, Tennessee Conference; Thomas M. Finney, clerical, St. Louis Conference; James O. Sweeney, lay, Missouri Conference.

Dr. Mann brought forward the Rev. Mr. Ransom, pastor of the church in which the General Conference holds its present session, and he was formally introduced to the Conference.

Bishop Kavanaugh then took the chair.

Dr. Young then stated that he had been desired by Dr. McFerrin to present his report as secretary of the Board of Domestic Missions, and to read the appendix to said report, as follows:

REVEREND AND DEAR BRETHREN—At the last session of the General Conference our missionary work was divided into two branches, foreign and domestic. The Board of Domestic Missions was located at Nashville, and the secretary, with the advice of the board and in compliance with his duty as prescribed in the Discipline, proceeded immediately to his work. As the Annual Conferences did not convene after the close of the General Conference, until the autumn and winter of 1869-70, no Conference boards could be organized before the times of their meeting. At the first opportunity, however, each Annual Conference did constitute a board auxiliary to the parent board, and have been at work with some degree of success.

The first annual report, which is herewith submitted, was imperfect, because the parent board failed to receive the necessary data; enough, however, was reported to show that the plan was approved by the preachers and the membership generally, and that God had made the board the instrument of much good.

Our second annual report, for 1868-69, which is also herewith handed to the General Conference, shows considerable progress. From nine Annual Conference boards we could get no reports whatever, and from eleven no statistics; and yet, from those reported, we gather the following encouraging facts, viz: Missions, as far as reported, 194; white members, 23,797; colored members, 291; received during the year, 3,621; local preachers, 73; Sabbath schools, 282; scholars, 9,945; churches, 228; infants baptized, 797; adults baptized, 2,017. Had your board been able to procure the statistics from the eleven remaining Conferences the numbers would have been greatly increased in this year's report.

The report for 1869-70 gives 187 missions, 17,665 white members, 245 colored members, 2,515 received during the year, 45 local preachers, 162 Sabbath schools, 478 officers and teachers, 10,553 scholars, 251 churches, 662 white infants baptized, 1,487 white adults baptized, 11 colored infants baptized, 8 colored adults baptized, \$12,189 35 collected for church purposes.

From the general summary, it will be seen that from eleven Annual Conference boards we have received no statistics; and many of those reporting to us say that their returns have been very incomplete. We are quite certain that, could there be a full and fair exhibit from every part of our field of domestic missions, the showing would almost double our present returns. But so it is. Every effort to obtain full reports has failed. Some brethren are always prompt.

There was collected and disbursed during the first year of the board's operations, \$44,672 90.

The second year the treasurer reported the collections, \$47,959 60, besides five Annual Conferences which made no report of their funds.

The third year, 1869-70, shows the amount of collections to be \$50,321 50; and six Conferences have not yet made their returns. These added would indicate that over \$60,000 have been collected during the year.

From the foregoing it will be seen that, in connection with the board, the gospel has been preached to multitudes, and the sacraments of the church administered to thousands, while scores and hundreds of guilty sinners have been brought to a knowledge of pardon through faith in Christ; and children by the ten thousand have been put under religious training. Here, without any reference to what has been impressed on the outside world, is a full remuneration for all the labor and expense in sustaining our home work.

The collections have been respectable, especially when we bear in mind that the board was organized when our country was desolated and impoverished, and almost every interest of the church prostrated. Church edifices, parsonages, school houses, college buildings and seminaries were nearly everywhere destroyed or dilapidated. Indeed, for two years subsequent to the last General Conference, many of the people were in want of bread; and contributions in money and provisions had to be made to a hungry and starving people, rendered poor by war, drought and mildew. Besides all this our foreign missionary work called for help, and an old debt weighed heavily upon the church; and then our regular ministers had to be sustained, or cease from their loved employ to plow the fields and make bread for their wives and children. In these straitened circumstances it is no marvel that the collections fell below what they once were, when one rich cotton or rice planter could pay his overseer \$1,000 per annum, and give a missionary \$500 to be a pastor to the slaves on his plantations. These large and generous sums went to swell the receipts of the missionary society, and counted by thousands as sums given to the cause of missions, in the days of our prosperity; but now, what is contributed is given in small sums, and appropriated to such as are not able to help themselves. We repeat that, in view of all the facts and circumstances enumerated, the church has no cause for discouragement; but rather she should thank God and take courage.

After a careful survey of the whole ground for four years the parent board is fully impressed with the importance and necessity of increased effort in the home department of our missionary work. There are thousands multiplied in our own land, and among our own people, who are unable or unwilling to sustain the ministry; they are perishing for the lack of knowledge; their children are growing up in ignorance and vice; and, if they are saved, the gospel must be sent to them. The poor, the maimed, the halt, the blind, must be brought in; the ditches and hedges, the byways and highways, the streets and market places must be all visited by the missionary of the cross, and the multitudes compelled to come to the marriage feast.

A live and prosperous church at home has the means and the heart to send the gospel abroad; the church that provides not for its own poor, or the destitute and suffering of its own country, will not likely feel great concern in the salvation of the pagan nations of the earth. The language of every converted sinner is:

"O that the world might taste and see
The riches of his grace!"

The board would modestly suggest that the Annual Conferences, in their yearly meetings, devote too little time to the cause of missions in their respective bounds. Would it not be well to devote a day, in open Conference, to this important interest? Let each missionary report the result of his year's labors; let each presiding elder represent the missionary ground in his district; let new fields, unoccupied territory, be reported; and let the whole Conference know what is doing, and what should be done, in this department; let the collections be reported, and the appropriations of money be suggested, and soon the whole Conference would be given to the cause. Would it not be well to insert in the Discipline, among the items in answer to the question, "What is the method of

proceedings in an Annual Conference?" a question to this effect, "What is doing in the bounds of this Conference in behalf of domestic missions?"

On the other suggestion: Great care should be taken by the Bishops, the presiding elders and the Annual Conference boards, that no moneys should be appropriated to other than strictly missionary labors, or to those who work in fields where they cannot obtain a support. To supplement the salaries of those who occupy places able to give them ample support, and leave the missionary on a hard field to struggle with poverty operates to the prejudice of the cause. A faithful application of the funds of the church is a virtue that should never be tarnished.

In the treasurer's reports it will be seen that, over and above the actual expenses of the board, there has been appropriated in three years, to various objects, the sum of \$2,074 29. This amount might have been greatly augmented if the secretary had felt at liberty to lift collections exclusively for the benefit of the parent board; but he found this entirely impracticable; each Annual Conference seemed to have demands for every dollar collected within its own bounds, and many of them spared the ten per cent. with embarrassment.

Before closing this report the attention of the General Conference is particularly called to the condition of the human work. Your body will be authorized in reference to the organization of a separate Conference or district for the German work. It is certain that very much is involved in the efforts of the church to evangelize this important element of our population. We ask your attention to the report of the Texas Conference board, found in the annual report accompanying this address.

Your board found impediments, not necessary to be mentioned here, in connection with the work among the colored people; but, as the condition of this portion of our population comes under the supervision of another board, we forbear, further than to remark that sincere and earnest desire is felt for the proper religious instruction of this large and important element of society.

Respectfully,
J. B. McFERRIN, Secretary.

NASHVILLE, APRIL 30, 1870.

After reading it Dr. Young said: "I have been requested by Dr. McFerrin not only to read this address, but to state to the brethren that he is very slightly indisposed, and would like for me to make a few remarks upon the address. He has sent out his annual circular to all the Conferences, and three annual reports, and that the sums mentioned in the circular tally exactly with those mentioned in the annual reports. He has averaged eight Conferences each year, and besides this, I would add, has attended district meetings without number. All the money has been spent within the bounds of the Conferences in which it was collected, except his traveling expenses, which were not over \$300 any one year, his salary and \$2,000, which was divided out as follows: During the war the old parent board learned that Bishop Soule was in straitened circumstances, and instructed a brother to furnish him with \$500. Some went to the support of the superintendent of the colored Conferences, and the remainder went to appropriations made by the Board of Managers in Nashville. The balance, over \$2,000, is in the Third National Bank of Nashville, and subject to order. I move that this be referred to the Committee on Missions." It was so referred.

W. M. Prottsman moved that that part of the report of the secretary of the Board of Domestic Missions referring to the business of an Annual Conference be referred to the Committee on Revision.

Dr. Evans then suggested that the organization of the standing committees be reported; whereupon the secretary called the names of the chairmen of the standing committees as follows: Episcopacy, L. M. Lee; Itinerancy, J. E. Edwards; Books and Periodicals, W. M. Rush; Boundaries, Robert Alexander; Missions, Jesse Boring; Revision, J. Hamilton; Sunday Schools, Simp-

son Bobo; Education, L. C. Garland; Religious Instruction of Colored People, James E. Evans.

Dr. Kerr, of the Presbyterian church, Dr. Bowman of the Second, and Dr. Richardson of the Third Presbyterian churches of this city, were then introduced to the Conference, and invited to take seats within the bar.

W. M. Rush then called for the Committee on Finance, which was announced as follows:

Baltimore, Thos. E. Bond; Virginia, A. G. Brown; West Virginia, W. C. Ireland; North Carolina, T. M. Jones; South Carolina, H. T. Wright; South Georgia, A. T. Colquitt; North Georgia, J. P. Garvin; Florida, G. W. Taylor; Montgomery, R. H. Powell; Mobile, A. S. Andrews; Louisiana, N. A. Crivens; Mississippi, O. J. Moore; Memphis, Milton Brown; Tennessee, J. B. Palmer; Holston, J. M. McTeer; Kentucky, W. M. Lenthur; Louisville, D. Morton; St. Louis, Truett; Ark., Missonri, C. G. Epperson; Arkansas, L. L. Mack; Little Rock, J. L. DeYampert; Indian Mission, E. Ewing; Texas, J. D. Gidding; East Texas, Jas. T. Taylor; Trinity, W. J. Clark; Northwest Texas, not reported; West Texas, D. A. T. Woods; Columbia, no representation; Pacific, W. E. Cooke; Illinois, R. Smithson.

Thos. Stanford asked leave of absence on account of family sickness, which was granted, and J. S. McCarver, first reserve, took his seat.

C. K. Marshall arrived and took his seat.

N. H. Lee presented a memorial from the Louisville Conference, which was read and ordered to be published in the General Conference Daily. It is as follows:

The delegates of the Louisville Annual Conference beg leave to state that since their arrival in this city they have received a paper containing the proceedings of a meeting held in the city of Louisville on the twenty-fifth ultimo, composed of a large number of the most influential male members of all the Southern Methodist churches in that city. The object of the meeting (as stated in the paper) was to consider the propriety of tendering to this General Conference some proposition as to the removal of the Publishing House of the Methodist Episcopal Church South from the city of Nashville, Tennessee, to the city of Louisville, Kentucky. It was agreed by the meeting that, should this General Conference favor the removal of the Publishing House to the city of Louisville, the members and friends of our church in that city should assure the payment to the House of such an amount of money as would meet the expenses of the removal and add largely to the capital of the House. After a full and free discussion, in which a number of brethren participated, the following resolution was unanimously adopted:

"Resolved, That we, as the representatives of the Methodist Episcopal Church South in the city of Louisville, do hereby request our delegates to the General Conference, soon to convene in the city of Memphis, to offer to said body the sum of \$50,000 for the use and benefit of the General Publishing House, on the condition of its removal from Nashville, Tennessee, to Louisville, Kentucky, such removal to be made upon the condition of the payment of the sum named, or as soon after said payment as may be consistent with the interests of the House."

We feel assured that we truly represent our brethren at Louisville, when we say, although they would highly appreciate the establishment of the Publishing House in their midst, for the advantages which would accrue to their city and to the church, that this is not the controlling consideration with them in making, through us, the above named proposition. They do not expect or design that the proposition to donate \$50,000 to the Publishing House, on condition of its removal to their city, shall be a determining consideration in the premises. Did they not feel assured that Louisville possesses the local advantages essential to the successful operation of the House they would not ask its removal, as they would not expect it to succeed, though they should endow it with a capital of \$500,000. A large proportion of the brethren making this proposition are business men of long and varied experience and observation; and they well know that the essential conditions of such a success as the church of the present day demands of our Publishing House, and must have, are, first, facility of obtaining and cheapness of labor; second, moneyed facilities; and third, such commercial advantages as will

enable the House to transport her products cheaply, speedily and safely to every part of our widely extending territory. In the absence of these advantages, which are essential conditions of a genuine vitality, and of a healthful and vigorous growth, whatever amount of capital the House might command, and whatever financial skill might be employed in its management, it would be destined to drag out an unnatural and sickly existence, and finally to reach a shameful and ignominious death.

In illustration we refer you to the fact that, of the whole number of book depositories authorized by the General Conference of 1846, the Louisville Depository was the only one which achieved a financial success. We refer you, also, to the success of the Louisville Conference Book and Tract Depository, established under the arrangement of the General Conference of 1858, of which Dr. Redford was agent, as another illustration of "the advantages of Louisville as a business center. This difference of result is not to be accounted for altogether, if at all, in the difference of financial ability, and degree of faithfulness and energy with which these establishments were managed, but mainly, if not altogether, in the difference of degree of conformity with the principles which control all manufacturing and commercial operations. While we most heartily unite with the whole church in gratitude to God for the marvelous work accomplished in the last four years in the resuscitation of our Publishing House, under the administration of Dr. Redford, yet we feel constrained to say that it is our opinion that this success has been accomplished in despite of the disadvantages of the location of the House, and that, more favorably located, much more would have been accomplished. And we firmly believe that, continuing in its present location, it never can reach the status that will render it capable of meeting the constantly increasing demands of our growing church.

We do not pretend to assume that Louisville is the point within our bounds affording the essential conditions of success in this department of church operation; but we believe that it possesses these advantages, taking all things into the account, in a degree superior to any other point. Having thus discharged our duty to our brethren of Louisville, by presenting the above named proposition to the General Conference, we close by most respectfully requesting that this paper be referred to the Committee on Books and Periodicals, with instructions to consider and report on the same, at as early a period as possible, during the present session.

N. H. LEE,
Chairman of the Delegation.

Dr. Green moved to refer this to the Committee on Books and Periodicals, which motion was amended by A. S. Moran, by adding "with instructions to report as soon as possible." With this amendment it was referred.

Dr. Redford remarked that it was due himself and his colleagues that he offered an explanation. He said: "I have the honor to be a representative from the Louisville Conference and as the memorial just offered by the delegates from that Conference refers to the management of the Publishing House, under my agency, I beg leave to say that my colleagues did not invite me to take any part in the preparation of the memorial just presented. In consequence of my relations to the Publishing House they have relieved me from the delicate attitude in which I would otherwise be placed."

The call was then made for petitions and memorials.

On motion of W. M. Rush it was ordered that all petitions and memorials be referred to the appropriate committees without reading, unless requested by the delegations offering them.

The secretary then called the roll of the Conferences, and the petitions and memorials were presented as follows:

Western Virginia Conference.—S. K. Vaght presented a correspondence respecting boundaries of Western Virginia and Baltimore Conferences. Referred to Committee on Boundaries.

South Carolina Conference.—A. M. Shipp presented a memorial from Marion (South Carolina) district meeting, on district conferences, etc. Referred to Committee on Education and Revision.

South Georgia Conference.—J. E. Evans presented a report from the Wesleyan Female College, Macon, Georgia. Referred to the Committee on Education.

Mobile Conference.—A. H. Mitchell, a memorial on making State lines Conference boundaries. Referred to the Committee on Boundaries.

Tennessee Conference.—A. I. P. Green, on distribution of church literature. Referred to Committee on Books and Periodicals.

A. H. Redford presented a memorial from superintendents of Sunday schools in Nashville. Also one from Rev. W. M. Green. Referred to the Committee on Sunday Schools.

Dr. Witherspoon, of the Presbyterian Church, was here introduced to the Conference.

Louisiana Conf.—J. C. Komer presented a memorial of the Conference on New Orleans exception. Referred to the Committee on Itinerancy.

Two memorials on Sunday schools. Referred to Committee on Sunday Schools.

A memorial from New Orleans Sunday School Convention. Referred to Committee on Sunday Schools.

A. H. Redford presented the exhibit of the New Orleans Depository. Referred to Committee on Books and Periodicals.

Holston Conference.—J. N. McTeer, a memorial from the quarterly conference of Hillsville station and circuit, on boundaries. Referred to Committee on Boundaries.

Louisville Conference.—E. W. Sehon, a memorial from colored Conferences, which was read and referred to Committee on Religious Interests of Colored People, and ordered to be printed in the *Daily Advocate*. It is as follows:

The undersigned, members of different Annual Conferences, (colored,) beg leave to present to the General Conference of the Methodist Episcopal Church South the following memorial:

It is with most grateful feelings we note the success which has attended your wise plans in the relation of our race. Colored Conferences have been formed embracing nearly the whole of the Southern States. The different members of the episcopal board have aided the general superintendent, the Rev. Dr. Taylor, in organizing these Conferences. The Bishops will testify to the honesty, devotion and zeal with which our people have come up to this work. They have listened almost with the eagerness of disciples to the wise counsel and tender admonition of these venerable men, now presiding over your deliberations. They have received their appointments with immense satisfaction—they have felt it to be a privilege to preach, and have consulted neither flesh nor blood as to the field to be occupied—they have gone on foot, and without money, and have endeavored to preach the gospel to the poor. Never did men go forth under more adverse circumstances. Illiterate, poorly clad, with no books but the Bible and hymn book, they have gone to the negro cabins, to the forests, to the gin houses and barns, and proclaimed in their feeble way the everlasting gospel. Their labors have been blessed; many that were alienated have returned to their first love, and many have been converted to God. That there has not been, at all times, the prudence, the wisdom, the purity and consistency which are so desirable, and, indeed, so necessary in the ministers of the gospel, we are prepared to admit. But, taking all things into consideration, we think that the instances of improper conduct on the part of our preachers have been very rare, and few of these have been of a flagrant character. We can, therefore, truly thank God and take courage.

It is the wish of your memorialists to keep up, nay more, to increase the feelings of gratitude, of confidence and of dependence, which we believe the Southern black man should entertain for the true Southern white man. We are among you and dependent on you, since many of us sustained the relation of slaves to masters; you were our masters; you were kind, conscientious and exhibited the deepest anxiety for our welfare. It was through the influence of the Methodist Episcopal Church South that we were converted to God. Your missionaries endeavored themselves to our people by devotion to our interests when we were slaves. Through them we learned the way of salvation; by them our marriage ceremonies were performed, our children baptized, our dead were buried. From their hands we received the consecrated bread and wine, symbols of the body and blood of Christ. From their lips our children received catechetical instruction, and were taught the glories and simple truths

of the Bible. The recollections of the past, to us, are hallowed by associations the most touching and tender conceivable. We can say, and we do say, that the record of the Methodist Episcopal Church South, in reference to the colored race, is worthy of the apostolic age. We shall love and honor you while we live, and dying we shall bless you. We believe that the time has now come when a General Conference can be organized for our race; under other circumstances it might be advisable to wait until our ministers were better educated. But in order that there be no alienation on the part of our people, we ask that you form at once and authorize the organization of a colored General Conference, connected with and dependent upon your General Conference. It is known to your venerable body that many influences are being brought to bear against us because of our relation to the Church South. We have been harassed, persecuted and abused. It has been said by our enemies that you would not allow the organization partially promised in the Book of Discipline, and which we have confidently expected would be effected at this General Conference. Indeed, we have been compelled to promise our people that there would be but little doubt that you would comply with our wishes in this regard. We ask it, not that we may get further from you, but that we may be drawn nearer to you. We ask it that we may bring our people more under the influence of the Methodist Episcopal Church South. We ask it that we may break the force and destroy the influence of those whose motto has been to disintegrate and absorb. We ask it that we may promote harmony, stop the mouths of complainers, and silence the voice of distrust, and we ask it that we may the more efficiently aid you in spreading scriptural holiness over these lands. We ask it that we may call you our people, to look upon the Methodist Episcopal Church and say to them, "Walk about Zion and round about her till the towers thereof, mark ye all her bulwarks, consider her palaces, that ye may tell it to the generations following; for this God is our God forever and ever; he will be our guide even unto death." With this work accomplished, and with a colored Bishop to preside, we should go among our people with a hope which we have hardly been able to indulge thus far. We should then, under the blessing of God, be invested as one man, and we would not fear, though an host should encamp against us. Thus we would be confident, and would dwell in the house of the Lord forever.

SAUEL G. KEAS,
WARDEN P. CHURCHILL,
GEORGE W. JACKSON,
DANIEL C. WELLS,
GEORGE HENDERSON,
JOHN L. THOMAS,
JOHN GARNER,
THOMAS BRIGHT,
TAYLOR COWEN,
EDWARD OWENS,
HENRY TALBOT,
SAMUEL PERCIPHOR.

Missouri Conference.—W. M. Rush, memorial on boundaries and missions. Referred to Committee on Missions.

B. H. Spencer, on changes in Discipline. Referred to Committee on Revision.

Arkansas Conference.—J. M. Steel, memorial on boundaries. Referred to Committee on Boundaries.

Texas Conference.—R. Alexander, memorial on German work; read and referred to the Committee on Missions. Another on German Apologist, hymn book and catechism. Read and referred to Committee on Missions.

East Texas Conference.—L. P. Lively, on episcopal services in Texas. Read and referred to Committee on Episcopacy.

Trinity Conference.—R. Lane, memorial of the Quarterly Conference of Jefferson station, on change of the name of the church. Referred to Committee on Revision.

I. G. John, a memorial on episcopal services in Texas. Referred to Committee on Episcopacy.

Pacific Conference.—O. Fisher, a memorial on a new Conference on Pacific coast. Referred to Committee on Boundaries.

Columbia Conference.—Bishop Marvin came forward to represent Columbia Conference; presented the minutes of the Conference, and called attention to the prosperous condition of Corvallis College. He also presented memorials from the Board of Foreign Missions, which were referred to the Committee on Missions.

An invitation to members of the Conference was received from the Ladies' Memorial Association of Memphis to attend the decoration of soldiers' graves to-morrow morning.

Dr. Mitchell moved that the Conference adjourn at eleven o'clock to-morrow morning, in order to attend. After an animated discussion, in which Drs. Bond, Marshall, Myers, Cottrell and others participated, Dr. Myers offered the following substitute:

"Resolved, That in view of the invitation extended to members of this Conference to attend the serv-

ice of the decoration of soldiers' graves, this body will adjourn on to-morrow morning at eleven o'clock."

Dr. Moran, of North Carolina, rose and said that without intending to cast any reflection on any of the brethren who had spoken, it was quite evident that any further discussion of this subject was unnecessary and unwise, and he therefore called for the previous question, which was sustained, and the substitute of Dr. Myers was adopted by the Conference.

A memorial from A. I. P. Green, T. O. Summers and R. A. Young, a committee from the Board of Domestic Missions, was presented, read and referred to Committee on Missions.

A communication from Bishop Paine, referring to his "Life and Times of Bishop McKendree," and resolutions of J. C. Keener and L. C. Garland, commending said work, were presented, read, and on motion of A. M. Shipp, were referred to the Committee on Books and Periodicals.

On motion of C. I. Vandeventer a committee of nine was ordered on the circulation of the Holy Scriptures.

Bishop Pierce announced the committee on orphans' homes as follows: J. Boring, D'Arcy Paul, G. W. Williams, J. Jackson, J. Hamilton and A. L. P. Green.

J. E. Edwards and L. C. Garland offered a resolution proposing a change of the Discipline in regard to the appointment of preachers, and requesting that, as it would have to lie over, according to rule, it be published in the Daily of to-morrow.

P. A. Peterson wished it referred to the Committee on Revision.

Dr. E. H. Myers rose to a point of order, and thought that it was out of order to do anything but lay it on the table.

Dr. L. M. Lee agreed with Dr. Myers.

Mr. Potter referred to the rule in question, and said that it required the resolution to lie on the table before being adopted, but that the Conference could make any disposition of it, in the meantime, that they thought proper.

Joseph B. Cottrell was disposed to agree with Mr. Potter. It was, however, not altogether clear that the Conference, under the rule, could do more than order the publication of the resolutions. If he apprehended aright the object of the movers of the resolutions, it was, without delay, to get so important a matter as that of the pastoral before the body that it might have the attention it deserved before we became jaded, and whilst all are present. Surely it is the subject of subjects, and deserves the most patient and thorough discussion. He was ready, and had no disguise of his opinion of it. After considering the subject for several years, he was confirmed in the opinions held at the last General Conference, and deemed it important to the prosperity of the church that decisive action be taken in the premises.

Pending this discussion the Conference adjourned with the benediction by the Bishop.

FOURTH DAY.

SATURDAY, May 7, 1870.

The Conference met at the stated hour.

Bishop Kavanaugh not being present, Bishop Paine called the Conference to order, and religious service was conducted by O. Fisher. Bishop Kavanaugh arrived and took the chair.

The minutes of the last meeting were read and approved.

Bishop Wightman took the chair, and called for the delegates who had arrived since yesterday; and the following delegates took their seats:

Asa Snyder, lay delegate from the Virginia Conference; and A. T. Scruggs, lay delegate from the Memphis Conference.

The call was then made for reports from standing and select committees. There being none, memorials and petitions were called for, and were presented, as follows:

Baltimore Conference.—John Martin presented a memorial calling for a change in the name of the church. Referred to the Committee on Revision.

Also one calling for the incorporation of District Meetings into our ecclesiastical economy. Referred to the Committee on Revision.

Also one against the division of the Conference. Referred to Committee on Boundaries.

Also one from the Quarterly Conference of Piedmont station, asking the General Conference to define who shall have the right of nomination of trustees to fill vacancies. Referred to Committee on Revision.

Also one asking the General Conference to divide the first question of the Quarterly Conference, and that the question of complaints be changed according to the suggestion of Bishop Pierce. Referred to the Committee on Revision.

Virginia Conference.—L. M. Lee presented a memorial on change of Discipline on presiding elders, etc. Referred to Committee on Revision.

P. A. Peterson moved that all matters relating to District Meetings be referred to a special committee of nine, which prevailed.

L. M. Lee presented a memorial requesting a rule to be inserted in the Discipline in regard to the manufacture and sale of ardent spirits. Referred to Committee on Revision.

Also, a memorial from Stafford circuit, Baltimore Conference, praying to be readmitted into the Virginia Conference. Referred to Committee on Boundaries.

Western Virginia.—W. C. Ireland presented a petition of that Conference, praying that that part of the Western Virginia Conference extending into Kentucky be transferred to the Kentucky Conference. Referred to the Committee on Boundaries.

South Carolina Conference.—A. M. Shipp presented a communication from Trinity Quarterly Conference, Charleston, South Carolina, on change of Discipline, asking for the admission of trustees into the Quarterly Conference. Referred to the Committee on Revision.

South Georgia Conference.—J. S. Key and J. E. Evans offered a resolution asking that presiding elders be allowed to appoint substitutes. Referred to the Committee on Revision.

North Georgia Conference.—Bishop Pierce presented a memorial from Lagrange church meeting, on Sunday school literature. Referred to Committee on Sunday Schools.

Montgomery Conference.—M. S. Andrews, a memorial from the trustees of East Alabama Male College, which was read, referred to the Committee on Education, and ordered to be published. It is as follows:

To the General Conference of the M. E. Church South, assembled at Memphis:

REVEREND AND DEAR BRETHREN: We the trustees of East Alabama Male College, being persuaded that the time has fully arrived for the church to establish a biblical institute for the proper training of candidates for the ministry, and seeing that the question is agitating the church in many sections, and believing that your body will devise measures to found such an institution, respectfully beg leave to suggest that you establish it in connection with this college.

We feel satisfied that there is not a more eligible location for such a school in the entire South. There is, perhaps, not a more healthy spot on the globe than Auburn, and the community is Methodist and highly refined, enterprising and intelligent. The college is easy of access, being immediately on the leading thoroughfare from the Northeast to the Southwest, and by means of railroads, now constructing, will very soon be in connection by short lines with all the northern and northwestern portions of our territory. It is at present in successful operation, with a well appointed and efficient faculty, and offers to the public all the advantages and inducements of a first class institution.

The building—erected before the war at a cost of nearly \$80,000—is, perhaps, the largest and best arranged of any belonging to our church. It was planned to accommodate over seven hundred students, with all necessary lecture rooms, public halls, etc. We tender to the church the free use of the libraries of the college, and of such halls and rooms as may be necessary for a biblical institute for the entire connection. We pray your earnest and patient consideration of the suggestion and offer we make, and if in your wisdom you should determine to establish the school in connection with our college, we pledge ourselves to do what we can to promote its interests and make it a blessing to the church.

MS. ANDREWS, Pres't,
JOSEPH B. COTTRELL,
W. A. MCCARTHY,
WILLIAM SHAPARD,
In behalf of the Trustees.

AUBURN, ALA., April 28, 1870.

Mobile Conference.—A. H. Mitchell presented memorial asking a change in the order of business in the Quarterly Conference. Referred to the Committee on Revision.

Mississippi Conference.—H. H. Montgomery and T. Reed offered a resolution asking that the clause "Except such as involves ministerial character and relations," be stricken out of page 45 of the Discipline.

Holston Conference.—J. M. MeTeer presented a memorial from Newbern circuit, on boundaries. Referred to the Committee on Boundaries.

Kentucky Conference.—H. P. Walker presented a memorial from Dr. Wellbourne on boundaries. Referred to the Committee on Boundaries.

A. H. Redford presented a memorial from that Conference on the subject of Logan Female College. Referred to Committee on Education.

East Texas Conference.—L. P. Lively presented a memorial from that Conference respecting the ordinations of local preachers. Read and referred to the Committee on Revision.

Trinity Conference.—R. Lane and others offered a resolution asking

that fifteen be substituted for thirty, in part II, section 5, paragraph 1, of the Discipline. Referred to the Committee on Revision.

West Texas Conference.—R. H. Belvin presented a memorial asking for a change of boundary. Referred to Committee on Boundaries.

Pacific Conference.—O. Fisher presented a memorial from Vesalia district, on religious literature and a book depository on the Pacific coast. Referred to the Committee on Books and Periodicals.

Also one on the subject of dancing, which was referred to the Committee on Revision.

On motion of A. Hunter the vote appointing a special committee of nine was reconsidered, and the memorial of the Virginia Conference was referred to the Committee on Revision.

Judge Byrd then called for the memorial of J. E. Edwards, pending the discussion of which the Conference yesterday adjourned.

C. K. Marshall arose and said he desired to make a few remarks; that the Conference was aware that the Mississippi Conference had sent in no memorial, but that he felt inclined to call the attention of the Conference to a subject which he had been advocating for sixteen years past—a general church paper, which ought to be established. Then, perhaps, he thought that they were not prepared for it—perhaps they were not even now, but he begged that the Committee on Books and Periodicals would look to this and take effective measures with reference to it. There was yet another necessity which presented itself forcibly to the church, and that is an eclectic church magazine, adapted to the wants of the clergy and scientific men of the church. This he thought was greatly needed. If the church would take it in hand it would be well; but if not he himself would gather about him suitable men, and they would publish it on their own responsibility.

On motion of J. E. Edwards, a memorial which had been referred to the Committee on Revision was transferred to the Committee on Sunday Schools.

W. W. Bennett then offered the following resolution, which was read:

Resolved, That whenever a change shall be proposed in any part of our Discipline, the section, chapter or paragraph in which the change is proposed shall be printed in the Daily Advocate, with the change proposed in said section, chapter or paragraph.

W. W. BENNETT,
P. A. PETERSON.

He said he offered the resolution for the reason that frequently changes were proposed in the Discipline, the nature of which it was not possible for the Conference to understand.

The resolution was adopted.

Dr. Bond offered a resolution fixing May 23 as the day of adjournment, which was read and laid on the table until Monday.

C. I. Vandeventer and B. H. Spencer offered a resolution on the publication of a hymn and tune book, which was referred to the Committee on Books and Periodicals.

On motion of Dr. Hamilton the report of the Committee on the Re-arrangement of the Discipline, presented by Bishop McTear, was referred to the Committee on Revision.

There was an extended discussion on the difficulty of hearing the speakers, resulting in the laying on the table of a motion by Judge Mack to appoint a committee of three to procure another room with better acoustic facilities.

On motion of W. W. Bennett the resolution of J. E. Edwards and L. C. Garland was amended, and on motion of W. M. Rush was referred to the Committee on Itinerary.

The amendment instructed the committee to inquire into the expediency of the proposed changes in the Discipline.

J. E. Evans offered a resolution asking that after the word "except," page 45 of the Discipline, second line from the bottom, the words "on the trial of ministers" be inserted instead of "such as involves ministerial character." He asked that he be allowed to state the reasons which called for this change. He said that the Conference would perceive that this had reference to the rights of laymen in the actions of Annual Conferences. As it now stands these rights are restricted. Here are eighteen questions in which laymen are not allowed to participate at all, and cannot therefore feel that interest which they should take in the action of that body of which they were duly elected members. It is their vote which governs the action of Quarterly Conferences. Until they act a recommendation to deacons' orders cannot be acted upon by us. In Annual Conferences they are not allowed to act upon those things which were originally theirs to govern. In the change proposed I expect the trial of ministers in deference to the feelings of others, expressed at the last General Conference, and which, perhaps, may not now be changed. For myself I would as willingly re-

pose my character in the hands of these, my brethren of the laity, who represent the several Conferences in our connection, as I would trust it to you. I move to refer this to the Committee on Revision.

Joseph B. Cottrell moved to strike out the exception left by Dr. Evans in his resolution, but seeing that it was about to give rise to discussion he was requested to withdraw his amendment, and the original motion of Dr. Evans prevailed.

On motion of P. A. Peterson the Committee on Books and Periodicals was instructed to inquire into the expediency of publishing a monthly review and magazine.

H. H. Montgomery submitted the plan of finance adopted by the Mississippi Conference, which was referred to the Committee on Finance.

J. C. Keener submitted a communication from the editor of the German Evangelical Apologist. Referred to the Committee on Books and Periodicals.

L. C. Garland asked and obtained leave of absence on account of pressing professional engagements until next Friday.

L. M. Lee offered a resolution limiting the time for the reception of any papers referring to change of Discipline to Thursday, May 12, pending the discussion of which, the hour of adjournment having arrived, Conference adjourned with the benediction by the Bishop.

FIFTH DAY.

MONDAY, May 9, 1870.

The Conference met at the stated hour.

Bishop Wightman being absent, Bishop Andrew took the chair.

Religious services were conducted by W. J. Parks.

The minutes of the last meeting were read and approved.

Bishop Andrew made the following remarks:

"I am here among you once more. I feared I should not be here. In fact, I had made up my mind not to attend, but my wife urged me to come, and my friend, Dr. Mitchell, promised to take charge of me; and now I am here, and feel that I am blessed of God to be permitted to shake hands with my fellow-laborers, and am glad to meet you as Methodist preachers. I thank you for the kindness with which you have greeted me, and for the warm welcome with which I have been received. I am here, unfit for work, and good for nothing, but I take pleasure in the business of the Conference, and listening to your debates when they don't become too wordy. This is an important Conference, an important crisis in the history of our church. The last General Conference introduced changes in our economy, one of which was lay delegation; and I am glad to see it has been so well received, and that so many laymen are before me. I would say that your relations are important, as laymen to ministers, and it is very important that there be no jarring between you. As laymen you should feel that you are just as much interested in the action of the Conference as the preachers. Watch and be careful. We are in more danger of erring with our tongue than in any other way. I know humanity is in danger of erring always, but the last General Conference inaugurated a system of change which should be allowed to remain. Don't be impatient to change. The last changes were very good. Don't touch that old book too heavily. It has been a precious book to me. I was born in this church and I am attached to her old Discipline. Now a brother comes to Conference and he thinks, why should I come if I can't have some new scheme to bring up? This is wrong. Let that Discipline remain a while longer. Let the old machine run four years more at any rate, and then if necessary knock it to pieces. I need hardly refer to the relations between us. I think you love me; I know I love you, and I ask you to pray for me. I have had some pretty hard sniffling in my life, but I think I have done the best I could. I have borne much personal abuse from the other side of the line. Nearly every week I would see something in their papers against Bishop Andrew. My old friend Charles Elliott used to attack me continually. At length I wrote to him and told him that I was getting tired of it, and didn't want to pay postage on a paper that was continually abusing me, and requested him to stop it, and then there was a cessation, and I had a little rest. "Four years ago you were kind enough to give me permission to retire from active service. It was not long before I couldn't preach standing. My lower limbs began to get weak, and I had to sit down. I have been trying to do good in Sunday schools, and in some other ways, but I couldn't do much.

"Now, let me enjoin you to be in unity; love the church; love Methodism; frown on everything that tends to alienate you from the church. I have been grieved to see a tendency to go off to other churches. Now, I am no bigot, but, nevertheless, I have never seen a man or

woman that joined another church in order to get more religion. God bless your souls! I have yet the first one to meet who could not be helped to heaven in this church. Train your children to Methodism. Learn them to say 'Our church!' I have seen with pain a disposition to glorify one another through the papers. Men of intelligence have come to me and asked me why this exists to such an extent among us. Every old-field school teacher is a professor, and straightway the school he takes charge of is the first school in the country. 'Now twelve months cures the people of all such. People don't esteem it praise; it is got so cheap. Brethren, be modest. There are very few of us great men, and those will be found out soon enough; and when I hear of preachers making a big show in the pulpit and going out after such things, I am afraid of them. Brethren, despise such. Aim not at glorifying yourselves, but glorify God. I have talked long enough and I will stop."

Bishop Marvin took the chair. Leave of absence was asked for J. C. Slocum, on account of pressing business.

Dr. Selon asked and obtained leave of absence for N. H. Lee, on account of family affliction.

A. R. Boone, lay delegate from Memphis Conference; J. M. Mask, reserve lay delegate from Memphis Conference, in place of L. C. Garland; S. T. Scott, reserve lay delegate from Louisville Conference, in place of J. C. Walker; J. P. Ralls, lay delegate from Montgomery Conference; J. L. De Yampert, lay delegate from Little Rock Conference; W. H. Foster, lay delegate from Louisiana Conference, appeared and took their seats.

Reports from standing and special committees were called for, and there being none, petitions and memorials were called for in the order of the Conferences.

Virginia Conference.—L. M. Lee presented a memorial asking for the abolition of the office of presiding elder, and for the admission of lay delegates to the Bishops' Council. Dr. Lee stated that he had promised to present this memorial, to advocate it, and vote for it, and that he was ready to that extent to act upon it. He added that it was presented by respectable gentlemen who did not design merely to get rid of him. Referred to the Committee on Itinerary.

North Carolina Conference.—Dr. B. Craven presented a petition from members of the church in Charlotte, North Carolina, praying to be transferred to the North Carolina Conference. Referred to the Committee on Boundaries.

South Georgia Conference.—R. V. Lovett and others presented a memorial on the relation of local preachers. Referred to the Committee on Revision.

J. S. Key, on the veto power of Bishops. Referred to the Committee on Episcopacy.

Mobile Conference.—A. H. Mitchell offered a resolution on the organization of Sunday schools, and appointment of superintendents. Referred to the Committee on Revision.

Dr. J. Hamilton, one on church property of the colored people in Mobile. Referred to the Committee on Colored People.

Louisiana Conf.—J. C. Keener offered resolutions on the German hymn book and Evangelical Apologist. Referred to the Committee on Books and Periodicals.

Mississippi Conference.—R. Abbey offered a resolution on church architecture. Referred to the Committee on Books and Periodicals.

Another on the propriety of establishing a mission in Mexico. Referred to Committee on Missions.

Memphis Conference.—T. L. Boswell presented a petition of that Conference asking permission to divide, if found expedient within four years. Referred to the Committee on Boundaries.

Holston Conference.—J. M. MeTeer offered a resolution on the boundaries of that Conference. Referred to the Committee on Boundaries.

Pacific Conference.—E. K. Miller presented a petition asking for the establishment of a book depository in San Francisco. Referred to Committee on Books and Periodicals.

Another on catechisms. Referred to the Committee on Revision.

The following resolutions were then presented, read and approved:

Resolved, That the Episcopal Committee be and they are hereby authorized to select and nominate one of our Bishops, or some other competent persons to write the life of our late venerable Bishop Soule.

F. E. PITTS,
J. E. EVANS.

Resolved, That the Committee on Revision be directed to inquire into the propriety of so changing the language of the Discipline, where suspension is mentioned as a punishment, as to make the time of suspension depend on the repentance and reformation of the suspended party.

WHITEFOORD SMITH,
W. P. MANZON.

The Rev. Dr. R. S. Moran, of

North Carolina, presented the following resolution:

Resolved, That section 5, chapter 2, page 61 of the Discipline be changed as follows: After the word "care," in the fifth line from the top of the page, add the following: "Or to any other appropriate work in which he may be useful as a minister of the gospel among us."

Referred to the Committee on Revision.

Dr. J. B. McFerrin presented memorials from S. T. Moorman; the first referring to presiding elders' districts—referred to the Committee on Itinerancy; the second on missions—referred to the Committee on Missions.

There was considerable discussion on the difficulty of hearing.

Dr. Green said that it was impossible to be heard in that house.

Dr. Marshall said that that house was the sepulcher of the human voice.

On motion of Truett Polk, the following resolution was adopted: "That when this Conference adjourns, it adjourn to meet at the Second Street Methodist Episcopal Church South, in this city."

On motion of Dr. L. M. Lee the question on which the Conference adjourned on Saturday was taken up.

A. A. Gilbert moved to amend the first resolution by adding, "unless by a vote of three-fourths of Conference." This motion prevailed.

H. A. C. Walker moved to amend by substituting 14 for 16.

Judge Lester said that he was for the resolution on the ground that it would greatly facilitate business. He was sorry that Dr. Lee accepted the amendment setting the time on Saturday instead of Thursday. He was for putting down the brakes and letting the committees go to work.

"The idea is a good one, to get the business up and get at it like business men. Every legislative body protects itself in that way against a flood of resolutions. It is in my line—it means business."

Dr. R. S. Moran, of North Carolina, said: "I think Monday is as short a time as we ought to have. I wish to examine this report on the rearrangement of the Discipline, and we cannot act wisely upon it in so short a time."

J. S. Key thought there would be plenty of time for that.

Dr. Moran asked if he had experienced as to how long a time it would take to read that report? He had, and thought there would not be time to do it under the limitations proposed.

Dr. Lee thought that anything of vital importance which should elude to be unfinished, could get a three-fourths vote, and that if it could not, that in itself was evidence against it.

Dr. Green said: "I think that moving rapidly does nothing but complicate the business. None of these restrictions do anything but mischief. If you carry that, we might as well go home next Saturday, since after that we can't change a law or a word. We come here not as a divided set of politicians; we are here as Methodist ministers and men. I think we had better go on and do what ought to be done, and not pass these fettering laws."

Dr. Winfield said: "As the matter now stands, I think I see daylight ahead. The West won't trouble you any more. We'll send you home in time, Dr. Bond."

Mr. Powell said: "It is with diffidence that I arise to address this body, but I desire to add a word of exhortation to these practical remarks of Dr. Green. I have observed these laws in other bodies, and have never found them productive of any good. It does seem to me that the gentlemen who have come here should bestow that kind of deliberation which matters of such importance demand. I hope the session will be a short one; but these matters are to be considered, and we should take time to do it. Let the session be short or long. We will proceed more rapidly without these restricting laws. I say it with deference to Dr. Lee. I hope you will not pass the resolution."

Paul Whitehead moved to amend by omitting the words "receive or."

Dr. Hamilton thought this would defeat the end of the motion.

Dr. Moran moved to lay the amendment on the table. This motion did not prevail.

W. J. Parks moved the previous question. The motion was sustained, and the amendment lost.

The resolutions were then adopted, as follows, to wit:

Resolved, That from and after the fourteenth day of May the General Conference will not either receive or refer to a committee any proposition intended to effect a change in the language or laws of the Discipline, unless by a vote of three-fourths of the Conference.

Resolved, That the Committee on Revision or any other committee be

and they hereby are, instructed, on the completion of any report changing the language or laws of the Discipline, to report the same forthwith to the General Conference, in order that it may be printed in the *Daily Advocate* for the consideration of the members of this body.

LEROY M. LEE,
JOS. H. COTTRELL.

W. A. McCarty was put in the place of O. R. Blue on the Committee on Episcopacy, and J. P. Ralls in place of J. Matthews on the Committee on Sunday Schools, from the Montgomery delegation.

Dr. Bond called for the resolution brought in by himself and J. E. Wiley, laid on the table on Saturday.

A motion of A. H. Mitchell to lay on the table was lost.

Dr. Watkins said: "I think it somewhat fortunate that the last General Conference did not determine for us at what hour we should adjourn, and yet they were probably better informed as to the necessary business which we would have to take up. That which is now attempted will necessarily cause delay. I like the remarks of Dr. Green. We meet to consult—to promote the interests of this great body which we represent. I hope the amendment will prevail."

Dr. Bond rose and said: "As I have great anxiety to facilitate the business of the house, I was disposed to keep silence, wishing to express this desire by example as well as precept. But as every resolution has to be discussed and rediscussed, amended and commended, and pass through all the various phases of legislation, I am compelled to speak upon this resolution. This is a differently constituted body from all others. Here are laymen—men of business, and some of very large business relations, in which others are involved. Some of them lose more than a hundred dollars a day by their absence. They come here making sacrifices, which they are willing to do for the interest of the church, but not to spend unnecessary time. They come thinking that perhaps they can do no better than to help the business through. Now we have wasted a week doing nothing. I am on one committee and have nothing to do. We have plenty of time. It is just this habit of putting off everything that delays the business. We wait two weeks for committees to report, but they take their own time. We want business attended to, and if they know they have to do it, in course of time we will get all our business done. As it is, we might sit here as long as the Council of Trent, and do nothing at last. If we determine to get through our business we can do it; and if I accept any amendment it will be one to shorten the time in question."

M. S. Andrews moved the thirtieth of May as a substitute, and said:

"We think it is necessary to make this report on the rearrangement of the Discipline. This requires time, and we have lost no time. Dr. Bond speaks of pecuniary interest. I hope none of us will be influenced by motives of this sort. District meetings and other and similar questions have to come up here, and it will take time to discuss these matters. I believe Dr. Pierce said at the last General Conference that the average time of sessions, in all that he had attended, was one month, and I do not think we can get through any sooner."

Dr. Bond replied: "I don't want to be misunderstood in this matter. We are now making an experiment with laymen. If they find they cannot attend without great losses, they will not attend; they will stay at home, and you will have men sent here who have money enough to retire from business, and the end of lay delegation will be defeated. We want men who are engaged actively in business, who are managing a large business, that we might get the benefit of their advice. To get them here it must be by showing them that the business can be got through in such time as is absolutely necessary to its transaction. It is a very easy matter to pool, pool, these things in a speech. It is a very pretty sentiment not to take pecuniary interest into account; but I tell you it must be considered. I hope I will be understood in this matter. It is very evident that that Committee on Revision is overburdened with work. Divide that work; add others to the committee. Why should they not be strengthened by others who are idle? How has reported a Bishop to say at the last General Conference that one month was the average time of its sessions. Do you suppose that every General Conference is alike? It seems as though this is a traditional notion from which they cannot deviate."

Dr. Winfield here moved the previous question, which was sustained, and the substitute was lost.

The amendment was then put and lost.

The original resolution was then carried by a vote of 123. It is as follows:

WHEREAS, By diligence and promptness in attention to its business this

Conference can finish its work within two weeks; AND WHEREAS, experienced teachers that in all similar assemblies expedition is attained by fixing a day of adjournment; therefore,

Resolved, That this General Conference will adjourn *sine die* on Monday, May 23.

THOS. E. BOND,
E. E. WILEY.

The following resolutions were then offered, read and adopted, to wit:

Resolved, That the Committee on Itinerancy be requested to report to this Conference its action in regard to the resolution of Drs. Edwards and Garland, on the subject of the removal of the restrictions of the pastoral term, so that the subject involved be the order of the day at ten A. M., Friday next.

J. H. COTTRELL,
A. H. POWELL.

Resolved, That the Committee on Sunday Schools are hereby instructed to inquire into the expediency, and report as early as possible, upon that part of the Bishops' address in which they recommend improvements in the interests of Sunday schools, and report a plan: 1. For a universal system of lessons. 2. A monthly periodical in the interests of teachers. 3. The publication of the *Sunday School Visitor* once a week—all of which to be published at our Publishing House, and under the supervision of an editor to be appointed by this Conference.

JAS. WICKERSHAM,
GEO. N. LESTER.

Resolved, That a committee of three be appointed to consider the practicability of obtaining a collection of church music, containing a variety of suitable tunes for all the meters in our hymn book, and adapted to the wants of our congregations in this respect.

CHAS. F. HARVEY.

Dr. Bondell was suggested as a proper person to be consulted on this subject.

Dr. Myers stated that he had in his possession some music prepared by Dr. Bondell, which he would submit to the committee, and would be glad for all to look at them who were acquainted with music.

P. A. Peterson and P. Whitehead offered a resolution on presiding elders reporting to Annual Conferences educational statistics. Referred to Committee on Education.

The following resolution was offered, read, and on motion of Thos. Reed, was laid on the table:

Resolved, That the Committee on Itinerancy be instructed to inquire into the expediency of so arranging the presiding elders' districts as to reduce the number of presiding elders to one-half of the present number in each Annual Conference, or to provide for semi-annual rounds of presiding elders in their respective districts.

LEVI D. TRAYNOR,
JAS. HENDRICKSON,
S. J. BRADLEY,
W. P. CONWAY,
T. J. MAGRUDER,
ASA SNYDER.

S. T. Scott, reserve delegate from the Louisville Conference, was put on the Committee on Missions in place of W. B. Machen, and on the Committee on Sunday Schools in place of J. C. Walker.

A. R. Winfield, of Little Rock Conference, was put on the Committee on Revision in place of A. Hunter, and A. Hunter on Committee on Boundaries in place of A. R. Winfield.

The following resolution was read and not adopted:

Resolved, That the Committee on Education be instructed to examine the subject of catechetical instruction upon the doctrines and government of our church, and report what action, if any, should be had by this Conference on that subject.

B. CLAVEN,
W. BARRINGER.

F. E. Pitts and six others of the Tennessee delegation presented a communication opposing the division of said Conference, which was read and referred to the Committee on Boundaries.

The secretary presented copies of his Commentary and Questions on Matthew and Mark, and bound volumes of the catechisms of the church, and *Sunday School Visitor*, which were referred to Committee on Sunday Schools.

The hour of adjournment having arrived, Conference adjourned with doxology, and benediction by the Bishop.

SIXTH DAY.
TUESDAY, May 10, 1870.

The Conference met in the Second Street Methodist church at the stated hour.

Bishop Marvin in the chair. Religious service was conducted by Dr. J. B. McFerrin.

The minutes of the last meeting were read and approved.

The Bishop then announced the following Committee on Church Music: C. F. Harvey, D'Arcy Paul and T. O. Summers.

Bishop Doggett took the chair. The upper side of the fifth window was made the bar of the house.

John Matthews, clerical delegate from the Montgomery Conference, appeared and took his seat. W. L. Lipscomb, lay delegate from the

Mobile Conference, appeared and took his seat.

Reports of committees were then called for.

J. Hamilton, chairman of the Committee on Revision, presented Report No. 1 of that committee, which was read and laid on the table under the rule.

J. E. Evans, chairman of the Committee on Religious Interests of the Colored People, presented the report of that committee, which was read, laid on the table for the present, and ordered to be published in the *Daily Christian Advocate*. It is as follows:

REPORT ON RELIGIOUS INTERESTS OF THE COLORED PEOPLE.

The Committee on the Religious Interests of the Colored People beg leave to submit their report.

We have had under consideration that part of the Bishops' address and all other papers referred to your committee; and, after mature deliberation, we submit the following resolutions for the adoption of the Conference:

Resolved, That the action of the last General Conference in reference to an ultimate organization of the colored people of the Methodist Episcopal Church South into a separate church is complete, and therefore no additional legislation is necessary to the end intended.

Resolved, That we fully approve the purpose of the Bishops, as expressed in their address to this Conference, at an early day to call a General Conference for our colored members, to organize them into a separate church, as provided in the Discipline.

Resolved, That we respectfully suggest to the Bishops to take measures to organize other Annual Conferences, wherever it may be proper to do so, that they may be represented in the contemplated General Conference; provided the time of holding of said General Conference shall not be delayed thereby.

Resolved, That we appreciate the services rendered in this cause by Brother Thomas Taylor; and we do hereby commend him to the Bishops, should his services be needed in the further prosecution and consummation of this organization.

Resolved, That all trustees now holding church property for the use of our colored membership be instructed to make titles to said property to the properly constituted trustees of the colored Methodist Episcopal Church South, according to the Discipline of said church, when organized.

WHEREAS, Applications have been made by certain parties for the transfer of the title to property belonging to the Methodist Episcopal Church South, to congregations who have withdrawn from our communion; and whereas, we regard the property conveyed to our trustees for the use of the colored congregations of our church a sacred trust to be held for them; therefore,

Resolved, That it is the settled conviction of this body that the Methodist Episcopal Church South has neither the legal nor moral right to transfer any property thus held to those who have withdrawn from our church.

Resolved, That the disinterested service rendered our colored people in a time of need by Rev. Samuel Watson, in the publication of the *Christian Index*, deserves and receives the warmest commendation of this Conference. And we do hereby recommend that paper to our colored members as worthy of their patronage.

Resolved, That we commend the colored Methodist Episcopal Church South, when formed, to the warmest sympathies, earnest prayers and support of the people of the South. Respectfully submitted.

J. E. EVANS, Chairman.

Petitions, memorials and appeals being called for, the following were presented:

Virginia Conference.—Dr. Leo presented a memorial of the Virginia Conference Sunday school society on the relation of baptized children to the church. Referred to the Committee on Sunday Schools.

South Carolina Conference.—Dr. A. M. Shipp presented a memorial from S. H. Browne on the subject of war, which was referred to the Committee on the Pastoral Address.

Montgomery Conference.—M. S. Andrews presented a memorial from that Conference on the relation of local preachers, etc., which was read and referred to the Committee on Revision.

J. Matthews presented another from the same Conference on the organization of Sunday schools, which was read and referred to the Committee on Revision.

Mobile Conference.—A. H. Mitchell presented a petition from that Conference on the insertion of a rule forbidding worldly amusements. Referred to the Committee on Revision.

Dr. J. Hamilton presented a memorial from the Columbus district on a Methodist university. Referred to the Committee on Education.

Holston Conference.—F. W. Earnest presented a memorial on local

preachers. Referred to the Committee on Revision.

Trinity Conference.—R. Lane presented a memorial from the Quarterly Conference of Canton and Garden Valley circuit on boundaries. Referred to the Committee on Boundaries.

The following resolutions were then offered, read and adopted:

Resolved, That the Committee on Revision be instructed to inquire into the expediency of so altering the Discipline as to make chairman of boards of trustees of church property members of Quarterly Conference.

W. H. ROBERTS,
B. CLAVEN.

Resolved, That the Committee on Revision be instructed to inquire into the expediency of inserting into the Discipline as a part of the business of the Quarterly Conference the following question: Has the sacrament of the Lord's Supper been regularly administered?

W. A. MCCARTY,
M. S. ANDREWS,
W. SHAPARD.

Resolved, That the Committee on Revision be instructed to inquire into the expediency of so amending the Discipline (rearrangement, page 31, section 5, par. 1, 2.) part 2, section 6, par. 4, page 249, that all after the word "finance" in the sentence at the top of the page shall be stricken out, and the following words inserted, to wit: "To consist of one clerical and one lay member of the Conference for each presiding elder's district. The clerical members shall be appointed by the president of the Conference (unless otherwise ordered,) at the close of its annual session, to hold their office until the close of the next ensuing Annual Conference session; and the lay members shall be appointed on the first day of the session during which they are to act."

R. S. MORAN,
N. F. REID.

Resolved, That the Committee on Revision be instructed to inquire into the expediency of amending the Discipline, chapter 2, page 67, so as to strike out the whole of the ninth section.

R. S. MORAN,
N. F. REID.

Resolved, That the Committee on Revision be and they are hereby instructed to inquire into the necessity and propriety of framing a specific rule against the manufacture or sale of spirituous liquors by members of our own church, except for chemical or mechanical purposes.

T. L. BOSWELL,
J. M. MASK.

T. L. Boswell presented another resolution calling upon the Bishops to define the clause in the Discipline referring to the use of spirituous liquors.

Bishop Paine said that this called for the official declaration of the Bishops on the meaning of a general rule, that it was a bad example, and without authority; there are only two cases in which a Bishop is called upon to do this. One is in an appeal from the Quarterly Conference, and the other when it comes up in a pending question in an Annual Conference; and these do not cover the case in question. He thought they might find it inconvenient to call upon the Bishops to do this, while the judiciary of the church was in session.

Dr. J. E. Evans thought that it was a principle in law, that the explanation of law makes it law.

Judge Morgan said that it occurred to him as a question having reference to civil law, which did not allow the legislature to act in the combined capacity of legislature and judiciary. If the Conference occupies the same position to our Bishops as the legislature to the judiciary, then they are the proper persons to do this. But if the Conference assumes the additional power of the judiciary, then it may be brought before them. But that would be an anomalous law.

Dr. Marshall said that he regretted that Dr. Boswell did not make a broader appeal to the Conference on that subject. "If Dr. Boswell had voted to expunge that portion of the rule, except in case of necessity, I would have liked it better. I don't believe in going to a doctor for his prescription to get a drink. A man of God will drink a great deal of cold water first. If I were very sick I would rather die than be fed on whisky. The habit grows. There will be the never-ending thirst for more, and the old sleeping lion will wake up and roar for one drink in the morning, another at noon, and another before retiring to rest; and before you know it you will read 'dust to dust' and 'ashes to ashes' over that man, who died a drunkard under cover of the Methodist Discipline."

After some further discussion the resolution was put to the Conference and lost.

The following resolutions were offered, read and adopted:

Resolved, That the Committee on Books and Periodicals be requested to consider the propriety and importance of publishing a weekly newspaper, for general circulation among all our people, upon the plan

heretofore presented to the General Conference.

C. K. MARSHALL,
A. M. SHIPP.

WHEREAS, The sufferings and necessities of orphans have in all ages claimed the sympathy and tender care of the church of Christ; and whereas, the number of orphans in our land and within the boundaries of our church appeals with touching emphasis to the enlightened charity of all good and Christian people.

WHEREAS, We deem the ordinary method of collecting great numbers of orphans into massive, solitary, gloomy and expensive buildings, unwise and contrary to the best interests of the orphans and of society, inasmuch as such children are unavoidably subjected to an unnatural and often most painful course of life, destroying the cheerfulness of childhood, and making the just and proper formation of character upon a high standard almost impossible; therefore,

Resolved, That we regard it as desirable, in undertaking a general system for the accomplishment of the work of befriending and educating orphans, we should consider the propriety of adopting a system applicable to the boundaries of each Annual Conference, by which, under the authority and management of such organizations, they may be boarded out in families and supported and educated and trained up in home and family relations, and apprenticed to learn appropriate trades, and thus rendered happy and useful.

C. K. MARSHALL,
A. W. WILSON.

Dr. Pierce offered a resolution asking a change in the Discipline, chapter 2, answer to question 5, referring to the passage of ministerial character, which was read and laid over under the rule.

He said: "My only object, at this time of life, is to cut off all incoming, secret, demoralizing elements from our ministry; to see to it that those whom we send out to our Bishops, to be appointed to fields of labor, are fit to go. They have been sent when it is known that they have been so deficient in the performance of their duty as to have rendered it surprising to me that their characters have been passed when their usual history is shameful neglect."

R. Lane and other delegates of Trinity Conference offered a resolution on boundaries, which was referred to the Committee on Boundaries.

On motion of W. P. Harrison and J. Boring a special committee of five was ordered to consider the expediency of changing certain expressions in the ritual. The resolution is as follows:

Resolved, That a special committee of five be appointed on the ritual, who shall be instructed to inquire into the expediency of changing the phraseology in the office of the ministration of baptism to infants, so that the exhortations on page 142 of the Discipline may read as follows:

"Dearly beloved, for as much as all men are conceived and born in sin, and that our Saviour Christ saith, 'Except a man be born of water and of the Spirit he cannot enter into the kingdom of God.' I beseech you to call upon God the Father, through our Lord Jesus Christ, that of his bounteous mercy he will grant to this child that which by nature he cannot have; that he, being baptized with water, may also be baptized with the Holy Ghost, and received into Christ's holy church, and be made a lively member of the same."

The following resolutions were then offered, read and adopted:

Resolved, That the Committee on Revision be requested to inquire into the propriety of so amending the law of the Discipline as to make a member holding a certificate of membership amenable for his conduct to the particular church granting said certificate, and giving said church authority to discipline said member as though he should then be in regular connection with said church.

W. SHAPARD,
JOS. H. COTTRELL.

Resolved, That the venerable and beloved Dr. Lovick Pierce, one of the few men of God who connect us personally and directly with the fathers of American Methodism, be and hereby is affectionately invited and requested to preach a sermon to the General Conference in session at such time as may be most suitable to his convenience.

R. J. MORGAN,
W. C. JOHNSON,
J. C. KENNEL.

Resolved, That the Committee on Revision be requested to inquire into the expediency of so amending Discipline, chapter 2, section 4, page 57, as after the words, "At the fourth Quarterly Meeting let the report of trustees be called for," to add these words, "And let the president of the Conference ask, 'Are there any vacancies to be filled or any changes to be made in the board of trustees?'"

A. G. HAYGOOD,
T. M. MERRIWETHER.

Resolved, That the Committee on Revision be requested to inquire into the expediency of so amending Discipline, chapter 2, section 4, page 57, as after the words, "At the fourth Quarterly Meeting let the report of trustees be called for," to add these words, "And let the president of the Conference ask, 'Are there any vacancies to be filled or any changes to be made in the board of trustees?'"

(Continued on fourth page.)

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, MAY 21, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—Rev. J. C. KEENER, 112 Camp Street, New Orleans, La.

AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

THE GENERAL CONFERENCE.

To keep up with each day's proceedings is quite impossible and attend to anything else besides. Resolutions, memorials, and various suggested changes pour in like as a miller pours corn into the hopper. Still it need excite no fear in the churches; there will be few changes made. The laymen are highly conservative, and withal set much value upon time, at least while so far from home. The Conference begins already to be feverish. Judging from propositions made, the Committee on Boundaries will have its full share of both. There is a wide, almost an epidemic anxiety to change the shape and edges of Conference boundaries. The ruling opinion upon this matter, as we gather it, is to conform Conferences to State lines. The Committee on Finance have several nuts to crack which will consume all their time, and possibly all their patience, before a system will be discovered that can repair the tumble-down condition of the money affairs of our Methodism. The Committee on Itinerancy has its hands full discussing a resolution to take away all limitation on the pastorate, so as to reduce everything to the present status of the New Orleans exception. This is introduced by Rev. Dr. Edwards, of Virginia. Our Conference resolution on this subject has been only presented and referred. It will elicit a warm and protracted debate. The friends of the change maintain that it is more thoroughly itinerant than even the present law. The opponents think that it will be fatal to itinerancy, because no Bishop can be found with nerve enough to change men merely by the force of their own judgment, without the backing of a disciplinary law.

The Sabbath services were a rich treat to the Conference and the people of Memphis. We wished to be able to do what will one day be done at some future General Conference—i. e., hear three sermons at once, by acoustic tubes and other marvelous contrivances. But at the present rate of hearing, we heard only a Sunday school speech by Dr. A. L. P. Green—a model in its way—and a sermon by Dr. L. Pierce, of Georgia. The venerable man, whom we all saw at the last General Conference as for the last time, is here in unabated mental strength. Twenty-six years ago, when stationed at Mobile, we heard the doctor frequently. On last Sabbath he preached in the First Baptist church of this city, on

the second verse of the first chapter of the First Epistle of Peter: "Elect according to the foreknowledge of God the Father, through sanctification of the Spirit, unto obedience and sprinkling of the blood of Jesus Christ; grace unto you and peace be multiplied." Any one accustomed to preaching will see that the text called for deep, clear thought and exact expression. We were never better instructed by any sermon of sixty minutes' length. The voice of the preacher, in its highest and loudest tones, was a pure rostrum—every word rang in silvery clearness. Better than all, the anointing of the Spirit was upon the preacher. His soul was in communion with his Lord, and often in the midst of a sentence his prayer ascended audibly. We can give no idea of the effect of this in riveting the words of this venerable man of God.

A VISIT FROM THE M. E. CHURCH.

GENERAL CONFERENCE ROOM, May 11.

Yesterday was quite a day. Bishop H. N. McTear was presiding. He announced to the Conference that a communication had been received from Bishop James and the Rev. Dr. W. L. Harris, one of the missionary secretaries of the Methodist Episcopal Church. The letter was read, and a committee of three was appointed to wait on them and introduce them to the Conference. Bishop James is fresh-looking and remarkably well preserved in his person; of medium stature; about sixty-five years of age; his head round and his hair almost white, his features symmetrical and his countenance benevolent. He was elected to his position by the Southern presbytery in the General Conference in 1844. His appearance among us again must have brought forcibly to the minds of some of our older ministers the events of that stormy session. Dr. Harris is younger, and has the face and look of a man of strength, who has seen much service.

The address of Bishop James was felicitous; the attention of the Conference profound. As soon as he had concluded a few resolutions were read, a committee of nine was appointed, and the curtain fell. The distinguished commission had appeared as from a clear sky; it paused—a vision of peace, and then vanished. The action throughout is accurately described in the record of their address, etc., which appears in the ADVOCATE of this week.

On to-morrow, or shortly thereafter, the response to this commission will be presented in a report of the committee.

GENERAL CONFERENCE ROOM, May 14.

We are now under full blast. Reports of standing committees are on the anvil. On yesterday reports were made from the Committee on Revision, majority and minority, on the subject of removing the limit of the pastorate. Brilliant speeches were delivered on both sides. Dr. Edwards, of Virginia, and Rev. J. B. Cottrell, of Montgomery, on the side in favor of the removal, and the Rev. A. R. Winfield, of the Little Rock, and J. McCarty, of the Montgomery Conference, in opposition to the motion, were among the best. At the last General Conference, this measure passed, but at the earnest pleading of the minority it was reconsidered, and the four-years rule was established. Now a large proportion of the body seem to be opposed to all change, judging by the number who have spoken; though several distinguished laymen, such as Dr. Garland, of the Memphis Conference, and D'Arcy Paul, of the Virginia, are said to be in favor of it, and prepared to speak on the subject. The four-years rule secures, we think, all the ends of an unlimited pastoral term, and is not open to the hazard of so radical an experiment in our system of itinerancy. Woe be to the poor Bishop who has to stand, without a rule to back him, between the preacher and preacher's wife on the one side, and the congregation on the other—the upper and nether millstone. He would soon know what the apostle meant in the exclamation, "Who is sufficient for these things?" It would, we fear, end in irreconcilable differences between the mobile

and the immobile parts of the ministry; though on the other hand Mr. Wesley moved men, and so did Bishop Asbury, without the sustaining limit of the Discipline. Dr. Bond made a short speech, in which he said that there were but three systems for determining the field in which a minister should labor—the congregational, the Wesleyan and the Catholic. Take off the limit and there would be but two—the congregational and the Catholic. He overlooked the presbyterial, which is as distinct from the congregational as it is from ours. So far as the wilderness and availability of forces are concerned, it would be well if every Protestant church in Christendom was as well in hand as the Romanists. The objection to the Roman system does not lie against the promptness with which it can hurl its squadrons, but against the vows of her priests, her objective purposes of political power, engrossing wealth; and her semipagan doctrines. In some things the children of this world are wiser than the children of light, and the church can afford to learn from any quarter in mere matters of expediency. It is certain that the strength and drill of Rome require just such an organization as the itinerancy to meet it. The Jesuits are moved every three years, no matter what their success may be—probably to prevent their becoming identified with any people or society; but Methodist preachers from a motive far higher—for the purpose of diffusing among the people those gifts which characterize each man who is fashioned by the Holy Spirit.

THE NORTHERN COMMISSION.

On yesterday a nail was "driven in a sure place." The answer to the Northern commission of the Methodist Episcopal Church was reported, read, and adopted by a rising vote. It was unanimous. This action you have herewith. The whole of this transaction began, continued and was ended pleasantly. There was not a ripple in its flow. If months had been given in advance to its contemplation on each side, the adjustment and harmony of the whole action could not have been more complete. We were edified, and we hope that the distinguished visitors will be gratified with the straightforward, hearty way in which they were received, heard and answered.

REPORT OF THE COMMITTEE ON PROPOSALS OF UNION.

The committee to whom were referred the proposals of union made by the commission from the Methodist Episcopal Church, having carefully considered the subject, recommend the adoption of the following resolutions:

Resolved, 1. That gratefully recognizing that Providence which has hitherto guided us, multiplied us, strengthened our numbers and preserved our integrity as a church of Jesus Christ under the trying conditions both of war and peace, we earnestly desire to cultivate true Christian fellowship with every other branch of the Christian church, and especially with our brethren of the several branches of Methodism in this country and in Europe.

2. That the action of our Bishops in their last annual meeting in St. Louis, in response to the message from the Bishops of the Methodist Episcopal Church, has the full endorsement of this General Conference, and accurately defines our position in reference to any overtures which may proceed from that church, having in them an official and proper recognition of this body.

3. That the distinguished commission now present of the General Conference of the Methodist Episcopal Church, which met at Chicago in May, 1868, appointed by it for the specific purpose expressed in the following resolution, to wit:

(Continued from third page.)
Revision be requested to inquire into the expediency of so amending the Discipline, part 1, chapter 4, section 4, page 127, as after the word "church," insert this paragraph, "Persons holding certificates of dismission from our church shall be amenable to the authority of those charges in which they may reside."
A. G. HAYGOOD.
JESSE BORING.

A. G. Brown and D'Arcy Paul offered a resolution on the support of the ministry, which was read and referred to the Committee on Finance, and ordered to be published in the Daily Advocate. It is as follows:

Resolved, That the Committee on Finance be and they are hereby instructed to consider and report upon the expediency of amending section 6, part 2, page 248 of the Discipline, so that it shall read as follows:

SUPPORT OF THE MINISTRY.

1. Every minister who, by the rules and usages of the church, has a claim on its funds, shall, as far as practicable, have his claim estimated by those who are to pay it, or by an agent authorized to act for them.

2. The stewards of each circuit and station shall meet as early as practicable in the Conference year. The time and place of this meeting shall be fixed by the fourth Quarterly Conference of the preceding year; or, in default thereof, by the preacher in charge. They shall elect their own chairman, secretary and treasurer; provided that the offices of secretary and treasurer may be filled by the same person. It shall be the duty of the board thus organized—

1. To estimate the salary and traveling expenses of the preacher in charge, having due regard to what, in their godly judgment, may be deemed necessary to place him and his family (if a man of family) in such circumstances of comfort and protection as will enable him to serve the church to the full extent of the requirements of the Discipline.

2. To apportion this amount, with the amount necessary to meet the claim of the presiding elder, among the several societies or classes of the pastoral charge, according to their best judgment of the equitable proportion of each.

3. To report their action to the first Quarterly Conference of the charge, which shall approve, amend or recommit.

4. As soon as practicable each steward shall inform his society or class of the whole amount to be raised on the circuit or station, and what part of it each society or class is expected to raise. The societies or classes shall adopt their own method of raising this money.

5. The stewards shall co-operate with their respective societies or classes by giving their personal attention, as far as practicable, to the execution of their plans, by making quarterly, and, when practicable, monthly or weekly collections in each society or class; by instructing the membership in the scriptural duty of giving as the Lord hath prospered them; and by such other means as may be deemed wise and necessary.

II.—SUPPORT OF PRESIDING ELDERS.

1. The salary and traveling expenses of the presiding elder shall be estimated by the district stewards.

2. The district stewards shall apportion this amount among the pastoral charges of the district, assigning to each an equitable proportion of the whole amount.

3. The boards of stewards of the several charges shall add the sum thus assigned to them to the amount estimated for the salary and traveling expenses of the preachers in charge, which shall be collected as a joint fund, and in case of deficiency it shall be divided among the persons having claims thereon, *pro rata*; first deducting the amount allowed for traveling expenses.

4. They shall report their action to the District Conference, which shall approve, amend or recommit.

III.—SUPPORT OF THE BISHOPS.

1. The allowance of the Bishops for salary and traveling expenses shall be estimated by the Committee on Episcopacy of the General Conference; and they shall apportion the amount to the several Annual Conferences, according to their best judgment of their equitable proportions.

2. The Annual Conferences shall adopt their own plans for raising this money, which shall be called the Bishops' fund.

3. This fund shall be paid over to the Joint Board of Finance of the Annual Conference; and the chairman of the board shall pay over to the presiding Bishop one-half the amount, taking his receipt for the same; and shall remit the other half to the general book agent by draft or otherwise, together with the receipt of the Bishop, taking the receipt of the general book agent for the whole.

4. It shall be the duty of the general book agent to divide the money thus received among the Bishops

pro rata, and remit to them by draft or otherwise, at least quarterly.

5. The general book agent shall report to the General Conference, setting forth: 1. The whole amount estimated for the salary and traveling expenses of the Bishops, and how it is apportioned among the Annual Conferences. 2. The whole amount received on the several apportionments, and how it has been distributed. 3. The deficiency, if any; its causes and remedy.

ALEX. G. BROWN.
D'ARCY PAUL.

MEMPHIS, TENN., May 10, 1870.

D. R. McAnally and other delegates of St. Louis Conference offered a resolution requesting the Committee on Boundaries to inquire into the practicability of organizing a Conference in the State of Kansas, which was adopted.

J. O. Sweeney asked and obtained leave of absence on account of important business.

The following resolution was offered, read and adopted:

Resolved, That the Committee on Revision be and they are hereby respectfully requested to leave the catechism out of the Book of Discipline.

D. R. McANALLY.
M. N. PUGH.
TRUSTEN POLK.

On motion of W. H. Potter and A. G. Haygood the book editor stated the reasons that a music book for Sunday schools has not been published agreeably to the provision of the last General Conference. He stated that the book agent has taken steps for the publication of said work, but it has been delayed on account of the circumstances of the Publishing House.

J. Mathews, of the Montgomery Conference, was put on the Committee on Sunday Schools in place of J. P. Ralls, and T. J. McCoy, lay delegate from the Baltimore Conference, on the Committee on Missions in place of W. P. Conway.

F. E. Pitts and L. M. Lee offered a resolution on the arrangement of the work on circuits, so that one preacher would have no more than four churches under his charge.

F. E. Pitts said that his desire was to rescue, as far as possible, the availability of class meetings and love-feasts, and to give the preacher a chance to visit among the people.

Dr. Lee said that he had a design in according that resolution, and that it commended itself to the attention of the church. There was now no chance for week preaching, and they were compelled to restrict their labors to the Sabbath. If any two churches should decide that they could support a preacher they should have one. He was not acquainted with the condition of the church work in the West, but he could speak with confidence about the state of things in Virginia, and he had learned from personal intercourse with the ministers that they were losing ground. A great deal of the work is distributed over so large a territory that the preacher can only touch them in his rounds. "We have ceased to be aggressive; we are only barely holding on to our work."

Andrew Monroe rose and said: "I do not think it possible to adopt a resolution of uniform application, especially through our broad, extended West. The objection I have to that resolution is that it seems to me to be unconditional. We had better leave it to the Quarterly Conferences, and let them refer the matter to the Annual Conference. I do not think this General Conference can fix upon a rule that will apply to all. It is said the minister has not time to visit. Why is this? It is because when he gets through his sermons on Sunday he goes home and stays there. If he does not preach except on Sabbath day why can't he go out during the week and visit his people and pray with them. They say they can't leave their families; but, sir, if there was a marriage every night in the week, and \$5 or \$10 to be gained by going, you couldn't keep them at home. Let them preach on the Sabbath, hold class meetings in the week, and go out and attend to their pastoral work. I do not think it will work well in many cases."

Dr. Winfield rose and called for the venerable W. J. Parks to express his views on this question.

W. J. Parks said: "From principle and long observation I am opposed to that resolution. I want to accomplish the desired end, but that's not the way to do it. In our country they carve in and carve in upon the circuits until they have left out all the feeble ones. I am opposed to presiding elders proposing this and that change without consulting the people whether such and such a change is wanted. Our people surrender a plenty. Now I entered on my work fifty years ago. I have traveled a circuit of two hundred and thirty miles, preached thirty-five times in twenty-four days, held night meetings, and did more pastoral work than any man or two men do now, that run home on the railroads whenever they please. Whenever we cut down our circuits we do wrong. I have traveled on less than \$100 a year; I have preached on \$80 a year when I had a wife

and two children. It is my opinion that the best way to get work out of men is to give them plenty to do. A man can't half preach unless you keep him at it. He may preach a fine sermon, and it may be a useful one, but there will be a lack of that inspiration that gives power and life to our preaching. I had rather have our circuits enlarged. I want to use our young men as the old ones were used. I want them to hold class meetings and prayer meetings. Our brethren who go for this resolution have no idea how they cut off the poor sections. I want Methodism to keep its hold on the poor."

N. A. Cravens thought that the inauguration of district meetings was intended to cover all such cases, and that it would be better to leave it to them. He said: "There was a time, during the war, when it was with difficulty that a preacher could get about; but now I trust the war-cloud has passed away to return no more, and that the influence of paralysis is being removed, and that old men are being renewed in their youth."

After considerable discussion Judge Byrd moved to refer the resolution to the Committee on Itinerancy, and pending the question the Conference adjourned with the benediction by the Bishop.

SEVENTH DAY.

WEDNESDAY, May 11, 1870.

The Conference met at the stated hour. Bishop Doggett in the chair. Religious service was conducted by Dr. Mitchell. The minutes of the last meeting were read and approved.

Bishop McTear took the chair and called for reports from standing committees, which were presented as follows:

L. M. Lee, chairman of the Committee on Episcopacy, presented Reports Nos. 1, 2 and 3 of that committee, which were read and adopted, as follows:

REPORT OF COMMITTEE ON EPISCOPACY.

NO. 1.

The Committee on Episcopacy beg leave to offer the following tribute to the memory of Bishop Soule:

It is due to the eminent services rendered to the church by the late venerable and beloved Bishop Soule, that this General Conference acknowledge the justice of the encomium passed upon his life and labors by his colleagues in their episcopal address, and that we adopting their sentiments, express our admiration of his thorough devotion to God and to the best interests of mankind, throughout his long and honorable career in those offices of high responsibility he filled in the church, so faithfully and so usefully. We rejoice that we ever had so noble an example set before us of fidelity, purity, dignity and self-sacrificing devotion to duty and to principle—an example which we commend to all who would approve themselves to the church and to the world as faithful ministers of the gospel of Christ. We acknowledge with profound gratitude the good Providence which spared him so long to the church as its counselor and guide, and which crowned a ripe old age with such blessings of serene peace and holy triumph as characterized his closing days. So long as we live we will cherish his memory, and will hand it down to our sons and successors in the service of the church as a monument of the power of the gospel to develop the noblest elements of manhood, until in him they reached a sublimity that made him fit for the companionship of that illustrious company of Christian heroes of the olden time, of "whom the world was not worthy."

On this occasion and in this brief tribute we can only give these few salient points of his life.

Joshua Soule was born August 1, 1781. On the nineteenth of June, 1799, he was admitted into the traveling connection, and appointed to the Portland circuit in Maine. He was elected deacon in 1800; was elected Bishop at the General Conference of 1820; declined to be consecrated at that time, but was re-elected and ordained in 1824; and died in triumph, March 6, 1867.

But how much actual service and fruitful labor was crowded into the interval between these extreme dates must be left to his biographer to say.

This body can now say no more than that, in common with the entire connection, which he loved so well, we mourn the removal from the church of so venerable and wise a leader, and pray that the mantle of our ascended Elijah may fall upon his sons and successors in the ministry.

L. M. LEE, Chairman.

MEMPHIS, May 11, 1870.

REPORT OF COMMITTEE ON EPISCOPACY.

NO. II.

The Committee on Episcopacy recommend to the General Conference the following action in respect to two of our honored Bishops, whose lives have been prolonged beyond the period of active service to the church.

The General Conference recognize the mercy of God in sparing to

the church the lives of the venerable Bishops Andrew and Early, that it may yet have the benefit of their wisdom and experience, and the illustration they give of a declining age, cheered by the consolations of religion and hallowed by the recollections of a long and fruitful service for God and the church. In their affliction and amid the infirmities of age they will ever have the sympathy and prayers of the church, and we heartily unite in the hope that they will find that the afflictions of this present time are not worthy to be compared to the glory that shall be revealed in them. The Conference will always hail their presence with pleasure, and receive gratefully such service as they may still be able to render in the pulpit and the councils of the church, until the great Head thereof shall reveal to them immortality and eternal life—which day we may wish, for our sakes, may be long delayed, while for their sakes to depart and to be with Christ may be better.

Resolved, That Bishops Andrew and Early be released as heretofore from active participation in the responsibilities of the episcopal office; but we request that, as far as their health and circumstances will allow, they give to their colleagues and the church at large the benefits of their experience and counsels.

L. M. LEE, Chairman.
MEMPHIS, May 11, 1870.
REPORT OF COMMITTEE ON EPISCOPACY.
NO. III.

The Committee on Episcopacy have had under review the official service and Christian character of all our Bishops for the past four years, and we take great pleasure in reporting that the general testimony is highly honorable to our chief pastors—and especially to those on whom the burden of active service now falls—for an industry, fidelity and consistency worthy of the days of the fathers of the church. These years have been marked by a renewal of closer intimacy with the membership of the church, a wider and more particular distribution of episcopal labors among the people, in the intervals of Conference sessions, than had been customary for some years previously; and, as a consequence, their personal influence has been more generally felt, and their official character has made a deeper impress upon all its departments of labor. Improvement in all its interests has resulted; and the hopes of the future have grown brighter, as our Bishops have traversed the land, to guide the office-bearers in the church and the ministry, and to preach the gospel of salvation.

This testimony to their zeal and fidelity is due to those who have been abundant in labors during the past four years—often at the cost of long absence from their families, and of arduous travel and great sacrifice of home comforts. In this they have proved themselves an example to those over whom they had rule; and they merit whatever encouragement commendation may give, to continue this work until every section of the church has become familiar with their presence and labors.

Resolved, That the character of the Bishops pass, and that their administration during the last four years be approved.

L. M. LEE, Chairman.
MEMPHIS, May 11, 1870.
Bishop Doggett announced the Committee on the Revision of the Ritual: W. P. Harrison, J. E. Edwards, R. A. Young, C. W. Miller, J. B. Cottrell.

The following communication was received and the call for reports was suspended to hear it read, to wit:

To the Bishops and General Conference of the Methodist Episcopal Church South, in conference assembled:
Dear Brethren—The commissioners appointed by the General Conference of the Methodist Episcopal Church, in 1868, to treat with similar commissions from other Methodist churches on the subject of union, at a meeting held in Philadelphia, November 23, 1868, appointed the Rev. Bishop James and the Rev. John McClintock, D. D., a deputation to bear to you a communication from them. Since then Dr. McClintock has deceased, and by authority of the commission, the Rev. William L. Harris, D. D., has been appointed to serve in his stead. The undersigned, now constituting the deputation, are present at the seat of your session for the purpose of presenting to you the communication of the commission, which we will be happy to do, either in person or by letter, as may best accord with your convenience and pleasure. Though we had proposed to ourselves the satisfaction of spending several days in witnessing the proceedings of your Conference, and enjoying the society of its members, the recent severe bereavement of our church, in the death of several of her chief ministers, makes it necessary for us to return as soon as we can fulfill the simple duty assigned us.

Truly and affectionately yours,
W. L. HARRIS,
JOHN McCLINTOCK,
WILLIAM L. HARRIS.

On motion of J. E. Evans, a committee of three was appointed to wait on Bishop James and Dr. Harris, and invite them to the Conference room. The chair appointed Bishop Wightman, Governor Trusten Polk and L. M. Lee on this committee.

The call for reports was then resumed.

W. M. Rush, chairman of the Committee on Books and Periodicals, presented Report No. 1 of that committee, which was read and adopted, as follows:

REPORT OF THE COMMITTEE ON BOOKS AND PERIODICALS.—NO. 1.

Your committee, to whom was referred the communication of Bishop Paine in relation to his work, "Life and Times of Bishop McKendree," prepared by him in compliance with the request of the General Conference, together with a paper from Dr. Keener and Garland, touching the same matter, would respectfully report:

That in their judgment the work is of so great value, not only because it presents the Methodist itinerant preacher in his true light as set forth in the labors, travels and sufferings of Bishop McKendree, but because of its historic character, being the only reliable history of the church, in many respects, during the period in which he lived, that it should be widely circulated throughout the church, and measures should be taken to perpetuate it for the benefit of coming generations; therefore,

Resolved, 1. That the General Conference express not only its appreciation but its unqualified admiration of the manner in which Bishop Paine has discharged the laborious and delicate trust confided to him by the General Conference of 1851, in the preparation and publication of the "Life and Times of Bishop McKendree."

2. That the Conference regards the work as an extremely valuable and timely contribution to the general, and particularly to the constitutional history of the Methodist Church in America during the most eventful period of its development, as well as a faithful and interesting delineation of the character and labors of the venerable McKendree.

3. That the Bishops be and they hereby are requested to put it into the course of study prescribed for undergraduates in our ministry.

4. That we accept, and hereby tender our thanks to Bishop Paine for the copy of his work that accompanied his communication, and that it be preserved in the archives of this General Conference.

Respectfully submitted,
W. M. RUSH, Chairman.

MEMPHIS, May 11, 1870.
J. Hamilton, chairman of the Committee on Revision, presented Report No. 2 of that committee, which was read and laid on the table under the rule.

It is as follows:

The Committee on Revision beg leave to offer Report No. 2.
Your committee have had under consideration a memorial from the Virginia Conference upon the subject of district conferences, and report the following to be adopted as sec. 3 of chap. 2 of the new arrangement:

QUESTIONS. What directions are given concerning district conferences?

ANSWER 1. There shall be held annually, in each presiding elder's district, a district conference, at such time as the presiding elder may designate, and at such place as the conference may select.

ANS 2. Said conference shall be composed of all the preachers in the district, both traveling and local; and such number of laymen, to be appointed in such manner as each Annual Conference may determine for itself.

ANS 3. A layman, and in his absence the presiding elder, shall preside; and if both be absent, the conference shall elect a president.

ANS 4. The conference shall elect a secretary, who shall keep a record of all its proceedings.

ANS 5. It shall be the duty of the district conference to inquire particularly into the condition of the several churches in the district.

1. As to their spiritual state, and the attendance upon the ordinances and social meetings of the church.

2. As to their financial systems, their contributions to church purposes, and the condition of houses of worship and parsonages.

3. As to Sunday schools, and the manner of conducting them, and as to education generally.

4. As to missions within the district—where new missions should be established, or what missions should be raised to circuits and stations.

ANS 6. The district conference shall elect annually by ballot, from the district, four delegates to the ensuing Annual Conference; provided, no member of the Annual Conference shall vote in said election.

ANS 7. At these conferences prominence shall be given to religious exercises, such as preaching, prayer meetings, love feasts, and the administration of the sacraments.

Your committee also had before them a second memorial from the Virginia Conference, asking a change in chapter 2, section 3, of the Discipline, by striking out the clause which limits the number of appointments in a presiding elder's district to four, and recommending that the General Conference do not concur.

All of which is respectfully submitted.

J. HAMILTON, Chairman.

On motion of T. M. Finney, it was ordered that all reports of standing committees be printed in the *Daily Christian Advocate*, unless otherwise ordered.

S. Bobo, chairman of the committee on Sunday Schools, presented Report No. 1 of that committee, which was read and laid on the table for the present. It is as follows:

The Committee on Sunday Schools beg leave respectfully to present the following as their Report No. 2:

The committee share with the Bishops in the gratification, expressed in their address to the General Conference, that "the whole Sunday school interest has assumed

a magnitude and importance never before known in the history of the Southern Methodist Church." Good and wise men will accept this fact as one of the most hopeful signs of the times. It furnishes a reason for both gratitude and encouragement. When it is considered that thousands of the best men and women of our church are engaged in the religious education of not less, it is believed, than a quarter of a million of our children, no argument can be needed to magnify our conception of the capabilities, for doing good, of an institution that occupies such a field, and that is entrusted with such opportunities.

Your committee are encouraged by the fact that the mind and heart of the church are being turned to the great question of bringing our Sunday schools to the highest point of efficiency. While we have certainly made some progress, your committee are convinced that our whole system of Sunday school instruction may be greatly improved. Practically we are without a system, and it is hardly an exaggeration to say that each one of our Sunday schools is a law unto itself. This may be attributed, in large measure, to the incompleteness and unsatisfactoriness of our Sunday school appliances. Our church has furnished but few books to our schools, and these, we are sorry to say, have not been favorably received. Our most successful superintendents have felt so deeply the need of other and more satisfactory reading books and requisites that, in many cases, they have been constrained to seek for them in other quarters.

The Bishops say, in their address: "We think you may find it practicable to adopt measures that will secure a uniform scheme of instruction, with texts furnished at our own Publishing House." Your committee believe that the reasonableness of this opinion cannot be questioned, and that the desirableness of such a scheme of instruction will hardly be doubted.

After careful inquiry into the facts of the case—collected from a very wide field—your committee have come reluctantly to the conclusion that our child's paper, the *Sunday School Visitor*, has not met the wants of our schools, nor competed successfully with its many and attractive rivals for their patronage.

The Bishops suggest the possibility of "the publication of a monthly journal adapted to teachers and the older classes of pupils." We know that many of the best Sunday school workers have long felt the need of such a publication to aid them in the use of the most approved method of Sunday school instruction.

There is another subject of grave importance, not mentioned in that part of the Bishops' address upon which we have been instructed to report, but that has been urged upon our consideration by various memorials and resolutions referred to us, and that we believe to be appropriate to the subject matter of this report—the want of a book of Sunday school music that shall enable us not only to teach our children to sing, but (harrowing the language of a resolution passed by the last General Conference) teach them "to sing with a view to their participating in the singing of the congregation in public worship."

Our church does not afford such a book of Sunday school music. Of necessity, therefore, our Sunday school workers have looked elsewhere for the supply of their wants. Our schools are using perhaps not less than forty different books of Sunday school music. We have seen as many as thirty-seven varieties advertised in a single issue of one of our church papers. Upon such a plan as this, it is inevitable that our children will be so taught as not to "participate in the singing of the congregation in public worship." We do not hesitate to say that not one of these books properly meets the wants of a Methodist Sunday school. Indeed, their compilers have almost wholly excluded Methodist hymnology from these collections.

We say nothing here as to the causes of our failure to meet the various wants of our Sunday schools; but having carefully investigated the subject, we beg leave to commend to the consideration of this General Conference the closing sentence of that part of the Bishops' address that refers to our Sunday school interests. The Bishops say: "We recommend the appointment of a suitable person to be specially intrusted with the oversight of these vital interests."

Your committee submit the following resolutions for the adoption of the General Conference:

Resolved, 1. That we recommend the adoption by our Sunday schools of the best system of uniform lessons that can be procured, in connection with the best church catechism that have been or can be prepared.

2. That we advise the publication, at the earliest practicable day, of a monthly journal adapted to teachers and the older classes of pupils.

3. That no pains should be spared to make our children's paper, in its literary merits, in the style of its illustrations, as well as in its mechanical execution, all that our schools

require, and the equal of the best children's paper published in this country.

4. That it is recommended that our children's paper be published in such form that it may be distributed weekly among the children.

5. That this General Conference hereby direct the publication of a suitable book of Sunday school lessons, as such as practicable.

6. That in order to meet the various wants of our schools, the entire department of Sunday school literature and requisites, including Sunday school music, be placed under the supervision of a competent man, to be elected by this General Conference, who shall be known as Sunday school secretary, and who shall devote his entire time to this work.

7. That the Book Committee be instructed to fix the salary of the Sunday school secretary, and to inform him a competent support.

8. That in case of a vacancy in the secretaryship of the Sunday school department, in the interval of the sessions of the General Conference, the Bishops, by resolution or otherwise, appoint his successor till the ensuing General Conference.

S. BOBO, Chairman.

The call was again suspended for the introduction of Bishop James and Dr. Harris, who were introduced by the Bishop.

The following communication was presented by Bishop James, and read by the secretary. It is as follows:

To the Bishops and General Conference of the Methodist Episcopal Church South, in conference assembled:

DEAR BRETHREN—By the action and authority of the General Conference of the Methodist Episcopal Church, held at Chicago in May, 1868, the undersigned were appointed a commission to treat with similar commissions from other Methodist churches on the subject of union.

The Bishops of the Methodist Episcopal Church, who also constitute a part of this commission, met at the Episcopal Church South, in the city of Memphis, Tennessee, on the 11th of May, 1869, and communicated to the Bishops of the Methodist Episcopal Church South the fact that such a commission had been appointed, and expressed to them the conviction that the commission would be happy to meet a similar one from the Methodist Episcopal Church South, for the purpose of conferring with its representatives.

At a meeting of this commission, held in Philadelphia, November 23, 1868, a resolution was unanimously adopted approving the direct action of the Bishops. Nevertheless, the commission, as such, and as constituted by the General Conference, is desirous of discharging its duties in the most judicious and acceptable manner, and in order to make a further communication on this subject, addressed to the Bishops and General Conference of the Methodist Episcopal Church South, to meet in Memphis, in May, 1870.

The fact that the General Conference of the Methodist Episcopal Church appointed this commission shows that, in the judgment of that body, there are now no sufficient reasons why a union may not be effected on terms equally honorable to all, and that the realization of such union is very important and desirable.

Having then you may see this subject in the same light, and that it may be your pleasure to appoint a similar commission to confer with us previous to the meeting of our next General Conference in 1872; and praying that you may be preserved in all that pertains to the welfare of a Christian church, and desiring your prayers in behalf of the church we represent, that we may share a like prosperity, we are, dear brethren,

Yours in Christ Jesus,
EDWARD H. JAMES,
LEVI SCOTT,
MATTHEW SIMPSON,
EDWARD R. AMES,
DAVID W. CLARK,
EDWARD T. FLOYD,
LUKE HUTCHINSON,
DANIEL CURRY,
JOHN MCCLINTOCK,
JOHN LANCASTER,
JOHN J. HARRIS,
THOMAS M. EDDY,
JAMES PIKE,
WILLIAM L. HARRIS,
Commissioners.

PHILADELPHIA, Nov. 23, 1868.

After the reading of the communication Bishop James came forward and thus addressed the Conference:

"Having presented that document, we consider that our official duty is performed. There is one incident, however, in connection with this matter to which I think it proper to refer. When that document was provided for it was not intended to be made public until it was presented here at this time. Its being made public is not by the action or approval of this commission. It was its intention, in a dignified and delicate manner to make this communication, and it was not intended to be heralded in the papers, that there should be any discussion over it that could be made use of to the disadvantage of any party. I think it due this commission to say that this has not been done by our action or approval. I deem it proper to say further, that I believe that the General Conference has acted with Christian impulse and candor.

I am sure that this commission acts from religious convictions and with perfect candor. The action of the General Conference was limited, and you can interpret it as wisely as I can. This commission was appointed to treat with similar commissions from other Methodist churches. I do not understand that it is authorized to take any definite action, but only that it might learn what embarrassments are in the way of union, and ascertain in what manner union may be effected. In being deputed to hear this document, I was not authorized to negotiate on any question, but I judge that we can confer together with the view to receive or give any information on this subject. I believe this is a simple and true explanation, so far as respects the church which we represent. I do not think that any of us can expect that perfect organic union can be effected at once, without much negotiation. The history of the past five years will not justify us in entertaining such a hope; and yet we do believe that the prayer of Christ will be heard, and the day will come when his people shall be one. I am not willing to lend this Conference to any action but what is justified by the action of the Conference I represent. I would do great injustice to my own feelings did I not add that it affords me

great pleasure to look upon my brethren whom I have known in years gone by. I thank God for his preserving kindness, and for his blessings conferred upon you. It also gives me pleasure to be present at your deliberations, and I pray that grace may be with all them that love our Lord Jesus Christ in sincerity."

Dr. Harris being invited to address the Conference, said: "It is impossible for me to add anything to what has already been said, except that I most cordially agree with the Bishop touching the feeling of the church and the purpose of the commission which we represent."

Dr. Keener said: "I have listened, together with the rest of my brethren, with great pleasure to the Christian and very earnest spirit of our brethren of the Methodist Episcopal Church. Coming to us as they do across a period of disaster and division, they are especially grateful to us. As to this proposition which comes to us with the prestige of their church, I think we should pause for a moment to examine into its meaning. If I understand the journal of the Methodist Episcopal Church of this point, this commission extends to the African Methodist Episcopal Zion Church, and to all other Methodist churches wishing to seek union with them. I will read the resolution adopted by them on this question from the journal of the last General Conference of the Methodist Episcopal Church, which I hold in my hand:

Resolved, That the commission ordered by the General Conference to confer with a like commission from the African Methodist Episcopal Zion Church, to arrange for the union of that body with our own, be also empowered to treat with a similar commission from any other Methodist Church that may desire a like union.

"If I understand that, this commission is to treat with any churches that may be knocking for admission at the door of the Methodist Episcopal Church, and not to knock for

STANDARD EDUCATIONAL WORKS
PUBLISHED BY
CHARLES SCRIBNER & COMPANY,
654 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.

"Incomparably superior in anything published."—*American*.

Introductory to the Study of Geography. Elementary Geography. Intermediate Geography. Common School Geography.

Guyot's System is approved, and endorsed by the most distinguished literary and scientific men of our nation, such as Prof. Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that one million (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, than by the pupils of this generation will obtain a clearer, more definite and extended knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

(Continued from 5th page.)
admission at the door of any other church. If this be the condition of things, then there is a great difficulty in entertaining any proposition looking to union, because of the original instructions of their Conference. But if they come before us desiring fraternal intercourse, another difficulty presents itself—they do not come authorized to negotiate for union. I therefore offer the following resolutions, which I move to be referred to a special committee to be appointed on this question:

Resolved, That gratefully recognizing that Providence which has hitherto guided us, multiplied us, and strengthened our hands under trying conditions, both of war and peace, as a church of Jesus Christ, we earnestly desire to cultivate true Christian fellowship with every other branch of the Christian church, and especially with our brethren of the several branches of Methodism in this country and in Europe.

Resolved, That the action of our Board of Bishops at their last annual meeting in St. Louis, in response to the message from the Board of Bishops of the Methodist Episcopal Church, has the full endorsement of this General Conference, and accurately defines our position in reference to any overtures which may proceed from that church, having in them an official and proper recognition of this body.

Resolved, That the distinguished commission, now present, of the General Conference of the Methodist Episcopal Church, at Chicago, in May, 1868, appointed by it specifically to confer with commissioners from the African Methodist Episcopal Zion Church, to arrange for union with that body, and to treat with similar commissions from any other church which may desire a like union, cannot, in our judgment, be construed, without great violence, as having been constituted by that General Conference a committee to bear its fraternal expressions to the General Conference of the Methodist Episcopal Church South.

Resolved, That we are highly gratified at the visit of the commission as indicative of the return of proper Christian sentiments and relations between the two great branches of Northern and Southern Methodism, and that we extend to them personally our highest regards as brethren beloved in the Lord.

J. E. Evans moved to appoint a committee of nine to take this subject under consideration.

Bishop James said: "It is proper for me to say, before that motion is put, that of course we abide by what is said in the journal of the General Conference; and yet I think it does not correctly represent the object of the appointment of this commission. It was not appointed with the sole object of conferring with the commission of the African Methodist Episcopal Zion Church; but before its appointment this subject in question came up, and this commission was appointed with the understanding that it was alike to the Methodist churches throughout the country. Perhaps we have transcended our bounds in this coming at the present time, and not waiting to be first approached on this subject. But we did not esteem ourselves so highly as to think that all these churches should first knock for admission. We judged it proper to inform these churches of the appointment of this commission, and that it would give us pleasure to meet them. I think his explanation is due. Dr. Keener's remarks were justified by what he has read from the journal."

The motion of J. E. Evans prevailed.
Bishop James rose and said: "My colleague thinks that I have made a mistake in my remarks concerning the journal of the General Conference. I meant to say that I do not think the journal represents fully the action of the Conference. The commission was provided for in that resolution, but not appointed at that time."

A. L. P. Green, Trusten Polk, J. C. Keener, L. C. Garland, Robt. Alexander, James Jackson, A. W. Wilson, G. W. Williams and E. K. Miller were appointed the committee to which the subject was referred.

The call was made for reports of special committees, and none being presented the secretary called for petitions, memorials and appeals. The Conferences were called in order and the following responded:

South Carolina Conf.—A. M. Shipp presented a memorial of G. W. Sullivan on the right of appeal on the part of laymen in certain cases. Referred to the Committee on Revision.

Mobile Conf.—J. Hamilton presented a memorial from the Meridian district favoring the transfer to district meetings the power to give and receive licenses to local preachers.

Little Rock Conf.—A. R. Winfield presented a communication on the Home Monthly. Referred to the Committee on Books and Periodicals.

The following resolutions were then presented, read and adopted:
Resolved, That the Committee on Revision be instructed to inquire into the propriety of inserting after line 2, page 12, of the rearrangement, or at the end of paragraph 16, page 71, in the Discipline, the following: "17. On the removal of any member of his charge to another, to write immediately informing the preacher in charge of the work to which such member has removed, whether with or without a certificate."

Resolved, That the Committee on Revision be instructed to inquire into the expediency of changing the Discipline, chapter 2, section 3, page 50, last paragraph in the answer to question 5, as follows: After the word "change," strike out the word "change," and insert in its place the word "Last filled by him," and insert in the place of it, "In which he resides." Then it will read thus: "When a traveling preacher is located he shall be amenable to the Quarterly Conference of the charge in which he resides until he presents his certificate of location to that or some other Quarterly Conference."

Resolved, That no minister of our church shall solemnize matrimony where there is a divorced wife or husband of either party still living, provided this prohibition shall not apply in the case of an innocent party in a divorce for the cause of adultery, or to parties who have been divorced seeking to be reunited.

Resolved, That the Committee on Revision be requested to inquire into the expediency of amending the Discipline (new arrangement), page 15, answer first to question 4, eighth line after the word "church," by adding the following words: "And they shall report the extent and result of their labors to the fourth Quarterly Conference."

Resolved, That the Committee on Revision be requested to consider the propriety of fixing a limit as to the time within which, as a general rule, a certificate of church membership shall entitle a member to readmission into our church.

Resolved, That the Committee on Books and Periodicals be instructed to inquire into the propriety of getting up a map, showing the boundaries of our several Conferences.

Resolved, That so much of the revised Discipline as refers to the duty of stewards and the support of the ministry be and the same is hereby referred to the Special Committee on Finance.

Resolved, That the Committee on Revision be and they are hereby instructed to inquire into the propriety of so amending the Discipline, chapter 6, section 5, page 26, (new arrangement), beginning after the word "care," by inserting the following: "Provided, that if in any case said committee should refuse or neglect to perform their duty, the preacher in charge shall proceed to investigate the report, and if he is thereby convinced that the purity and peace of the church requires a trial, he shall prepare a bill of charges and specifications himself."

Resolved, That the Committee on Books and Periodicals be instructed to consider and report upon the expediency of publishing a monthly periodical devoted to the cause of missions, to be under the editorial supervision of the missionary secretaries.

Resolved, That the Committee on Books and Periodicals be instructed to inquire into the propriety of reporting in favor of creating the office of book and periodical superintendent in every society, to be nominated by the preacher in charge, and elected by the Quarterly Conference annually, but the appointee to hold the office until a successor has been nominated and elected; his duties to be, under the direction of and in co-operation with the preacher in charge, to assist in the circulation of the books and periodicals of the church, and to be responsible to the Quarterly Conference, of which he shall be ex-officio a member.

Resolved, That the Committee on Books and Periodicals be and they are hereby requested to report upon

the expediency and propriety of enlarging the Nashville Advocate to double its present size, and the election of a corps of not less than three editors by this General Conference for the same, who shall devote their entire time to the interest of said paper.

Resolved, That the Committee on Revision be and the same is hereby instructed to consider the propriety of adding the following provisions on the duties of Bishops, after the word "institution," answer 2, question 3, section 5, page 61, of the Discipline, "and when requested by an Annual Conference to appoint a preacher to travel at large, and do such work as the Conference may direct."

The following resolutions were offered, read and not adopted:
Resolved, That the Committee on Revision be instructed to inquire into the expediency of changing our marriage ceremony so as to have the pronouncement of marriage made with civil as well as religious aspects. And also the expediency of removing therefrom the inquiry as to objections to the solemnization of the bonds.

Resolved, That the Committee on Revision be and they are hereby instructed to inquire into the propriety of so amending the Book of Discipline, chapter 2, section 3, page 45, for four lay representatives, one of whom may be a local preacher, insert: "One lay representative from each station, circuit or mission, two of whom may be local preachers."

Resolved, That the Committee on Revision be instructed to inquire into and report upon the propriety of altering the Discipline, chapter 3, section 4, page 104, fourth item in the first answer in that section, strike out the words "at every quarterly meeting," in the latter part of the first sentence, and insert, "at least once in every quarter," so as to read: "4. Let the Lord's Supper be administered monthly in every congregation wherever it is practicable, and where it is not practicable, at least once in every quarter."

Resolved, That the Committee on Revision be instructed to inquire and report whether or not it was the intention of the General Conference, in establishing monthly church meetings, to do away with class meetings, and also to inquire and report as to the expediency of requiring the preacher in charge to hold at least one class meeting every month; and incorporating among the questions now asked in the Quarterly Conference this question, or one of similar import, of the preacher in charge, viz: "Have you held a class meeting at least once a month in your charge, and do you regularly and faithfully attend to this duty?"

Resolved, That the Committee on Revision be and they are hereby instructed to inquire into the propriety of amending our Discipline in answer 3, on page 75, in fifth line from the bottom, after the word "example," by the addition of the words, "Will you faithfully and constantly eschew the introduction of political questions in the services of the church?"

C. W. Miller offered resolutions proposing changes in the ritual. Referred to the Committee on the Ritual.

A. H. Redford presented certain music books, which were referred to the Committee on Sunday School Tune Book.

J. P. Ralls and J. Mathews offered a resolution favoring the establishment of a paper for the youth of our church. Referred to the Committee on Books and Periodicals.

L. Pierce, S. Anthony and J. S. Key offered a resolution on infant baptism and the relation of baptized children to the church.

Dr. Pierce said that he had long been considering this subject, and thought it of vital importance. "I want the church to understand that they baptize their children into the church and nowhere else."

The resolution was read and laid on the table under the rule.

The report of the Committee on the Religious Interests of the Colored People was taken up, acted upon, item by item, and adopted as it appeared in our issue of yesterday.

A. L. P. Green made a motion, which was amended by W. H. Fleming, favoring the payment of expenses incurred in carrying into effect the provisions of the report.

Dr. McFerrin objected to the motion. He saw no reason why these could not be organized as were the Georgia and Alabama Conferences. He did not want an agent, requiring

an extra salary, when the Bishops and presiding elders could do this. He thought it was bad policy to create an office in order to spend what money was on hand. If it was necessary to employ a man, then the Board of Missions should be applied to.

J. B. Cottrell was opposed to saddling everything on the Board of Domestic Missions.

Bishop Pierce said that the motion was well introduced, but altogether unnecessary, as the Bishops could attend to it, and their expenses had already been provided for by the colored people.

On motion of H. A. C. Walker, Dr. Green's motion was laid on the table.

The question on which Conference adjourned on yesterday was taken up, and the motion of W. M. Byrd to refer the resolution of F. E. Pitts and L. M. Lee to the Committee on Itinerary was carried.

Report No. 1 of the Committee on Revision, laid on the table on yesterday, was then taken up. Dr. Hamilton, the chairman of the committee, said that the rearrangement had left the Discipline virtually intact, with but little change, and it was more likely that the committee, after four years of consultation on this subject, would have made the changes that were necessary better than they could be made by any one in the short time in which it would be done here.

With reference to that portion of the report which recommends non-concurrence in the resolution presented by J. S. Key, asking that the Discipline be so changed as to allow presiding elders to appoint substitutes, J. S. Key said he did not desire to be perturbed, but that the object of his resolution was to give the presiding elder authority to appoint a man to serve in his place when it was impossible for him to attend.

Dr. A. R. Winfield said that if this power was given to presiding elders they would stay away when it was unnecessary.

Dr. Moran said that his own experience was in favor of the resolution; that very frequently young men filled these stations who were not competent to preside in the absence of the presiding elder.

Dr. Lee was in favor of the resolution. He thought by this means the number of presiding elders could be diminished and their work enlarged.

Dr. N. F. Reid said: "I am in favor of the report of the committee. Dr. Lee indicates, in his remarks in opposition to the report, that he wishes the way cleared to something else. The presiding eldership seems to be the point from which all the new measures of change in our economy begin. It seems to be the great difficulty in the way. I wish here to express the opinion that when this office in the church is destroyed our whole polity must of necessity be changed. I am opposed to everything that even weakens the office. Our best men should be put into it, and no measure adopted that may seduce them into the neglect of their duty."

R. Abbey opposed the report of the committee. He was as willing to trust the presiding elder to appoint a man to take his place as he was to trust the Bishop to appoint some one to take his chair at the Annual Conference.

Dr. Watkins said there were two reasons why he hoped that the report of the committee would be adopted. "It is said that there is great inconvenience as it now stands. Now the older presiding elders have not noticed any sad disadvantages resulting from it, and the rule as it is has generally worked well. Another reason is, you invade the prerogative of the Bishops by this resolution. In so far as that circuit is concerned, the man appointed by the presiding elder is, to all intents and purposes, the presiding elder, and this involves a transfer of authority. If the presiding elder can do this, he has invaded the authority of the episcopacy."

Andrew Monroe moved the previous question, which was sustained, and the report was adopted, as follows:

The Committee on Revision beg leave to offer Report No. 1:

Your committee have had under careful consideration the rearrangement of the Book of Discipline, reported by the special committee appointed by the last General Conference and approve the same, and recommend its adoption by this General Conference, subject to such minor changes as may be judged advisable.

They recommend also that all proposed changes be conformed to said rearrangement as to chapters, sections, pages, etc., as such conformity will render them easy of examination and comparison.

Your committee have also had under consideration a memorial from the Mobile Conference, proposing a new and extended order of business for quarterly conferences, and recommend that it be not adopted.

Also a resolution offered by J. S. Key and J. E. Evans, proposing a

change of section 4, question 3, page 53, of the Discipline, so as to authorize presiding elders to appoint an elder to preside in quarterly conferences in their absence, and recommend non-concurrence.

All of which is respectfully submitted.

J. HAMILTON, Chairman.

MAY 10, 1870.

A resolution of T. S. Moorman and S. Bobo, proposing a change in the General Rules, was offered, read and laid on the table under the rule.

A paper submitted by W. S. Baird and A. W. Wilson, on rebaptism, was read and referred to the Committee on Ritual.

The chair announced the Committee on the Pastoral Address, as follows:—Clerical: O. Fisher, E. H. Myers, A. H. Mitchell, H. A. C. Walker, J. B. McFerrin; lay: D'Arcy Paul, A. H. Colquitt, J. E. Groce, T. J. Magruder, R. J. Morgan.

The hour of adjournment having arrived, Conference adjourned with the doxology, and benediction by the Bishop.

MUSICAL INSTRUMENTS.

PHILIP WERLEIN,

NOS. 80 AND 82 BARONNE STREET,

NEW ORLEANS,

Southern Depot of the celebrated and renowned

PIANOS, ORGANS,

Marchal & Miltner's, Needham & Son's,

WEDDON'S EXCELSIOR LABOR-SAVING

WASHING COMPOUND.

No Rubbing Necessary—No Washing Machine Needed.

(Patent granted September 22, 1864.)

REASONS FOR PREFERRED THIS SOAP.

1. It is not only the best, but the cheapest yet offered to the public.

2. It will be successfully used in any kind of water—soft or hard, hot or cold.

3. It so modifies the action of boiling water on woolen goods that their fibers do not contract under its influence, and the garment is left bleached, soft and as large as originally made.

4. It will not destroy colors; on the contrary, renders them bright and beautiful.

5. The goods do not require any rubbing with the hands, washboard or washing machine; all that is necessary is soaking, boiling and rinsing.

6. It will not injure the hands; on the contrary, renders them soft and smooth.

7. Without boiling it will bleach clean and white the most unwholesome, laces, curtains, etc. Simply dampen them in warm water, soap them, place them in a dry vessel, until next day, and dry them.

8. A liberal discount to the trade.

We guarantee all the above facts, and will refund the purchase money to any one not satisfied with their trial of the Soap. We also guarantee to pay for any injury done to clothing by the Soap, on proof of such injury. It is hardly necessary to inform the public that two-thirds of the wear and tear of clothing results from rubbing, which may be saved by the use of this Soap.

We guarantee all the above facts, and will refund the purchase money to any one not satisfied with their trial of the Soap. We also guarantee to pay for any injury done to clothing by the Soap, on proof of such injury. It is hardly necessary to inform the public that two-thirds of the wear and tear of clothing results from rubbing, which may be saved by the use of this Soap.

BELLS, STEEL COMPOSITION.

For Churches, Schools, Etc.

RAYNER, NORTON & CO., Manufacturers,

Cincinnati, Ohio.

These celebrated Bells (not Cast Iron or Steel) are made of pure Bell Metal, and are of a size and weight to suit the taste and pocket of every church, school, etc., and cost only one-third as much as those of other makers.

Send for descriptive circular.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD

NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, combining all the new and important improvements; also to the extra height of the oven under the fire chamber, the Patent Air Chamber, Front Doors, and Patent White Enamelled Iron Knobs, the improvements in the covers and centre pieces, all of which have been covered by Letters Patent, and are used in no other Stove. They are warranted to stand fire, or others, sent free at charge in all cases. We have all sizes of the justly celebrated Stove, both

PLAIN AND EXTENDED BACKS.

The Extended Back with cast-iron Enamelled Reservoir and Fanet, The Warning Clock, Grilliron Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, as in the case in use of the Stove now used, and the heat is forced directly against the whole surface of the bottom of the Reservoir. The Reservoir, being detached from the pipe, can be removed at pleasure, thereby forming a six-hole Stove, the best in use, as the back holes will heat as well or better than the middle ones. For sale by

G. W. W. GOODWIN,

62 Camp street.

Complete and Perfect Cooking Stove

FOR BURNING COAL OR COKE

ever invented. In the estimation of all who have yet seen it. Patented in 1869.

THE MONITOR.

which can be seen at 62 Camp street. The advantages possessed by this Stove over all the other Cook Stoves are so numerous, and so patent to every sensible observer, that it is only necessary to examine it in order to be convinced of its superiority.

All of the above Stoves are fitted with extra extra Oven Doors lined with tin, and furnished with William Resor's Patent Air Chambers, sliding front doors, patent covers, and White Enamelled Knobs.

The operation of every Stove is guaranteed. Directions for putting up and using same accompany each Stove.

The Christian Advocate.

SATURDAY, MAY 21, 1870.

Newspapers in the United States.

The Rev. P. A. Peterson, of Norfolk, Virginia, has laid us under great obligations for the very able article which we give below:

BROTHER PETERSON: A recent issue of your paper contains a paragraph on "Newspapers in the United States," copied from an exchange, which I think is not correct in stating that the first daily newspaper in Virginia was printed in 1780. I have been much interested in the origin and history of newspapers, and have given the subject considerable attention, and have not been able to find a trace of a daily newspaper in Virginia at that early period. The first daily paper in this country did not appear until 1784. It was entitled the *Pennsylvania Casket and Daily Advertiser*. It was commenced September 21, 1784, and was published by John Dunlop and David Claypole, and afterward became the *North American*.

Although the first settled of the English colonies in America, Virginia did not have a printing press until nearly years after the introduction of printing into Massachusetts. Sixty-four years after the settlement of Virginia, Sir W. Berkeley, a distinguished governor of the colony for thirty-eight years, in answer to certain inquiries of the committee for the colonies, said: "I thank God we have no free schools nor printing, and hope we shall not have these hundred years. For learning has brought disobedience and heresy and sects into the world; and printing has divulged them and libels against the government." Lord Ellingham, who was appointed governor in 1683, was directed "to allow no person to use a printing press on any occasion whatever." Some authorities say that a press was established in 1682, and was shortly after put down; but the best sources of information do not furnish any account of printing in Virginia earlier than 1729.

In that year William Parks printed, at Williamsburg, "Stith's History of Virginia," and in August, 1736, he commenced the publication of the first newspaper in the colony, entitled *The Virginia Gazette*. It was a sheet twelve inches by six, issued weekly. In his prospectus, after stating that newspapers had been established both in this country and Europe, he says: "From these examples, the encouragement of several gentlemen, and the prospect I have of success, in this ancient and best settled colony, Virginia, I am induced to set forth weekly newspapers here; not doubting to meet with as good encouragement as others, or at least such as may enable me to carry them on." Mr. Parks died in 1750, and the paper was discontinued for a time. In February, 1751, it was revived by William Hunter, who died in 1761. It was then enlarged by Joseph Bayle, who, at his death, was succeeded by Purdie & Dixon, who published it until the beginning of the Revolution.

Mr. Jefferson, in one of his letters, says: "Till the beginning of our revolutionary disputes we had but one press; and that having the whole business of the government, and no competition for public favor, nothing disagreeable to the government could find its way into it. We procured kind to come from Maryland to publish a free paper." In May, 1766, Rind commenced his paper, also entitled *The Virginia Gazette*, "published by authority, open to all parties, but influenced by none." After Rind's death, which occurred in August, 1773, the paper was continued by his widow until her death, when John Pinkney took charge of it.

The first printing press introduced into the American colonies was set up at Cambridge in 1638, and the first printing was executed in 1639. Printing was carried on exclusively at Cambridge for about thirty-five years. Presses were established in Pennsylvania, near Philadelphia, in 1687; in New York (city) in 1693, in response to an invitation and offer of the council in these words: "If a printer will come and settle in New York, for the printing of our acts of Assembly and public papers, he shall be allowed the sum of £40 current money of New York, per annum, and have the benefit of his printing that serves to the public." In Connecticut at New London, 1703; in Maryland at Annapolis, 1726; in Virginia at Williamsburg, 1729; in South Carolina at Charleston, 1730; in Rhode Island, 1732; in New Jersey at Woodbridge, 1754; in New Hampshire at Portsmouth, 1756; in Delaware at Wilmington, 1761; in Georgia at Savannah, 1763; in Vermont, 1781; in Maine at Falmouth, 1786; in Kentucky at Lexington, 1786; in Tennessee at Rogersville, 1791, and in Ohio at Cincinnati, 1795.

The first newspaper in the several

States appeared, as follows: The Boston News Letter, Boston, 1704; The American Weekly Mercury, Philadelphia, 1719; The Maryland Gazette, Annapolis, 1728; The South Carolina Gazette, Charleston, 1731; The Rhode Island Gazette, Newport, 1732; The Virginia Gazette, Williamsburg, 1736; The Connecticut Gazette, New Haven, 1753; The North Carolina Gazette, Newbern, 1755; The New Hampshire Gazette, (still issued, the oldest existing newspaper in the United States of America,) Portsmouth, 1756; The Wilmington (Delaware) Courant, Wilmington, 1761; The Georgia Gazette, Savannah, 1763; The New Jersey Gazette, Woodbridge, 1777; The Vermont Gazette, or Green Mountain Post Boy, Westminster, 1781; The Falmouth (now Portland, Me.) Gazette and Weekly Advertiser, 1785; The Knoxville Gazette, Tennessee, 1793.

The following figures, which are believed to be nearly correct, will give some idea of the marvelous increase in newspaper literature in the United States during the last hundred years: In 1775 there were 38 papers; in 1810, 359; in 1830, 852; with a yearly issue of 68,117,796 copies; in 1840, 1,631, with a yearly issue of 195,838,673 copies; in 1850, 2,526, with a yearly issue of 426,409,978 copies; in 1860, 4,051, with a yearly issue of 928,000,000 copies; in 1869, 5,000, with a yearly issue of about 1,500,000,000. *Baltimore Episcopal Methodist.*

WE MUST never fall into the delusion that the purposes of God set aside the use of means. I have heard thoughtless or captious talkers say, "If God works out his purposes, then there is no need for preaching, or any other means." Ah! singletons, that thou art, if we teach you that God works out his purposes by means, how mad must you be to charge us with thinking lightly of the means!—*Spurgeon.*

MEDICINE—MEDICINE.

KOSKOO.....KOSKOO.
THE GREAT REPUTATION
which Koskoo has obtained in all parts of the
country.

AS A GREAT AND GOOD MEDICINE,
AND THE LARGE NUMBERS OF TESTIMONIALS
which are constantly being received from
physicians, and persons who have been cured
by its use, is conclusive proof of its remarkable
value.

As a Blood Purifier it has no Equal,
BEING POSITIVELY
THE MOST POWERFUL VEGETABLE AL-
TERATIVE YET DISCOVERED.

DISEASES OF THE BLOOD.
"The life of the flesh is in the blood," is a
Scriptural maxim that science proves to be
true. The people talk of bad blood as the
cause of many diseases, and like many popular
opinions this of bad blood is founded in
truth.

The symptoms of bad blood are usually
quite plain. Bad Digestion causes imperfect
nutrition, and consequently the circulation is
feeble, the soft tissues lose their tone and
elasticity, and the tongue becomes pale,
broad, and frequently covered with a pasty,
white coat. This condition soon shows itself
in roughness of the skin, then in eruptive
and ulcerative diseases, and when long con-
tinued results in serious lesions of the Brain,
Liver, Lungs or Urinary apparatus. Much,
very much, suffering is caused by impure
blood. It is estimated by some that one-fifth
of the human family are affected with Scrofula
in some form.

When the blood is pure you are not so liable
to any disease. Many impurities of the
blood arise from impure diseases of large
cities. Eradicate every impurity from the
fountain of life, and good spirits, fair skin
and vital strength will return to you.

KOSKOO AS A LIVER INVIGORATOR
STANDS UNRIVALED.
BEING THE ONLY KNOWN MEDICINE
that efficiently stimulates and corrects the
hepatic secretions and fractional derange-
ments of the Liver, without debilitating the
system. While it acts freely upon the Liver,
instead of expelling, purging it gradually
changes the discharges to a perfectly natural
state.

SYMPTOMS OF LIVER COMPLAINT AND OF SOME
OF THOSE DISEASES PRODUCED BY IT.
A sallow or yellow color of the skin, or
yellow-brown spots on the face and other
parts of the body; dullness and drowsiness,
sometimes headache; bitter or bad taste in
the mouth; internal heat; in many cases a
dry, teasing cough; uneasiness at the stom-
ach and sides; aggravating pains in the sides,
back or breast, and about the shoulders;
constipation of the bowels; piles, jaundice,
coldness of the extremities, etc.

KOSKOO:
Is a remedy of wonderful efficacy in the cure
of diseases of the Kidneys and Bladder. In
these affections it is as near a specific as any
remedy can be. It does its work kindly,
silently and surely. The relief which it af-
fords is both certain and perceptible.

DISEASES OF THE KIDNEYS AND BLADDER.
Persons unacquainted with the structure
and functions of the Kidneys cannot estimate
the importance of their healthy action.
Regular and sufficient action of the Kid-
neys is as important, may even more so,
than regularity of the bowels. The Kidneys
remove from the blood those effete matters
which, if permitted to remain, would speedily
destroy life. A total suspension of the urinary
discharges will occasion death in from
thirty-six to forty-eight hours.

When the Urine is voided in small quan-
tities at the time, or when there is a disposi-
tion to Urinate more frequently than natu-
ral, or when the Urine is high-colored or
scalding, with weakness in the small of the
back, it should not be trifled with or delayed,
but Koskoo should be taken at once to meet
the difficulty before a lesion of the organs
takes place. Most of the diseases of the
Bladder originate from those of the Kidneys;
the Urine being imperfectly secreted in the
Kidneys, proves irritating to the Bladder and
Urinary passages. When we recollect that
medicine never reaches the Kidneys except
through the general circulation of the Blood,
we see how necessary it is to keep the Foun-
tain of Life pure.

KOSKOO
Meets with great success in the cure of—

DISEASES OF THE NERVOUS SYSTEM.
Almost nine-tenths of our people suffer
from nervous exhaustion, and are, therefore,
liable to its concomitant evils of mental de-
pression, confused ideas, softening of the
brain, insanity, and complete breaking down
of the general health. Thousands are suffer-
ing to-day with broken-down nervous sys-
tems, and, unfortunately, tobacco, alcohol,
late hours, over-work, (mental and physical),
are causing diseases of the nervous system to
increase at a fearful ratio.

The symptoms to which diseases of the
nervous system give rise may be stated as
follows: A dull, heavy feeling in the head,
sometimes more or less severe pain or head-
ache; periodical headache, dizziness, noises
or ringing in the head; confusion of ideas;
temporary loss of memory; depression of spirits;
starting during sleep; bad dreams; hesita-
tion in answering questions; dullness of
hearing; twitting of the face and arms,
etc., which, if not promptly treated, lead to
Paralysis, Delirium, Insanity, Impotency,
Apoplexy, etc., etc.

KOSKOO
Is not a secret quack remedy. FORMULA
and each bottle. Recommended by the
best Physicians, eminent Divines, Editors,
Druggists, Merchants, etc. The
Best and Most Popular Medicine in Use.

To AGENTS.—A straight pencil mark in the
above calendar indicates the date of a money-
letter received; a circle the amount of dol-
lars received, and a half circle the amount of
cents.

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S
COMMERCIAL COLLEGE,
61 CAMP STREET,
Corner Commercial Place, N. O.
Open day and evening the entire year.
Penmanship, Book-keeping, Mathematics
and Languages are practically taught by ex-
perienced professors. Persons from twelve
to fifty years of age attend. The instruction
is private to each student. Persons who
have neglected their education can here
speedily qualify themselves for good situa-
tions in business. Some from the country
may obtain board in the family of the prin-
cipal.
Willard Walker, a late graduate of the
Southern University of Alabama, and son of
the Rev. Dr. J. B. Walker, of New Orleans,
has charge of the Mathematical department.
Terms: Ten to twenty per cent. less than
other colleges in this city.
A liberal deduction made when three or
more attend together. The principal has been
a practical teacher in New Orleans since
1851. For circulars, giving terms, etc., ad-
dress
J. W. BLACKMAN,
sell 1 y New Orleans.

METHODIST FEMALE COLLEGE,
TUSCALOOSA, ALABAMA.
Under the Patronage of the Mobile Conference.
The regular scholastic year will begin on
the first Monday in OCTOBER next, and end
the last of June. It is divided into two terms
of four and a half months each.

EXPENSES:
Primary department, per term..... \$20 00
Collegiate department, per term..... 25 00
Latin and Modern Languages, each..... 10 00
Music on Piano and Guitar..... 25 00
Use of Instrument..... 5 00
Drawing and Painting..... \$20 to 25 00
Contingent fee..... 3 00
Board, including washing, lights and
fuel, per month..... 22 00
Young ladies must furnish their own to-
wels, sheets, pillow cases and table napkins.
Payments for each term in advance. Pupils
entering within the first month will be
charged from the beginning. Itinerant min-
isters charged no tuition in the Literary
Course.
Strict attention given to the manners and
morals of the young ladies, and to their habits
of study.
Refer to Dr. Keener.
For information address the President,
a15 3m C. D. MILLER, Principal.

TUSKEGEE FEMALE COLLEGE,
TUSKEGEE, MACON COUNTY, ALABAMA.
REV. GEO. W. F. PRICE, PRESIDENT.

1. Institution permanent and successful.
2. Full faculty of experienced teachers.
3. Music made a special feature.
4. Art taught thoroughly and cheaply.
5. Fine Scientific Apparatus in good order.
6. Boarding department excellently kept.
7. Pupils under control of President.
8. Attention to health, manners, morals.
9. Vocal music gratuitously to all.
10. Languages taught, ancient and modern.
11. Particular care given to Primaries.
12. Object Lesson System adopted.
13. Discipline thorough and efficient.
14. Literary culture unsurpassed.
Music Department.—Dr. S. M. Bartlett,
Principal. Dr. Bartlett has been a successful
teacher of vocal and instrumental music for
nearly twenty years, much of the time in
female colleges in Alabama. The institution
has excellent instruments for instruction.
Persons desiring to enter the professor's eye.
Vocal music is a gratuitous daily exercise.
Vocalization taught thoroughly.
BOARDING DEPARTMENT.—Capt. J. H. Pos-
seward, steward. Mrs. E. R. Whittehurst, house-
keeper.—The gentleman in charge of this de-
partment is late of Marianna, Florida, and is of
elevated character and social standing. The
President resides in the college, and has
charge of the boarders. Young ladies must
furnish one pair blankets, one pair sheets,
towels, pillow cases, toilet soap and lights.
Fees for each term in advance. Four weeks
make a scholastic month.
Next year begins September 15, 1869. Two
terms, twenty weeks each.
CHARGES FOR YEAR OF FORTY WEEKS.
Primary department..... \$25 00
Academic department..... 40 00
Collegiate department..... 50 00
Music department..... 60 00
Art department..... \$20 to 40 00
Languages, each..... 20 00
Diploma fee..... 5 00
Board per month, without lights..... 20 00
No incidental charges of any kind. Fees
for each term in advance. Total expense,
without extras, about \$250.
REV. GEORGE W. F. PRICE,
President, Tuskegee Female College,
sel 1 6m Tuskegee, Macon Co., Ala.

SHARON FEMALE COLLEGE,
SHARON, MADISON COUNTY, MISSISSIPPI,
will reopen on MONDAY, the 27th of Septem-
ber, under the presidency of
REV. J. M. PUGH, A. M.

The course of study is extensive and thor-
ough, and no pupil will be spared to give to
the student a solid education.
Rates of tuition per session of ten months:
Primary division..... \$30 00
Preparatory department..... 40 00
Collegiate department..... 50 00
Contingent fee..... 5 00
Music at usual rates.
Board can be had at from \$10 to \$20. For
further information address the President.
H. H. MONTGOMERY,
President of Board of Trustees.

NOTE.—My friends in the counties of Mad-
ison, Yazoo, Holmes, Carroll, Sunflower, At-
tala, Scott, Leake, Neshoba, Rankin, Hinds,
and elsewhere, will please consider this no-
tice as a personal application for their patron-
age, as it will be out of my power to pay them
a special visit.
The daughters of the preachers of the Mis-
sissippi Conference, and the orphans of de-
ceased preachers, and also the orphans of de-
ceased Masons, on application, shall have
their tuition free of charge.
J. M. PUGH, President.

WINTHROP FEMALE COLLEGE,
BROOKHAVEN, MISSISSIPPI,
will reopen SEPTEMBER 22, 1869. Provi-
dential will be made for all who apply for ad-
mission.
To send your daughter here will cost you
\$200 for the term of ten months, or forty
weeks. This amount will pay for board, fuel,
lights, washing, tuition in English, English
text books, Latin, French, and all the neces-
saries in the school room. A deduction
of \$50 will be made for ministers' daugh-
ters.
All the branches are taught. Our music
teachers are believed to be unequalled.
Music and the Languages are extra.
Send for circular.
H. F. JOHNSON,
President.
j17 5m

MANSFIELD FEMALE COLLEGE,
Mansfield, De Soto parish, La.
OWNED BY THE LOUISIANA CONFERENCE.
The Fall Session of this institution, now ex-
tending over the last year of its exist-
ence, will open on WEDNESDAY, the 29th
day of September, with a corps of experi-
enced teachers, and enlarged facilities of in-
struction.
Terms unchanged. For catalogues, con-
taining full particulars, address
CHARLES B. STUART,
sel 1 2m President.

SCHOOLS AND COLLEGES.

CENTENARY COLLEGE, JACKSON, LA.,
was established by the State of Louisiana, in
1825, and transferred to the Methodist Epis-
copal Church South in 1845. It is now under
the patronage of the Mississippi and
Louisiana Conferences.
The College exercises were necessarily
suspended during the war, but were regu-
larly resumed, after reorganization, on the
first Monday in October, 1865. The approach-
ing session will open on the first Monday of
October next.
Tuition, \$75 per annum, payable semi-an-
nually in advance.
Boarding can be obtained at from \$20 to
\$25 per month.
The Buildings, Libraries, Apparatus, Labo-
ratory and Society Halls, the location in point
of beauty, health, ease of access and good so-
ciety, are all unsurpassed by those of any in-
stitution in the Southern States.
The past history of the College is the pledge
of its future prosperity.
The Board and Faculty promise the public
that nothing shall be wanting on their part
to secure the thorough education of the
young men committed to their care, in both
Preparatory and Collegiate Departments.
The old students, alumni, and friends of the
institution are requested to give publicity to
the full reorganization and opening of the
College, as stated above.
W. H. WATKINS, President.

MARTHA WASHINGTON COLLEGE,
ABINGDON, VIRGINIA.
Spring Term opens FEBRUARY 16, 1870.
Short recess in summer, and two months' vacation in winter.
As a great part of our patronage is from
the Cotton States, we have made this ar-
rangement to meet the convenience of our
Southern patrons.
Young ladies remain during the summer.
Parents who visit the Virginia Springs and
mountain retreats see their daughters here.
They return to the Gulf States in winter.
College located immediately on the Vir-
ginia and Tennessee Railroad, the great
route of travel from New Orleans to New
York. Parties passing farther north are
invited to call and examine the advantages
of this College. It is located ten miles from
Emory and Henry College. Brothers go to
Emory and Henry, and their sisters to Mar-
tha Washington. Both under the manage-
ment of the Holston Conference, and the
only colleges under its control. Full faculty
of eight teachers. Write for catalogue to
B. ARBOGAST, President, or
DR. W. G. CUNNINGHAM,
Prof. Moral Philosophy.

EAST ALABAMA MALE COLLEGE,
AUBURN, ALABAMA.
Rev. James F. Dowdell, A. M., LL. D.,
President and Battle Professor Moral Sci-
ence.
John Darby, A. M., Emeritus Professor of
Chemistry and Natural History.
John T. Dunkin, A. M., Professor of Latin
and Greek Languages.
Alexander Hogg, A. M., Professor of Mathe-
matics.
William C. Stubbs, A. M., Professor of Nat-
ural Sciences.
A. S. Douglas, A. B., Instructor in Prepa-
ratory School.
Spring Term opens on the 20th of January
and closes on the 13th of July.
Mr. Dowdell will be aided by the Faculty in
the discipline and instruction of the Prepara-
tory Department.

Tuition and incidental fee in College,
Spring Term..... \$40 00
Tuition and incidental fee in Prepa-
ratory Dept., Spring Term..... \$20, 30, 40 00
Board in best families, exclusive of lights
and washing, \$15 to \$20 per month.
Auburn is located on the Montgomery and
West Point Railroad. It is unrivaled in
healthfulness, and unsurpassed in moral and
social advantages.
The Board of Trustees are rejoiced in se-
curing the above Faculty, and are confident
that nothing is wanting to make this insti-
tution equal to the best.
For further information apply to President
Dowdell, at Auburn, Alabama.
JOHN B. GLENN,
ja 1 6m President Board of Trustees.

TRINITY HIGH SCHOOL, FOR YOUNG
MEN AND BOYS,
Pass Christian, Mississippi.
REV. WM. CAMERON, A. M., PRINCIPAL.
The next scholastic year of this institution
will commence on the FIRST MONDAY in
October, and continue ten months, or forty
weeks.
The Boarding Department is under the
management of Mrs. John E. Caldwell.
For circulars, giving particulars, apply to
the Principal, or to the following named
PATRONS.

Colonel D. E. Schuyler, New Orleans.
Colonel Henry Gillum, New Orleans.
Captain W. C. Flinders, New Orleans.
Mr. Joel Murray, New Orleans.
Mr. Orrin Cull, New Orleans.
Mr. A. H. May, New Orleans.
Colonel Frank A. Bartlett, New Orleans.
Mr. J. H. Jennings, New Orleans.
Mr. A. H. Swanson, New Orleans.
Mr. Alfred Davis, Natchez, Miss.
Gen. E. Swift, U. S. A., Vicksburg, Miss.
Mr. William Myers, Deer Creek, Iasqueena
county, Mississippi.
Mrs. Mary A. Smith, Woodville, Miss.
Mrs. Catherine Stull, Mobile, Alabama.
Rev. John H. Rice, D. D., Mobile, Alabama.
W. A. Champlin, Esq., Pass Christian, Mis-
sissippi.
Dr. C. B. New, Pass Christian, Mississippi.

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The general market has shown less animation since our last issue. There has been a manifest falling off in the spring business, and most branches of the wholesale trade have been less actively engaged in filling orders and sales to country merchants. Sugar and molasses have been in fair request, and, with few exceptions, Western produce has commanded firm prices. Among the receipts we notice 51,000 bushels of wheat in bulk, per barges from the upper Mississippi. This shipment will no doubt meet a ready sale at satisfactory prices. The prompt dispatch and economy in all transit charges given to this invoice is the surest way to promote the river movement.

The weather has been clear and seasonable, and our accounts from the interior are generally encouraging. The tributaries are still in good navigable condition, and the receipts of cotton have been more liberal than was expected on the scanty arrivals last week.

The river is two feet four inches below high water mark.

Corros.—The following are the arrivals since the thirteenth instant:

Louisiana and Mississippi bales.	12453
Arkansas.	45
Lake.	363
Mobile.	21
Florida.	21
Texas.	261

Total.

On Saturday, under unfavorable accounts from New York, and discouraging telegrams from Liverpool, the demand was slack throughout the day, and, finding they could not realize Friday's prices, factors were compelled to recede to those of Thursday, at which barely 2,500 bales changed hands, nearly half of which was taken by one party, good ordinary closing at 21 1/2 to 21 3/4, low middling at 22 to 22 1/4, and middling at 22 1/2 to 22 3/4. On Monday, there being a further decline of 1/4 at New York, as well as in arrival cottons at Liverpool, only a few buyers came forward, and mostly with offers 1/4 to 1/2 below previous rates. Very few factors, however, were willing to give way to this extent, and the sales were confined to 650 bales, taken by six buyers, at extremely irregular rates—good ordinary, for example, selling at 20 1/2 and 21 1/4, and low middling showing even a wider range—but closing so unsettled as to make quotations entirely nominal. On Tuesday the market opened with some inquiry at the inside rates of the previous day, but buyers found the moderate supply on sale held at higher figures, and during the morning nothing was reported of any moment. Later in the day, however, a few parties came together, at about 20 1/2 to 21 1/4 for good ordinary, and 21 1/2 to 21 3/4 for low middling, the outside figures, of course, being for strict, and the business summed up 1,850 bales, which, from the apparent dullness, was much more than was generally expected. There was such a wide difference between the views of buyers and factors that the quotations given below must be regarded as nominal, but they, nevertheless, approximate as nearly as possible to the facts.

This makes an aggregate for the past three days of 5,000 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 1,073,354 bales, against 768,000 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 702,716 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of \$48,920 bales to Great Britain, of 119,092 to France, and of 109,815 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary.

Good ordinary.

Low middling.

Middling.

Strict middling.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, MAY 28, 1870.

NO. 19.

PROCEEDINGS OF THE GENERAL CONFERENCE OF THE METHODIST E. CHURCH SOUTH.

EIGHTH DAY.

THURSDAY, May 12, 1870.

The Conference met at the stated hour. Bishop McTear in the chair. Religious service was conducted by A. Hunter.

The minutes of the last session were read and approved.

W. Haden, lay delegate from West Texas Conference; J. W. Harris, lay delegate from the Tennessee Conference; O. R. Bine, clerical delegate from the Montgomery Conference; J. M. Swinford, lay reserve delegate from the Pacific Conference, in place of W. R. Bain, appeared and took their seats.

G. G. Dibrell, lay delegate from Tennessee Conference; J. C. Mitchell, lay delegate from St. Louis Conference; L. L. Mack, lay delegate from Arkansas Conference; C. G. J. Phipps, lay delegate from Missouri Conference, asked and obtained leave of absence on account of business. Trusten Polk, lay delegate from St. Louis Conference, asked and obtained leave of temporary absence on account of official business. F. W. Earnest, lay delegate from Holston Conference, obtained leave of absence on account of family affliction.

J. E. Edwards, chairman of the Committee on Itinerancy, presented Report No. 1 of the majority, and also a report of the minority of said committee, which were read and made the order of the day for Friday, at ten o'clock A. M. They are as follows:

REPORT OF THE COMMITTEE ON ITINERANCY.—NO. 1.

The Committee on Itinerancy having considered the resolution signed by J. E. Edwards and L. C. Garland, proposing a change in paragraph 2, question 3, section 5, page 60 of our Book of Discipline, which was referred to the committee, with instructions to inquire into the expediency of making the change proposed, and to report the action of the committee to the Conference in time to make it the order of the day for ten o'clock, Friday, May 13, beg leave to report the following resolution as the result of their deliberations, sustained by a majority of the committee, viz:

Resolved, That the Committee on Itinerancy deem it inexpedient to recommend the adoption of that portion of the resolution, signed by J. E. Edwards and L. C. Garland, which contemplates a change in the time of the pastoral term.

J. E. EDWARDS, Chairman.

MINORITY REPORT.

J. E. Edwards, A. T. Mann, J. B. Cottrell and James McKay, on behalf of the minority of the Committee on Itinerancy, beg leave respectfully to differ with the majority in the report submitted to the Conference on the resolution signed by J. E. Edwards and L. C. Garland, asking a change in paragraph 2, question 3, section 5, page 60 of our Discipline, and submit for the adoption of the Conference the following resolution in lieu of the resolution reported by the majority of the committee, viz:

Resolved, That the General Conference do confer in the change proposed in paragraph 2, question 3, section 5, page 60 of our Discipline, as recited in the resolution signed by J. E. Edwards and L. C. Garland.

JOSEPH B. COTTRELL,
JOHN E. EDWARDS,
A. T. MANN,
JAMES MCKAY.

W. M. Rush, chairman of the Committee on Books and Periodicals, presented Reports Nos. 2, 3 and 4 of that committee, which were read and adopted, as follows:

REPORT OF THE COMMITTEE ON BOOKS AND PERIODICALS.—NO. 11.

Your committee, to whom was referred the memorial of J. G. Jones, of Mississippi, on the subject of a more general circulation of our church literature, would report that, having carefully examined the paper, we cannot recommend to this General Conference the adoption of such system of agencies as is proposed.

Respectfully submitted.

W. M. RUSH, Chairman.

REPORT OF THE COMMITTEE ON BOOKS AND PERIODICALS.—NO. 11.

The attention of your committee being directed by the general book agent, in his quadrennial exhibit, to a claim which we hold against the

government of the United States, would respectfully report that,

WHEREAS, By the occupation of the Southern Methodist Publishing House, in Nashville, during the war, by the authorities of the United States, a just claim has incurred to the Publishing House against the United States for rents and damages; therefore,

Resolved, That a commission be appointed by the General Conference to present and prosecute a claim for rents and damages to the Southern Methodist Publishing House against the government of the United States.

Respectfully submitted.

W. M. RUSH, Chairman.

REPORT OF THE COMMITTEE ON BOOKS AND PERIODICALS.—NO. 11.

Your committee, to whom was referred the memorial from Louisville, asking for the removal of the Publishing House from Nashville to Louisville, beg leave most respectfully to report back that, paper to the General Conference for its action.

W. M. RUSH, Chairman.

The subject of the Louisville memorial was made the order of the day for Tuesday, May 17, at ten o'clock.

J. Hamilton, chairman of the Committee on Revision, presented Report No. 3 of that committee, which was read and laid on the table under the rule. It is as follows:

REPORT OF THE COMMITTEE ON REVISION.—NO. 11.

The Committee on Revision beg leave to offer Report No. 3:

Your committee have had, before them sundry memorials upon the subject of the appointment of superintendents of Sunday schools, and recommend to change answer 2 to question 4, section 3, chapter 2, page 9, N. A., so as to read, "To supervise the instruction of children and the interests of Sunday schools, and, upon nomination by the preacher in charge, to annually elect the superintendents."

Also a paper proposing to make the election of stewards annual. With this your committee concur, and recommend that answer 1, question 4, section 15, chapter 3, page 18, N. A., be amended by adding the words "to be elected annually."

Your committee recommend to amend answer 1, question 1, section 2, chapter 2, page 6, N. A., by striking out the words "within its bounds" and inserting the words "with such Conference."

Also to amend answer 3, question 1, section 2, chapter 2, page 6, N. A., by striking out the words "and relations."

The committee also recommend that the answer to question 1, section 3 of chapter 2, page 8, N. A., be amended by striking out "meetings" and inserting "Conferences."

Also that answer 9, question 4, section 3 of chapter 2, page 9, N. A., be changed to question 5, to read as follows, "What order of business shall be observed in the quarterly conferences?"

Also that the words "of which he may be, ex officio, a member," in answer 2, section 4, chapter 2, page 10, N. A., be stricken out.

The committee had before them sundry memorials requesting that trustees be made members of the quarterly conferences. We find that this has already been done by the new arrangement.

The resolution of W. A. McCarty and others, requesting the addition to the business of the quarterly conference of the question, "Has the sacrament of the Lord's Supper been regularly administered?" was non-concurred in.

The recommendation in the memorial from the Virginia Conference, that to the questions asked in an Annual Conference be added the question, "What ministers are received from other churches?" was not concurred in.

The recommendation in the same memorial that the rule in regard to arbitrations for the settlement of questions that may arise between members of the church be restored to the Discipline, is concurred in.

The recommendation contained in the memorial from the quarterly conference of Piedmont, Baltimore Conference, proposing a division of question 1 in the business of a quarterly conference, is not in the new arrangement.

The preamble and resolution of F. W. Earnest, Holston Conference, concerning local preachers, was not concurred in.

Also the resolution of R. S. Moran and N. F. Reid, proposing to strike out answer 9 to question 1, section 5, chapter 2, page 59 of the Discipline, was not concurred in.

The memorial from the Virginia

Conference, requesting further legislation on the subject of temperance, also a resolution on the same subject, signed by T. L. Boswell and J. M. Mask, together with a memorial from the Visalia district meeting, Pacific Conference, calling for additional legislation on the subject of dancing, and a paper on the same subject from the Mobile Conference, are returned to the General Conference, with the request that they be referred to the Committee on the Pastoral Address.

All of which is respectfully submitted.

J. HAMILTON, Chairman.

The chair then called for petitions, memorials and appeals.

J. S. Martin presented a memorial of the delegation, asking that the Publishing House be transferred to Baltimore. Referred to the Committee on Books and Periodicals, to be published in the Daily Christian Advocate, and made the order of the day for Tuesday at ten o'clock.

It is as follows:

The Baltimore Conference delegation respectfully pray this body to instruct the Committee on Books and Periodicals that in case they shall determine to recommend the removal of the Publishing House from its present location, they shall carefully consider and report upon the advantages of fixing it in Baltimore. We urge upon your attention that in the question of permanently locating a great establishment for the manufacture and sale of books and periodicals only two considerations ought to have weight in determining the result. These are the comparative facilities of making and distributing the product of the establishment. We urge also that these are incomparably greater in a large commercial city, a great center of trade, than in any merely geographical center of a district. Lines of diameter drawn on a map from the boundary of a State may determine mathematically where the metropolis ought to be, but in fact it is never there. No commercial city in the world, no great capital in the world, is near the mathematical center of its country, and all attempts to make cities grow in what surveys declare to be the right places, have failed. Now if cities are not determined by centrality, it is because centrality is not the same as convenience. Many other circumstances are more important and determining. The city of Baltimore, containing now three hundred and fifty thousand inhabitants, and rapidly increasing in population and trade, offers the facilities for the manufacture of books only to be commanded in large cities, where artists, mechanics and materials can always be had. For the distribution it has means of cheap water and land communication with every part of the South, and the periodical presence of a very large number of Southern purchasers from every part of the country, which must be the market for our books. The climate is healthy, the market the best on the continent, and the conveniences of living to the people employed in such business as you are considering unsurpassed, if equaled. As we think that the location should be determined on exclusively commercial grounds, we refrain from introducing suggestions of the moral and ecclesiastical advantages of the place we recommend.

Respectfully submitted.

J. S. MARTIN.

S. S. BOWELL.

A. W. WILSON.

W. S. BAIRD.

D. BAILEY.

S. BRADLEY.

E. W. MASSIE.

T. J. MAGRIDER.

JOS. HENDERSON.

T. J. MCCOY.

A communication was received from Bishop Early, expressing a hope that he will be at the Conference before its close.

A communication from Mt. Sterling (Ky.) district meeting of colored people was received and referred to the Committee on the Religious Interests of the Colored People.

The following communication was then read to the Conference:

STATE FEMALE COLLEGE.

May 12, 1870.

To the Bishops and Members of the General Conference:

FATHERS AND BRETHREN—I am deputed by the faculty and students of the State Female College to invite you to an entertainment to be given at the college on Friday evening, the thirteenth instant. This institution is located in the vicinity of the city, and is under the patronage of the Methodist Episcopal Church South. Recognizing your honorable body as always the patrons of sound Christian education, and, especially,

interested in the prosperity of our denominational schools, we shall be happy to have your presence, and extend a cordial invitation.

This invitation is intended to embrace also all visitors now in the city attending the General Conference.

The exercises will begin at eight o'clock. The city cars will run both out and in to accommodate all who may wish to attend.

CHARLES COLLINS, President.

A. G. Brown, J. E. Edwards and D'Arcy Paul offered a resolution on a change of ritual. Referred to the Committee on Ritual.

O. Fisher and T. C. Barton offered a resolution on the trial of a traveling preacher. Referred to the Committee on Revision.

The delegation from Montgomery Conference offered a resolution favoring the ordaining of ministers by the president of a Conference, in absence of a Bishop, which was read and laid on the table.

The following resolution was then offered, read and adopted:

Resolved, That the Committee on Revision be and they are hereby instructed to inquire into the expediency of adding the following words to the answer to question 1, section 3, chapter 2, to wit, "It shall be the duty of all the members of the quarterly conference to attend its sessions unless providentially hindered."

W. P. HARRISON.

W. J. PARKS.

The following resolution was then offered:

Resolved by this General Conference, That notwithstanding Wesley's Sermons, Clarke's Commentaries and Watson's Institutes are among the books in the course of study prescribed for those who are to be ordained deacons and elders, or are admitted into the traveling ministry of the Methodist Episcopal Church South; yet this fact is not to be construed into an endorsement by this body, or by our church, of what these authors have said in regard to the design of baptism.

H. H. SPENCER.

C. L. VANDVENTER.

B. H. Spencer thought that there was much injury done by quotations from the works referred to in his resolution.

P. A. Peterson thought the most judicious thing to be done was to lay the resolution on the table, which he moved to do, but afterward withdrew his motion by request.

T. M. Finney thought it more respectful to refer it to a committee; that brethren ought not to be slung down in the manner in which it had been done.

Dr. Rush said that, knowing, as he did, that they had to meet objections brought out by quotations from these works, he thought it should have some sort of reference. He did not think that Wesley believed the doctrine of baptismal regeneration, but there are those who seize on these forms of expression in his writings to our disadvantage, and that relief should be given, if possible.

Dr. Hamilton said that he did not think that the brethren should feel such sensitiveness on this subject; that the English Methodists always discriminated between various parts of Wesley's works; that Clarke's Commentary was never adopted as a standard—there were things in that work which he did not believe, and never could. He knew that brethren did find difficulty on this point, but he did not see what relief could be afforded.

The resolution was referred to the College of Bishops.

Dr. Taylor and W. J. Clark offered a resolution on statistics, which was read and referred to the Committee on Books and Periodicals.

On motion of R. S. Moran, the Committee on Books and Periodicals were instructed to inquire into the expediency of publishing a quarterly review.

The chair announced the committee of nine on the Circulation of the Holy Scriptures, as follows: C. L. Vandover, J. E. Evans, Thomas L. Boswell, A. R. Boone, William V. Tudor, I. P. Garvin, T. W. Moore, G. A. Dannelly and H. Jewell.

On motion of P. A. Peterson, Report No. 2 of the Committee on Revision was called up.

J. E. Evans moved to take it up item by item.

Answer one was read.

D. R. McAnally thought it was better to substitute "may" for "shall." He had not been able to persuade himself but that there is some honesty and good sense outside of this Conference. We have left some at home—we did not bring it all with us.

J. E. Edwards thought that that

would strike a death-blow at the tap-root of the whole scheme.

A. Monroe thought that that substitution would certainly involve us in embarrassments, and he hoped the amendment would not prevail.

The motion to amend was lost.

W. Shepard moved to strike out "presiding elder," and insert "Bishop," which motion was not seconded.

The motion to adopt the item as it was, prevailed.

Item two was taken up.

Dr. Green said that item might be improved. We ought always to be uniform, and it was his opinion that every member of a quarterly conference ought to be eligible to a seat in the district conference. As we wish to work laymen into these meetings, he would greatly prefer that all members of quarterly conferences shall be members of district conferences. This would avoid elections and prevent the possibility of any hard feelings, and all that sort of thing. He moved to amend to that effect.

R. Abbey rose and indorsed all that Dr. Green had said.

Dr. W. Smith said that a difficulty arose on this point, and that the committee found, on interchanging views, that the designation of particular parties would in some cases make the representation too large, and in others too small. We want not merely official members, but other laymen. Now if this is left to the Annual Conferences, each Annual Conference will be able to suit itself.

Dr. Green said that we had embraced not only stewards, but trustees, in quarterly conferences, and in this way, by his proposition, every important member of the church would have a seat in the district conference, and you had better make a machine that will run uniform, and let it run smoothly through.

M. S. Andrews moved a substitute to the amendment, and said that he would state his reasons in a few words. He said they had a plan in the Montgomery Conference which worked admirably; and that was to elect four electors from each pastoral charge, who should elect the lay delegates to the Annual Conference. His substitute was as follows:

"Said Conference shall be composed of all the official members within the district, and four electors chosen by each quarterly conference."

N. F. Reid said that the object was to render the district meeting most effective, which he did not think could be done by Dr. Green's plan. He thought they should adhere to the report of the committee, especially as the committee had canvassed the whole matter more thoroughly than can be done by any one man.

W. H. Potter hoped that the substitute would not prevail; he knew that it would destroy the efficiency of these meetings in Georgia. It was very desirable that district meetings should be held in towns and villages where the Annual Conferences could never meet. This plan of Dr. Green's would give us so large a body that small villages could not entertain them. According to this plan there would sometimes be ninety in attendance, and it would require a large town to accommodate them.

Dr. Green said that he did not like that electoral college.

It would introduce an element of distrust—one and another would come up with the question, "Why am I proscribed?" The effect will be bad, for you would be sure to hear from those who were not electors, that the right men had not been elected. All official members ought to have the right to vote. This substitute would be sure to introduce an element of distrust.

Dr. Key said that he had had all these points before the committee. Many had had extensive observations, and were enabled to canvass all the points of difficulty. We must leave the largest margin for spontaneous combustion. If we make it formal we destroy its life. Some represented district meetings in their sections as failures, yet were willing to vote for them for the good they had done among others. The best thing that can be done is to adopt that report.

Dr. Hamilton said that Dr. Smith gave the reasons that influenced the committee—that there was great difference in different sections of the country. According to Brother Andrews' plan there would be, in populous districts, one hundred and seventy-five members. The effect of that plan would be to prevent us in the Mobile district from ever having one. But yet there is force in Dr. Green's remarks.

J. B. Cottrell said if Brother An-

drew's plan was adopted they would have one that would run through.

On motion of A. R. Winfield the amendment and substitute were laid on the table.

P. A. Peterson moved to amend by striking out all after "local," and inserting "the class leaders and stewards and superintendents of Sunday schools, and one member from every church, to be elected by said church."

On motion of A. R. Winfield, this was laid on the table.

A. R. Winfield called for the previous question, and the call was sustained. The question was put, and the second answer was adopted.

Answer three was read, and P. A. Peterson moved to amend by adding the words "from among the traveling elders of the district." This amendment, on motion of A. R. Winfield, was laid on the table. The third answer was then adopted.

Answer four was then adopted without discussion.

Dr. Moran moved to amend the fourth item in answer five, by adding the following words, "and report to the Annual Conference."

This amendment, on motion of A. R. Winfield, was laid on the table.

On motion of Dr. Evans, items two and four were transposed. The fifth answer was then adopted.

Dr. Moran moved to amend answer six by inserting before the word "provided" the following words, "and also to elect one of these four to serve on the Finance Committee at the next session of the Annual Conference."

This amendment, on motion of Dr. Winfield, was laid on the table.

Judge Kilpatrick moved to strike out the proviso.

A motion to lay the amendment on the table did not prevail. The question was put and the amendment was lost.

Answer six was then adopted.

W. M. Rush moved as answer seven, "To license and renew the license of local preachers, and to recommend to the Annual Conference proper persons for admission into the traveling connection, and proper persons for deacons' and elders' orders."

Dr. Rush said that his reason for this was that very frequently it was the case, when a man was proposed to the quarterly conference as a candidate for the ministry, that he was related in some manner to those who were to vote upon him, and that he was elected out of personal regard, without reference to the qualifications necessary to the office of the ministry; and so after he had been in the ministry for years, and displayed an utter incapacity to perform the work which he had assumed, still they were unwilling, from their personal relation to him or regard for him, to take away his license to preach the gospel, which he never preaches.

He desired that district conferences should have the privilege of passing upon these licenses, so that when they go up to the Annual Conferences they may not only be recommended by their intimate friends and relations, but by the laity of the whole district. In his section of country it was the cry to have district meetings for this very purpose.

The chair said: "Suppose we try this for four years, and if the laity then desire it, we can change it. But let it be tried."

Judge Byrd expressed himself emphatically in opposition to innovations of this sort.

Dr. Jones said that his views were once the same as those of Dr. Rush, but when the subject had been discussed he yielded his views and was in favor of the report as it stood.

Dr. McFerrin hoped that they would not take away the right of quarterly conferences.

Dr. W. W. Bennett indorsed the views of Dr. Rush. He said it was what was needed all over Virginia. Preachers should be licensed to preach by at least thirty members, whereas they were now licensed, sometimes, by five, and these, perhaps, the relatives or intimate friends of the candidate.

Dr. Evans did not wish to encumber the district meetings with this. Bishop Andrews said: "I want to know what the quarterly conference is to do if you take this away from it. It can't live long if it has nothing to do. If you establish these district meetings, and give them all the power, you will kill the quarterly conferences."

Dr. Boswell said that he had been opposed to the amendment, for the reasons which Bishop Andrews had stated, but he felt obliged to say that Drs. Rush and Bennett had converted him. The facts stated by those brethren, in reference to the present method of disposing

of candidates for the ministry, he had seen operate to their injury the church.

The amendment was lost. The hour for adjournment drawing near, Bishop Jones was invited to address the Conference. He came forward and said: "I very much regret that circumstances make it necessary for me to leave your Conference and your city this afternoon. It would have been a very high gratification to me to have enjoyed your society; especially am I interested in witnessing your proceedings, as this is the first Conference in which I have seen the action of lay delegation, and I confess that what I have witnessed has given me much pleasure. I think I can say that I anticipate, though it is not positively certain, that the laity will be associated with us in the highest legislation of our church. I especially regret the necessity of leaving at this time, since the Committee on Public Worship has invited us to preach. I wish it understood that I do not decline from any other reason, but that I am compelled to be absent on other important business. I hope it will be understood. It would certainly be a pleasure to me to remain and to listen, as I have done, to others of you."

"I desire to acknowledge thankfully the generous hospitality extended to me by the committee, and I wish to acknowledge the official and personal courtesy extended to me as a body, and by a very large part of the Conference as individuals. I think that I can say in behalf of those whom we represent that it will give us pleasure to reciprocate it at any time. I again invoke the blessing of our common Parent and our one Saviour upon the individuals of this Conference and the church you represent. May the blessing of God be and abide with you all. Amen."

The Bishop having taken his seat, Dr. Harris arose and said: "I desire to say that I have spent the last two days with great personal satisfaction. I came here a stranger, acquainted with only two of your body, and they received me as old friends, and I reciprocate the feelings which they expressed; and now in leaving I desire to express to you, and through you to the committee, my profound thanks for the Christian courtesy which you have extended to me. I shall bear it over in mind, and I unite with the Bishop in invoking the richest blessings upon you and upon your church."

On motion of Jesse Boring the session was extended to finish the report. Answer seven was then adopted. P. A. Peterson proposed the insertion of another answer, to be numbered seven—"the District Conference shall have power to elect trustees of district parsonages when it may be necessary."

This was not adopted. Dr. Edwards moved a reconsideration of the vote. This motion did not prevail.

On motion of E. H. Myers all that part of the report referring to district conferences was adopted.

The last paragraph was read, and pending the discussion the Conference adjourned with the doxology, and the benediction by Bishop Jones.

NINTH DAY.

FRIDAY, MAY 13, 1870.

The Conference met at the stated hour. Bishop Paine in the chair. Dr. Barringer conducted religious worship.

The minutes of the last meeting were read, corrected and approved.

Bishop Paine asked that the Bishops be excused from serving on the Committee on the Pastoral Address. He said that it was not usual to put Bishops on such committees, and that they had so much at present on their hands that they could not attend to it.

H. A. C. Walker objected, and wanted some compromise.

J. C. Keener moved to discharge the whole committee.

Dr. Myers said that a pastoral address which does not come from the chief pastors of the church is an anomaly. He was willing to yield to the Bishops, but thought it better to discharge the whole committee.

G. Lester moved as a substitute that the Bishops be discharged from the active preparation of the address, and that it be submitted to them.

Dr. Keener thought that the committee was a novel thing, and that the Bishops had acted with propriety in asking to be excused. He thought the Bishops were fully competent to prepare their own address, and that the appointment of that committee was one of those things that dropped in accidentally, without due consideration. He therefore moved that the committee be discharged.

Dr. Mitchell moved to lay the substitute on the table, which motion prevailed.

A. W. Wilson moved an amendment to Dr. Keener's motion to discharge the committee, and refer the whole matter to the episcopacy.

Dr. Keener accepted the amend-

ment, which was put to the Conference and carried.

A. C. Allen, clerical reserve from the Memphis Conference, in place of G. W. D. Harris; J. D. Giddings, lay delegate from the Texas Conference, appeared and took their seats.

The following reports from standing committees were submitted: Itinerancy, J. E. Edwards, chairman; Report No. 2, as follows:

REPORT OF COMMITTEE ON ITINERANCY. NO. II.

The committee has considered the memorial "of the official members of Trinity station," Richmond, Virginia, asking "for the abolishment of the office of presiding elder, so far as it relates to the larger towns, and the admission of the lay element to the Bishops' Council, as a part of the appointing power of the church," and recommend that the General Conference do not concur in the petition of the memorialists. The paper also signed S. T. Moorhead, Richmond, Virginia, praying a change in the number of appointments allowable in a presiding elder's district, with other changes in relation to administration, has been considered, and the committee recommend non-concurrence on the part of the General Conference.

The resolution signed by F. E. Pitts and L. M. Lee, recommending a change, where practicable, in our circuits so as to embrace four regular appointments, with preaching on Saturday as well as Sunday, with class meetings, love-feasts, etc., has been considered, and the committee recommend that the General Conference do not concur in the resolution.

JOHN E. EDWARDS, Chairman.

On motion of L. M. Lee this report was laid on the table.

W. M. Rush, chairman of the Committee on Books and Periodicals, presented Reports Nos. 5, 6, 7, 8, 9 of said committee, which were adopted, as follows:

REPORT OF THE COMMITTEE ON BOOKS AND PERIODICALS.—NO. V.

Your committee having had under consideration that item in the exhibit of the agent of the Publishing House relating to the New Orleans Depository, would beg leave to recommend that it be continued under the supervision of the Publishing House, so long as it shall be self-sustaining, and may be deemed to be useful to the church by the book agent.

Respectfully submitted.

W. M. RUSH, Chairman.

MEMPHIS, May 13, 1870.

REPORT OF THE COMMITTEE ON BOOKS AND PERIODICALS.—NO. VI.

The Committee on Books and Periodicals report that they do not deem it advisable to undertake the publication of a weekly newspaper as proposed in the resolution of C. K. Marshall and A. M. Shipp, referred to them.

Respectfully submitted.

W. M. RUSH, Chairman.

MEMPHIS, May 13, 1870.

REPORT OF THE COMMITTEE ON BOOKS AND PERIODICALS.—NO. VII.

The Committee on Books and Periodicals having had under consideration that portion of the report of the agent of the Publishing House relating to the Christian Advocate, and also a resolution of F. W. Earnest and others, suggesting an enlargement of the paper to double its present size, and the election of a corps of not less than three editors, report for adoption the following resolutions:

Resolved, 1. That the Christian Advocate ought to be enlarged, and that the enlargement be made so soon as the agent may deem it expedient.

2. That the size of the enlarged form be left to the discretion of the agent, and the editorial management, as heretofore, be under the charge of one editor.

Respectfully submitted.

W. M. RUSH, Chairman.

REPORT OF THE COMMITTEE ON BOOKS AND PERIODICALS.—NO. VIII.

The Committee on Books and Periodicals have had referred to them a memorial from the delegation of the Pacific Conference, in reference to a series of catechisms for the children of the church, and beg leave to refer the memorial back to the General Conference, with the recommendation that it be referred to the Committee on Sunday Schools.

The committee also recommend the reference to the Committee on Sunday Schools of so much of the report of the agent of the Publishing House as relates to the Sunday School Visitor and the proposed publication of a monthly paper for teachers in Sunday schools, and an eclectic catalogue of Sunday school publications.

Respectfully submitted.

W. M. RUSH, Chairman.

REPORT OF THE COMMITTEE ON BOOKS AND PERIODICALS.—NO. IX.

The Committee on Books and Periodicals, to whom the subject of church architecture was referred, have considered the same, and as the result of their deliberations have adopted the following resolutions:

Resolved, 1. That the book agent be instructed to procure, in con-

nection with the book editor, the preparation of a manual on church architecture, adapted to the wants and character of Southern Methodism, both in city and country, and particularly with the view of improvement in the design and construction of houses of worship at comparatively small cost.

2. That the book agent publish said manual, when procured, in a small, cheap volume.

Respectfully submitted.

W. M. RUSH, Chairman.

Reports Nos. 10 and 11 of the same committee were also presented, read and laid on the table for the present. They are as follows:

REPORT OF THE COMMITTEE ON BOOKS AND PERIODICALS.—NO. X.

The Committee on Books and Periodicals have had before them the recommendation of the agent of the Publishing House to publish a monthly periodical combining the features of a review and magazine; and also a resolution offered by P. A. Peterson and E. H. Myers, proposing a monthly combining the features of a religious magazine and a theological and literary review; and also a paper offered by J. P. Ralls and J. Mathews, recommending the publication of a monthly periodical particularly adapted to the youth of the church.

Upon the whole subject thus referred them the committee report for adoption the following resolution:

Resolved, That the agent of the Publishing House be authorized and instructed to publish a monthly magazine, of high grade, to be called The Home Circle, of which an editor shall be appointed, who shall be elected by the General Conference.

Respectfully submitted.

W. M. RUSH, Chairman.

Report No. 11, of the same committee, is as follows:

REPORT OF THE COMMITTEE ON BOOKS AND PERIODICALS.—NO. XI.

Your committee, to whom was referred the communication of Prof. A. B. Stark, editor of the Home Monthly, having considered the same, would recommend that the proposition of Prof. Stark be accepted, and that the book agent be authorized to make a fair and equitable arrangement with Prof. Stark for his interest in the Home Monthly.

Respectfully submitted.

W. M. RUSH, Chairman.

J. Hamilton, chairman of the Committee on Revision, submitted Report No. 4 of that committee, as follows:

REPORT OF THE COMMITTEE ON REVISION. NO. IV.

The Committee on Revision beg leave to offer Report No. 4.

Your committee had under consideration a memorial from the Montgomery Conference respecting local church organizations, and do not judge any legislation is required upon that subject.

They have also considered the resolution referred to them, signed by N. F. Reid, R. W. Murin and W. M. Barringer, proposing a change in answer 3 to question 4, section 11, chapter 3, page 15, N. A., by striking out the words, "last filled by him," and inserting "in which he resides." In this your committee concur.

Also that the word "other," in same answer, before the words "quarterly conference," be stricken out.

A resolution was referred to the committee, signed by W. P. Harrison and W. J. Parks, proposing to add the words, "It shall be the duty of all members of the quarterly conference to attend its sessions, unless providentially hindered," to chapter 2, section 3 and question 1. In this recommendation your committee do not concur.

The committee had before them a memorial from the Baltimore Conference, and also one from the Jefferson station, Trinity Conference, proposing a change in the name of the church, by striking from it the word "South." Both of these papers are reported back to the General Conference, to be considered in Committee of the Whole.

Also a paper signed by the delegation of the North Carolina Conference, proposing that chapter 2, section 5, page 61 of the Discipline be changed, by inserting after the word "care" the words, "or to any other appropriate work, in which he may be useful as a minister of the gospel among us." This paper is also returned to the General Conference, with the request that it be referred to the Committee on Itinerancy.

Also a resolution from the Piedmont station, Baltimore Conference, requesting that the right to nominate trustees to fill vacancies that may occur in boards, may be vested, by specific legislation, in the preacher in charge, etc. Your committee are of the opinion that no further legislation is necessary—section 16, page 19, being sufficiently explicit.

We recommend that the words "in joint" be stricken out of answer 5, to question 2, of the same section (16.)

The paper signed by H. P. Walker and C. W. Miller, proposing a change

in answer 2 to question 3, in section 3 of chapter 2, page 61 of the Discipline, is reported back to the General Conference, with the request that it be referred to the Committee on Itinerancy.

The resolution signed by D. R. McAnally and others, requesting that the catechism be left out of the Discipline, was concurred in.

A resolution from the South Carolina Conference requesting that provision be made for the election of trustees for district parsonages was before the committee, and in compliance with it we recommend the adoption of the following as answer 6 to question 2, in section 16, page 19, N. A.: "Trustees of district parsonages shall be appointed by the district conferences, upon nomination by the presiding elder, and shall be responsible to the quarterly conference of the charge within which the property may be located."

All of which is respectfully submitted.

J. HAMILTON, Chairman.

MAY 13.

Dr. R. S. Moran moved that so much of the report as recommended reference to the committee be adopted, which motion prevailed.

On motion of R. Abbey the rest of the report was laid on the table.

S. Bobo, chairman of the Committee on Sunday Schools, submitted Report No. 2 of that committee, which was laid on the table under the rule. It is as follows:

REPORT OF THE COMMITTEE ON SUNDAY SCHOOLS.—NO. II.

Your Committee on Sunday Schools respectfully submit, as supplementary to Report No. 1, in which a Sunday school secretary was recommended, the following resolution:

Resolved, That each Annual Conference elect a corresponding secretary to represent the Sunday school interests of that Conference to the Sunday school secretary, elected by the General Conference.

S. BOBO.

S. Bobo submitted Report No. 3 of the same committee, and that portion recommending reference to the committee was adopted, and the rest, on motion of W. Shapard, was laid on the table. It is as follows:

REPORT OF THE COMMITTEE ON SUNDAY SCHOOLS.—NO. III.

Your committee submit as their Report No. 3 the following:

Resolved, That we hail with pleasure the accession to our Sunday school text books of the Rev. Dr. T. O. Summers' valuable Commentaries on the Gospels of Matthew and Mark, and recommend their use by our teachers in the preparation of their Sunday school lessons.

Your committee respectfully return to the General Conference the resolution from the Montgomery Annual Conference asking that the Discipline prescribe a method for "organizing and relating the Sunday school to the church," with the recommendation that the request be not concurred in by the General Conference.

Respectfully submitted.

SIMPSON BOBO, Chairman.

MEMPHIS, May 13, 1870.

REPORT OF THE COMMITTEE ON SUNDAY SCHOOLS.—NO. IV.

Your committee have considered the various resolutions referred to them as to the expediency of providing for the election of Sunday school superintendents by the quarterly conferences, and beg leave to report that, in the judgment of your committee, such provision is not at this time expedient.

Respectfully submitted.

SIMPSON BOBO, Chairman.

MEMPHIS, May 13, 1870.

REPORT OF THE COMMITTEE ON THE RELIGIOUS INTERESTS OF THE COLORED PEOPLE.—NO. II.

The Committee on the Religious Interests of the Colored People, presented Report No. 2 of that committee, which was adopted, as follows:

The committee have had under consideration the memorial from Mount Sterling district meeting, in reference to perfecting the organization of the colored people, as provided in the Discipline, and also suggesting a name for said organization; and report that the subject matter of said memorial, except the name, has been already reported upon and adopted by this Conference.

In reference to the name of the contemplated organization your committee are of opinion that they will naturally take the name of "Colored Methodist Episcopal Church South," being the colored members of the Methodist Episcopal Church South, simply set up to themselves. But when said organization is perfected, they will have control of the question of name, as well as of all other matters pertaining to a complete and independent church, and may therefore act in that matter as in their judgment will promote the best interests of the colored people.

Respectfully submitted.

J. E. EVANS, Chairman.

MAY 13, 1870.

J. E. Evans, chairman of the Committee on the Religious Interests of the Colored People, presented Report No. 2 of that committee, which was adopted, as follows:

The committee have had under consideration the memorial from Mount Sterling district meeting, in reference to perfecting the organization of the colored people, as provided in the Discipline, and also suggesting a name for said organization; and report that the subject matter of said memorial, except the name, has been already reported upon and adopted by this Conference.

In reference to the name of the contemplated organization your committee are of opinion that they will naturally take the name of "Colored Methodist Episcopal Church South," being the colored members of the Methodist Episcopal Church South, simply set up to themselves. But when said organization is perfected, they will have control of the question of name, as well as of all other matters pertaining to a complete and independent church, and may therefore act in that matter as in their judgment will promote the best interests of the colored people.

Respectfully submitted.

J. E. EVANS, Chairman.

MAY 13, 1870.

R. A. Young then called for the

report of the Committee on Itinerancy, which was made the order of the day for ten o'clock.

The secretary then read the Report No. 1 of the majority, and also the minority report, as published in our issue of yesterday.

J. E. Edwards presented the original paper, which was read by the secretary.

R. A. Young moved the adoption of the minority report, which motion was ruled down on the ground that the majority report should be considered first.

J. E. Edwards moved to substitute the minority report for the majority on the ground that the majority report referred only to one single aspect of the question, while the minority report covered the whole subject; which motion prevailed.

Dr. Young then arose and said: "I have not offered to make a single speech before this Conference until this morning. The little statement I made on the report of Domestic Missions was intended for Dr. McFerrin. I dare say that some of my best friends will wonder why a young man should begin this debate. I would say that in one respect I may be a young man, but in another I am not. I am in the twenty-sixth year of my pastorate in the Methodist Episcopal Church South. I propose to give the history of this movement at the General Conference held at New Orleans, for the special benefit of the clerical and lay members who were not there, and perhaps did not take the Daily, or have not seen the journal. I propose to give this from memory, as well as I can. There was, at that time, a committee appointed on Change of Economy. A resolution was brought in before that committee recommending an extension of the pastorate—that is, that the Bishop be allowed to appoint a preacher one year at a time, so long as he was seen to be the right man in the right place. We had a discussion on this question at night, and a large majority went for taking out two years and putting in none at all. This is my first point: that after mature deliberation it was by a fine majority that this was carried. The next morning we were wakened up by the fact that there was great dissatisfaction in this regard on the part of some of the superintendents and prominent members of the Conference, who were jealous of the very fringes of Methodism, and they suggested a reconsideration in order to adopt a compromise. I believe it was Dr. Bennett, or one of the Virginia delegates, moved that we put four years instead of two; and that if we moved a reconsideration, and allowed this compromise, it would bring us up to this General Conference, and we could then see what further change could be made. I voted for that because I considered it was done in good faith. They encouraged us to reconsider, that we might see the working of this plan through the coming four years. Westward on the threshold of that time and that hour. If my fifteen minutes are not out, I would ask, Is there any one Bishop who will say that this four year rule has ever hampered him? He is here; let him speak. My friends joked me on the position I then assumed, on the ground that I was comfortably settled in my charge at Tulip street. Edgely was my London, and Tulip street my cathedral. My friend, Bishop McTear, knew all this, and yet at the next session of the Tennessee Conference, notwithstanding all my love for my charge, and comfortable situation, moved me across the river to McKendree church; and the four years' rule did not hamper him at all. I have been encouraged to this movement by men of almost threescore years and ten, by men of large experience and extended observation; and I repeat, if there is a Bishop whom this four years' rule has ever hampered, let him speak. I have been busy myself to see to what extent this four years' rule has been carried out; and, as they allege, has destroyed the itinerant system. I have found some Conferences in which not a man has gone back four years; some in which but one, and in others two. In Tennessee, where we have men trained for the ministry, men capable of staying fully that length of time, there were only two sent back according to the four years' rule. And it is so of other Conferences. If I thought it would ever hamper the Bishops I would vote against it instantly, and I speak sincerely. I think the extension of the pastorate would have a good effect on the education of our young men. I throw this out as a seed-thought, to be developed by men more capable of doing it than myself. I think it would have a good effect on our pastoral work, and throw this out as another seed-thought. It would have a fine effect on us in what we courteously call our studies; and develop the best talent of our church."

Dr. Schon rose and said: "I have no apology to offer for the remarks which I shall make on this vital and important subject. I look

upon it as one of the most important, if not the most important, that can engage the attention of this body. I do not look upon this as a mere nominal change to accommodate the ministry or the people of our church; but as a fatal blow at the very root of our itinerant system. It is by this, and this alone, that we can keep the culminating glory of our church still in view. By its adoption they do that which will uproot the very principles of this system; they will do that which will force us to abandon that which has exerted unbounded influence in aggressive movements of our church. The most prominent feature of Methodism is her diversity of talent in her ministry; and the adaptation of that ministry to the wants of the whole church; and the only system which can ever preserve this mighty power is the itinerant system. Mr. President, it is the pride and glory of my life that I have been connected with that band of heroes who have carried the torch of religion flaming through this wide extended land. This itinerant system has been mine in youth; it is mine when age has frosted my locks, and God grant that it be mine till these bones sleep in the grave of my fathers. This system is the crown of our Methodist Church. Let me mention the working of other systems in other churches. They have tried the settled pastorate for long years, and are now, in some form, seeking to engraft upon their systems this itinerant element. A minister of another church once said to me, 'I had often wondered why and how it is that the Methodist clergy have such a success and power over the minds of the people. But the mystery was at length solved. I had been seeking a place where a Methodist minister had never been. At length, while traveling in a wild, unsettled portion of the country, no road, no path could anywhere be found. I wandered on through this wild waste until at length in the distance I saw the smoke curling from the chimney of a lonely hut. I rode up, fastened my horse, and entered, feeling within me the secret gratification that I had at length reached the object of my search. I spread my books out upon the table, and to my surprise my eye caught a glimpse of a Methodist tract.' Yes, I thank God for the words which he spoke—the Methodist circuit preacher had been there before me! O give us this circuit preacher! Spare us this tree! Hew not down this monarch of the ages! If you do it I shall move to lift a collection to buy a bell, and ring it in the old tower of Methodism, to toll its funeral knell!"

W. A. McCarty said: "I am not an old pastor, as my brother from Nashville; but if he is 'Young,' I am younger, and I will proceed to discuss this question on the theory advanced by one of the friends of Job: 'Great men are not always wise, neither do the aged understand wisdom; therefore I also will show mine opinion.' Dr. Young asked if there was one of the Bishops who could answer that the four years rule had ever hampered him. In my Conference it has hampered them. I know that it hampers the appointing power."

"Another point: it will induce the reading of sermons. It is easier to read them than to preach them, and because he can't preach it out he will read it out. It will operate injuriously on the young men of the Conferences who are on the outposts of the church, and who are not known about the great centers. They say they want a man who can stay it out—one who has reputation and capacity to sustain it through an indefinite period of time. This will keep back the young men until their energies have died out, and age has damped the spirit of their youth. This will not only damage but destroy the itinerancy. Is there a man here who doubts this? (Answer, 'Yes.') Well, I don't know that I will reason with that man. If a man would doubt his own existence, would I go into a logical argument to prove it?"

"When you take away this rule, and allow a man as long as he pleases, and as long as the church pleases, and as long as the Bishop pleases, you have Congregationalism. 'It will destroy the episcopacy. Take an example: Here is a promising man, beloved in his pastoral charge, and bound to a people by ties of relationship and love, and tell me where is the Bishop that would dare to move him? It would take more than the nerve of a man—more than the nerve of a Bishop. People would say we don't want that Bishop. They would say it, too, if perchance he should fix a man upon them whom they were not willing to receive. I repeat it, Mr. President, it will be subversive of the whole economy."

Jos. B. Cottrell said: "I deplore the fifteen minutes rule, as it would require over an hour to develop the argument I wish to advance. The Methodist Church is without a pastorate. To speak of an itinerant pastorate is as absurd as to speak of a square circle—that is, when you mean by itinerancy the arbitrary

power of the committee on Itinerancy, which was made the order of the day for ten o'clock.

The secretary then read the Report No. 1 of the majority, and also the minority report, as published in our issue of yesterday.

J. E. Edwards presented the original paper, which was read by the secretary.

R. A. Young moved the adoption of the minority report, which motion was ruled down on the ground that the majority report should be considered first.

J. E. Edwards moved to substitute the minority report for the majority on the ground that the majority report referred only to one single aspect of the question, while the minority report covered the whole subject; which motion prevailed.

Dr. Young then arose and said: "I have not offered to make a single speech before this Conference until this morning. The little statement I made on the report of Domestic Missions was intended for Dr. McFerrin. I dare say that some of my best friends will wonder why a young man should begin this debate. I would say that in one respect I may be a young man, but in another I am not. I am in the twenty-sixth year of my pastorate in the Methodist Episcopal Church South. I propose to give the history of this movement at the General Conference held at New Orleans, for the special benefit of the clerical and lay members who were not there, and perhaps did not take the Daily, or have not seen the journal. I propose to give this from memory, as well as I can. There was, at that time, a committee appointed on Change of Economy. A resolution was brought in before that committee recommending an extension of the pastorate—that is, that the Bishop be allowed to appoint a preacher one year at a time, so long as he was seen to be the right man in the right place. We had a discussion on this question at night, and a large majority went for taking out two years and putting in none at all. This is my first point: that after mature deliberation it was by a fine majority that this was carried. The next morning we were wakened up by the fact that there was great dissatisfaction in this regard on the part of some of the superintendents and prominent members of the Conference, who were jealous of the very fringes of Methodism, and they suggested a reconsideration in order to adopt a compromise. I believe it was Dr. Bennett, or one of the Virginia delegates, moved that we put four years instead of two; and that if we moved a reconsideration, and allowed this compromise, it would bring us up to this General Conference, and we could then see what further change could be made. I voted for that because I considered it was done in good faith. They encouraged us to reconsider, that we might see the working of this plan through the coming four years. Westward on the threshold of that time and that hour. If my fifteen minutes are not out, I would ask, Is there any one Bishop who will say that this four year rule has ever hampered him? He is here; let him speak. My friends joked me on the position I then assumed, on the ground that I was comfortably settled in my charge at Tulip street. Edgely was my London, and Tulip street my cathedral. My friend, Bishop McTear, knew all this, and yet at the next session of the Tennessee Conference, notwithstanding all my love for my charge, and comfortable situation, moved me across the river to McKendree church; and the four years' rule did not hamper him at all. I have been encouraged to this movement by men of almost threescore years and ten, by men of large experience and extended observation; and I repeat, if there is a Bishop whom this four years' rule has ever hampered, let him speak. I have been busy myself to see to what extent this four years' rule has been carried out; and, as they allege, has destroyed the itinerant system. I have found some Conferences in which not a man has gone back four years; some in which but one, and in others two. In Tennessee, where we have men trained for the ministry, men capable of staying fully that length of time, there were only two sent back according to the four years' rule. I think it would have a good effect on our pastoral work, and throw this out as another seed-thought. It would have a fine effect on us in what we courteously call our studies; and develop the best talent of our church."

Dr. Schon rose and said: "I have no apology to offer for the remarks which I shall make on this vital and important subject. I look

changing of men, swapping of men. Itinerancy, in its best sense, is 'going about doing good.' It is intended to signify aggression upon the outlying world. This aggression is prevented by the fact that preachers have no time to learn the necessities of a neighborhood or tract of country before they are, by the arbitrary rule of limitation, dislodged from their positions; to give place to others. This, too, at an expense which is disastrous, and a most deleterious effect, from the wear and tear of constant moving. A nomadic, ever-shifting, changing ministry—'passers,' not pastors—lacks essential elements of conservatism. Men subjected to it do not take the finest mold and polish; are prevented from receiving the more delicate touches which qualify for the responsible and sacred duties of the pastoral office. It is remarkable that the exceptions to the rule in the law of the church are cases of a more artificial character, where the swapping of men would disrupt nothing. For two professors or two others to swap seats would produce no abrasion of any delicate organism; but for two pastors to swap places calls for a dissolution of ties which may not be formed in a day. The pastoral functions have reference to elements which mingle in the relationships of neighborhood and home; they desiderate knowledge which requires time and diligence. The pastorate is God's order. It is thought that to conform to it will interfere with our episcopal arrangement. We must have it—it is essential to the church of God. If it be found to be incompatible with our episcopacy, then, rather than the church be without what God ordained, let our episcopacy slide. I see no incompatibility, however. It has been said, our Bishops will not have the nerve to carry out the system without the rule of limitation. If that be the case, I pity them. Men who only have God for a master can do their duty. It has been said that unless there be a rule of limitation the men of good appointments would have no chance ever to get the good ones. My observation has been that the men who hold good appointments almost invariably swap with men who have about as good. I have heard a good deal of laudation of our glorious itinerancy from men who practically ignore it. They manage to have their families stay in the same town ten, fifteen, twenty years. After all their protestations, they find their way to the Bishop's room, and are seen to arm presiding elders at the Annual Conferences, quite in contravention to what they so fervently commend. Out upon such simulation. It is said the changing of men is necessary in a frontier country. Why so? What is gained? If a man can plant himself firmly and watch the successive waves of population as they come, he can set his net wisely and gathier in successfully, where a stranger would do little or nothing. The idea of itinerancy is perverted. If it consists in an arbitrary displacement of men by an inexorable rule it is not what obtained at the beginning. But this is the notion, and it is the superstition of the Methodist people—the Nehushtan of our church. Hezekiah, when he became king, found the people worshipping the brazen serpent. He broke it to pieces, and 'he called it Nehushtan—a piece of brass.' Like idolatry among the Baptists and apostolic succession among Episcopalians, we must have our glorious something to flaunt—and without considering what we mean, we say, 'our glorious itinerancy.' The Methodist Church is made by the limitation rule, the least aggressive of any of the churches. The Methodist tree needs a top root. Its lateral roots are fine. Institute a pastorate and you have it. It had a provisional one in the class leader and in the local ministry of former days. They built up the church. When they dropped out, we needed a heaven ordained pastorate. You cannot bring to life things worn out. Do you not try to put new wine into old bottles? You must come ultimately to a proper pastorate.

Dr. A. R. Winfield said: "I do not rise to move the previous question, nor to lay anything on the table. We are ready to discuss this question. My first proposition is this: 1. Itinerancy is at the foundation of our government. It is the standpoint from which to contemplate every important change in our economy. Our church is founded upon this. From the earliest times, that has ever been its leading idea. If Congregationalism had been superior to Methodism, Wesley would never have broken loose from the shackles of the Established Church, poverty-stricken, to found this glorious system which we are living to perpetuate. Religion had been shut up in those cells until its life-blood had left it, and it had grown pale and sickly. The ministry of the Methodist Church is an itinerant ministry, and her itinerancy is the life of her religion.

"2. This removal of all restrictions, whatever the theory, practically abolishes itinerancy. To my

mind it is clear that we cannot reconcile an extended pastorate with an itinerancy. The only question is this: Is Congregationalism better than itinerancy? I will not take it upon myself to decide, but I will say that, by the help of God, we have set the world on fire. The camp fires of a holy Christianity, which have gloamed all along our extended borders, have been lit by the hands of the itinerant ministry. Had it not been for this grand system, Andrew Monroe and those who have gone before him had never carried the standard of Methodism into this, our wide-extended West. We have ever been the pioneer church. We do not wait for feather beds and pillows to revel in luxurious ease. The Methodist itinerant hears the command of his Saviour, 'Go, and he goes.' You talk about the Bishop removing men—I tell you, sir, he will not do it. The preacher may be spunky and the people may back him. Then what are you going to do? He brings you up by challenging your right to do it. Will you tell him that his good brother yonder has fared badly, and that he must go and take his place? No, the Bishop will not, cannot do it. I have been a presiding elder a long time, and have seen the danger of putting men back.

"3. My third proposition: It robs the episcopacy of one of its chief functions—the appointing power—and thus degrades the office, making the Bishop a mere notary for others. They say, 'we only appoint for one year; and then the Bishop can send them wherever he pleases.' He cannot do it. I might refer to a certain Southern city of which an exception has been made, for an illustration of this. I tell you, sir, they will never consent to be torn up from their nests, and thrown out on the rolling waves of an itinerancy, when you build such fortresses, behind which they may rest secure.

"4. It localizes the talent of the ministry for the benefit of the few to the damage of all the rest. Now, there are men of talent, like Dr. Young, who should go through the country. Is it right to give McKendree church all the benefit of his talent, when other churches are calling for it? Methodism must be regarded as one great system, and its great system and its ministers must be common to all. If I should follow out my feelings, I would offer here a resolution to place ourselves completely in the hands of our Bishops. Has it not sent the blush to our cheek to read of our fathers, in the Histories of Methodism in Kentucky and Tennessee, which have just been published—their sacrifices and sufferings, and their devotion to the cause of Christ. Where now is the fire that once burned on the altar of their hearts? Where is that fire of zeal that made them out loose from all their social and domestic ties, and all the relations of life? He that would have the honors and wealth of this world is not worthy to serve in his Saviour's cause.

"5. It is a disguised Congregationalism, and tends to subvert our whole economy. Our church has never demanded it. You know Arkansas has the true spirit of the itinerancy. But Dr. Young was terribly aggrieved by being taken up ruthlessly and carried across the river from Tulip street to McKendree. Truly, that was a terrible affliction!

"6. This plan teaches our people to rely upon the acquaintance with, confidence in, and affection for the preacher, and the social influence growing out of a long pastoral relation, instead of the Holy Ghost. That was a dark night in Methodism when that four years' rule was passed. I was willing to accept it then as a compromise, but I am happy to say that we can get a two-thirds vote on our side at this time. Brother Cottrell talked loud and long, and spoke of the expense which the itinerant system devolved upon the church. When such vital interests are at stake, such notions should not be considered. Twenty years ago I went to Arkansas, a poor houseless wanderer, to preach the gospel of the blessed Lord. They told me I would starve, that I could never live. But I did live, and I am living still, and blessed be God I am here to contend for this great system to which I have devoted my life. I have advertised my property for sale in view of this great measure. I have but two sons, and I will clasp them to my bosom and bid them enter the ranks of the Methodist itinerancy."

The venerable Dr. Pierce then arose and said: "All that I would have said has been said on this subject. I will simply state that I look upon this as a grand crisis in the onward march of Methodism. I was the first delegate to the first General Conference ever assembled, and I have been in every one since. By the mercy of God I am preserved to be present at a new order of a General Conference, where there are assembled an equal number of lay and clerical members. I have perceived that the question under discussion was the leading question of the

church, and my impression is that the change proposed would stand a much better chance to be adopted if there were no laymen present. While I mean no imputation of impurity to any one, I will say that I have never seen a purer set of men than the Methodist preachers of the past. Strange to tell, this movement has been slowly growing and growing, until it has culminated here. If it could be proved to be the best measure for the church—even though I could not see so far into the future as those who advocate this measure—it would be my prayer that it might prevail. My philosophy, my logic, and my experience teach me that the very day you break up this system you disorganize Methodism. The itinerancy belongs to the elements of Wesleyan Methodism. The moment you take out this—you destroy its identity. You can't pass this law without the following. As I speak to you to-day, if this ever prevails, the peace and harmony between the Bishops and ministers will be broken up. Every man who is favorably received into a circuit and station, and gets this fixed into his mind, will think hard of it unless the Bishop signs this bill made up in his mind and in the minds of the people, and it will be heard whispered around: 'I know that man needs that place no more than I.' Let there be a terminus as well as this peculiar privilege. I only wish to say that I have been working under the old rule, of six months to two years, for sixty-six years, and I have done more good than if I had been stationed all that time in one of the churches in the city of Memphis. The object of Methodism is not to accommodate, but it is the universal good. The argument of my friend from Alabama, though I believe he was sincere, was a very specious one; but that of my brother from the Little Rock Conference is the ground which should be taken. You cannot adapt this change proposed equally to the rights and claims of every one. To call this an itinerant ministry would be a miserable nominality."

Dr. J. E. Edwards said: "That minority report covers all that is contemplated in the change, and does not refer, as does the majority report, to a single aspect of the question. But I am no lawyer to pick flaws in the indictment of a commonwealth attorney. I confess that I approach this with no small degree of embarrassment, mainly because I am conscious of my inability, in the hurry of a speech, to discuss fully the merits of this question. I also feel embarrassed in following the Jeremy Taylor of our church, whose opinions with some are almost oracular; and yet I would beg leave to put in a demurrer to what has been said by some of my brethren on that side of the question. I, too, am old in the pastorate. I have been thirty-five years in the itinerancy—in the hands of the Bishops—never having given them occasion to consider thirty-five minutes as to where to send me. What is proposed by the change now before this Conference is the lifting of an arbitrary limitation, without any ulterior design to strike a death-blow at the root of the itinerant system. Let us look at the negative aspects of this question:

"1. It does not encroach, by any organic law or usage of the church, on the episcopacy. It only intends to lift a proviso that shackles it. So far from encroaching upon their authority, it goes to remove the trammels, that they might use men to the greatest advantage of the church. We have been careful to maintain this point. There is no encroachment on their authority. It does not invade their rights to ordain men, or to preside in Conferences, and I maintain, in view of this, that it does not encroach on the episcopacy.

"2. Nor does it encroach on the Methodist itinerancy. 'What,' says one, 'does the chairman of the Committee on Itinerancy propose to abolish the system? Never, never—so help me heaven. I would knock off every trammel and chain and leave the ministry wholly in the hands of the Bishops, to send them wherever, in their opinion, they would best subserve the interests of the church. What is the itinerancy? It is that principle or feature by which members of Annual Conferences are subject to continual change, under the authority of the episcopacy vested in their hands by the General Conference. It does not necessarily follow that a man must be frequently changed in order to constitute him an itinerant minister. If this is so, you violate this in your military posts, in your editors' chairs, in your agencies, and in your presidents of colleges. These still retain the technicality of itinerant preachers, involving a liability to change. That is just where this proposition places us.

"Another negative aspect: It does not contemplate a settled pastorate. What is meant by a settled pastorate? A minister takes charge of a church by contract, and remains until they wish him removed, or until he gets some call which he deems

more desirable. Nothing of that sort is intended. The appointment of a preacher year after year only resembles this by a bare possibility. It is not our intention to fix a settled pastorate."

On motion of Dr. Marshall, Dr. Edwards was allowed fifteen minutes more to finish his speech.

Dr. Edwards continued: "I am obliged to the Conference for the courtesy which they have extended to me, but I see that there is a disposition to throttle me on the part of some from whom I did not expect it. I can do nothing more than merely state my arguments, which amount to nothing in this body.

"My fourth proposition was, that it did not look to a settled pastorate.

"5. It does not contemplate a longer term of pastorate than under the four years' rule, and the average term would be shorter.

"6. It does not invade any divine right. Surely they cannot claim this.

"These are the negative aspects of the question, but they go very far in favor of the proposed measure.

"I will refer to some objections:

"1. They say that it tends to Congregationalism. It is an utter impossibility that it could tend to this.

"2. They say it would operate to the disadvantage of a large class of men in our church. God made men with certain peculiar talents, and it is within the observation of all that a man is drifted about from year to year until a place which he fits exactly is found. He should fill that place, and should not be put off by any arbitrary law.

"3. It is objected that the Bishops would not have the nerve to act. I have never found them wanting in nerve; but they will exercise their honest conviction so as to give the greatest good to the greatest number. The operation of this restrictive law has in some places nearly killed the church. Constructively a man could claim his right to stay, and the object of this measure is just as often to keep him from staying as to send him back.

"A few arguments in its favor. 1. It will give all the advantage of a settled pastorate without any of its disadvantages. Here is a plan that will accomplish this by having a flexible joint in the machine.

"2. By this you furnish additional stimulus to the preacher. Success and demand will determine the position he is to fill, and thus determining, it would give an impetus to his efforts.

"3. It will give permanency to the work of the pastor, which, by the old rule, is frequently left incomplete.

"4. It will more firmly attach the preacher to his people. There are men upon whose hearts the coal of prophecy has been laid; yet, while they believe the Methodist doctrine, they hesitate to enter a pastorate in which they see so little prospect of accomplishing the result of their efforts.

"5. This measure is suited to every part of our country."

Dr. Keener moved that Dr. Edwards have fifteen minutes more to finish his speech, which was granted.

Dr. Edwards continued: "I intend only to say that I have no end to gain by this measure, but I have prayed that God would grant that I might live, just to allow me to enter some field in which I might accomplish the greatest amount of good in my declining years.

"We want a law to protect us, that will not trammel the episcopal authority."

Dr. Bond said: "I have listened to these speeches with not only gratification, but with interest, as a learner of the minds of the church and the condition of its institutions. When I heard the able speech of my friend from Alabama, all the instincts of my nature were aroused; for when I see a brave man withstanding the opinions of those with whom it is to his interest to agree, saying, in reference to old established rules, 'These be not the gods that brought ye up from the land of Egypt,' I honor him. When I see that man, it is with pain that I am not converted to his views.

"I endeavored to find out what was the proposition before the house. At length I caught the idea, and I will give the Conference the benefit of my discovery. There are three systems which fix the relation of ministers to churches. One is the Congregational system, in which the congregation makes an agreement with the pastor. The other two systems are those in which the ministers are assigned by episcopal authority. One of these is the Methodist, the other the Roman Catholic. Both are good, and work well to the end proposed. The question is now, Which shall we prefer? I prefer our own. The result of the proposed measure would be to constitute the Bishop a thorough Pope, and he will be assailed on all sides, and there will be a quarrel every time he assigns a man."

A. S. Andrews said: "I do not think that any subject is so fraught with weal or woe as this. I bear my testimony against the resolution. It will sap the foundation of our

itinerancy. According to our present system the poor have the gospel preached to them, and as the scream of the panther dies out on our borders the song of the Methodist circuit preacher is heard in its place. Again, it tends to destroy the great spiritual element in our church by opening a field for the gratification of worldly ambition and the enjoyment of worldly pleasure. This scheme throws around the preacher the enchanting witcheries of worldly interest, which would set a bad example to the people; and O, I pray you, guard the piety of your people. It will break into the unity of our church. My brethren have laughed at me for my earnestness in this matter. It springs from my love of Methodism. To Methodism I owe all that I hope for here, and all that I hope for hereafter."

Dr. Rush opposed the measure by a few emphatic remarks, directed against the use of the expression "swapping off," by J. B. Cottrell, to designate the itinerancy, which he caricatured in a most eloquent and earnest style.

A dispatch expressing fraternal sentiments was received from the South Carolina Sunday School Convention, in session in Charleston, and the secretary was instructed to forward a suitable answer.

J. C. Denning asked and obtained leave of absence.

T. C. Garland was recognized as having the floor, and Conference adjourned with the doxology, and benediction by the Bishop.

TENTH DAY.
SUNDAY, MAY 14, 1870.
Conference met at the stated hour. Bishop Pierce in the chair.
John Harrell conducted religious worship.
The minutes of the last meeting were read and approved.
Bishop Wightman took the chair, and called for reports from standing committees.

W. M. Rush, chairman of the Committee on Books and Periodicals, submitted the following report, which was adopted:

REPORT OF THE COMMITTEE ON BOOKS AND PERIODICALS—NO. XII.
Your committee, having considered the resolution offered by R. S. Moran, instructing them to inquire into the expediency of publishing a quarterly review for our church, beg leave to report that in their judgment such a publication is inexpedient; and they recommend the missionary secretaries to make a liberal use of the columns of our church papers.

Also, your committee, having considered a resolution offered by Dr. Sallins and others, in relation to a map of the boundaries of the Annual Conferences, beg leave to report that in their judgment such a map is not in sufficient demand to justify its manufacture and publication.

All of which is respectfully submitted.

W. M. RUSH, Chairman.

MEMPHIS, May 14, 1870.
J. Hamilton, chairman of the Committee on Revision, presented Report No. 5 of that committee, which was read and laid on the table under the rule. It is as follows:

REPORT OF THE COMMITTEE ON REVISION—NO. V.
Your committee have had under consideration a paper signed by R. W. Lovett, A. H. Colquhitt and Jas. Jackson, asking that the words "one-fourth of whom may be local preachers," in chapter 2, section 1, and answer 1, page 5, N. A.; and the words "one of whom may be a local preacher," in section 2, answer 1 of the same chapter, may be stricken out. The committee so far concur in this request as to recommend that the first sentence named be so changed as to read, "one of whom may be a preacher."

A paper was referred to the committee, signed by Charles Taylor and H. P. Walker, requesting that at the end of chapter 2, section 7, answer 16, page 71 of the Discipline, the following words be added: "On the removal of any member of his charge to another, to write immediately, informing the preacher in charge of the work to which such member has removed, whether with or without a certificate." With this request your committee recommend non-concurrence.

A paper, signed by P. A. Peterson, Paul Whitehead and D. Arcey Paul, was referred, asking a rule to govern our ministers in celebrating the rite of marriage in the case of divorced persons. With this request the committee recommend that the Conference do not concur.

Also a resolution, signed by J. Edwards and B. Croson, requesting the General Conference to fix a limit within which letters of dismission shall entitle the holders to be received into the church. Your committee think it inexpedient to fix such limit.

A resolution, signed by R. Lane, J. M. Binkley and others, was before the committee, asking that the word "thirty," in part 2, section 5, article 1 of the Discipline be substituted by the word "fifteen." Such change was judged inexpedient.

A paper was referred to the committee, signed by E. K. Miller, T. C. Barton and others, asking for the preparation and adoption of a form for recognition of the church membership of baptized children, and the assumption by themselves of their baptismal obligations. Your committee find this already provided in the rearrangement of the Discipline.

A resolution, signed by A. G. Haygood and T. M. Morriewenther, proposing a change in chapter 2, section 4, page 57 of the Discipline, relative to the call made in quarterly conferences upon trustees, was before the committee, and in its judgment such call is already provided for.

A second resolution, signed by A. G. Haygood and J. Boring, asked an amendment in part 1, chapter 4, section 4, page 127 of the Discipline, by inserting after the word "church" the following: "Persons holding certificates of dismission from our church shall be amenable to the authorities of those churches in which they may reside." Your committee recommend non-concurrence with the request.

The committee recommend that in answer 3, section 5, chapter 6, page 27, N. A., after the words "of trial" the words "suspension or" be inserted. Also that at the close of answer 3 the following be added: "In cases of suspension, the suspended person shall not be restored until satisfactory evidence be given of repentance and reformation, unless the innocence of the accused shall have been made apparent."

A memorial by G. W. Sullivan, of South Carolina, was referred to the committee, asking that the right of appeal be given to laymen, when dissatisfied with the decision of a quarterly conference in a trial. Your committee are of the opinion that the request cannot be granted.

All of which is respectfully submitted.

J. HAMILTON, Chairman.

L. C. Garland, chairman of the Committee on Education, presented the following report, which was adopted unanimously:

REPORT OF THE COMMITTEE ON EDUCATION—NO. I.
The assertion that Methodism is unfriendly to learning, or that at any time it has declined to avail itself of its advantages, is a libel upon a church which was originated within the walls of one of the most venerable and renowned universities of the world—a church whose founder was a man of extensive and varied and accurate knowledge, and who, to the end of his life, did all in his power to improve the intellectual as well as the spiritual status of his followers. Mr. Wesley was a scholar; but, what was far better, he was a holy man of God—a man who, with the great apostle of the Gentiles, "counted all things but loss for the excellency of the knowledge of Christ Jesus his Lord"—a man who knew how to hold learning within its legitimate sphere and to apply it to its proper ends. He was also a reformer of the corruptions and evils brought upon the Church of England by pride and formalism and self-indulgence, and philosophy, falsely so called. As was to be expected, the high, the noble, the worldly-minded, the rich, the sensual, the wise in their own conceit, had no ear to lend to doctrines and teachings like his; and he was forced to turn aside to the humble, the poor, the ignorant and the despised. In this fact we make our boast, for in this he had the imprimatur of the great Head of the Church, who laid it down as one of the infallible marks of his kingdom, "that unto the poor the gospel is preached"—an evidence, this, of apostolicity worthy all the lines of pretended pretentious descent drawn up in the pride and the fancy of pretentious men. And whenever we shall lose the spirit of Wesley—his devotedness to the temporal and eternal welfare of the poor—when ever we shall so modify his system as to fail to thrust out into the work of the ministry godly men, men of one business, and that the business of spreading scriptural holiness throughout these lands, and carrying the gospel, in its simplicity and purity, to the door of every man who will hear it—we shall have lost one of the features of our conformity to the apostolic church, and you may then write "Ichabod" upon all the institutions peculiar to Methodism.

Whilst, then, from the force of circumstances, Mr. Wesley's followers were drawn chiefly from the ranks of lower life, and were, for the most part, poor and unlearned—and while he preached to them nothing but the gospel in its utmost simplicity, and determined to know

(Continued on fourth page.)

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, MAY 28, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—Rev. J. C. KEENER, 112 Camp Street, New Orleans, La.
AGENTS—All the members of the patronizing Conference.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

TO SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, REGISTER the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

THE GENERAL CONFERENCE.

GENERAL CONFERENCE ROOM,
Memphis, May 17.

The report of the Committee on Education, No. 2, was read by its chairman, Dr. Garland, on yesterday. It embraces the recommendation to establish a theological institution to be under the immediate supervision of the Bishops. This inaugurates a movement which many of the friends of the Conference colleges oppose upon the ground that it will take away from those institutions much valuable patronage; that the presence of young men who are preparing for the ministry is highly salutary to the discipline and moral atmosphere of a college; that, on the other hand, the young men derive much advantage from being educated in company with those who are afterward to be the ruling citizens of the country—its lawyers, doctors, politicians, farmers and scientific men; that the distribution of young men studying for the ministry controls, to a considerable degree, their ultimate choice of the fields where they will be found after graduation. If they are sent too far from home they will not come back to stay; that the cost of sending young men to a central institution would nearly pay the expense of a year's board. The discussion is not upon whether there shall be an educated ministry, or one trained theologically, but whether this training shall be given at one point or at several. The last General Conference recommended that a biblical department should be established in each of our church colleges.

The speaking upon this question we never heard surpassed anywhere. Drs. Winfield, of Arkansas, Marshall, of Mississippi, Shipp, of South Carolina, Prof. Garland, of Memphis, Gen. Colquit, of Georgia, Dr. Craven, of North Carolina, Drs. Green and McFerrin, of Tennessee, and Andrews, of Mobile, presented the theme in all its phases, and poured light upon it from every side. One could scarcely vote in the dark after such able arguments; but the very excess of light was somewhat confusing. We found ourselves almost convinced by the speech of each speaker, and in such a state of mind the disputant who had the last word certainly had no little advantage.

While I write this subject is up, and the vote has just been taken, and the minority report adopted, thereby determining in favor of theological departments over one central theological institution. This

discussion occupied nearly the entire morning.

NEW CONFERENCE.

The report of the Committee on Boundaries, though rather a dull document to the audience, is an intensely interesting one to the members of a General Conference. The disturbance of the limits of an Annual Conference concerns immensely both the preachers and the people of that territory. The gradual development of churches and of pastors has strongly bound them together by ties the most precious and sacred. It is a pity there should ever arise a necessity for any change that should disturb those relations. But in the gradual growth of membership, the opening of new routes of travel, and the increase of communication between districts which were formerly separated by broad streams and mountain chains, the original condition of things has been essentially altered. And it is in accordance with the genius of Methodism to suit itself to things as they are—to keep up with the movements of commerce and population. Every General Conference has therefore to review the lines of the entire work.

The tendency of all these alterations is toward making State lines Conference lines. This cannot be done yet, but we think that eventually the several Conferences will lie altogether in the bounds of the several States where they are located. Yesterday it was decided to make a North Mississippi Conference, dividing the whole State by a line running two counties above the line of the Vicksburg and Meridian road; a North Alabama Conference was formed, taking in all the State north of an east and west line running about ten miles north of Greensboro; a Western Conference, taking in all regions toward the Pacific, starting from the Western Missouri Conference line not included in other Conferences; a Los Angeles Conference in the southern part of California; and an Illinois Conference embracing the State. The Louisiana Conference remains as heretofore.

THE ELECTION OF BISHOP.

We anticipate the regular order of General Conference proceedings by publishing below the balloting on the election of Bishop Keener, and also an account of the ordination, which took place on the twenty-second instant. We congratulate the church at large more than the doctor himself on his promotion to the episcopacy. In common with all the readers of this Advocate, we hope that he will continue to be seen in the conduct of the paper for a long time to come.

At the instance of Dr. E. H. Myers the chair called the Conference to prayer—led by the venerable Dr. Lovick Pierce.

W. H. Potter, D. Ball, P. A. Peterson and J. W. Whipple were appointed tellers. The result of the ballot was as follows:

John C. Keener.....	55
James A. Duncan.....	51
John B. McFerrin.....	17
N. F. Held.....	1
A. L. P. Green.....	4
John H. Linn.....	4
E. E. Wiley.....	4
E. A. Morris.....	4
W. P. Harrison.....	3
John S. Martin.....	3
R. H. Myers.....	3
Andrew Hunter.....	3
David R. McNally.....	3
E. Reister.....	2
Jesse Boring.....	2
T. O. Summers.....	2
S. S. Roszell.....	2
C. F. Deems.....	2
J. C. Granberry.....	2
E. W. Schou.....	2
W. V. Tudor.....	1
O. R. Blue.....	1
W. H. Anderson.....	1
J. S. Key.....	1
F. A. Wood.....	1
O. Fisher.....	1
T. M. Finney.....	1
W. H. Potter.....	1

The whole number of ballots was 183; necessary to a choice, 92. No election.

The second balloting resulted as follows:

John C. Keener.....	97
James A. Duncan.....	84
J. B. McFerrin.....	6
J. S. Martin.....	5
E. W. Schou.....	2
C. F. Deems.....	1
S. Reister.....	1
O. R. Blue.....	1
A. Hunter.....	1
W. F. Held.....	1
W. P. Harrison.....	1

The whole number of ballots was 187; necessary to a choice, 94. No election.

The hour of adjournment being near, the time was extended.

The third balloting resulted as follows:

John C. Keener.....	98
James A. Duncan.....	89
John S. Martin.....	1
John B. McFerrin.....	1
J. A. Hunter.....	1

The whole number of ballots was 184; necessary to a choice, 92. John Christian Keener, having received a majority, was declared duly elected a Bishop of the Methodist Episcopal Church South.

On motion of N. A. Cravens the vote by which adjournment *sine die* was fixed for Monday, May 23, was reconsidered, and, on motion of L. M. Lee, the resolution fixing the day of adjournment was laid on the table.

W. B. Wood, lay delegate from the Tennessee Conference, W. M. Leathers, lay delegate from the Kentucky Conference, W. E. Cocke and W. T. Rucker, lay delegates from the Pacific Conference, asked and obtained leave of absence.

Bishop Paine announced that the Bishop elect would be ordained on Sunday morning, May 22, in the Second Street Methodist church, after sermon by Dr. Lovick Pierce. Conference then adjourned with the doxology, and benediction by the Bishop.

ORDINATION OF BISHOP KEENER.

The ordination of John Christian Keener as a Bishop of the Methodist Episcopal Church South took place in the Second Street Methodist church, Memphis, Tennessee, May 22, 1870.

The ordination sermon was preached by the venerable Lovick Pierce, D. D., on Second Timothy, iv, 1-5. The collect was read by Bishop Andrew, the epistle by Bishop Pierce, and the gospel by Bishop Kavanaugh.

The Bishop elect was presented by J. Hamilton and N. A. Cravens. The address to the congregation was read by Bishop Wightman, the prayer succeeding by Bishop Marvin; the examination of the Bishop elect was conducted by Bishop Paine; the *Veni Creator* and accompanying prayer by Bishop Doggett.

Bishop Paine proceeded with the service—all the Bishops present, with J. Hamilton, N. A. Cravens and O. Fisher united in laying on of hands. The prayers following the presentation of the Bible were read by Bishop McTyeire; and after the doxology the benediction was pronounced by Bishop Paine.—*General Conference Daily*.

LATEST NEWS.

The following are the latest dispatches from the General Conference:

MEMPHIS, May 25.—The Methodist General Conference to-day selected Louisville as the next place of meeting, and the following named officers were elected: Book agent, Dr. Redford; editor of Monthly Magazine, Dr. W. P. Harrison; secretary of the Board of Missions, Dr. J. B. McFerrin.

The editors of the various church papers were re-elected. The salaries of Bishops Andrew and Early were fixed at \$2,500; the salaries of other Bishops at \$3,000 per annum.

MEMPHIS, May 25.—The Methodist Conference adopted the report of the Committee on Episcopacy in reference to the veto power of Bishops.

NEW PUBLICATIONS.

ONLY A GIRL, OR A PHYSICIAN FOR THE SOUL. A romance from the German of Wilhelm von Hellern. By Mrs. A. S. Wister. Philadelphia: J. B. Lippincott & Co. 1870.

Well bound and neatly gotten up; about 350 pages. From Albert Eyrie, 130 Canal street, New Orleans.

LIPPINCOTT'S MAGAZINE FOR JUNE.—A most interesting number. The article, "The Revolution at the South," is devoted to the condition and prospects of the negro race. The author is not free from error, but takes a moderately fair view of the subject for a Northern man.

THE GALAXY FOR JUNE.—We have noted several articles of great interest. "Senator Wilson and Edwin M. Stanton," by J. S. Black, is pungent and abundantly conclusive. "Ten Years in Rome" continues to bring to light the hidden things of darkness.

Is not bringing up your children with bad habits, ruin will come, and your tears and prayers to God will be unavailing. But bring up your children with good habits and in the fear of the Lord, and he will bless you and your children, to the third, aye, to the tenth generation.

The real lack in all systems of religion based upon nature or reason, as opposed to revelation, like the ancient Hellenic paganism, is their utter failure to afford comfort and strength to mankind in the hour of weakness, trial and sorrow.

(Continued from third page.)

among them nothing but Christ and him crucified—yet his journal, his positive declarations upon the subject, and his establishment of schools, show that he felt at heart a deep solicitude for the intellectual as well as the moral elevation of his people. And the very system which he adopted for this end has been perpetuated and modified and enlarged by his followers in England, until the intellectual status of the church is not inferior to that of any other, and until Methodism in England has become a social and moral power, respected and felt throughout the realm.

And just so it has been in America. The simple, heartfelt, experimental, self-sacrificing religion we preach, has never been, and will never be popular with the world. Our mission was at first chiefly to the middle and lower orders of society. We followed emigration to the very verge of civilization; and preached the gospel in the remotest and darkest corners of the land. But our founders were not unmindful of the intellectual condition of those whom they had brought to the foot of the cross. Though not very successful in this line of effort, yet Bishop Asbury attempted the establishment of schools. Not long after his time the church became more deeply sensible of the power of education either to evil or to good, and waked up more fully to the necessity of educating her own sons and daughters, if she would keep them in sympathy and union with herself. Our Methodist children were educated at institutions either under the direction of other denominations of Christians or under the direction of the State. In the former case they were drawn away, but too often, into the communion of those by whom they had been fostered, and in the latter into the ranks of the ungodly and the profane. It thus became, as it continues this day to be, a solemn and imperative duty laid upon the church to educate its own youth. In the discharge of this obligation, colleges have sprung up to the number of about forty within the bounds of this General Conference. It is even questionable whether we have not overleaped our object and inflicted an injury upon the education of the church by multiplying our colleges to an extent which has prevented us from making any one of them as complete and useful as we might desire it to be. A half dozen judiciously located institutions of learning, having concentrated upon them the money and patronage which have been distributed among the forty, would have served our purpose better—have given a higher character to the education of the church and have met more perfectly the demands of the age. If the number cannot now be reduced, let the church take warning from the past, and in the future avoid increasing the evils arising from this source by declining to erect additional colleges, excepting where they may be absolutely required; and to repair the mischief already done, let it address itself with earnestness and energy to the proper establishment of the institutions already under its patronage.

We have read with gratification the reports sent up from a number of the colleges under the patronage of the church. We feared that, amidst the wreck and ruin brought upon the country by the devastations of war, none of our institutions were at present self-sustaining. But the facts in regard to several show that they are out of debt and are carrying on their operations without the creation of new debts. Yet those in the best condition are sorely suffering from the want of funds to enlarge their capacity for usefulness. We trust the liberality of our people will furnish the requisite amounts speedily.

But what has given us most gratification is the moral and religious condition of our schools. It was reported of one of them that it had never passed over it a single year without a revival of religion, and that of the students who had entered it, from the first of its operations until now, about two-thirds had been converted to God, and had led lives consistent with their religious profession. No wonder the faculty had never, since the reopening of its halls after the war, had occasion to enforce the discipline of the institution by the suspension or the dismissal of a solitary student. And in this regard the institution referred to is not singular, for, without exception, a like satisfactory condition is reported from all the other institutions heard from.

We dare say that specific reports from our other institutions, had they reached the committee, would have shown the most of them, both male and female, to be in a like state of moral soundness and usefulness. What clearer evidence could we demand of God's approbation upon our efforts to train up in his nurture and admonition the children of the church? Is not our educational enterprise in this its most important aspect, to wit: the preservation of the morals and the

development of the Christian sympathies of the young, a great and glorious success?

It is amazing that our people do not consider these facts in their true significance; and that so many of them persist in patronizing institutions of learning where the principles of their children are corrupted and their habits vitiated, or where, if their morals are preserved, they lose their sympathy for the church of their fathers. This must be because of a supposed superiority in the educational appointments of the institutions they patronize. If such be really the fact, the deficiencies in our own institutions ought to be removed, and they ought to be elevated in character until our people shall prefer to patronize them, over any others in the land. It will not do, in the support of our institutions, to depend upon the sectarianism of Methodists. The truth is, they have too little of it—too little of that sectarianism which loves the church for the church's sake. Far better would it be for the institutions of the church if we had more of this spirit of sectarianism among us. If we loved the Methodist Church more, because it is our church, we would rally around its institutions and support them, despite of any deficiencies that may be temporarily attach to them; and in that case, through unity of effort, such deficiencies would be most likely to be speedily removed.

Again, our people who patronize other institutions rather than their own, cannot be sufficiently impressed with the fact that an education is purchased at too dear a price, when that price is the wreck of moral character or the loss of the Christian sympathies of early life. What thanks does a father owe to an institution of learning that returns to him his son, it may be, with all its blushing honors thick and fresh upon his brow, and yet that son a profligate?

Never was there a greater mistake than that which is becoming so prevalent at the present day, that more intellectual culture is of itself adequate to exalt the virtue and secure the happiness of a people. It was never so at any period of the world. The contrary is susceptible of the clearest proof from the history of our race. In all nations the periods of greatest literary distinction have been the periods of greatest moral corruption; as witness, the Pederstian age in Greece, the Augustan age in Rome, the Elizabethan in England, the Republican in France, and the present in America. Education was never more widely diffused throughout the United States than now. Never was there more ado about it. Never were institutions so multiplied. Learning was never more highly valued and sought after as a means of redneing the laws of nature, and the properties of matter, to human control, and contributing to national and individual wealth and power. And this education, has not been wholly from under the control of Christianity. It has partially felt its restraining influence; and yet, with this partial restraint upon its natural tendencies, what is the result? Has the virtue of the people increased with their knowledge? Are our public men more patriotic, more self-denying, more honorable, more true to compacts, and more trustworthy than they were fifty years ago? Are the morals of the people improved? Is there less of crime and lawlessness in proportion to population? Alas! to all such inquiries there comes up a negative response which is well nigh universal. And yet education is, with a vast number of persons, the agency which is to bring us to the perfectibility, so-called, of our nature, and the question, in some sections of the country, is even raised of exalting education by totally divorcing it from religion. Fatal delusion, this! And, if it prevails, education will have become the Moloch upon whose altars will be sacrificed the spiritual and eternal interests of our posterity. And that Methodists should prefer for their children an education which is out of sympathy with all forms of Christianity, or, if not so, which is at least unfriendly to their own religious principles and polity, is a folly we did not expect, and for which we know not how adequately to account. Be it, therefore,

Resolved by this General Conference, 1. That it is the duty and interest of Methodists to maintain and patronize the educational institutions of their own church.
2. That as far as we have knowledge of the institutions of the church by specific reports, they are all eminently worthy of the confidence and patronage of the people.
3. That where there is any inferiority in an institution of the church, compared with other institutions of like grade, arising from the want of libraries, apparatus and cabinets of natural history, or from the small number and incompetency of its officers, such cause of inferiority ought to be removed as speedily as possible by a supply of funds adequate to furnish it, and to maintain an efficient corps of officers of acknowledged ability.

4. That it is more important to the educational interests of the church to place in good working order the institutions already under its patronage than to found new ones.
5. That an unsanctified education is a curse rather than a blessing, and that the authorities controlling the education of colleges should be careful to employ all means by which may be maintained the religious character of our institutions, which, for the most part, is so satisfactory, and for which we express our devout thanks to almighty God,

without whose special blessing nothing valuable can be accomplished.

All of which is respectfully submitted.

L. C. GARLAND, Chairman.

J. Boring, chairman of the Special Committee on Orphans' Homes, submitted the following report, which lies over under the rule:

REPORT OF THE SPECIAL COMMITTEE ON ORPHANS' HOMES.

The special committee appointed to consider the subject of homes for orphans, beg leave to report that they have investigated the subject as thoroughly as the circumstances would allow, and are fully persuaded of the truth and profound importance of the following propositions:

1. That the word of God declares it to be a perpetual arrangement of divine Providence that the poor shall always abide among us.
2. That the highest obligations of duty to God, as well as to our fellow-men, require us to make provision for the welfare of the helpless orphan and indigent widow, and the faithful discharge of this high trust is one of the sources of the richest consolation possible to human experience.
3. That the early church was careful to discharge this duty, and for several centuries succeeding the apostolic age the widow and the orphan were regarded as subjects of special interest, to be provided for, temporally and spiritually, as far as possible.

4. That there is special necessity for this benevolent work at this time.

We therefore recommend the adoption of the following section, to be placed in the Book of Discipline next after the section on missions:

REPORT OF THE COMMITTEE ON ORPHANS' HOMES.

SECTION.—Of Homes for Orphans.

QUESTION 1. What directions are given concerning orphans?

ANSWER 1. Let each Annual Conference, as soon as practicable, establish one or more orphanages, direct, either by purchase, gift or otherwise, to be maintained by the church.

ANS 2. The indigent orphans of our church and congregations, and others when practicable, shall be received into such homes, under the direction of trustees hereinafter provided for, where they shall be cared for, in all respects as in intelligent Christian families—they shall be as thoroughly educated as practicable, trained to business and habits of industry and useful pursuits, and, as far as possible, qualified to become useful members of society.

ANS 3. When an Annual Conference shall determine to found a home for orphans within its bounds, it shall appoint a board of trustees, consisting of six traveling preachers from its own members, and six laymen who shall be members of our church, and twenty-one years of age.

ANS 4. The trustees shall hold all the property, real and personal, of such home, in trust for the Methodist Episcopal Church South, for the purpose hereinafter specified; shall manage, direct, and when proper, sell or otherwise dispose of the same; shall appoint a superintendent, matrons, teachers and such other officers and subordinates of the institution as may be necessary, and shall superintend the conduct and management of the same. They shall also determine the number of orphans to be received, and decide between applicants when there are more than can be admitted; and they shall also determine the time and mode of discharging such orphans.

ANS 5. The trustees shall not put out to service any orphan or other child who may have been admitted into said home; but they may make such business arrangements for said orphans, when they shall have attained proper age, as may be deemed best for them, retaining the guardianship and oversight of the orphan pending such business arrangement.

ANS 6. Before proceeding to establish a home for orphans, the trustees shall, if practicable, procure from the proper authorities of the State in which it is to be built, a charter or act of incorporation for such home.

ANS 7. The board of trustees shall adopt their own by-laws, and conduct the business of the home, subject to the limitations and restrictions herein specified, and shall make a full annual report of the institution to the Conference in session.

ANS 8. The trustees shall be amenable to the Annual Conference, and shall nominate persons to fill vacancies in their board, subject to confirmation or rejection by the Conference.

ANS 9. Whenever an Annual Conference shall make the request, it shall be the duty of the presiding Bishop to appoint a special committee to visit and report upon the orphans' home within the bounds of said Conference.

ANS 10. In case any Annual Conference may not be able to establish a home for orphans, it may, at its discretion, confer the same upon any unite for that purpose, upon such terms as may be agreed upon by themselves.

JESSE BORING, Chairman.

H. A. C. Walker and W. H. Fleming offered a resolution proposing a change of the Discipline. Referred to the Committee on Revision.

Another proposing changes of Ritual. Referred to the Committee on Ritual.

J. E. Evans and S. Anthony offered a resolution on the trial of a Bishop. Referred to the Committee on Revision.

J. E. Evans and J. S. Key offered a resolution on the support of Bishops. Referred to the Committee on Finance.

J. E. Evans presented a memorial from the Colored Georgia Conference of the Methodist Episcopal Church South, which was read and ordered to be printed.

M. S. Andrews and others offered a resolution on the hymn book and Discipline, which was read and referred to the Committee on Books and Periodicals.

J. C. Keener offered a resolution on class meetings, which was read and referred to the Committee on Revision.

H. H. Montgomery and R. Abbey offered a resolution on the trial of traveling ministers. Referred to the Committee on Revision.

A. R. Boon and A. B. Fly offered a resolution on change of the Discipline. Referred to the Committee on Books and Periodicals.

G. Jones and T. L. Boswell offered

(Continued from fifth page.)

simple story of the cross uttered through unpolished lips, yet coming from a full and glowing heart and in dependence upon the Spirit of divine grace, will find its way to the consciences of men, and under its power sinners will be convicted and converted, and through the instrumentality of such an one there will be added to the church such as will be saved. Such were many of the most useful members of our church a century ago. And yet no one can doubt that the usefulness of these men would have been enlarged by proper intellectual culture. As in our first report was stated in another connection, our population at that period was for the most part, unlettered. The literary attainments of these ministers, though small, were in advance of those of the people to whom they preached. There were but few cultivated tastes to offend by false grammar, or rhetoric or elocution. But even at that time these holy and successful ministers of God lamented their lack of knowledge, and they endeavored to repair their deficiencies as, under the circumstances, they best could. The young ministers were required to travel under their seniors, that they might be directed in their studies and incited to diligence.

In the progress of the church it lifted up its membership to a higher social position, and took hold upon the most refined classes of society, so that there was created a demand for ministers not less simple-hearted and earnest and devotedly pious, but more cultivated and refined, that they might not drop below the level of the laity in this respect, and become scorned, in part, of the power they had exerted over them. The church recognized this demand and proceeded to supply it by adopting enlarged courses of study to be prosecuted by the candidates for the several orders in the ministry. But it was found necessary to exact from candidates some previous scholastic training in order to the successful study of these prescribed courses, and to the quarterly conferences was intrusted the examination of candidates upon the elementary studies of an English education. That much good was effected by these measures cannot be denied. Enough was accomplished to show the efficiency of the system if it were judiciously applied. It failed chiefly in that part intrusted to the quarterly conference, which did not exact from the candidate the amount of mental development requisite for the successful prosecution of his future studies in the midst of the burdens and responsibilities of a minister assigned to full work.

The church then adopted the policy of erecting colleges for the general liberal education of its youth, indulging the hope that from among those thus cultivated it would please the Holy Ghost to call many into the ministry. In this hope the church has not been wholly disappointed. Look over the Conferences and you will find many graduates of our colleges in the ranks of the ministry, and they are generally our most prominent and useful men. They, by virtue of their previous culture, could, when they were received on trial, do the full work of preachers, and at the same time master the prescribed courses of study. They are the exponents of the utmost usefulness of the plan adopted by the church when it is rightly applied, and they prove the plan to be a good one. But no doubt out of the ranks of our educated youth God has called to the ministerial work many more than have responded to the call. The career opened up before our educated young men, by the professions, are so brilliant and inviting, and harmonize so perfectly with the carnal aspirations of our nature, that it requires an unusual measure of grace in our educated youth to withstand the temptation, and to induce them to forsake all for the self-denying and laborious and ill-paid work of the ministry. The divine call is probably resisted by a majority of those to whom it is made, and it is as true in this age of the church as in any former one, that the majority of God's ministers are taken from among the middle walks of life and from youth of moderate literary attainments. The necessity is, therefore, as strongly laid upon the church as it ever was to educate its ministers. Indeed, it is more so, when we consider the fact that our numerous schools and colleges are daily elevating the intellectual character of our people, and the cry from every part of the work is, give us a more highly educated ministry. We cannot defer longer to meet this demand without disappointment to the people and detriment to our cause. Never, at any former period, had the Methodist Church so strong a hold upon public sympathy; never were its opportunities for usefulness so great as at the present time, and if we had a ministry equal in all respects to the occasion we might go up in the name of the Lord to the possession of the land.

The church, moreover, stands al-

ready fully committed to this work. The principle upon which the education of the Christian ministry responds has long since been accepted by the Methodist Church, and the duty it imposes acknowledged in what the church has already done. There is no diversity of opinion among us upon this point. The only question is, how we may educate our ministers most effectually.

Without disturbing the plan already adopted by this church, which we have stated to be a good one, and which we should not wish to see disturbed, excepting to give it greater efficiency by exacting a better preparation from candidates for the ministry, and by making the annual examinations more rigid, we think the church ought to establish a theological institute under the control of the College of Bishops and officered by our wisest and holiest men, where those called of God to preach may receive without detriment to their piety and zeal a better preparation for the work of the ministry. We would not have attendance upon the training of this institute coerced by making it indispensable to admission on trial; nor would we compel a student attending it to remain any definite period of time. Let it be an opportunity of improvement over and above those now furnished by the church, of which our young men called to preach may avail themselves or not, as they please, and to such extent as they please. But that it may be accessible and useful to all classes of candidates, we would have two courses of study prescribed in it: The one for the mere English scholar, to enter upon which the requirements should be the same with those for admission into a Conference upon trial. This course should not be less extensive than the entire four years' course now proscribed by the Discipline, and being prosecuted under the most favorable circumstances it may be so arranged as to be thoroughly completed in two years. If a student remains and finishes this course, so much the better. If he leaves at the end of one year, or even of six months, to enter a Conference on trial, let him do so. He will, from a stay, however brief, have secured to himself advantages worth much more to him than the time and money he may have expended, and which he could not have procured in equal degree elsewhere or by any other means.

The other course should meet the wants of the classical scholar, who desires to study the Scriptures in their original languages, and to make himself familiar with the whole circle of biblical literature. Admission to this course would demand higher attainments—attainments about such as the graduates of our colleges acquire. Here, again, we would impose no length of residence at the institute upon any one prosecuting this course. He may enter it short when he pleases, and offer himself to a Conference for admission on trial. And we think a course sufficiently extensive may be arranged so as to be completed in three years.

Students completing either of these, we would receive into the ministry just as they are now, and precisely upon the same terms. From the moment of application for admission on trial, up to the hour of consecration to the highest order in the church, no distinctions should be made between these and the candidates who present themselves with the certificates of the quarterly conferences only.

To enter into the details of the organization of such an institute is not the object of this report. Suffice it to say, they are not difficult. The two courses may be made to harmonize, so that the work of both may be done in the time prescribed, by the labor of three men, lecturing twice a day.

To the establishment of such a theological institute the sentiment of the church was committed by the College of Bishops at the last General Conference. In their address they say: "In this connection we specially bring to your attention the importance of an institute for the proper training of young preachers. That we should make some proper arrangements for the more thorough training of our young men before they are received into the Conference and sent forth to minister in the church of Christ, appears to us to be so obvious as to need no argument to prove it." Now, what was the response of the Conference to this recommendation of the Bishops?

"That it is at this time most expedient that biblical schools be established in connection with the colleges which are under the control of the Annual Conferences." The very phraseology shows that this measure was designed as a temporary arrangement, until the times should become more favorable for the establishment of an institute. We had just emerged from the war, and the time was propitious for nothing more than the attachment of a biblical chair to a college. But this action was in acknowledgment of the importance of theological

schools, and a waiver of all objections against them. It was an acceptance by the church of the policy of affording our young ministers the opportunity, in a theological school, of being better prepared for their work. And the measure, adopted as temporary, has been useful. Not a college belonging to the church ought at any time to have been without a chair of biblical literature; and no young man should at any time have left its walls without having been taught, in connection with the study of the Bible, the doctrines and usages of the Methodist Church. We should be glad if arrangements were made whereby every student should attend upon the instructions of the biblical chair. As a mere literary production, the Bible cannot be ignored by any one pretending to a liberal education. And that Homer or Virgil should be daily studied and commented upon, and not the Bible, is perhaps a reflection upon an institution under the immediate patronage of the church. Let the biblical departments already established in our colleges be fostered and supported, and let the establishment of others in the institutions now destitute of them, be encouraged. But we respectfully submit that these chairs do not and cannot meet the demands of the church for an educated ministry.

A respectable theological course of three years' study requires the undivided labor of three or four instructors. Now, we have not a college that is not complaining of the want of funds to enlarge its literary advantages, so as to bring it up in all its departments of learning to a level with those institutions with which it has to compete. Each has found it difficult to establish a single chair of biblical literature. And, for the most part, the labor of but one man has been exclusively applied to biblical instruction. What he could not do in the limited course of study adopted, has been divided out, as best could be done, among the professors of the literary departments.

Is this the theological instruction the church demands? But it may be asked, Why not raise money to increase the number of theological chairs, and convert the biblical department of each college into a bona fide theological institute? The answer is that this would impose upon the church the enormous expense of endowing a half dozen or more institutes when one is all that is required. Then why not take hold of the biblical department of some one of these colleges, and erect it into a bona fide theological institute, by the endowment of three or four theological chairs, and the purchase of many thousand theological books for its library? 1. Because it would be difficult to choose between their rival claims. 2. Because those institutions are under the control of corporate bodies, which, by law, have the exclusive management of them, and who would intervene between this General Conference and the institute of its own creation. 3. Because jealousies and rivalries would exist between the biblical chairs of the colleges and a theological institution attached to any one of them. The students of Emory would not dishonor their alma mater biblical chair by going to Wofford for theology, and vice versa. Those of neither would resort for a like purpose to Trinity or Randolph Macon, and we should never concentrate our youth upon the theological department of any one of them, so as to make a great institution of the church.

We are therefore in favor of establishing a theological institution separate and apart from our colleges, against which the prejudices of the graduates of our colleges could not lodge in any equal degree. If this should break up the biblical chairs of the colleges by attraction to the institute, inasmuch as it would be to transfer our youth to an institution affording greatly enlarged facilities, the church gains by it. But there can be no such effect if the colleges will do what we think is proper to be done, namely, to make every student attend upon the lectures of their biblical professor, in part or in whole. This would insure the biblical chair full work at all times—work, too, of the highest interest to the church. Far be it from this committee to underrate these biblical chairs, or to injure them in the least degree.

This is a matter about which we regret that there was not unanimity in the committee. Up to this point we were a unit. All admitted the necessity of elevating the standard of ministerial education—all admitted the propriety of doing this by schooling—but while the majority considered it best to establish a school exclusively under the control of the General Conference, and upon a scale worthy of the church, the minority prefer to adhere to the several schools attached to the colleges, and on this point propose to present a separate report. We will not do the minority the discourtesy of arguing beforehand the inconsistency involved in the proposi-

tions that a theological school in connection with a college tends to good, but one by itself tends only to evil; and that if there are great benefits resulting from a partially organized and imperfect biblical department of a college, there will be mischief only from an extensive and thoroughly organized theological institute.

We regret exceedingly that the committee could not see eye to eye on this point, as they did upon all others. We should have rejoiced if the Conference could have moved forward with the prestige of unanimity in this great work of ministerial education, which the church is obliged to take hold of and direct for its own advancement.

The truth is, a show of learning to the detriment of our ministry is intruding itself among us. Learning is an element in ministerial qualification so demanded by public taste that there is scarcely a minister who does not affect it more or less, whether he really possesses it or not. Our young men without guides, without the facilities for the acquisition of true learning, are catching at a spurious article, which is of no service subjectively as a means of mental improvement, or objectively in elucidating and enforcing the simple truths of the gospel. It is harmful under any view you can take of it, and we had a thousand times rather have a simple and totally unlettered ministry than one imbued with the superficial and patched up learning of the day. The exhibitions of the pulpit are becoming tenfold more painful by affected learning than by undisciplined ignorance. Neither is desirable, but the latter is vastly more endurable. Now, we must get this vanity and foolishness out of our young ministers. They must know and feel that the preaching of the simple story of the cross, and that in its utmost simplicity and directness of appeal to the consciences and hearts of men, and in sole dependence upon and co-operation with the Holy Ghost, is the only preaching that will prove effectual to the salvation of souls.

We know of no way of ridding ourselves of false learning but by substituting for it the true. And how this substitution is to be effected except by the proper training of the young ministers of the church, and how they are to be properly trained unless placed as pupils under the tuition of the most wise and holy men of the church, is just our comprehension. Be it, therefore, by this General Conference,

Resolved, 1. That our Bishops be requested and authorized to locate and plan a biblical institute for the proper training of young preachers, and to solicit, in the manner which to them may seem most effectual, contributions from all parts of the church for this establishment and endowment of the same.

2. That to secure the identity of this institution with the church, and its operations in complete sympathy and harmony with its organization and policy, the Bishops of the church shall be its trustees and directors. They shall prescribe its course of studies, appoint its officers, assign to them their respective duties, and see that they are rightly and faithfully discharged, a majority of whom shall have full authority to act.

3. Graduation at the institute shall not be made imperative to admission into a Conference upon trial.

4. The graduates of the institute shall acquire no specific rights over the candidates for admission having only the certificates of quarterly conferences. They enter the Conferences by the same mode and upon the same terms.

All of which is respectfully submitted.

L. C. GARLAND, Chairman.

MEMPHIS, May 16, 1870.

On motion of L. C. Garland this majority report was laid on the table until minority report should be read. This was presented by Dr. Cravens, and is as follows:

MINORITY REPORT OF THE COMMITTEE ON EDUCATION.

The undersigned, members of the Committee on Education, being a minority of the same, and differing from the majority on the propriety of inaugurating measures to establish a theological seminary, beg leave to offer the following report:

We are of the opinion that it is inexpedient at this time to take any steps indicating a fixed intention on the part of the General Conference to establish an institution exclusively for the training of young preachers. The opinion of the whole church is very far from being unanimously in favor of such a measure. It is even doubted by many whether such an institution accords either with the interests of Methodism or the teachings and spirit of the gospel; hence to act now, with this divided opinion, and no certainty of success, would certainly be a hazardous experiment. Any resolution or form of words indorsing a theological seminary, neither followed nor intended to be followed by immediate and successful efforts to obtain it, will be unwise and injurious.

If the resolution is simply intended to quiet those who are supposed to demand it, or if it is prepared as a protection for those who are restless under our supposed ministerial inferiority when compared with others, or if it is meant as a silken cord to hold those children of Methodism who are said to be straying away in search of a higher culture; upon either or all the suppositions, as a reason for the passage of the resolution, there would be a seeming want of candor incompatible with the word of God, and something which may be construed into practical subterfuge unworthy any assembly of great and good men.

If, however, the resolution is intended to be followed by immediate and vigorous action, then in our opinion it is injudicious, undesirable and certain of failure. Whether located at some existing institution, or at a place yet to be selected and improved, a large sum of money will be necessary. Such a seminary can have very little, if any, income from tuition, and hence all expenses of founding and maintenance must be provided for by a vested endowment, and a provision for all appliances and faculty will require a larger sum than has been raised for all our schools and colleges since the war. This difficulty is greatly increased by the fact that every Conference already has a load almost too heavy to be borne. It will require a persistent and tremendous effort to prevent the colleges we already have from being crushed by debt, or dying of starvation. We shall need the famed energy of Methodism, aided by enlarged Christian liberality, to have the investments and vantage ground of our literary institutions, and place them upon a basis of collegiate respectability and financial security. We have not a dollar to spare, and no time to lose. We are in far more danger of losing position in the world of letters, caste in society and human efficiency in preaching the word of God from want of first class colleges, than from any present lack of theological suggestions.

We assert, in reply to the suggestion that some persons are thought to be holding large sums in reserve for the purpose of endowing a theological seminary, experience answers with a groan that reserved donations are dangerously slow of movement, and generally bring with them, if they ever come, troublesome conditions and destructive litigation. With an impoverished people, Bishops and preachers badly supported, our sons and daughters to educate, churches to repair and build, and more than thirty colleges, male and female, any attempt to establish a theological seminary would result in inevitable, disgraceful failure.

Nor are we entirely without theological tuition and training. The biblical chairs in connection with our colleges have accomplished more than their friends at the last Conference anticipated. More than one hundred young men, many of them preachers, are now receiving biblical instruction in our colleges, not only with a view to the ministry, but directly upon those books and studies that would be prescribed in a theological seminary. Those young men are exerting an immense influence upon the religious character of the colleges, and will soon come forth prepared to battle for truth upon any field, and rich in the rudiments of a pastoral experience that the students of a seminary exclusively theological would never have any opportunity to acquire. Lot the importunate advocates of the theological seminary wait till the biblical schools have placed their first fruits in the hands of the Bishops; then, if these trained men shall generally fail in the elements of a successful gospel preacher, a proposition for something else will be appropriate.

Finally, we doubt whether anything in the history, and present condition of the church, or in the world of evil around us, has as yet demonstrated the present necessity or propriety of a theological seminary, even if one could be established. The history of such institutions has little that is favorable to Methodism, and much that is adverse. They have been the fruitful source of heresies innumerable, of a manner of preaching not generally desirable and rarely effectual among us, and of unbelief that formalism that never favors experimental religion. Methodism in earnest is the best form of religion, and the best religion, we think. It desires and uses all light and learning, but can only make them effective when they blaze and burn with the Holy Ghost. We would deprecate anything that in the least tends to diminish that zeal and spirituality that have done so much toward making the kingdoms of this world the kingdom of our Lord and his Christ.

Without attempting to anticipate what the future may demand, we offer the following resolution for the adoption of the Conference:

Resolved, That we indorse the action of the last General Conference in reference to biblical chairs in connection with our existing colleges,

as the best available means for training young preachers.

Respectfully submitted,

B. CRAVEN,
E. K. MILLER,
A. H. COLQUH,
T. M. SMITH,
E. W. SMITH,
R. SMITHSON,
CHARLES TAYLOR,
J. R. HOGGERS,
H. G. JOHN,
H. G. HALL.

Judge Byrd moved an indefinite postponement of the whole subject, which motion was lost.

Dr. Hamilton moved to lay it on the table, and make it the order of the day for Friday at ten o'clock. J. E. Evans offered an amendment, proposing an afternoon session to discuss this question, which motion prevailed.

(To be continued.)

WEDDONS' EXCELSIOR LABORERS'

ING WASHING COMPOUND.

No Rubbing Necessary—No Washing Machine Needed.

(Patent granted September 22, 1863.)

REASONS FOR PREFERRING THIS SOAP

1. It is not only the best—but the cheapest yet offered to the public.

2. It may be successfully used in any kind of water—cold or hot, hard or soft.

3. It so modifies the action of boiling water on woollen goods that their texture is not injured under its influence, and the garment is left bleached, soft and as large as originally made.

4. It will not destroy colors; on the contrary, renders them bright and beautiful.

5. The goods do not require any rubbing with the hands, washing or mangle being unnecessary if necessary is soaping, blotting and rinsing.

6. It will not injure the hands; on the contrary, renders them soft and smooth.

7. Without boiling it will bleach clean and white the finest black-reels, laces, collars, cuffs, etc. Simply dampen them in warm water, soap them, place them in a dry vessel until next day, then rinse and dry. This contains very much more rubbing and requires boiling.

We guarantee all the above facts, and will refund the purchase money to any one not satisfied with their trial of the Soap. We also guarantee to pay for any injury done by the Soap, on proof of such injury. It is hardly necessary to inform the public that two-thirds of the wear and tear of clothing results from rubbing, which may be saved by the use of this Soap.

A Liberal Discount to the Trade.

CENTENARY MALE INSTITUTE.

SUMMERFIELD, ALABAMA.

The twenty-eighth annual session of the school will begin on the first Monday in October, 1870, and continue nine months.

The expense for tuition, board, and other incidentals, will be \$25.00 per scholar, for the session, and one-half of the cost of the school, 1870.

Persons wishing to patronize this school may address

1931 2m

Principal, SUMMERFIELD, ALA.

SCHOOLS AND COLLEGES.

CENTENARY COLLEGE, JACKSON, LA.

was established by the State of Louisiana in 1825, and transferred to the Methodist Episcopal Church south in 1845. It is now under the joint patronage of the Mississippi and Louisiana Conferences.

The college exercises were necessarily suspended during the war, but were regularly resumed after reorganization, on the first Monday in October, 1865. The approaching session will open on the first Monday of October next.

Tuition, \$1 per annum, payable semi-annually in advance.

Board can be obtained at from \$20 to \$25 per month.

The buildings, Libraries, Apparatus, Laboratory and Society Halls, the location in point of beauty, health, ease of access and good society, are all unsurpassed by those of any institution in the Southern States.

The past history of the College is the pledge of its future prosperity.

The Board of Trustees, under the able

The Board and Faculty promise the public that nothing shall be wanting on their part to secure the thorough education of the young men committed to their care, in both Preparatory and Collegiate Departments.

W. H. WATKINS, President.

MARTHA WASHINGTON COLLEGE,
 ARLINGTON, VIRGINIA.

As a great part of our patronage is from the Cotton States, we have made this arrangement to meet the convenience of our Southern patrons.

Young ladies remain during the summer. Parents who visit the Virginia springs and mountain retreats see their daughters here. They return to the Gulf States in winter.

College located immediately on the Virginia and Tennessee Railroad, the great

route of travel from New Orleans to New York. Parties passing farther north are invited to call and examine the advantages of this College. It is located ten miles from Emory and Henry College. Brothers go to Emory and Henry, and their sisters to Martha Washington. Both under the wings

ment of the Holston Conference, and under
only colleges under its control. Full faculty
of eight teachers. Write for catalogue to

The location is extremely favorable

The location is every way favorable and facilities ample.
We solicit patronage, and insure satisfaction on all trials.

The image is a very poor quality scan of a document. It appears to be a ledger or a form with multiple columns and rows. A prominent vertical line runs down the center of the page. There are some faint, illegible markings and what might be numbers or letters scattered across the page, but they are not readable due to the low contrast and noise.

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The general market has exhibited still less animation since our last issue, most branches of the wholesale trade showing a manifest falling off in the spring business. Sugar has been extremely dull, with light receipts and no material change in prices, and the sales of molasses have been confined to retail transactions, at previous rates. Western produce has been inactive, with light supplies and only a moderate local demand. Under scant supplies corn has sold as high as \$1.55 per bushel, teaching our planters a forcible lesson of the impolicy of relying exclusively on the Western crop.

The weather has been clear and warm, and our accounts from the interior are generally encouraging. The tributaries are still in fair navigable condition, but the receipts of cotton have shown a marked falling off, indicating the rapid exhaustion of the stocks in the country.

The river is two feet five inches below high water mark.

CORRIGENDUM.—The following are the arrivals since the twentieth instant:

Louisiana and Mississippi bales	4642
Arkansas	453
Mobile	172
Florida	40
Texas	255

Total

5562

On Saturday, although there was some inquiry for the North, yet the general demand was slack, and, with moderate supplies at the ruling rates, most factors asking a fraction above the limits of buyers, the sales were confined to 1,700 bales, at about previous quotations, except in one or two cases in which some concessions were made. On Monday, under the depressing influence of a decline of $\frac{1}{4}$ ¢ at New York, and a reduction in foreign exchange of $\frac{1}{4}$ to $\frac{3}{4}$ per cent, buyers came forward with still less spirit, and the business embraced only 1,400 bales, while the medium and better qualities ruled $\frac{1}{4}$ ¢ lower than on Saturday, good ordinary closing at 20 $\frac{1}{4}$ to 20 $\frac{3}{4}$ ¢, and low middling at 21 $\frac{1}{4}$ to 21 $\frac{3}{4}$ ¢. On Tuesday the market opened with only a moderate inquiry, and buyers claiming further concessions, which factors generally were unwilling to admit. There was consequently only a very limited movement until later in the day, when parties came together more freely, and 2,350 bales changed hands at irregular prices, some transactions showing a decline of $\frac{1}{4}$ ¢, others of only $\frac{1}{8}$ ¢, and others again, mostly strict low middling and the higher grades, no apparent variation. Certain descriptions of spinners' cottons, in fact, could hardly be bought as well as on Monday.

This makes an aggregate for the past three days of 5,450 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 1,084,287 bales, against 773,048 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 726,931 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 344,618 bales to Great Britain, of 112,922 to France, and of 114,713 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	17 $\frac{1}{2}$ to 18 $\frac{1}{2}$
Good ordinary	20 to 21 $\frac{1}{2}$
Low middling	21 $\frac{1}{2}$ to 22 $\frac{1}{2}$
Strict middling	22 $\frac{1}{2}$ to 23 $\frac{1}{2}$

Burned	1317-102350

Stock on hand and on shipboard	114530
--------------------------------	--------

SUGAR.—A limited demand has prevailed since our last review, and the sales on Saturday and Monday were confined to 150 hogsheads Louisiana, most of the receipts at 7 $\frac{1}{2}$ to 8¢ per pound for inferior, 8 $\frac{1}{2}$ to 8 $\frac{3}{4}$ ¢ for common, 9 to 9 $\frac{1}{4}$ ¢ for fair, 9 $\frac{1}{2}$ to 10¢ for good fair, and 10 $\frac{1}{4}$ to 10 $\frac{3}{4}$ ¢ for fully fair.

MONEY.—Gold, 114 $\frac{1}{4}$ to 114 $\frac{3}{4}$ ¢. American silver half dollars, 108 to 109. Mexican dollars at 2 $\frac{3}{4}$ to 3 per cent premium in gold.

The decision of the Supreme Court in favor of the lessees of the mine has caused a remarkable revulsion in the Louisiana Petroleum and Coal Oil Company, which ruled last week at \$70, and was offered on Tuesday at \$55.

City Treasury notes, \$5 to 22.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, JUNE 4, 1870.

NO. 20.

PROCEEDINGS OF THE GENERAL CONFERENCE OF THE METHODIST E. CHURCH SOUTH.

ELEVENTH DAY.—Continued.

Monday, May 16, 1870.

Dr. J. E. Edwards moved to take up Report No. 1 of the Committee on Itinerancy, pending the discussion of which the Conference adjourned on Friday last.

Dr. Garland was recognized as having the floor, and he arose and said: "The position in which I find myself is as novel as unexpected. When Dr. Edwards desired me to sign that resolution, it being in accordance with an opinion formed thirty years ago, I could not refuse, but I considered it as understood that I was not to be brought into the discussion. I thought that as my opinion was formed on this subject thirty years ago, perhaps it was not with all the lights before me; hence I preferred to act as a juror, and not an advocate. But you recollect how the current of the debate forced me on the floor. I am not a debater nor a public speaker. I have been all my life a lecturer in college halls, and hence I feel a degree of embarrassment. Being unaccustomed to speaking, the operations of my mind are somewhat perturbed. Besides this, I am physically feeble, and I am sure that I cannot develop this subject as I would wish. I know of no better way of conducting this argument than by tracing the manner in which I came to the conclusion, thirty years ago, that the restrictive rule of two years worked to the disadvantage of the church.

"I have observed the fact that Methodism has not held its relative strength in towns and cities where once it was the prevailing denomination. Its less in relative numbers has not always resulted from the influx of a foreign population, but in a declension from the church of the children raised up in it. The result must be owing to some cause. That most commonly attributed, and which I accept, is our deficiency in family religion. Though born a Methodist, I was educated among Presbyterians; I have lived a part of my life in refined Presbyterian communities. I have had no other opportunity of coming to a conclusion in regard to the relative status of family religion, between us and the denominations which have partly taken our ground from us, but by a comparison between the Presbyterian and Methodist communities in which I have lived. And this comparison has satisfied me that inattention to family religion is one of our defects. But this is itself only a proximate cause of the declension to which I refer. We must go deeper, and seek for the cause of our neglect of family religion; and I know not to what to refer it but a defective pastorate. What is a pastorate for but to establish and maintain in efficiency family religion? Now that our pastorate is defective is too plain to require argument. It is against the laws of our nature that a comparative stranger can exert upon us the same influence with an old and tried friend. Every Methodist community receives, indeed, with open arms a minister sent to it with the imprimatur of an Annual Conference, but that does not entwine about him our family sympathies. These he has to win in time by association with his people. And before this close sympathy is awakened, he is removed to another field of labor. So, then, we are brought down to the brevity of the pastorate as the cause of its want of effectiveness.

"Another fact has forced itself painfully upon my mind: to wit, that from among the members received into our church, a considerable proportion fall back into the world. Why is this? Does the Holy Spirit act less efficiently among us than among others? Is our gospel less pure and scriptural? Are these parties not soundly converted? We give a negative reply to these questions; and, if time would allow, I could trace this deficiency, as the former one, to an inefficient pastorate. Our church organization has looked to aggression more than to conservation. We have not been too aggressive, but we have not properly cared for the seals the Lord has given to our ministry. But I must hasten on to another defect.

"In the third place I have observed that not a few of our most able and efficient men have been driven into speedy location by this policy of our church. It is an old

saying that "two removes are equal to one burning," and I have myself witnessed painful losses on that score.

"Now, if this analysis is correct in referring these defects to the brevity of the pastorate, should it not be extended unless greater evils would result from the change? And what are the evils to result from the adoption of the resolution as urged by its opponents? We will consider the most prominent ones in order.

"1. We have had many panegyrics on the itinerancy, and upon the institution of Methodism, to which I heartily accord. I drew in the spirit of Methodism from my mother's breast. I am a Methodist by birth, by investigation and by principle. Nor do I yield to any one in my love for the church and her institutions.

"But, besides this, we had prophecies that it would break down the itinerancy. Prophecy is no argument. The ground of the prophecy may be an argument, but the assertion is not.

"2. It has been said that the resolution breaks down the itinerancy. How? The answer is, it fixes a man down for ten, fifteen or twenty years, until he becomes a planted fossil. Now, it does no such thing. It fixes a man for one year only. No man will drive me from that logical position.

"3. It is said that the result will be that the Bishop will appoint, year by year, a man for the period named. Well, grant he does; why does he return him? Because the good of the church requires it; and if the good of the church requires it, where else will you have him placed? To rightly comprehend this matter, we must inquire into the principle that underlies the itinerancy. That principle is the right of the church to dispose of a minister in the manner best calculated to promote the interests of the church. A minister is not to judge of his fitness to serve any particular congregation, nor is a congregation to choose its own pastor. All must be left with the church, and the appointing power must not consult individual convenience nor local preferences, unless in harmony with the interests of the whole work.

Now this principle secures us perfectly against the evil apprehended, which it does by taking this power out of the hands of the people, and placing it wholly in the hands of the Bishops; and why? In order that the general good may override local interest. And, sir, no Bishop has a right to appoint a man to a place unless it is to the best interests of the whole church. It is not whether he can serve any particular church better than any other man; for there is no church but what can be best served by our best minister; the principle is that this man, disposed of to the best interests of the church at large. Now, if it is seen that sending a man back would be against the interests of the itinerancy and the church, the Bishop cannot do it. This brings the whole argument in a nutshell. This is the principle of the itinerancy, and I have not heard an argument that proves that this resolution will at all violate that principle. Indeed, it is in full harmony with it. Nobody loves the itinerancy more than I. But, sir, if itinerancy were to go by the board, I would not give up Methodism. If only congregationalism were left I would take its doctrine of salvation by faith, and all its kindred doctrines, and simple, heartfelt religion, and still expect it to be one of the most favored churches of the land.

"Another argument which they advance is that it acts injuriously on the minister, and makes him a reader instead of a preacher. Now, if he had been there so long that he could not sustain the pulpit, could any Bishop keep him there? Would not that be a proof that the interests of the church required him to be moved?

"Again, it is said that it secularizes a preacher, and he becomes a broker or a trader. Who watch over a minister? Do not the Bishops, and would they not remove a man whenever this should occur? But is this true of congregational ministers? Are they brokers and traders? Are the facts in accordance, at all, with this line of argument?

"Again, it is said by that you would localize talent. It is true, as my venerable friend (Dr. Pierce) has said, that he had done more good moving about than he would have done if stationed in any one place all the time. I have no doubt of it, and for very reason no Bishop would have put him down in perpetuity at one place. But he

might have suffered less inconvenience by moving every four or six years, instead of two, and would have been enabled to show a much more effective pastoral work, although no man, under the circumstances, ever did that work better.

"Another argument presented is that it will embarrass the Bishops. How? This is an assertion, but not an argument. Questions of difficulty come up annually, connected with appointments, as the rule now is; and if the rule were abolished they could not come up more frequently.

"I did not expect from the delegate from Baltimore that for the purpose of effect he would have thrown the advocates of this resolution into such bad company as the Roman Catholics. But let that pass. I thank him, however, in so doing, for an argument that I had not before thought of. Protestants do not hold the Roman Catholic Church to be a true church of Christ. They look upon her as the great Babylonish harlot, and cannot attribute her success to any aid of the Holy Ghost. Her vast development, her tenacity to life, is one of the greatest problems presented for solution. It is worthy of study. Without any of those spiritual aids upon which other churches rely for success, it is the largest denomination in the world. The secret lies in the use of men exactly where they are wanted, and this we claim to be the principle of John Wesley. We only wish to give it flexibility, and adapt it to the wants of the church. The great founder of our religion gave us only general principles, that the Christian religion might have flexibility of adaptation to all climes and people. This is precisely what we want to give to Wesleyan itinerancy. I am not afraid to trust our superintendents with this power. When they fail to discharge with fidelity the proper functions of their office, it will signify but little what our institutions are.

"I thank the Conference for their courtesy in hearing me without limitation of time."

Dr. Hamilton followed Dr. Garland, opposing the adoption of the minority report, and on motion of L. M. Lee he was allowed to speak without regard to limitation of time—a motion of P. A. Peterson to suspend the fifteen minutes' rule during the remainder of the session being lost.

Dr. Lee and Colonel Powell followed in favor of the substitute, and Dr. McFerrin against it. J. B. Cottrell made a personal explanation. On motion of Judge Byrd, the subject was indefinitely postponed.

A. W. Wilson presented a memorial of Reuben Wright on certain unsettled claims on the Missionary Society, which was read and referred to a special committee of five, as follows: A. W. Wilson, J. S. Lithgow, D. K. Pittman, H. H. Montgomery and W. B. Wood.

A motion of W. M. Leftwich to refer all other claims on the Missionary Society to the same committee did not prevail.

Bishop Pierce submitted the report of the commission appointed by the last General Conference to meet a commission of the Methodist Protestant Church to consider the subject of union, which was read and adopted, as follows:

REPORT OF COMMISSIONERS APPOINTED BY THE LAST GENERAL CONFERENCE TO CONFER WITH THE CONVENTION OF THE METHODIST PROTESTANT CHURCH, IN MAY, 1867.

Your commissioners waited on the convention which met in Montgomery, Alabama, in May, 1867, and on presenting their credentials were promptly and courteously received.

The negotiations were conducted with fraternal cordiality and frankness on both sides. They, with the result, have been published at length in the official papers of the church, and so generally read and circulated that we do not consider it necessary to present them in detail.

Though the commissioners did not succeed in effecting an organic union between the two churches, yet they report, with satisfaction, that in official deliberation and conversation the difficulties in the way of organic union seemed to be less than many supposed; and a very respectable number of the convention agreed with your commissioners as to the basis on which an organic union might be effected. The harmony of feeling was delightful to us. We felt that we were among brethren, and our desire to be one with them in organization, as well as in faith, was increased by our personal and ministerial intercourse.

Year commissioners would conclude this report with a recommendation that you adopt the following resolutions:

Resolved, 1. That the fraternal greetings of the General Conference of the Methodist Episcopal Church South hereby be extended to the General Conference of the Methodist Protestant Church now assembled in Baltimore.

2. That the Rev. J. H. Linn, D. D., Rev. S. Kepler and Rev. L. D. Huston, D. D., be requested to wait on the General Conference of the Methodist Protestant Church, now in session at Baltimore, and present the fraternal greetings of the General Conference of the Methodist Episcopal Church South.

G. F. PIERCE,
H. S. MOTTE,
J. E. EVANS,
LEROY M. LEE.

The hour of adjournment having arrived, Conference adjourned with the doxology and benediction by the Bishop.

AFTERNOON SESSION.

Conference met according to adjournment. Bishop Marvin in the chair. Religious exercises were conducted by H. Jewell.

The minutes were read and approved. Bishop Kavanaugh took the chair. The order of the day was suspended to allow of the transfer of the memorial of W. Headen, agent of the Corpus Christi Male and Female Academy, from the Board of Foreign Missions, to which it had been referred, to the Committee on Education.

A motion of Dr. Shipp to postpone the order of the day to Friday next, at ten o'clock, was lost.

The order of the day was taken up, and Judge Byrd moved the adoption of the report of the minority as a substitute for Report No. 2 of the majority of the Committee on Education.

The question was then discussed by Thomas Reed, F. E. Pitts, Chas. Taylor, L. M. Smith, (he being allowed to speak without regard to the fifteen minutes' rule), O. Fisher, A. H. Colquitt, in favor of the report of the minority, and by J. B. Cottrell, E. H. Myers, W. H. Watkins, J. Hamilton and A. L. P. Green against it.

Rev. Allen Wright, of the Presbyterian Church, principal chief of the Choctaw nation, on his way to the General Assembly of the Presbyterian Church, at Louisville, was introduced to the Conference.

Dr. Marshall arose to speak on the question—was recognized as having the floor—when the Conference adjourned with the benediction by the Bishop.

TUESDAY, MAY 17, 1870.

The Conference met at the stated hour. Bishop Kavanaugh in the chair.

Divine service was conducted by N. A. Cravens.

The minutes of the last meeting were read and approved.

Bishop Doggett took the chair.

M. C. Baldrige, lay reserve delegate from the Tennessee Conference in place of John F. House, and J. J. Dement, lay reserve delegate from the Tennessee Conference in place of Watson W. Cooke, appeared and took their seats.

W. M. Rush, chairman of the Committee on Books and Periodicals, submitted Report No. 13 of that committee, which was read and adopted, as follows:

REPORT OF THE COMMITTEE ON BOOKS AND PERIODICALS.—NO. XIII.

Your committee, to whom were referred the memorial of the St. Louis, the Missouri and the Illinois Conference delegations relating to the removal of the Publishing House from Nashville to Baltimore and St. Louis, and also a communication from Logan D. Dameron, president of the Southwestern Book and Publishing Company, upon the same matter, beg leave to report the same back to the General Conference, and recommend that they be considered in connection with the general question.

Respectfully submitted.

W. M. RUSH, Chairman.

MEMPHIS, May 17, 1870.

W. P. Harrison, chairman of the special committee on the revision of the Ritual, submitted Report No. 1 of that committee, which was read and adopted, as follows:

REPORT OF SPECIAL COMMITTEE ON THE REVISION OF THE RITUAL.—NO. I.

The special committee appointed to consider propositions to revise the Ritual beg leave to make Report No. 1.

A paper was referred to us making certain inquiries concerning the faith and practice of the church in regard to rebaptism. This paper, signed by William S. Baird and A.

W. Wilson, requests us to determine whether it is proper for the General Conference to decide the lawfulness of rebaptizing persons in adult age who have been baptized in infancy, and the case of those adults who, having been baptized by one mode, desire to be baptized by another.

Your committee, after due consideration, deem it unnecessary for this Conference to pronounce an opinion upon these subjects.

W. P. HARRISON, Chairman.

MEMPHIS, TENN., May 17, 1870.

Milton Brown, chairman of the Committee on Finance, submitted Report No. 1 of that committee; also a minority report of the same committee—both of which were read and laid on the table under the rule, and ordered to be printed in the Daily. They are as follows:

REPORT OF THE COMMITTEE ON FINANCE.—NO. I.

The Committee on Finance, to whom was referred the various memorials, resolutions and plans on the subject of the support of the ministers, presiding elders and Bishops, beg leave to report and recommend the adoption of the following, viz: Strike out sections 1, 2 and 3 from chapter 9, pages 30 and 31 of the "report of the special committee on the rearrangement of the Discipline," and insert the following, viz:

SUPPORT OF THE MINISTRY.

1.—SUPPORT OF PREACHERS ON CIRCUITS AND STATIONS.

1. Every minister who, by the rules and usages of the church, has a claim on its funds, shall, as far as practicable, have his claim estimated by those who are to pay it, or by an agent authorized to act for them.

2. The stewards of each circuit and station shall meet as early as practicable in the Conference year. The time and place of this meeting shall be fixed by the fourth Quarterly Conference of the preceding year; or, in default thereof, by the preacher in charge. They shall elect their own chairman, secretary and treasurer; provided that the offices of secretary and treasurer may be filled by the same person. It shall be the duty of the board thus organized—

1. To estimate the salary and traveling expenses of the preacher in charge, having due regard to what, in their godly judgment, may be deemed necessary to place him and his family (if a man of family) in such circumstances of comfort and protection as will enable him to serve the church to the full extent of the requirements of the Discipline.

2. To apportion this amount, with the amount necessary to meet the claim of the presiding elder, among the several societies of the pastoral charge, according to their best judgment of the equitable proportion of each.

3. To report their action to the first Quarterly Conference of the charge, which shall approve, amend or recommit.

4. As soon as practicable each steward shall inform his society of the whole amount to be raised on the circuit or station, and what part of it each society is expected to raise. The societies shall adopt their own method of raising this money.

5. The stewards shall co-operate with their respective societies by giving their personal attention, as early as practicable, to the execution of their plans by making quarterly, and when practicable, monthly or weekly collections in each society; by instructing the membership in the scriptural duty of giving as the Lord hath prospered them; and by such other means as may be deemed wise and necessary.

6.—SUPPORT OF PRESIDING ELDERS.

1. The salary and traveling expenses of the presiding elder shall be estimated by the district stewards.

2. The district stewards shall apportion this amount among the pastoral charges of the district, assigning to each an equitable proportion of the whole amount.

3. The boards of stewards of the several charges shall add the sum thus assigned them to the amount estimated for the salary and traveling expenses of the preacher in charge, which shall be collected as a joint fund, and in case of a deficiency it shall be divided among the persons having claims thereon, *pro rata*; first deducting the amount allowed for traveling expenses.

4. They shall report their action to the District Conference, which shall approve, amend or recommit.

5.—SUPPORT OF THE BISHOPS.

1. The allowance of the Bishops for salary and traveling expenses shall be estimated by the Committee on Episcopacy of the General Conference; and they shall apportion the amount to the several An-

nual Conferences, according to their judgment of the equitable proportion of each Conference.

2. The Annual Conferences shall adopt their own plans for raising this money, which shall be called the Bishops' fund; provided, it shall be the special duty of the presiding elders to see that the plans of their respective Conferences be faithfully executed.

3. This fund shall be paid over to the Joint Board of Finance of the Annual Conference; and the treasurer of the board, under the direction of the chairman, shall pay over to the presiding Bishop one-half the amount, taking his receipt for the same; and shall remit the other half to the general book agent, by draft or otherwise, together with the receipt of the Bishop, taking therefor the receipt of the general book agent for the whole.

4. It shall be the duty of the general book agent to divide the money thus received among the Bishops *pro rata*, and remit to them by draft or otherwise, at least quarterly.

5. The general book agent shall report to the General Conference, setting forth: 1. The whole amount estimated for the salary and traveling expenses of the Bishops, and how it has been apportioned among the Annual Conferences. 2. What has been received on the several apportionments, and how it has been distributed. 3. The deficiency, if any; its causes and remedy.

All of which is respectfully submitted.

MILTON BROWN,
Chairman Committee on Finance.
MINORITY REPORT.

I make the foregoing report, as chairman, in compliance with the order of a majority of the Committee on Finance, but do not concur in recommending its adoption, believing that the plan proposed to be stricken out is subject to fewer objections, and is preferable to the one proposed to be put in its place.

MILTON BROWN.

MEMPHIS, May 17, 1870.

C. F. Harvey, chairman of the Committee on Church Music, submitted the report of said committee, which was read, laid on the table for the present, and ordered to be printed. It is as follows:

REPORT OF SPECIAL COMMITTEE ON COLLECTION OF CHURCH MUSIC.

The special committee to whom was referred the resolution to inquire into the practicability of obtaining a collection of church music suited to the various moods contained in our hymn book, have had the same under consideration, and beg leave to report that, after full investigation of the subject, they believe that such a collection of sacred music, as contemplated by the resolution, is not only desirable, but necessary to the general use of those of our hymns written in particular or unusual meters. There is no collection of sacred music, within our knowledge, having merit enough to entitle it to patronage, that contains tunes for all the meters in our hymn book. As our sacred poetry, written in the same measure, expresses the emotions of joy, sorrow and penitence, so should our music be so adapted to the words as to express fully these various emotions of the soul.

We also believe that a collection of tunes suited to revival occasions is very desirable. The knowledge of some of these gems of sacred song is confined to certain localities, while others are scattered in works now nearly out of use and print, and can only be obtained at considerable trouble and expense. A collection in this department alone will supply a want felt by many of our societies, and it will give access to the choicest songs of Zion used in our entire connection. It is believed by your committee that a collection can be made that will not only meet the wants of our own church, but by its intrinsic merits commend itself to the patronage of other denominations. We therefore recommend the adoption of the following resolutions:

Resolved, 1. That a committee of five, residing in different parts of our connection, be appointed to collect suitable tunes for the work contemplated.

2. That the committee shall have power to appoint one of their own number, or some other suitable person to receive and arrange the material furnished for publication, and shall also have power to arrange all details for the successful prosecution of the work.

3. That no original composition or arrangement shall be admitted into the work, until a manuscript copy shall have been furnished each member of the committee, and his approval obtained thereon.

4. That each member of the committee shall furnish every other member with a list of pieces furnished by him for publication, and in what works found, who shall, as soon as practicable, express his approval or dissent to each piece; and it shall require a majority of the committee to any piece admitted.

5. Whenever a collection satisfactory to the committee shall have been made, the general book agent is hereby instructed to publish the same as soon as practicable.

CHAS. F. HARVEY, Chairman.

MEMPHIS, May 17, 1870.

Dr. Shipp said: "Mr. President, four years ago, on motion of Dr. Sehon, a resolution of sympathy in behalf of the Methodist Episcopal Church South, at Columbia, South Carolina, passed the General Conference at New Orleans. All the circumstances connected with the loss of this church and our suffering people of Columbia are most affecting, and such as to commend them to the kindest regards and liberality of all our people.

"We respectfully ask the indulgence of the General Conference to have read at the secretary's table a short appeal setting forth the present condition and wants of Methodism in Columbia, and

shall be greatly obliged if Dr. Sehon or some other friend will reproduce the resolution so kindly adopted four years ago.

The communication was then read. J. Hamilton, chairman of the Committee on Revision, submitted Report No. 6 of that committee, which was read and laid on the table under the rule.

Dr. A. L. P. Green presented a communication from the Rev. P. M. Pinckard concerning certain claims on the Board of Domestic Missions, which was referred to the Committee on Missions.

The order of the day, being the consideration of certain memorials referring to the removal of the Publishing House, was then taken up.

J. S. Lithgow offered a resolution, which was read, and on motion of P. A. Peterson, the Louisville delegation was granted permission to withdraw their memorial, which Mr. Lithgow said he did from "pure motives, and in the fear of God."

The following is the preamble and resolution:

The Louisville delegation, after free consultation and due reflection, unanimously adopted the following preamble and resolution:

Whereas, The discussion of the question relating to the removal of the Southern Methodist Publishing House from Nashville, Tennessee, to Louisville, Kentucky, may result in injury to the church; and in view of the peace and best interests of the entire church; therefore,

Resolved, That we respectfully ask the privilege of the General Conference to withdraw the memorial presented by this delegation to the General Conference for the removal of the Book Concern from Nashville to Louisville.

JAMES S. LITHGOW, Chairman.

MEMPHIS, May 17, 1870.

Dr. Sehon said: "I more wish to add that the entire delegation unite in that resolution; not that we love Caesar less, but Rome more; not from any abatement of feeling on this subject, but because we believe it will result in argument and distraction, and will be more productive of injury than of good."

Dr. Bond said: "I never was good at reading riddles, and never more at a loss than now to read this one. We are told that if this subject is discussed great evils will arise; that notwithstanding their great anxieties on this subject, yet for fear of these evils they withdraw their memorial, which they tell us they do in the fear of God. I wish to know whether the condition of that concern is such that they do not wish to expose it to the church. I have heard of a painted ship with a rotten hull. Now if this is one, and only kept together by a quadrennial varnish, we want to know it, and are not disposed to be put off in that manner. We are determined to know all about this concern. I am sure Dr. Redford wants us to. If it is best to let it stay where it is, then let it stay. If it is best to move it, then move it. But let the brethren have an opportunity to be convinced."

Dr. Green said: "I want to help Dr. Bond out of this difficulty. If you will be so kind as to examine Dr. Redford's report you will find out all you want to know."

Dr. Bond said: "That's the hardest thing of all to unravel."

Dr. Green said: "If you want any inferences, I will say, and I don't care if the reporter takes it down, that so far as the value of that Publishing House is concerned it is worth \$70,000 more than what it is reported at, and I am on the block to answer any questions on this point."

Dr. McAnally requested, in behalf of the St. Louis, Missouri and Illinois delegation, to be allowed to withdraw all papers presented by them in regard to the removal of the Publishing House.

On motion of Dr. Moran they were granted permission.

Dr. Finney said: "Mr. President, I wish to make this public statement of the history of this memorial. This has reference to an adoption of the Southwestern Book and Publishing Company as a publishing house of the church, and those who have given attention will have learned the history, nature and design of that institution."

I wish to state, as a fact, that previous to the assembling of this General Conference our board of directors having learned that some movements would be made toward the removal of the Publishing House, we resolved that we would not and should not initiate such a measure. But, in view of such measures being taken, we were empowered to present this institution to the church on the supposition that this would be an action that would not result in a transient, but a permanent establishment of the house at that point which the General Conference should see fit to place it. We esteem St. Louis to be the greatest commercial emporium within our boundaries, and deem it of vital importance that the Publishing House should be located at that place; and our memorial came in consistently with the history which I have given. Louisville

first, then Baltimore, and then St. Louis. Now as Louisville has withdrawn its memorial, we desire to withdraw that of St. Louis."

A. S. Andrews said: "It seems to me that if we ever look into the propriety of removing the Book Concern, this is the time to do it. If we wait four years longer we may put it out of our power to do it. I understand that if it remains new buildings are to go up, and before that time \$75,000 more may be invested in it. If we ever expect to investigate this matter now is the time. Let us see what our wants are. It strikes me that we are running the Book Concern at large cost of paper, etc., which could be had cheaper at other places."

Dr. Redford said: "Mr. President, I did not wish to make any remarks on this subject. When I attempt to make a speech in an Annual Conference I am embarrassed, but here in the General Conference my embarrassment is such that I cannot say what I wish. When I was a child my arm was broken, and as a crippled child is always spoiled, whenever I heard any one else talking I would never fail to give my opinion. Consequently I met with rebuffs, and they were continually saying to me, 'Shut up; you talk too much.' Now this has had a tendency to keep me back. But if I can do so without embarrassment, I would like to say a word or two on the question before us. In regard to the Publishing House at Nashville, I will take pleasure in informing Dr. Bond that in my quadrennial exhibit I have made a full, fair statement of the condition of the Publishing House, and I will say that if the interest of the Publishing House at Nashville were put up to-day for sale, I would be glad to purchase it at an advance of its value as stated in that report. The stereotype plates are reported at \$25,000 less than what they would cost to-day. I keep inside of the real amount, because they could be made more cheaply than now. In reply to Dr. Bond, in his allusion to the painted ship, I will say that I stand on board no sinking vessel. I admit she was in a bad condition when I took command of her four years ago, but she has breathed many a storm since then, and is now prepared to sail in any seas. The Southern Methodist Church presents the only example, in Europe or America, of a publishing house so nearly wrecked that ever recovered."

W. C. Johnson moved an indefinite postponement of the whole subject, which motion did not prevail.

A. W. Wilson said: "I confess that we are placed in rather an awkward position as memorialists, after this action. We understood that it was contemplated to remove the Publishing House for good and substantial reasons. Inasmuch as the question was to remove it to a permanent place where it could be well sustained, both now and in all time to come, we were induced to suggest Baltimore as the proper place, and the withdrawal of these memorials has not changed our opinion. No matter what local advantages may accrue from its removal, the general interest of the church is the one consideration. For myself I have long doubted whether the church should go into any extended business of any kind. But if it is to be maintained, and the object is to furnish the church publications in the best style and at the cheapest rates—if these be the ends, I don't think there can be any hesitation between Baltimore and Nashville."

Dr. Hamilton suggested the appointment of a committee of nine of the most intelligent and efficient men of the church, to whom this subject should be referred.

Dr. Bond said: "Dr. Hamilton's suggestion is eminently wise and prudent, and the only difficulty in the way is that it would be hard to tell who are the most intelligent and efficient business men in this Conference. This Publishing House exists—not exists, but persists, simply, by inertia. The General Conference don't seem to be able to do anything with it. Suppose you refer it to a committee of nine of the most intelligent men of the church; they will discuss it and rediscuss it, and as sure as fate, there will be two or three who will talk it to death, and finally bring in a minority report, to be discussed for ten days here in the Conference room, and Dr. Green, a most sagacious and wise man, will be able to keep it at Nashville, simply from the difficulty of acting on the subject. The great difficulty is that the real line of argument is the one which we cannot pursue. This is just what is aimed at in the sagacious prudence and skill and management of Dr. Green, whose whole soul—except in spiritual matters—is thrown into his efforts to keep that house at Nashville, so that everywhere he is going about singing:

"Be it my only interest here,
With constant industry and care,
To keep that house at Nashville."

and I earnestly beseech the chair, whatever he does, don't put him on that committee."

Dr. Green said: "I am like a

poor fellow who was arraigned before court, and thought he had been badly treated, and employed Mr. Grundy to defend him. He went on to show how badly the poor fellow had been treated, step by step; pictured his case so pitifully that at length he burst into tears and said: 'I never knew I was so badly treated before.' Now I never knew I was so great a man before; but lost I should lie under the charge of being a trickster."

Dr. Bond said: "I didn't say that, doctor. I said manager."

Dr. Green said: "Well, manager, then. I don't like that any better. If you can find any man, either clerical or lay, in this Conference or outside of it, that will say that I have tried to influence him on this question, I will grant all that Dr. Bond has said. I'm as clear as an ox. Whatever I do, I do flat-footed on the floor of this Conference."

Dr. Finney said that he was in favor of referring it to that committee. He had always doubted the propriety and ability of the church to conduct business operations successfully, and he wanted this matter referred to business men.

Dr. Redford said: "The proposition is to refer this subject to a committee of nine of the most intelligent members of this body. To this I am opposed. When the whole matter is fully discussed in the committee, and their report presented to the Conference, so far from being accepted without debate, the entire question will be freely canvassed again. Besides, there are two hundred and thirty-seven of the members who compose this General Conference, who will expect to be on the committee."

"I once attended a General Conference, and the Committee on Public Worship waited on me to learn who of my delegation might with propriety be invited to preach. I replied that any of us would do, or we would not be here. I am about the poorest among them, and I think my preaching would be much more acceptable than that to which they were accustomed. The Publishing House will flourish anywhere if properly managed. You may put it on Monte Sano, and it will flourish there. You may send it to Baltimore, and publish your books in New York, and it will flourish there if the church will rally around it."

"The Publishing House is my child; and as a mother loves her sickly babe whom she has tenderly nursed through long years of affliction, and rejoices over its recovery and loves it more than any other child, so I love this my child better than all the other institutions of the church; and I implore the brethren not to abuse it too much, nor move it from Nashville, which I have no idea they will do."

Mr. McFerrin said: "I am opposed to referring it to a committee. Brother Finney has revived the old objection, 'the church can't publish.' Now this was all discussed at the General Conference at Columbus, and they decided to have a publishing house. Thon St. Louis, Memphis and Louisville were all applying for it."

Dr. McAnally said: "Not St. Louis."

Dr. McFerrin said: "It's no odds; she wanted it. It was brought up again in New Orleans, and now they are nibbling at it again. Now I want to tell Dr. Bond that the concern ain't sick. It was sickly, but it's got better. But I suppose he wants to take it to Baltimore to his medical college, to doctor it."

On motion of Dr. J. Hamilton a special committee of nine was ordered to take into consideration the whole subject of the Publishing House, and report to this Conference; certain resolutions referring to this subject, offered by E. H. Myers and I. G. John, were read and referred to that committee. A memorial from the Rev. T. N. Stowart, and other colored ministers, was presented by J. E. Evans, and read, as follows:

We would respectfully solicit your honorable body to appoint a delegation—say five—to meet the call of the Bishops on the sixteenth day of December, 1870, at Jackson, Tennessee, to confer with our delegates in organizing our contemplated colored General Conference. If you approve our request, we would sincerely ask that you appoint the Rev. J. E. Evans, of Georgia; the Rev. Dr. S. Watson, of Tennessee; the Rev. Dr. Sehon, of Kentucky; the Hon. Thomas Whitehead, of Virginia, and one other lay member of said delegation.

All of which is respectfully submitted.

T. N. STEWART,
BENJAMIN BULLARD,
B. S. NEWTON,
J. F. THOMAS,
WESLEY WARE,
AUGUSTUS BOSTIC,
S. LEATH,
J. CLOPTON,
And others.

MEMPHIS, May 17, 1870.

On motion of George N. Loster the request of the memorialists was granted, and Judge Morgan was chosen as a member of said delegation.

A memorial from T. J. McCoy and others, calling for a Sunday school convention, was read and referred to the Committee on Sunday Schools.

The question on which Conference adjourned on yesterday, being the motion to adopt, as a substitute for Report No. 2 of the majority of the Committee on Education, the report of the minority, was then called up, and Dr. C. K. Marshall, who had the floor, was allowed to speak on this subject without regard to the fifteen minutes' rule.

The question was then discussed by C. K. Marshall, A. R. Winfield, R. Abbey, B. Craven, and by A. S. Andrews, A. M. Shipp and L. C. Garland against the adoption of the minority report as a substitute for the report of the majority.

The previous question was then called for by Dr. Bond. The call was sustained, and the substitute was adopted.

In the discussion of Report 2 of the Committee on Education, Monday afternoon, May 16,

F. E. Pitts said: "Mr. President, the important subject now before the Conference can only be properly determined by the satisfactory settlement of two questions. First, is it essential to the success of Methodism at all? And, even should it be important, is this the time for its establishment? If, however, we should fail to see its essential importance, neither this nor any other period would be the right time for its organization. We have already established, in connection with several of our flourishing colleges, biblical chairs; and these chairs are filled by eminent instructors and able divines. What demand is there among our young men who are now looking to the ministry that may not be met by these hallowed seats of learning? With these great facilities, and our annual courses of study extending through a term of four years before they are eligible to full ministerial orders, together with that incomparable theological institution, the traveling connection, can we not keep pace with the progress of the age? Sir, as compared with the theological institutions of other denominations, some of the venerable doctors of a sister church have recently paid the Methodist economy an honest tribute by saying, 'The itinerant system of the Methodist Church is the best theological institution upon the face of the earth.' Progress, indeed! Look at this General Conference; what system of theological training has made this gifted and venerable body of men? Look at the triumphs of the gospel and the multitudinous hosts a Methodist ministry, unaided by theological schools, have brought, by the blessing of God, into the fold of Christ. Progress, indeed!"

The chair then announced the special committee of nine on the Publishing House, to wit: E. E. Wiley, S. Regester, J. E. Evans, W. P. Barton, W. C. Johnson, J. S. Lithgow, G. W. Williams, Joseph B. Palmer and Asa Holt.

Conference then adjourned with the doxology and benediction by the Bishop.

THIRTEENTH DAY.

WEDNESDAY, May 18, 1870.

The Conference met at the stated hour. Bishop Doggett in the chair. Divine service was conducted by Dr. McAnally.

The minutes of the last session were read and approved.

On motion of R. A. Young, F. E. Pitts was granted leave of absence during the remainder of the session on account of family affliction, and T. L. Maddin, reserve lay delegate from the Tennessee Conference, was allowed to take his place in the Conference and on the Committee on Episcopacy.

Charles M. Howard, lay reserve delegate from the Montgomery Conference, in place of W. Garrett, appeared and took his seat.

A. G. Haygood was put on the Committee on Episcopacy, in the place of W. J. Parks, and L. D. Palmer was put on the Committee on Sunday Schools, in place of A. G. Haygood.

Bishop McFeyre took the chair. The Rev. Dr. Burns, of the First Baptist church of this city, was introduced to the Conference.

L. M. Lee, chairman of the Committee on Episcopacy, presented Report No. 4, which was adopted, as follows:

REPORT OF COMMITTEE ON EPISCOPACY. NO. IV.

The Committee on Episcopacy beg leave to submit their Report No. 4.

The committee having been instructed to nominate one of our Bishops or some other competent person to write the life of the late venerable Bishop Soule, and it appearing that Bishop Soule himself expressed a desire that should his life be written, Bishop Wightman might be selected for the work; and whereas, the committee believe that this desire is very general; therefore,

Resolved, That Bishop W. M. Wightman be nominated to the

General Conference to write the life of Bishop Soule.

L. M. LEE, Chairman.

MEMPHIS, May 17, 1870.

Also report No. 5 of the same committee, which lies over under the rule. It is as follows:

REPORT OF COMMITTEE ON EPISCOPACY. NO. V.

The Committee on Episcopacy beg leave to offer their Report No. 5, as follows:

The committee have had under consideration the matter referred to them by resolution of J. E. Edwards, R. Abbey and others, proposing an alteration of chapter 2, question 3, answer 7, page 63 of the Discipline, so that it shall require a concurrence of two-thirds of all the Bishops to make the decision of a Bishop in an Annual Conference a law of the church; and the committee do not concur.

They recommend, however, that the last clauses of said answer be replaced by the following words, after the words "the College of Bishops," viz: "Shall be reported quadrennially to the General Conference for insertion in its journals, and shall be thereafter published in an appendix to the Discipline; and when so published they shall be authoritative interpretations or constructions of the law."

The committee further recommend that all such decisions heretofore made by the College of Bishops be inserted in such appendix to the Discipline—to have the same force and effect as those to which the above rule applies.

L. M. LEE, Chairman.

MEMPHIS, May 18, 1870.

Also Report No. 6 of the same committee, which was adopted, as follows:

REPORT OF COMMITTEE ON EPISCOPACY. NO. VI.

The Committee on Episcopacy beg leave to submit their Report No. 6, in the form of a resolution, as follows:

Resolved, That as to the memorials from Texas, referred to the committee, requesting an increase of episcopal service in that State, the committee can only recommend that this subject be referred to the consideration of the Bishops, with the request that the prayer of the memorialists be granted.

L. M. LEE, Chairman.

MEMPHIS, May 18, 1870.

Also Report No. 7 of the same committee, which was laid on the table on the motion of J. E. Evans. It is as follows:

REPORT OF COMMITTEE ON EPISCOPACY. NO. VII.

The Committee on Episcopacy beg leave to offer their Report No. 7, as follows:

Whereas, The Texas memorialists necessarily brought the subject of an increase in the number of Bishops before this committee; and whereas, the committee settled nothing definitely on this subject, having first voted negatively on a resolution that it was inexpedient to increase the number of Bishops, but rejected severally the motions to elect one, two or three Bishops, and agreeing in nothing further, finally reconsidered their first mentioned vote, and then postponed the whole subject indefinitely. Now, therefore,

Resolved, That the aforesaid action of the committee be reported to the General Conference.

L. M. LEE, Chairman.

MEMPHIS, May 18, 1870.

J. E. Edwards, chairman of the Committee on Itinerancy, presented Report No. 4 of that committee, which, on motion of H. A. C. Walker, was referred without reading to the Committee on Episcopacy.

Also the following report, No. 5, which was laid over under the rule:

REPORT OF COMMITTEE ON ITINERANCY. NO. V.

The committee have duly considered the resolution signed by the delegates from the North Carolina Conference, asking for a change in section 5, chapter 2, page 61 of the Discipline, so as to add, after the word "care," in the fifth line from the top of the page, the following words, "or any other appropriate work in which he may be useful as a minister of the gospel among us."

Resolved, That we do not concur in the proposed change.

HORACE JEWELL,
S. P. WHITTEN,
C. I. VANDEVENTER,
T. L. BOWELL,
W. P. MOZZON.

W. M. Rush, chairman of the Committee on Books and Periodicals, presented Reports Nos. 14 and 15, which were read and adopted.

REPORT OF COMMITTEE ON BOOKS AND PERIODICALS. NO. 14.

The committee have the honor to acknowledge the receipt of the following report on the resolution of the North Carolina delegation which proposes to change section 5, chapter 2, on page 61 of the Discipline, so as to read, after the word "care," "or to any other appropriate work in which he may be useful as a minister of the gospel among us."

Resolved, That we do not concur in the proposed change.

HORACE JEWELL,
S. P. WHITTEN,
C. I. VANDEVENTER,
T. L. BOWELL,
W. P. MOZZON.

W. M. Rush, chairman of the Committee on Books and Periodicals, presented Reports Nos. 14 and 15, which were read and adopted.

REPORT OF COMMITTEE ON BOOKS AND PERIODICALS. NO. 15.

The committee have the honor to acknowledge the receipt of the following report on the resolution of the North Carolina delegation which proposes to change section 5, chapter 2, on page 61 of the Discipline, so as to read, after the word "care," "or to any other appropriate work in which he may be useful as a minister of the gospel among us."

Resolved, That we do not concur in the proposed change.

HORACE JEWELL,
S. P. WHITTEN,
C. I. VANDEVENTER,
T. L. BOWELL,
W. P. MOZZON.

W. M. Rush, chairman of the Committee on Books and Periodicals, presented Reports Nos. 14 and 15, which were read and adopted.

REPORT OF COMMITTEE ON BOOKS AND PERIODICALS. NO. 15.

The committee have the honor to acknowledge the receipt of the following report on the resolution of the North Carolina delegation which proposes to change section 5, chapter 2, on page 61 of the Discipline, so as to read, after the word "care," "or to any other appropriate work in which he may be useful as a minister of the gospel among us."

Resolved, That we do not concur in the proposed change.

J. Boring, chairman of the Committee on Missions, submitted Report No. 1 of that committee, which was read and laid on the table under the rule.

REPORT OF COMMITTEE ON MISSIONS. NO. I.

In presenting their first report, the Committee on Missions beg leave to state that, in entering upon their work, they found themselves greatly embarrassed by what seemed to be the natural results of the system adopted by the General Conference of 1866 upon the subject of missions. Unwilling to propose a radical change in so short a time, we have sought, by the suggestion of amendments and modifications, so to adapt the system of a foreign and domestic board to the necessities of the case as to continue it at least four years longer.

With the view to accomplish an end so desirable the secretaries of both boards, Drs. Munsey and McFerrin, were invited by the committee to submit their views upon the subject, which they did, and from which most important information was obtained.

But, after every effort to continue the present organization of our missionary work, we feel compelled, in view of the results of the last four years' experience, the large debts now demanding settlement, the expenses necessarily attending two boards and their operations, together with the state of the country, to recommend most respectfully the following for the adoption of this General Conference:

SUPPORT OF MISSIONS.—SECTION VII.

ARTICLE 1. The missionary operations of the Methodist Episcopal Church South shall hereafter be committed to one board, under the following provisions and regulations:

ART. 2. The board shall consist of the bishops of the Methodist Episcopal Church South, a secretary, corresponding secretary, treasurer, one manager from each mission district, and five managers to be appointed by the Bishops.

ART. 3. The secretaries shall be elected quadrennially by the General Conference. The treasurer shall be elected by the board, and the district managers, by the delegates from the Conferences comprising each mission district. If for any cause the General Conference shall fail to meet at the appointed time, the board shall continue in office until the next meeting of the General Conference.

ART. 4. The Annual Conferences of the Methodist Episcopal Church South shall be divided into mission districts, as follows:

The first district shall embrace the Baltimore, Virginia, Western Virginia, Holston, Kentucky and North Carolina Conferences.

The second district shall embrace the South Carolina, Florida, North Georgia, South Georgia, Mobile and Montgomery Conferences.

The third district shall embrace the Louisville, Tennessee, Memphis, Indian Mission, Arkansas, Little Rock, Mississippi and Louisiana Conferences.

The fourth district shall embrace the Texas, West Texas, Northwest Texas, East Texas and Trinity Conferences.

The fifth district shall embrace the Illinois, Missouri, St. Louis, California, Columbia and any other Conference which may be formed.

ART. 5. The board shall have authority to make by-laws for regulating its own proceedings; to appropriate money to defray incidental expenses; to provide for the support of superannuated missionaries, and widows and orphans of missionaries, who may not be provided for by any Annual Conference (it being understood that they shall not receive more than is allowed by the Discipline to other superannuated ministers, widows and orphans); to print books for the Indian, German and foreign missions, build houses of worship, school houses, residences for the missionaries, and defray all other necessary expenses incident to the work under its care. The board shall also publish annually a statement of its transactions and funds, and lay before the General Conference a report of all its transactions and a statement of its funds up to some convenient day near and prior to the time of holding the General Conference.

ART. 6. The board shall meet annually to make appropriations for the ensuing year; determine what fields shall be occupied as foreign missions; the number of persons to be employed in each; estimate the sums necessary for the support of each mission; fix the amount which may be drawn for during the year, and the division of said amount between the foreign and domestic missions.

ART. 7. The sums allowed for the support of missionaries shall be sufficient to support them in their work. The board shall require communications to be made quarterly by each missionary, or from each mission, to the secretary, giving information of the state and prospects of the missions in which they are

employed. No one shall be acknowledged as a missionary, or receive support from the board, who has not some definite work assigned him, or could not be an effective laborer in a circuit, except as provided for in article 5.

Art. 8. The revenue of the board shall be derived as follows: From annual collections in every congregation, at such time and in such manner as each Annual Conference shall direct; from special collections made by the secretary, and from donations and legacies.

Art. 9. The secretary and corresponding secretary shall reside at the place where the board is located, but may be members of any Annual Conference or Conferences.

It shall be the duty of the secretary to travel, as far as possible, through the connection, visiting the Annual Conferences, and the missions under the care of the board, promoting the interests of the missionary cause. It shall also be his duty to attend to all the business of the board with the government of the United States, in relation to schools which have been or may hereafter be committed to its care in the Indian country by the Department of the Interior or Commissioner of Indian Affairs.

It shall be the duty of the corresponding secretary to journalize the proceedings of the board; to conduct its correspondence; to give the missionaries any information that may be necessary; to prepare for publication in the church papers, monthly, an abstract of the proceedings of the board, and condensed accounts of the missionary work, and prepare the annual report of the board. The salaries of the secretary and corresponding secretary shall be fixed by the board.

Art. 10. The treasurer shall hold all the funds of the board in safe deposit, which deposit shall be made by him as an officer of the board, subject to his drafts as such, and his successors in office. He shall also furnish an annual report, to be published with the annual report of the secretary.

Art. 11. In case of vacancy occasioned by death, resignation or otherwise, in the board, such vacancy shall be filled by the board until the ensuing General Conference.

Art. 12. Nine members at an annual meeting of the board, and five members at a called meeting, shall constitute a quorum.

Art. 13. First. It shall be the duty of each Annual Conference to organize a Conference Board of Missions, which shall appoint its own officers and regulate its own administration, subject to the provisions of this constitution. Each Conference board shall pay all its funds into the treasury of the General Mission Board. It shall also furnish to the General Mission Board an annual report, containing the number and names, and an account of the condition of all the missions within its bounds.

Second. It shall be the duty of each Annual Conference board to make an estimate of the amount necessary for the support of each mission within its bounds, for which amount the president of the Conference shall draw upon the general treasury, provided the sum shall not exceed two-thirds of the amount raised the previous year for missions by said Conference. Appropriations exceeding this sum must be made by the general board.

Third. Each Annual Conference shall designate the time and manner in which collections for missions shall be taken up within its bounds. The collection shall be so taken as to enable each contributor to give such direction to his donations as he may desire, and the amounts so contributed shall be distinguished in the reports of the treasurer.

Fourth. It shall be the duty of each presiding elder to bring the subject of missions before the district meetings, and also before the quarterly conference of each circuit and station within his district. Each quarterly conference shall appoint a committee, of not less than three nor more than five, on missions, of which the preacher in charge shall be chairman, whose duty it shall be to assist the preacher in raising missionary money.

Fifth. It shall be the duty of the preacher in charge of a circuit or station to institute monthly missionary prayer meetings, and to encourage the formation of juvenile missionary societies in all the Sabbath schools within his charge.

Art. 14. This board shall be located and domiciled in —

Art. 15. This constitution shall not be altered or amended but by a majority of the General Conference.

JESSE BOWING, Chairman.

Also Reports Nos. 2 and 3 of the same committee, which were read and adopted.

J. Hamilton, chairman of the Committee on Revision, submitted Report No. 7 of that committee, which was read and laid over under the rule. It is as follows:

REPORT OF THE COMMITTEE ON REVISION.—NO. VII.

The Committee on Revision beg leave to offer Report No. 7.

Your committee have had under consideration a variety of resolutions referred to us by the General Conference, and report upon them as follows:

1. A resolution, signed by C. I. Vandever and James H. Birch, proposing a change in the Discipline on page 97, respecting the presidency of a church conference. The committee recommend non-concurrence.

2. A resolution by Thomas W. Whitehead, G. G. Dibrell and A. G. Brown, proposing to change the Discipline, chapter 2, section 1, answer 1, thus changing the ratio of representation from one to every twenty-eight to one for every fifty members of the Annual Conference; provided that every Annual Conference shall be entitled to one clerical and one lay delegate. Your committee recommend non-concurrence.

3. A resolution by H. A. C. Walker and W. H. Fleming, recommending: First, to insert in chapter 2, section 3, question 1, answer 1, "secretary of church meeting" before "superintendent"; voted not to concur. Second, on page 56, second item, to insert the word "religions" before "services"; your committee find this provided for in the new arrangement. Third, that wherever the words "quarterly meeting" occur, to strike out "meeting" and insert "Conference"; the committee find this already done. Fourth, that on page 57 of the Discipline, in the item after notation 10, after the word "let" be stricken out. The committee recommend that answer 13, page 10, N. A., be changed so as to read, "The report of the trustees shall be made to the quarterly conference in writing, and shall be recorded on the journal." Fifth, in page 63 of the Discipline to strike out figure "4" and paragraph following, and conform the succeeding notation thereto. In this the committee do not concur, because the requisite change was already provided for. Sixth, that on page 71 of the Discipline, line 1, after "report" insert "or cause to be reported;" with this recommendation the committee do not concur. Seventh, that on page 240 of the Discipline figure "4" be stricken out; also the paragraph following, thus leaving the whole matter of salary, etc., with the stewards and pastors, as the Discipline provides on page 248, second paragraph. The committee do not concur, as this matter was already provided for.

4. A resolution from the East Texas Conference, asking that chapter 2, section 10, question 2, N. A., answer—, be changed so that a local preacher may be eligible to deacon's orders when he shall have preached two years; and that the answer to question 3, same page, be so changed that a local deacon may be eligible to elder's orders two years from the date of his election to deacon's orders. In neither of these recommendations do your committee concur.

5. A paper signed by R. S. Moran and N. F. Reid, asking for changes in the Discipline on page 249, relative to the appointment of members of the Joint Board of Finance; your committee find this matter already provided for in the new arrangement.

6. A resolution, signed by O. Fisher and T. C. Barton, asking that the provision of the Discipline that commits the trial and conviction of a member of a Conference to a committee be so changed as to place that matter in the hands of the Conference and of ministers of the same grade. To this request the committee do not agree.

7. A paper by T. L. Boswell and J. M. Mask, proposing to change chapter 6, section 5, answer 1, page 24, N. A.; by inserting after the word "case," "provided if in any case said committee should refuse or neglect to perform their duty the preacher in charge shall proceed to investigate the report;" etc.; to this proposition the committee do not agree.

8. The resolution by H. H. Montgomery and R. Abbey, proposing a change in chapter 6, section 2, question 1, answer 1, by adding, "And when the circumstances are such that the accused cannot be tried at the session of the Conference, the court of trial shall be appointed to try the case during the interval," etc.; to this proposal your committee do not agree, as they judge that such trial by committee cannot take place during the interval of Conference under the law in the case.

9. A resolution by W. Shepard and J. B. Cottrell, proposing such a change in the Discipline as will make a member holding a letter of membership amenable to the church granting the letter; with this proposal the committee do not concur. All of which is respectfully submitted.

J. HAMILTON, Chairman.

W. H. Foster, from the Committee on Sunday Schools, submitted Report No. 6 of that committee, which was read and adopted.

Also Reports Nos. 7 and 8 of the same committee, which were read

and laid on the table for the present. They are as follows:

REPORT OF THE COMMITTEE ON SUNDAY SCHOOLS.—NO. VII.

The Committee on Sunday Schools, to whom was referred a memorial from the Sunday School Society of the Virginia Conference in regard to the "relation which baptized children sustain to the church," ask to be discharged from the further consideration thereof, and suggest its reference to the Committee on Revision.

Respectfully submitted.

W. H. FOSTER, Chairman pro tem.

REPORT OF THE COMMITTEE ON SUNDAY SCHOOLS.—NO. VIII.

The Committee on Sunday Schools recommend the adoption of the following:

Resolved, That the Sunday school secretary prepare and the book agent publish, at the earliest practicable day, a suitable manual for the use of superintendents, embracing a plan for organizing schools and conducting the exercises thereof.

Respectfully submitted.

W. H. FOSTER, Chairman pro tem.

Also Report No. 9 of the same committee, which was read, and on motion of A. W. Wilson the first resolution was amended by changing twenty-eight to forty, and by adding, "Provided, however, that every Annual Conference shall be entitled to one representative. After considerable discussion, the report of which is crowded over to our next issue, W. H. Fleming moved the previous question. The call was sustained, and the report was adopted by a vote of 110 to 81.

A communication from the Rev. Dr. J. K. Nichols, fraternal messenger from the General Conference of the Methodist Protestant Church, to this body, was received, read and referred to a special committee of five, as follows: N. F. Reid, O. R. Blue, L. M. Smith, J. C. Grauberry, E. W. Massey.

T. M. Finney made a statement in regard to the commutation of fare on the public routes of travel to and from the seat of Conference, and a committee of three were appointed to take this subject under consideration and report to the Conference. The committee is as follows: W. M. Prottman, T. J. McCoy, H. G. Hall.

A motion of W. Smith and T. E. Bond to hold afternoon sessions from three to six o'clock, was, on motion of D'Arcy Paul, laid on the table.

C. Taylor, from the Committee on Education, submitted Report No. 3 of that committee, which was read and adopted.

Also Report No. 4 of the same committee, which was read and laid over under the rule. It is as follows:

REPORT OF THE COMMITTEE ON EDUCATION.—NO. IV.

On the memorial respecting a course of study for local preachers, the committee begs leave to report as follows:

Resolved, 1. That a course of study be prescribed for local preachers by the Board of Bishops, which shall be substantially the same with that prescribed for itinerant ministers.

2. That on page 15, new arrangement of the Discipline, chapter 3, section 11, the answer to question 2 be amended by substituting for "four years," "two years," and for "proper examination," "approved examination before a committee appointed by the presiding elder, of which he shall be chairman, upon the course of study prescribed by the Bishops."

3. That on the same page (15) the answer to question 3 be amended by substituting for "four years," "two years," and for "proper examination," "approved examination before a committee appointed by the presiding elder, of which he shall be chairman, upon the course of study prescribed by the Bishops."

Respectfully submitted.

CHAS. TAYLOR, Chairman pro tem.

Also Report No. 5 of the same committee, which was read and laid on the table for the present. It is as follows:

REPORT OF THE COMMITTEE ON EDUCATION.—NO. V.

On the memorial of William Henden, (a member of this General Conference, and agent of the Corpus Christi Male and Female Academy,) which was presented to the Conference and referred to this committee, it reports: That the importance of this institution to the interests of Protestant Christianity in the region where it is located can hardly be over-estimated.

Situated at the farthest point in the Southwest where we have a ministerial charge, on the very confines of Mexico, in the midst of a population mostly Roman Catholic, but which, being greatly disaffected toward its own priesthood, is now ripe for the introduction of Protestantism, it presents one of the most inviting fields for missionary labor within our reach. Since, therefore, by the instrumentality of this institution, many children of Protestant parents are being reared from Romanism, and many more Roman Catholic children and

youth may be readily brought under our influence; be it

Resolved, 1. That we regard this educational enterprise as highly important to the success of a pure Christianity in the extreme Southwest.

2. That we not only heartily approve, but do most earnestly commend it and its claims, as presented by its agent, Brother William Henden, to the warmest sympathy and generous liberality of our people.

3. That some measure be taken at this session looking to the immediate relief of the Corpus Christi Male and Female Academy.

All of which is respectfully submitted.

CHAS. TAYLOR, Chairman pro tem.

On motion of J. E. Evans, the names of R. H. Vanderherst, of Columbus, Georgia, of H. Anderson, Fort Valley, Georgia, and R. J. Brown, Macon, Georgia, colored ministers, were allowed to be attached to the memorial presented yesterday by T. N. Stewart and others, in respect to the organization of the colored Methodist Episcopal Church South.

A. W. Wilson submitted the report of the special committee on the claims of Reuben Wright against the Board of Foreign Missions, which was read and adopted; and ordered to be published in the Daily Christian Advocate.

The Conference then adjourned with the doxology and benediction by the Bishop.

FOURTEENTH DAY.

THURSDAY, May 19, 1870.

Conference met at the stated hour.

Bishop Pierce in the chair.

Religious exercises were conducted by W. H. Watkins.

The minutes of the last meeting were read and approved.

Bishop Paine took the chair.

Dr. Schon rose and said: "I had the pleasure of offering a resolution in behalf of the suffering church of Columbia, South Carolina. I also became interested in another enterprise, and followed my gifted brother on last Sunday to aid him in helping Central Methodist church of this city."

I then murmured that I could do nothing myself, for my heart goes out after all these interests of the church: I have, within a few hours, received the following dispatch:

LOUISVILLE, May 18, 1870.—Rev. E. W. Selon, Overton House: Please announce that I will give \$200 to Central Methodist Episcopal Church South in Memphis at the dedication, and also \$100 toward rebuilding the Methodist Episcopal Church in Columbia, South Carolina.

J. S. BULL.

"This is from Dr. John Bull, one of the most worthy citizens of Louisville, and widely and favorably known, and a worthy member of our church, and who freely brings his offerings to the altar of God. May God bless the giver and those to whom his benefactions are given, and may many others go and do likewise."

E. H. Myers, from the Committee on Episcopacy, submitted Report No. 8 of that committee, which was read and adopted, as follows:

REPORT OF COMMITTEE ON EPISCOACY.—NO. VIII.

The Committee on Episcopacy beg leave to make their Report No. 8, as follows:

The committee, after having duly considered the subjects embraced in the paper from the Committee on Itinerancy, submitted to them, adopted the following:

WHEREAS, The paper named is mostly a statement of errors and omissions in the journal of the secretaries of the several Annual Conferences—sometimes when a Bishop presided over the Conference, sometimes when there was no Bishop present; and

WHEREAS, The document nowhere gives the name of any Bishop under whose presidency the inaccuracies complained of were overlooked; and

WHEREAS, Therefore, the document offers nothing which seriously affects the official administration of any Bishop, and nothing on which to base specific action, if it were desirable, this committee can only refer the paper back to the General Conference, for action on the matters contained in it, with the following resolution:

Resolved, That the attention of the Bishops be respectfully called to the action of preceding General Conferences, requiring them to supervise the Conference journals, and to endeavor to procure accuracy and uniformity in the journals throughout the connection.

L. M. LEE, Chairman.

MEMPHIS, May 19, 1870.

Report No. 4 of the Committee on Itinerancy, returned by the Committee on Episcopacy, was read, and the committee had leave to withdraw the portion referring to the administration of the Bishops, and the resolution referring the report to the Committee on Episcopacy.

At the suggestion of Bishop Pierce, Dr. Young moved to amend by adding the following resolution:

Resolved, That the record of the regular minute business be read each morning from the journal.

This amendment was not adopted.

The report was then adopted, as follows:

REPORT OF THE COMMITTEE ON ITINERANCY.—NO. IV.

The Committee on Itinerancy have carefully examined the journals of the several Annual Conferences under the instructions of the last General Conference requiring "secretaries of the several Annual Conferences to record all the acts of the Conference, of every kind whatever, in the consecutive order of their occurrence or in an appendix; especially all complaints, charges and specifications, with the decisions in all such cases, as also all resolutions, reports of committees, statistics, memoirs, appointments of preachers, and what ever else enters into and constitutes a complete historical record of each Annual Conference," as also the instructions requiring the Bishops "to supervise the Conference journals, to direct the secretaries to the requirements of the General Conference as to the manner of keeping their journals; to supply secretaries with copies of their decisions on all questions of law submitted to them in the Annual Conference, and affix their signature, in all cases, to the minutes of the Conference over which they preside." Under these instructions your committee have conducted their examinations with the following result, which is respectfully submitted to the Conference:

The Baltimore Conference journal has been kept with marked accuracy and neatness. The marginal notes are so arranged as to facilitate reference. It is a fine specimen of neat, tasteful, complete journaling.

Virginia Conference.—The journal is found nearly faultless, there being only two omissions worthy of note in four years. On the opening of two morning sessions there is no record of the reading and approval of the minutes of the previous daily sessions, namely, on the twenty-fourth November, 1866, and the sixteenth November, 1867. With these small exceptions the journal is deserving of unqualified praise in all the essentials of a complete record.

Western Virginia Conference.—The first, second and third sections have no errors of sufficient note to require report. The journal is kept with care and taste.

The fourth session, held at Point Pleasant, has no date of year, month or day. The hour of the day only is noted. This is presumed to be the session of 1869. We note, also, neglect to follow and record disciplinary questions.

No Bishop present. Rev. S. K. Vaughn was elected president of the Conference. The questions 7, 8 and 10 were asked: "Who are elected and ordained?" etc. Answers are recorded giving names of persons elected and ordained. The journal should have shown that the persons named were elected but not ordained.

Your committee respectfully suggest to the General Conference that the questions answered as above should be divided: "who elected," etc., "who ordained," etc.

On page 104 we note the omission to record a certain paper adopted by the Conference. The entry on page 98 shows that certain brethren died during the year, but not named under the appropriate question; and we find no reference of these names to the Committee on Missions, and no report recorded in proceedings or appendix.

On the fifth day of the session leave of absence was granted to Wm. Guines Miller, secretary of the Conference. R. Fox was elected secretary pro tem. Wm. G. Miller does not appear again on the journal, and yet on the final adjournment of the Conference he signs the minutes.

On page 101 the name of S. Hargis is omitted and substituted by the name of George L. Warner in an important connection, and should be corrected on the journal.

On the first day of this session a Judiciary Committee is appointed. On the third day "papers from the Glenville quarterly conference, in the case of Rev. McCutchen, were referred" to this committee. Sixth day, this committee reports, and on motion the case is dismissed for want of jurisdiction. Same day, this action is reconsidered, and "papers laid on the table," writing on episcopal decisions, and a committee appointed to lay the evidence before the College of Bishops. In all this there is no statement of the history, nature of character of the case, showing a very incomplete and defective record.

On page 97 (no question recorded.) "George J. Conner (deacon) called; character passed, and on motion admitted into full connection, and elected to elder's orders and required to complete his course of study for the third and fourth years."

Page 104, S. Black and others enter a protest against the action of the Conference in this case in the following words: "Whereas, the Discipline forbids the election of traveling preachers to deacon's or elder's orders without an approved examination on the course of study, etc. This committee think the protest well taken, as otherwise a dangerous precedent might obtain in

some of the Conferences. (See Dis., p. 74.)

Page 96, under question 15, the name of J. P. Johnson is called, and his "case laid over."

Page 98, his "case is called and referred to a special committee," and on motion he is permitted "to have examined, not a member of the body." From this action an appeal is taken by a member.

Page 103, the special committee submit their report, which is adopted, and all this without any record of charges, specifications, testimony or other history of the nature of the case.

North Carolina Conference.—The journal of the Conference session of 1866 is found defective in several particulars. Frequent blots, scrawls, erasures and interlinations, difficult to read.

On first page we read, "For information, the standing committees appointed at last Conference were announced," but who or what they were does not appear. Also, "a committee of three was appointed on the support of the ministry," names not given.

On second page, question 15 taken up. Question not recorded. Under this question "Solomon H. Helsbeck, through his presiding elder, asked for a location, which was granted." This should have been recorded under its appropriate question, which is not the fifteenth.

Questions 12 and 13 taken up; not recorded. Under those questions the characters of several supernumerary and superannuated preachers were taken up and passed; not the proper questions. From the second day of the session to the close it does not appear that any one was in the chair.

Question 15 was resumed, when N. A. H. Goddin passed examination of character, and was located at his own request, through his presiding elder.

Again question 15 was taken up, when S. R. Traywick was located at his own request. This matter is not under its appropriate question.

We find other matter under questions foreign to the subject. We note also the reception of Hiram P. Cole on trial, without any record of recommendation or examination. We note further irregularities and omissions in recording business without any question, as, for example, "W. M. Walsh was continued in the superannuated relation." Statistics reported under no question. So of the appointments of the preachers. Fifth day.—Committee on Education reported, and the report was adopted, but not recorded.

Questions 7, 11, 14, 16, 17, 18, 19, 20, 21, 22, 23, not asked; journal not paged.

Conference session of 1867.—On pages 14 and 15 we read, "Question was taken up, when it appeared there were no preachers of the third year." The question itself is not recorded, nor its memorial order given.

Again we read, "Question was taken up, when J. E. Thompson passed the examination of character; passed on all his studies; was questioned by the Bishop in open Conference, and was elected to deacon's orders and admitted into full connection;" but as before the question is not recorded.

And yet again we read, "Question taken up, the districts were called," etc., but the question itself is omitted.

On page 29 the journal is dated Washington, 1868, when it should be 1867.

Conference session of 1868. We find on pages 65 and 66 a committee reported and the report adopted. It was then reconsidered, amended and adopted, but nowhere appears in the records of the Conference.

Session of 1869, sixth day, resolutions were offered and adopted, marked "M," but not recorded. Also resolutions offered by M. L. Wood, unanimously adopted by a rising vote, marked "N," but not recorded. Also resolutions adopted on motion of H. F. Hudson, marked "P," not recorded. Also a report of treasurer of Board of Domestic Missions, read, amended and adopted, but not recorded.

At the session of 1868 N. F. Reid stated that the charges and specifications presented against J. W. Tucker, and referred to him for investigation as presiding elder, had been investigated by a committee, and that he had present all the papers in the case.

A committee of nine was appointed to reconsider and determine the charges against J. W. Tucker.

On page 59 we read, "The committee appointed to try the charges preferred against Rev. J. W. Tucker have carefully examined the whole case. They have found Joel W. Tucker guilty of the charge of immorality which was preferred against him, and have expelled said Joel W. Tucker from the Methodist Episcopal Church South."

There is no record of charges and specifications found in the journal.

South Carolina Conference.—At the session of 1866 the third day's proceedings were not read and approved.

(Continued on fifth page.)

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church, South.

SATURDAY, JUNE 4, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—Rev. LINUS PARKER, 112 Camp street, New Orleans, La.
AGENTS—All the members of the patronizing Conference.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:
REV. S. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:
REV. M. S. ANDREWS.
REV. WILLIAM A. SHAFARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:
REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:
REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, REGISTER the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

EDITORIAL.

At a meeting of the Publishing Committee of this paper, held at Memphis, May 23, 1870, the following resolution was adopted:

"Resolved, That Rev. L. Parker, D. D., be requested to conduct the editorial department of the NEW ORLEANS CHRISTIAN ADVOCATE, and that the Executive Committee be instructed to notify Brother Parker of our wishes, and engage his services."

We suppose the action of the Publishing Committee needs no explanation. Bishop Keener's engagements will not permit him to continue in charge of the ADVOCATE, but we have great satisfaction in assuring our readers that the paper will have the aid of his continued counsels and frequent contributions.

PRESIDING ELDER OF THE NEW ORLEANS DISTRICT.

The Rev. Linus Parker is hereby appointed to the New Orleans district, Louisiana Conference.

H. N. McTYRE.
Memphis, May 26, 1870.

New Orleans Dist., Louisiana Conference.

SECOND ROUND OF QUARTERLY MEETINGS.

Carondelet street, 7 1/2 P. M., June 6
Felicity street, 6 P. M., " " 7
Moreau street, 7 1/2 P. M., " " 6
German charges, 7 1/2 P. M., " " 10
New Orleans circuit, embracing Algiers, Jefferson City, Louisiana avenue and Carrollton, at ADVOCATE OFFICE, 112 Camp street, at 7 P. M., " " 13
Thibodeaux, Saturday, " " 18
Baton Rouge, Saturday, " " 24
Plaquemine, Saturday, " " 24

The Conference year is so far advanced that it is necessary for this round to be held immediately. The preachers of the district are requested to hold their Quarterly Conferences at the appointed time, as it may not be in my power to attend many of them. I have given the time of the Quarterly Conferences only.

LINUS PARKER, P. E.

CENTENARY COLLEGE.

There will be a meeting of the Board of Trustees and Visitors of Centenary College on Friday, July 1, at Jackson, Louisiana.

J. C. KEENER,
President Board of Trustees.

THE THREE R'S.—He (the Rev. Rowland Hill) used to like Dr. Ryland's advice to his young academicians; "Mind, no sermon is of any value, or likely to be useful, which has not the three R's in it: REFINED BY THE FALL; REDEMPTION BY CHRIST; REGENERATION BY THE HOLY SPIRIT. Of himself he (the Rev. Mr. Hill) remarked, "My aim in every sermon is a stout and lusty call to sinners, to quicken the saints, and to be made a universal blessing to all." Sidney's Life of Rev. Rowland Hill.

THE OLD AND THE NEW.

Methodism is the most progressive form of godliness. It changes no essential thing, but all the non-essentials of its constitution are so many forces mobilized, ready to advance with the demands of the hour. It infuses new blood into old channels, with the regular action of a living heart. By this law of displacement the editor that has been gives place this day to the editor that is—the Rev. Linus Parker, D. D.,—and we pass off the stage with no more disturbance than attends the falling of a curtain. The ringing of a bell and the rising of the same curtain at once introduces to the audience the one who is now to minister to its instruction and entertainment. Of the new editor we might say many good things, but it is enough to say that he has already made, during the past four years, the acquaintance of the readers of the ADVOCATE. Indeed, its success is largely due to his pen, or that of "W." as to the writer.

It will be a long time before we shall be able to keep entirely quiet; for the habit of speaking through these columns cannot be broken in a day. We shall do it as our friends break off from tobacco—very gradually. We shall try, however, to use an entirely new set of words, and go off in quite unexpected directions, so that it will be difficult, may be, for the critical to know exactly who is writing.

The prospects of the ADVOCATE were never more flattering. It is out of debt; its subscription list is increasing; it meets with the favor of Southern Methodists wherever it circulates. We hope that the preachers will rally to it, so that it will be able, by the meeting of the Annual Conferences, to amply support one who can give his whole time to the business of editing.

We send our paper free to all the members of the General Conference, and ask them to send subscribers whenever it does not interfere with the patronage of their own Advocates, but only in that case.

THE GENERAL CONFERENCE.

GENERAL CONFERENCE ROOM,
Memphis, May 26—last day.

Events now follow each other like successive claps of thunder. Since we last wrote the election of various church officers has transpired. The results of a General Conference are not to be precalculated. Great measures and well matured plans have been presented, discussed and rejected. Let it not, therefore, be supposed that all this thought and labor were in vain. Far from it. One of the great uses of such a body as this is to afford expression for the various suggestions and workings of active minds that are reaching out in search of new supports and heights. Safety comes from counsel not only by what it does, but by that which it entertains and does not.

While I write the Conference is winding up with labored, rapid breath. The venerable Bishop Andrew is just now giving us one of his fatherly talks—possibly his last. "I have coveted no man's silver or gold," "I have never failed to go to my work," "Don't forget your old brother," and "I love you," are among the golden words that are falling from his lips.

The Conference is thin. Many have left. It would be well for Annual Conferences to inquire who, of their representatives have disappeared from their seats at the most important time of this session. Just when the reports of the large committees and the election of general officers of the church come up for action their counsel and their votes are equally beyond reach. No doubt many have gone, may be all, to meet pressing engagements; yet four weeks is a very short time to spend upon the legislation for thirty-four Conferences and our large membership. We do not know the use of time if it be not for such labors as those in hand.

The citizens of Memphis have entertained the Conference with marked hospitality. We have had two homes—one at Mr. W. Littlejohn's and one at Major M. J. Wicks—at both of which every possible kind-

ness has been extended to oneself and the brethren who shared with us. The next General Conference meets at Louisville on the first day of May.

THINGS DONE.

The editor of the Daily or the secretary, who this time were one and the same person, the indefatigable Dr. Sumners, is the only one who can state accurately what has been done at this session of the General Conference. We mention a few items:

1. The district meeting has been made an organic part of our system.

2. The action of the last General Conference in regard to biblical departments in our several colleges was readopted and emphasized.

3. The veto of the Bishops against any action they may deem unconstitutional, so as to send such action down to the Annual Conferences, upon the usual course, for constitutional confirmation or rejection, was adopted.

4. The union of the Foreign and Domestic Missionary Societies into one society, as it used to be previous to 1866; and the society domiciled at Nashville.

5. The establishment of a Sabbath school department distinct; with the election of an editor for Sabbath school publications.

6. The reaffirmation of the duty of presiding elders and preachers to maintain class meetings in their original spirit—that the action of 1866 only affected it as a test of membership.

7. The establishment of a new monthly magazine with a distinct editor.

8. The adoption of a new arrangement of the Discipline, so that the laws of the church appear collected under their proper heads.

9. An episcopal letter, by order of the General Conference, setting forth our original and unchanged rule in regard to theater-going, dancing, horse-racing fairs, etc., and against the increased laxity of our membership in these matters; requiring greater consistency in the outward lives of our people; putting down that mischievous notion that the church is a hospital for limping disciples.

10. Five new Conferences have been made, and liberty was granted, under certain conditions, to make two more—a provisional sort of legislation of very doubtful utility, and well calculated to produce restlessness.

11. A general Sunday school convention has been ordered, the call to be made hereafter, at such time and place as the committee appointed may determine.

12. A German hymn book and catechism is to be published.

13. The adoption of a quarterly review, under the oversight of a committee appointed by the Bishops, and edited by Prof. Bledsoe—such a review as will bring strength and the very highest reputation to our church. This we regard as one of the most important and provisionally wise acts of this session. When the whole arrangement is completed we shall have much to say upon it, for we shall have the best quarterly in America.

14. The formation of a colored General Conference was ordered according to the provision of the Conference of 1866; at which a colored Bishop will be elected and the colored Annual Conferences duly set off to themselves. They will then be not under us, but of us and with us. This arrangement the Zion's Herald thinks will end in the general absorption of all our Methodist colored churches by the Methodist Episcopal Church. We think that the absorption throughout the South will be the other way, especially if our colored preachers have the good sense to elect a Bishop from among their own Southern-born people, and not from those affectionate brethren who have of late come down among them from the frigid coasts of the North, desiring to be fed constantly upon honor and hominy. This General Conference is to be held at —, on the —.

15. The increase in Conferences, the amount of service demanded at district meetings, the waning health

of the most experienced of our Bishops, and the opening width of the West led to the election of another Bishop.

16. At the last hour the report of the Committee on Petitions to Change the Name of the Church came in. The Conference, as we think, wisely resolved to do nothing in that direction. Let us hope that this will put a conclusion to all thought of any change in our title. The border men from Kentucky earnestly protested against any change. By the by, the only scriptural part of our name is the word "South." It describes the territory over which our church mainly extends. The only name given in Scripture to churches is a territorial one. The word "Jerusalem" did not limit that church; nor could the word "Antioch," nor the title "Rome," "Alexandria," "Philadelphia" or "Corinth" be construed as restraining the missionary spirit of those churches, or as confining them to the countries in which they were first established, any more than the Church of England is at present prevented by its name from taking in the islands of the Pacific, the East Indies or the people of Canada. The Scriptures did not call churches after men; no, not even Paul's or Peter's name could have been placed where some of our friends would now put the name of Wesley. We accept the word "Methodist" as one accepts the place of birth; but there is no Scripture for it. The word "South" means a certain domain of country which was set apart to us by the Methodist Episcopal Church, in 1844, for cultivation. We justly and properly took our name then. So may it abide forever!

17. And lastly, the New Orleans exception was removed, thereby placing the preachers appointed there under the same condition with other itinerants.

Lay Delegation in the M. E. Church.

From the following statement, which we take from the Methodist, it will be seen that lay delegation has been adopted in the Methodist Episcopal Church. The presence of laymen in our recent General Conference impressed most favorably even those who had opposed their admission, whilst the advocates of the measure regard this policy as triumphantly vindicated. On last Saturday, May 14, the East Maine Conference gave 43 votes for lay delegation, and 14 against; on Monday the affirmative gained one vote, making 44 to 14. This brings the total affirmative to 4,907, the negative to 1,589, and the grand aggregate to 6,496.

We could safely concede to the negative the entire vote of the Germany Conference—45. This would make the grand aggregate 6,541, the total negative 1,634, and the total affirmative 4,907. Three-fourths of 6,541 is 4,905 1/4, or less than the affirmative already obtained.

But in point of fact—1. No Conference has polled a vote equal to the whole number of members on its roll. The number voting has varied from two-thirds to three-fourths. 2. No Conference has polled or will poll a unanimous vote against lay delegation. 3. Our advisers from Germany promise a unanimous vote in favor of lay delegation. As we have more than the required constitutional majority under the most unfavorable supposition possible, we can announce confidently to the church that lay delegation is carried.

A little water may spring in the bottom of the well; but if it do not increase so as to fill the empty and freely overflow, it will become fetid where it lies, and more noxious than utter dryness. It is quite possible, as to emotion, to be very languishing over the misfortune of others, and yet to do the unfortunate as little good as the misanthrope who laughs at human sorrows.—Rev. William Arnold.

The ATHENEUM states that Mr. Disraeli was offered £10,000 for his new novel of Lothair, which was to be published on May 2, and that he was offered £4,000 for its use in a periodical.

IN EXPERIMENTING in London recently on telegraphy, messages were sent to Teheran, in Persia, a distance of 3,700 miles, and answers were received in thirty seconds.

THE THEATER at Pompeii has been reopened after an interval of eighteen hundred years, with "The Child of the Regiment."

NEWS FROM THE CHURCHES.

MONTGOMERY, ALA., May 5, 1870.

Mr. Editor: I have not yet gone to Memphis. God has been doing a great work in my charge. For over five weeks there has been an unusual religious interest, resulting in the conversion of many souls. We have had, since Conference, an addition of one hundred and five members. Several ministers have aided in the blessed work. Rev. O. R. Blue has remained with me, preaching and working effectively. We will leave for the General Conference when we feel justified in closing the meeting. Yours,

JOHN MATHEWS.

UNION SPRINGS DISTRICT,
Montgomery Conference, May 11, 1870.

Mr. Editor: On the second of March I received a kick from a horse, which came near taking my life, and from which I was so disabled as not to be able to attend to my duties on the district for four weeks; but Brother C. A. King, pastor of Line Creek circuit, rendered efficient aid on one charge, and Brother A. Dowling, pastor of the Troy charge, fully supplied the lack of services on another, as well as holding his own quarterly meeting and conference; so that there was but one charge made to suffer. I have sufficiently recovered to resume my labors, but I am troubled with a partial blindness. The sight of one eye has so failed as to be of no service in reading, and I am threatened with a similar failure of the sight of the other. A facial neuralgia, I think, has been the cause. One charge in the district, Rocky Mount circuit, has sustained a severe loss in the death of its pastor, Rev. John F. Dickinson. He was an able and efficient preacher, and was greatly beloved by his charge. Brother W. B. Adams, who was a supernumerary on the circuit, has been placed in charge, and a local preacher has been employed as an assistant.

The preachers in the district are attending to their ordinary ministrations with regularity and efficiency. The editor of the ADVOCATE are kindly invited to attend our district meeting, to be held in Greenville, Alabama, and represent the interest of "our organ." Of the time you will be notified.

J. W. SHORES.

NEW IBERIA, May 18, 1870.

Mr. Editor: We have just closed an interesting meeting in New Iberia, which resulted in the conversion of about twenty souls, and an accession to the church of twenty-three members. The meeting lasted a week. Brother Trippett, of Franklin, was with us, and did good service. The membership of the church was very much revived; so much so that the good work is still going on at prayer meetings that are being held at different places in town and country. Our membership now numbers nearly two hundred—more than double what it was three years ago. This ingathering has been partly from the ripening harvest in our own field, and partly from the influx of new settlers into this delightful country. The large majority of emigrants to New Iberia and vicinity for the last three years have been church members or church goers. The congregations of the various churches are increasing, so that additions to our church buildings are beginning to be needed in order to accommodate all the people. Our Sabbath school has grown in the last year from an average attendance of fifty to sixty, to an average of eighty to ninety scholars, and is still growing.

While we rejoice at these indications of the improvement of the moral and religious tone and character of our community, we yet look for greater things. The spirit of God is still moving upon the hearts of the people. They are hearing the word, and some are almost persuaded to be Christians; while there is no abatement in the influx of good people to our country. The cry is, Still they come! And from the broad acres of fertile lands, from a salubrious climate and a growing, prosperous country echo answers, Let them come!

A. E. GOODWYN.

Plan of Episcopal Visitation for 1870.

FIRST DISTRICT.—BISHOP PAINE.
Western Virginia, Catterburg, August 31.

Kentucky, Covington, Sept. 14.

Louisville, Greensburg, Sept. 28.

SECOND DISTRICT.—BISHOP McTYRE.

COLORADO CONFERENCE.

Kentucky, Louisville, Oct. 19, Bishop Paine.

Tennessee, Brownsville, October 26, Bishop Doggett.

Mississippi, Vaiden, Nov. 4, Bishop Doggett.

Alabama, Selma, Nov. 25, Bishop McTyre.

Georgia, Savannah, Jan. 4, Bishop Pierce.

Arkansas, Camden, Nov. 25, Bishop Keener.

South Carolina, Abbeville, August 5, Bishop Wightman.

NOTE.—Bishops Andrew and Early, being supernumerary, are without appointment, and will visit such Conferences as they find convenient.

THOMAS MURRAY.

THOMAS MURRAY was born in Ayrshire, Scotland, in 1818, and for twenty-five years past has been a resident of this city. He became a member of the Methodist Episcopal Church South in May, 1860, and for the last two years has been a member of the board of stewards. Brother Murray was a warm friend of the Sunday school cause. He was liberal in his support of church institutions and charitable to the poor. For months past he has been confined to his house by an incurable attack of dropsy. During these months of confinement I saw him often, and conversed and prayed with him frequently. He expressed again and again the strongest faith in God, and the most confident hope of salvation through Jesus Christ. He often expressed himself as happy in God, and entirely resigned to his wise and holy will. It is sad to think we shall see his genial face no more; but we hope to meet him in the home of the good. We find and subjoin from the Penny magazine the following just and appropriate remarks upon the general character and position of Brother Murray as a citizen:

"A GOOD MAN DEAD.—Mr. Thomas Murray, whose death is announced in the morning papers, was a most worthy and respected citizen, who had resided here for many years. He was a native of Scotland, and by profession a builder and architect, and had erected several of the finest buildings to be found in the city. He was distinguished for his active spirit of charity, and for the practical turn he gave to all benevolent objects with which he was connected at various periods, being regarded by all contributors for the relief of the poor and distressed as a most capable and faithful steward of their bounty. He was one of the leaders in the organization of the free market, in the year 1861, for the benefit of the families of those who had volunteered in the Confederate service, or others who needed assistance, and was always to be seen there at the hour of distribution, giving his personal aid and services in that work, together with the lamented Mr. Ricardo, I. N. Marks and other gentlemen."

"For some time Mr. Murray was president of the Mechanics' Society; and as a member of the Legislature was prominent and earnest in getting an appropriation made for the establishment of an asylum or home for disabled soldiers at Minuterville, and was afterward the principal of it."

His pastor, J. B. WALKER.

It is contemplated at Rome to canonize Columbus.

(Continued from third page.)

Session of 1867 Rev. J. B. McFerrin, D. D., is spoken of as secretary of foreign missions. The last day's proceedings not read and approved. Minutes of the last two days not read and approved. In all other respects the journal has been well kept, and is deserving of a high measure of praise.

The journal of the South Georgia Conference is, in the main, correct. There is, however, a single omission, for three consecutive sessions of this body, as to the presence of any presiding officer in the chair after the day on which the Conference assembled and commenced business.

At the session of 1867 there is a record of the expulsion of a certain member for "immorality," but no record of charges, specifications or evidence in the case.

At the session of 1868 it is stated that the statistical report was read, with the entry, "see report," but the report nowhere appears on record.

The journal of the Georgia Conference for 1866 states that the Committee on Memoirs "closed" their report in the case of John Simmons, and the appendix contains the report, but there is no mention of the death of the brother in answer to the question, "What preachers have died during the year?"

The journal is not paged, and there are but few marginal notes.

The North Georgia journal for the years 1867, 1868 and 1869 is a model of Conference journalism as a whole, but, like the South Georgia journal, it contains the strange omission, for three consecutive years, of any note as to the official occupancy of the chair, from day to day, except the opening of the session, except in three or four afternoon and night sessions near the close of the Conference. With the exceptions alluded to the journal cannot be too highly commended.

Florida Conference.—The journal of 1866 not before the committee. At the twenty-fourth session, 1867, questions 5, 9, 11, 14, 16, 17, 18, 19, 20, 21, 22, 23, not asked, and the report of the Board of Domestic Missions not recorded.

At the twenty-fifth session, held January, 1869, questions 1, 2, 3, 6, 8, 10, 15 were asked, the rest omitted.

At the twenty-sixth session, held December, 1869, questions 1, 3, 4, 8, 10, 15 were asked, the rest omitted. The journal for this session not signed by the secretary.

Montgomery Conference journal is found unexceptionable, bating the fact that it is not paged, and has a running heading foreign to the subject. Otherwise (and these exceptions are trivial) it is an admirably kept journal.

Mobile Conference.—In the journal of the third session of the Conference, held November, 1866, there are the following defects:

The journal is not paged. The report of the Committee on Memoirs is commenced but not completed. Two and a half pages of the journal at that place left blank. The report on the fund for delegates to the General Conference is not recorded. Also reports from the Committee on District Meetings, adopted and referred to, but not recorded. The sixteenth question is asked and unanswered; and nearly three pages of the journal at that place left blank. The report of the financial board is referred to but not recorded. There is no record of the reading of the minutes of the last day of the session.

In the journal of the fourth session, held December, 1867, are the following defects:

The journal is not paged. In the minutes of Monday morning session there is no record of the reading of the minutes of Saturday. The statistics are very meager. There is no account of the minutes of the Monday afternoon and night sessions having been read and approved.

In the journal of the fifth session, held December, 1868, we notice on page 7, after the record of the adjournment of the Conference for the day, the fifth question is asked and answered. On page 8 the report on the religious interests of the colored people is referred to but not recorded. On page 20 a report on the location of a female college was adopted, and is referred to but not recorded. There is no account of the minutes of the last meeting of the session being read and approved. Nor does the journal state how the Conference adjourned, or that it adjourned at all.

In the journal of the sixth session, held December, 1869, a memorial from the district meeting of the Mobile district is referred to, but, excepting the resolution, is not journalized. The report of the board of finance, the report of the committee to reconsider the commission of the Rev. Dr. Meredith, and the report supplementary to the financial report were severally adopted, but not recorded. No statistics recorded. No account of the minutes of the last meeting of the session being read and approved.

Louisiana Conference.—On page 20, Conference session of 1866, page 22 and page 24, the action of several committees is reported and

adopted by the Conference, but no record of the reports, either in the body of the journal or appendix. Questions 12, 14, 16, 22 not noted, though the matter of the answers to these questions is contained in the journal.

Session of 1867, many of the questions not propounded, but the substance of the answers given.

On page 91, session of 1868, page 92, and on page 93, we have the facts recorded that the committees on Sunday schools, on ministerial support, and on education, severally reported, and the reports were adopted, but in no instance is the body of the report recorded.

In the case of James A. Ivey, in reference to whom a committee was appointed, it is stated, page 96, that the committee made their report, and a resolution was adopted passing his character, and another returning the papers containing complaints to his presiding elder; but there is no record of what the complaints were in this case.

On pages 98, 130, 133 and 134 reports of committees are presented and adopted. The resolutions in some instances are recorded, but there is no record of the reports themselves, either in the body of the journal or in the appendix.

Mississippi Conference.—We find the journal of the Mississippi Conference correct in all particulars.

Memphis Conference.—Journal well kept, and very neatly recorded. We find, however, a number of little errors and inaccuracies, which mar the journal.

At the twenty-seventh session, page 120, the third and seventh questions were taken up at the same time. No answer to question 21. Question 23 is omitted, and in lieu thereof it is stated, "the following appointments were made."

The minutes of the trial of D. F. Tabb are not recorded.

At the twenty-eighth session, 1867, page 156, it is said the Conference adjourned with the benediction by the Bishop, while there is no record showing that a Bishop was even present. On page 157 we find questions 3 and 7 taken up at the same time as at the previous session. Many circuits report no statistics at all.

The report of the committee on the trial of A. B. Sollers is said to be recorded in appendix, but not found.

At the twenty-ninth session, 1868, question 23 not recorded.

At the thirtieth session, 1869, page 265, question 16 not stated; and on page 272, blank not filled. Page 279, minutes not stated to have been read and approved, and question 23 omitted.

Tennessee Conference.—The journal of this Conference is very well and neatly kept, and shows but few faults. No financial report is recorded for the year 1867. The record of the trial and suspension of a member is given, and yet no record of charges, specifications or testimony.

On page 119 this Conference excuses a violation of law by certain quarterly conferences.

There is no financial report on record for 1869.

On page 125 there is the report of a committee on the investigation of charges, specifications, etc., against a member, and yet the charges and specifications are not given.

Holston Conference.—The journal is in the main unexceptionable. In the minutes of the session of 1866, in two instances (pages 77 and 85) no mention is made of the presiding officer. Altogether this journal merits high commendation for its general accuracy and completeness.

Kentucky Conference.—The records of this Conference for 1866 were not before your committee—an omission which often occurs at the close of a volume, but which should not be allowed.

In general the journal is well kept; a few errors and a few omissions, however, may be noticed.

In the record of 1867 the names of the members of the Joint Board of Finance are not given.

"Action" is sometimes "taken" on given subjects, but nothing is given to show what that action was.

No "Joint Board of Finance" appointed at the close of any session, as is customary and required by law.

Louisville Conference.—We note omissions as to the official occupancy of the chair in a number of instances. On the first day of the twenty-first session (journal page 188) the Bishop not being present, Dr. Linn was elected president of the Conference. On the second day the business was taken up without noting who was in the chair, though it appears the Bishop was then present. A like omission occurs at the twenty-second session, (journal page 256) and again at the opening of the twenty-third session, as also on the first and second days of the twenty-fourth session. With these exceptions the journal appears complete, and worthy of commendation.

The journal of the St. Louis Conference is free from even inaccuracies. It is pronounced entirely un-

exceptionable in every particular of a Conference journal.

Missouri Conference.—The journal is nearly faultless. On page 40, session of 1866, in answer to question, "What local preachers are elected and ordained elders?" it is recorded, "the following names were called; characters passed, and they elected." This is a small oversight. The journal deserves very high praise for its accuracy and neatness as a whole.

Arkansas Conference.—There is no record of the Conference held in 1866 in the hands of the committee. The record of 1867 breaks off before the close of the session, and the appointments of the preachers, and possibly many other things, are not recorded.

In 1868 the Conference adjourned to meet at three o'clock P. M., and nothing follows but the appointment of the preachers.

The journals for 1867 and 1868 are not signed by president or secretary.

Great irregularity appears under the usual questions. Admitting on trial is recorded under question 2, "Who remain," etc. Election of elders' orders is recorded under question 1, "Who are admitted," etc. The transfer of a preacher to another Conference is recorded under question 2, "Who remain on trial?" A transferred preacher is recorded under question 15, "Are all the preachers blameless," etc.

The following singular record is found in the journal of 1867: "Francis M. More, who was discontinued at our last session on account of his absence, came forward and showed, through J. M. P. Hickerson, his presiding elder, that he had been formerly received into full connection in the itinerancy, and elected to deacons' orders by the East Texas Conference during the prevalence of the late war, and at a time he could not reach the Arkansas Conference to be received; therefore, on motion of said Hickerson, the action of the East Texas Conference in the premises was legalized by this Conference, and Francis M. More recognized as a member of the Arkansas Conference in full connection, regularly elected to deacons' orders."

Here we have the singular fact of one Annual Conference legalizing the acts of another; and the still stranger feature that the alleged acts are not true; for the statement that Francis M. More had been received into full connection and elected to deacons' orders by the East Texas Conference turns out not to be true. The journal of the East Texas Conference for 1865 shows that F. M. More was elected to deacons' orders under question 8, "What local preachers?" etc. Such a record as this is untrue, illegal, and ought to be corrected.

Little Rock Conference.—We note, page 2, a communication received, but not disposed of in any way. Page 15, report of Committee on Memoirs in the cases of John Harris, Fountain Brown, Malcolm H. Turner, Franklin Bond and J. C. L. Aldin, not recorded. Page 20, steward's report incomplete. For the year 1867, question 16, very imperfect. Pages 38, 39, 40, 41 and 60 show no record of minutes read and approved.

Session of 1868, page 62, memoirs of Ratliff and Croswon not recorded, though the record in the daily proceedings say they are on page. No reports for this session recorded.

Session of 1869 correct, save in the omission to record a report.

Indian Mission Conference.—In the journal of 1867, page 282, in answer to the fourteenth question, "What preachers have died during the year?" we find the name of Thomas Bertholf. On page 234 there is an entry noting the reading of his obituary, but no record of the same is found, as required by the law.

In the minutes of 1868 we find reference to reports from various committees being read and adopted, but no record of them in any form.

At the session of 1869 we find no account of the minutes having been read from day to day, during the entire session. Also, the obituaries of two deceased brothers presented, read and adopted, but not recorded.

In other respects the journal appears to be correct.

Texas Conference.—This journal is well kept, and we find in it, altogether, much to commend.

At the session of 1866 the appointments of the preachers not recorded, though the journal is duly signed by the Bishop.

On page 310 we find this singular entry: "Question 1 was taken up, whereupon the following action was taken: The petition of John S. Clower was presented by Brother R. Alexander, P. E., and his request was granted." What the request was we are not informed.

East Texas Conference.—We note uniform omission to enter the names of those present at roll-call.

At the session of 1866 S. A. Williams reported deceased; S. Lynch and F. Wilson, in 1867; A. H. Shanks and Joseph Bond in 1868, and J. R. Burk in 1869. Reports

are presented on the decease of those brethren and adopted, but not recorded.

In 1867 there was no report from the Committee on Memoirs. Indeed, we note uniform omission to record reports. The journal is not paged.

Trinity journal is reported perfect. This is the very highest praise we can give it.

Northwest Texas.—In the journal of 1866 we note the omission to state, who occupied the chair on three of the daily sessions. Session of 1867, same omission in two instances. Session of 1868, same omission in two instances. At the session of 1869 we find the following record: "The name of Thomas Whitworth was called, and he was located according to the Discipline."

West Texas Conference.—The journal of this Conference shows considerable irregularity in the disciplinary questions on the business of an Annual Conference.

On page 92 the "case" of a member is reconsidered, a special committee appointed to take into consideration all the complaints against him, and report for the action of Conference; and on page 93 this committee reports a conditional resolution to the effect that "his presiding elder appoint a committee of three, who shall examine all the accusations against him, and if he is found innocent enough in their judgment for his character to pass, it is in this act of the committee passed; but if it is not the case, they shall punish him as they think right, and report to the next session of the Conference." And all this without any statement of charges, specifications, history or nature of the case.

Query: How "innocent" must a man be, in the judgment of a committee of three, in order to the passage of his character?

The journal of this Conference shows other cases of trial and punishment, with no record of charges, specifications, etc.

The committee submit to the Conference whether or not the administration is according to law and usage in the above mentioned case, under the "conditional resolution?"

Columbia Conference.—Very well kept. We note the omission to record the notice given by the Bishop of the ordination of deacons and elders.

Pacific Conference.—We find no mention of the presence of a Bishop, or of any other presiding officer, on the third and fourth days of the session of 1866. With this exception the journal contains a complete record of the Conference proceedings.

Illinois Conference.—This journal is found free from errors and omissions. As a whole, it is worthy of high commendations. It might be improved by inserting a larger number of marginal notes and references.

The committee beg leave to submit the following resolution for the adoption of the Conference, with the design of still further tending to improve and perfect the journals as historical records of our Annual Conferences:

Resolved, 1. That the secretaries of the Annual Conferences, for the sake of greater convenience, be requested to use such books for their records as will conveniently comprise the regular proceedings of the four annual sessions coming between the sessions of the General Conference, with the appendix for reports, etc., so that only one book of medium size shall be necessary to be forwarded to the General Conference for the use of the Committee on Itinerancy.

2. That the secretaries be requested to keep up a running heading, from page to page of the journals, stating the date of the Conference session.

3. That the Bishops be respectfully requested to see that the regular questions are recorded by the secretaries in their numerical order, and answered; and that they give particular direction as to the recording the memoirs of the deceased preachers, and the reports of committees.

JNO. E. EDWARDS, Chairman.

Bishop McTyeire said: "I think the whole Conference feels indebted to the committee for this report. It is so complete and thorough. I have this suggestion to make. The minutes of the Annual Conferences have witnessed great improvement during the last four years, and that improvement may be distinctly traced to the report of the Committee on Itinerancy four years ago. You then ordered that report to be printed and a copy of it given to each Annual Conference secretary, and he was directed to paste or put it in the fly leaf of his journal. Hence this improvement. Some of the Conferences have been specially, and I have no doubt justly, commended in this report, who four years ago were sharply rebuked for the irregularities of their journals, for omissions, errors and such like. Not to be invidious, I may instance one. Four years ago the committee animadverted on the manner in which its minutes were reported. I had the pleasure of meeting with that Conference at its

first session after that. The report was read in their hearing, and they were mortified at it; and they selected a secretary not on the score of his popularity, but they elected an efficient, competent secretary, who in the light of those strictures gave us excellent minutes on the first day and afterward. Let us therefore have something done in that way with this report, and it will effect all you wish to accomplish. It is not *late* that our brethren want—especially the unpracticed secretaries—but *instruction*. Let them know by these directions, and the special strictures of this elaborate report, how you wish their journals kept, and those important documents will be conformed accordingly. Spreading this report before the Annual Conferences and the secretaries, and keeping it before them, will still further advance their minutes toward perfectness."

L. M. Lee, chairman of the Committee on Episcopacy, submitted Report No. 9 of that committee, which was laid over under the rule and made the order of the day for

(Continued on sixth page.)

Koskoo.—This medicine is rapidly gaining the confidence of the people, and the numerous testimonials of its virtues, given by practitioners of medicine, leaves no doubt that it is a safe and reliable remedy for impurity of the blood, liver disease, etc.

The last *Medical Journal* contains an article from Prof. R. S. Newton, M. D., president of the Medical College, city of New York, that speaks in high terms of its curative properties, and gives a special recommendation of Koskoo to the practitioners of medicine. This is, we believe, the first instance where such medicines have been officially endorsed by the faculty of any of the medical colleges, and reflects great credit upon the skill of Dr. Lawrence, its compounder, and also puts "Koskoo" in the van of all other medicines of the present day.

Norfolk Daily Journal, Dec. 11, 1869.

MARRIED.

In Wesson, Mississippi, May 11, by the Rev. Robert B. Downer, Mr. WILLIAM F. PREWITT to Miss MOLLIE WALKER.

NEW ADVERTISEMENTS.

GEORGE H. HOLZACH'S
PATENTED IMPROVED
MOVABLE WINDOW SHADE.

This improvement relates to a new and simple manner of so arranging window shades that light and air can be admitted into the room through the upper part of the window without raising any portion of the shade; and when the window is furnished with the combined screens its usefulness and comfort in warm weather, when a good current of fresh air is so welcome, cannot be surpassed.

Parlors, dining rooms and bed rooms, the latter especially in those of sickness, are by this improved combination thoroughly ventilated and lighted at pleasure, without the slightest inconvenience to the sleeper or patient, at exposure to the passerby.

It can be attached to any window with but little alteration and at moderate expense. Orders solicited and promptly attended to. State Rights for sale by

THE ONLY TRUE AND PERFECT HAIR COLORED.

The Mystery, or Turner's Hair Tint.

A harmless, beautiful and permanent Hair Dye.

It is the only preparation ever invented, where the shade can be controlled at the will of the operator, and at the same time easy of application. It is now used by the principal Hair Dressing Saloons of New Orleans, and all over the South. A sample box will be sent, postage paid, to any address or Post Office in the United States, upon receipt of price, \$1, by JAMES TURNER & CO., Chemists and Druggists, No. 20 Camp street, under City Hotel, New Orleans. ap2 3m

BACHELOR'S HAIR DYE.

This splendid Hair Dye is the best in the world. Harmless, reliable, instantaneous; does not contain lead, nor any other poison to produce paralysis or death. Avoid the painted and delusive preparations boasting virtues they do not possess. The genuine W. A. Bachelor's Hair Dye has had thirty years' unimpaired reputation to uphold. It is the only perfect Hair Dye—Black or Brown. Sold by all Druggists. Applied at 16 Bond street, N. Y. jy24 1yr

BROOKS' IMPROVED PATENT

WROUGHT IRON REVOLVING

COTTON SCREW PRESS.

Patented by R. M. Brooks, of Georgia, April 14, 1868.

It took the first premium at the Louisiana State Fair, at New Orleans, April, 1869, over eleven competitors; also at the Tennessee State Fair, at Memphis; and more recently at the Mississippi State Fair, at Jackson; and again at the recent State Agricultural Fair, at New Orleans, April, 1870, in a contest with fourteen Cotton Presses, embracing the most approved patents from different States of the Union, North and South.

The following is the certificate of some of the principal cotton factors and merchants of New Orleans. In our circulars can be seen the certificates of practical planters and seedling artisans from several Southern States in regard to the admirable principle and practical working of this Press.

We, the undersigned, purchased last season, from Messrs. J. H. Jennings & Co., the Brooks Revolving Cotton Screw Press, for our customers, and, so far as heard from, they have given entire satisfaction.

Moses Greenwood & Son, Warren, Crawford & Co., C. L. Wallasey, Ivey, Melburn & Co., Frank & Daniel, Campbell & Strong, Chapp Bros., Co., E. F. Hudson & Co., R. S. Walker, Violet, Black & Co., Block Bros., Wright, Allen & Co.

Circulars, giving cuts, with full description, price list, etc., sent by mail on application to

J. B. JENNINGS & CO.,
Proprietors, 14 Union street,

FINE TOILET SOAPS.

"AMERICAN COMPANY."

(Continued from fifth page.)
Saturday, at ten o'clock. It is as follows:

REPORT OF COMMITTEE ON EPISCOPACY. NO. II.

THE POWER OF BISHOPS.
The Committee on Episcopacy having been "instructed to inquire into the validity of the last proviso in the restrictive rules, under the circumstances of its introduction into the Discipline, and to report whether any additional legislation is necessary respecting said rule;" and having given their careful attention to the subject, beg leave to submit the following as the result of their deliberations.

The resolution contains two distinct subjects:

First, as to "the validity of the last proviso in the restrictive rules, under the circumstances of its introduction into the Discipline;" and

Second, as to "whether any additional legislation is necessary respecting said rule."

We consider them in the order of their statement.

First, as to the validity of the proviso.

The resolution, in its terms and intent, suspends the constitutional validity of the proviso, and supposes the presence of something in "the circumstances of its introduction into the Discipline" that invalidates its authority, and renders it of no effect as a provision for investing the episcopacy with the right or power to veto an act of the General Conference. The suspicion expressed in the resolution is justified by "the circumstance" under which the proviso was "introduced into the Discipline."

It was the act, simply and solely, of a majority vote of the General Conference. The resolution putting it into the Discipline, and giving it the authority of law, with the quality and power of a restrictive rule of the church, both as to the rights of the episcopacy and the powers of the General Conference, was introduced and adopted on the thirty-first of May, at the General Conference of 1854. The resolution originated with the late Rev. W. A. Smith, D. D. But after its adoption, and on more mature reflection, he did not regard it as complete and authoritative as enacted in 1854; and sought, at the General Conference of 1866, to correct and legitimate what he believed to be defective and imperfect in its character and authority as a law. The position it occupies in the Discipline, as related to and a part of the constitution, recognize and proclaim it as one of the constitutional provisions of the church; and yet it is isolated, in form and authority, from other provisional exceptions of the constitution, and becomes a part of the constitution not by an appeal to the original and ultimate authority of the church, but by a mere majority vote of the General Conference. The General Conference may, under certain limitations and restrictions, make rules and regulations for the government of the church by a majority vote; but it cannot add to, or take from, the restrictions imposed upon it by the church, by the vote of a majority of its own members. If, therefore, the proviso in question be regarded as a law of the General Conference, it is out of place and without authority as a part of the constitution; and if it be held as in and of the constitution of the church, it is still invalid and without force, because it has not the sanction and is without the authority of the church. It is not constitutionally a part of the constitution.

Again: The supposition that the proviso added to the constitution by vote of the General Conference, in 1854, is valid, and possesses the force of law, rests upon two assumptions, neither of which is true. It assumes, first, that the right of power to veto an act of the General Conference is inherent in the episcopacy; and, second, that the General Conference, in its own right, possesses the power of determining the constitutionality of its own acts.

I. As to the first of these assumptions it is enough to say, as a broad, general view of the subject, that, whatever may be held as an abstract idea of the inherent rights and powers of the episcopacy, the right or the power of the veto, as a prerogative of the episcopal office, has neither been held as a principle nor exercised as a power in our church. Its need has sometimes been felt, and its utility, under well defined limitations and restrictions, will be readily acknowledged; but the church has never conferred it, and the Bishops have never used it. Besides, the doubts as to the validity of the proviso in the Discipline must satisfy every thoughtful person that the veto power contained in the proviso is not the recognition of an inherent right or original power of the episcopacy, but is the creation of the General Conference at the time and "under the circumstances of its introduction into the Discipline." And, in addition, the proviso itself, both in the power it assumes and the right it confers, has nothing older than

itself, or outside of itself, or independent of itself, to establish its self-assumed power or to legitimate its well intended, but unauthorized rights. As it does not either recognize or assert the inherent veto power of the episcopacy, and did not, because it could not, confer it, it may be safely affirmed, on the broad, general view we are now taking, that the veto power does not inhere in the episcopal office, and does not belong to it by any legitimate act or authorization of the church. The General Conference, in the act we are considering, did not possess the power, and could not confer the right or the power of veto upon the episcopacy of the church.

Pursuing the inquiry as to the inheritance of the veto power in the episcopacy, we turn from these general views of the subject to the special facts of our church history and government, which may be regarded as authoritative exponents both of the fact and the principle we are seeking to solve and establish. The following facts need only to be stated:

1. The right or power of veto is not recognized or conceded, either by expression or implication, in the composition or constitution of the delegated General Conference; or in the rights and powers by which it was authorized to assemble and make rules and regulations for the government of the church.

2. The episcopacy of the church has never assumed or asserted, and does not seem ever even to have suspected the inheritance in themselves, or their office, of the right or power to veto an act of the General Conference.

3. The General Conference, except in the resolution of 1854, has not, by an expression of opinion or act of legislation, indicated the knowledge or belief, or even the suspicion of any such right or power in the episcopacy; and even the resolution of 1854 contains in itself the evidence of the fact that it was the spirit and purpose of the act to call into being and give form and power to a right not previously existing, and yet felt to be important, if not necessary, to the security and permanence of our ecclesiastical system. The act clearly was, and was intended to be, a creative act.

4. When, in 1820, the General Conference, by resolution, made presiding elders elective by the Annual Conferences, and thereby denied to the episcopacy both the right and the power of appointing them, the senior Bishop, McKendree, believed the act to be unconstitutional, because it interfered "with the plan of our itinerant general superintendency," and was, therefore, in conflict with one of the restrictions upon the power of the General Conference. At the same time Joshua Soule was elected Bishop, but declined consecration, and resigned the office, because he believed the act to be unconstitutional, and could not accept an office that imposed obedience to the resolution. The senior Bishop prepared a protest, "pronouncing the resolution unconstitutional, and therefore destitute of the proper authority of the church." He did not, however, present the protest, because, under these combined influences, the General Conference suspended the operation of the resolution, and, in 1824, repealed it. These are historical facts. And, in their essential nature and qualities, they ignore and repudiate both the idea and the fact that the right or the power of veto resides in the episcopacy. The conclusion is too plain and positive for doubt or dispute.

On all the grounds, then, as herein set forth and established, that deny and disprove the inheritance of the right or power of veto in the episcopacy, the assumption of such right, as validating the resolution of 1854, falls to the ground, and with it the supposition of the validity and authority of the proviso also falls; and the proviso itself is, therefore, in this view of it, void as legislation, and of no effect as law.

II. The second point of the supposition that the proviso in question is valid, and possesses the force of law, rests, as has been stated, upon the assumption that the General Conference, in its own right, possesses the power of determining the constitutionality of its own acts. A starting point in the argument against this assumption may be well taken in the opinion and words of the late venerable senior Bishop of our church, the Rev. Joshua Soule, uttered as long ago as 1824. He then said: "The General Conference is not the proper judge of the constitutionality of its own acts. If the General Conference be the sole judge of such questions, then there are no bounds to its power." It might be added, and no security against its power, or its encroachments upon the integrity and unity of the church, or the rights of its ministers. But we do not draw arguments from the possible intolerance of power, or the apprehensions of danger; nor rest them upon opinion—even the opinion of so good and great a man as Joshua Soule. We take higher and stronger

grounds. Our own constitutional history is the field of its argument. But we do not traverse its circumference; we only take the dimensions of its density and diameter. We present the whole argument in propositions that contain their own conclusions, and, at the same time, contradict the assumption that the General Conference, in its own right, possesses the power of determining the constitutionality of its own acts.

1. The General Conference is not an original body, self-existent and independent. It is the creation of another body, larger and stronger than itself. It does not possess original life or power. It has power; but its powers are derived and dependent. Again: It is representative; represents a power behind and outside of itself; existing before and independent of itself. The General Conference has a constitution, but it did not make its constitution. It was made for it by another body, and before it had a being. Its own being and power reside in, and are derived from, the constitution that another gave it, and that gives it organic life and power. The terms and tenor of the restrictions upon its powers show its responsibility, and prove that the right of determining the constitutionality of its acts was reserved, and remains in the hands of the original body of elders.

2. The General Conference is a delegated body, with delegated powers. It was constituted, and its constitutional prerogatives and powers defined and limited, by the body of elders of the church, in general convention assembled, in 1808. Previous to 1808 the whole body of elders, in quadrennial session, possessed the legislative power of the church, and made all rules and regulations for its government. For sufficient and satisfactory reasons they then determined to delegate their powers, under certain limitations and restrictions, to an elective body of elders, to be chosen from and by the members of the several Annual Conferences. Subsequently, in 1828, the first proviso of the constitution, as it now stands, defining the means and mode by which any one of the six restrictions, except the first, which is held to be unalterable, may be altered, was adopted, and became a part of the constitution. Within the limitations specifically stated, the General Conference has "full powers" to make rules and regulations for our church; outside of the restrictions it has no power to make, to modify or to revoke; to effect either of these changes, or any other, it is compelled to remit the subject to the judgment of the original body of elders.

3. The General Conference is a dependent and responsible body; dependent for its being and authority upon the original body of elders, and responsible to them for its fidelity in the use of the powers delegated to it. But without some provision of the constitution, such as was aimed to be established in the proviso under consideration, there is no legitimate or authoritative mode either of questioning the constitutionality of their acts, or of remitting them to another tribunal for adjudication. And in the absence of suitable provision for this purpose, the General Conference may exercise the powers, even if it do not claim the right of determining the constitutionality of its own acts; and, in such an event, the General Conference absorbs all power into itself, its responsibility ceases, and it can "revoke, alter, change or destroy" even the constitution itself, at its own will and by its own act. Such power was not given to it, nor intended to be given. But all this power would have been given, if in what was given was included the right of determining the constitutionality of its own acts. The original body of elders delegated everything of power they possessed if they delegated this power. They reserved nothing to themselves if they did not reserve the right to guard their own constitution; if they did not reserve the right of determining the constitutionality of the acts of the delegated body; if they did not reserve the right to hold their agents and representatives in the grasp of a grave, dignified and ceaseless responsibility to themselves as the ultimate and only legitimate judge of their acts, and of their fidelity to the engagements and obligations of the constitution, made and provided for their especial guidance and government. It is incredible that such a body of men as those who inaugurated the constitution of the church, and checked and restrained the General Conference with such limitations to their acts, and such restraints upon their power, could have been so incautious and inconsiderate as to dispossess and deprive themselves so utterly of any further and all future relations to and control over those to whom they intrusted their rights and delegated their powers. Such a supposition would be an assault upon their integrity and intelligence, as unjust as it is unmerited. In view, then, of the foregoing

facts and arguments, and in consideration of the further fact that the proviso in question, for "its introduction into the Discipline," and for its validity as a part of the constitution, rests solely upon the vote of the General Conference, your committee is of the opinion that it is defective in authority as a law; and that it is not, and of right cannot be, either received or maintained as a part of the constitution of the church.

We were instructed to inquire and report:

Second, as to "whether any additional legislation is necessary respecting said rule?"

If the General Conference accepts the conclusions of its committee, the invalidity of the proviso, and its consequent incompetency to fulfill the objects of its incorporation into the Discipline, are already determined. The only question deserving of consideration now concerns the desirableness of such an addition to the constitution. The need of it has been often felt, and the absence of the provision and its powers, for their conservative influence, and as a check upon hasty and improper legislation, as often deplored. There can be scarcely a doubt as to the necessity of such a definition of the rights of the episcopacy, and the powers of the General Conference, as it was believed would be secured and settled by the resolution adopted in 1854. Right is not always secure or strong. Power is cumulative, aggressive, self-willed. Right and power are often antagonistic. Undefined right is uncertain and insecure. Uncontrolled power is grasping and ambitious: the one needs a shield, the other a bridle. Both, in their relations to each other and to the church, will be better with legislative definitions and constitutional guards.

Besides, in the possible contingency of a disagreement between the Bishops and the General Conference as to the constitutionality of any act of legislation, a contingency that may often, and at any time, occur, there is now no established rule of procedure for the adjustment of the issue, or the settlement of its difficulties. The security and peace of the church may, in such a case, receive great damage. Is it not the dictate of wisdom to "foresee the evil," and prevent it by necessary legislation?

Assuming, as we may be free to do from the act of the General Conference in 1854, that that act was the evidence of a desire and the expression of a purpose to supply a need of the church long and often painfully felt; and desiring that the church may be freed from the apprehension of evil from emergencies that may arise from differences and disagreements as to acts of legislation, or questions of right or power, may we not venture to express the hope that the General Conference will so far agree with its committee in its opinion as to the necessity of foreclosing the whole subject by appropriate legislation, as to adopt the resolution hereunto annexed, and thereby do itself the credit of consummating the work so well begun by the aggregate body of elders in 1808; and of securing to the episcopacy rights and powers they have not asked, but always deserved and needed, and which, we may both hope and believe, they will well use and never abuse.

Your committee, therefore, recommends the adoption of the following resolutions as conclusive of the subject, and necessary to legitimate and perfect the object contemplated and sought by the proviso of 1854.

Resolved, 1. That the last paragraph on page 44 of the Discipline, beginning with "provided," and ending with the words "null and void," be stricken out.

2. That the following proviso, if it receive a two-thirds majority of this body, be sent round to the several Annual Conferences, and if it receive a three-fourths vote of the same, it shall be inserted in the Discipline in lieu of the aforesaid paragraph.

"Provided, That when any rule or regulation is adopted by the General Conference which, in the opinion of the Bishops, is unconstitutional, the Bishops may present to the Conference which passed said rule or regulation, their objections thereto, with their reasons, and if then the General Conference shall, by a two-thirds vote, adhere to its action on said rule or regulation, it shall then take the course prescribed for altering a restrictive rule, and if thus passed upon affirmatively, the Bishops shall announce that such rule or regulation takes effect from that time."

All of which is respectfully submitted.

LEROY M. LEE, Chairman.

MEMPHIS, May 19, 1870.

W. M. Rush, chairman of the Committee on Books and Periodicals, submitted Report No. 16, which was adopted.

R. Alexander, chairman of the Committee on Boundaries, submitted the report of that committee, which was read, and a motion of S. P. Whitten to lay it on the table and

make it the order of the day for Monday next at ten o'clock, and another by B. H. Spencer, to recommend the report, did not prevail. The report was then acted upon, item by item.

The boundaries of the Baltimore Conference were adopted.

A motion of S. P. Whitten to reconsider the vote on this item did not prevail.

The items referring to the boundaries of the Virginia and Western Virginia Conferences were then adopted.

The item referring to the boundaries of the Holston Conference was read, and A. M. Shipp moved the recommitment of the items referring to the boundaries of the Holston, North Carolina and South Carolina Conferences, which, on motion of J. M. McTeer, was laid on the table.

A. M. Shipp and H. A. C. Walker offered an amendment, which was sustained by the movers and W. Smith, and opposed by J. M. McTeer, N. F. Reid and W. H. Babbit, and on motion of A. H. Mitchell was laid on the table. It is as follows:

Resolved, That a new Conference be established, to be called Western North Carolina Conference, embracing the territory within North Carolina now held by the Holston Conference, the territory within North Carolina now held by the South Carolina Conference, and bounded on the east by the Pee Dee or Yadkin river, beginning south at the South Carolina line, running thence north with said river to the county line of Davidson county, North Carolina, east; thence with said county line to the North Carolina railroad; thence with said road to Greensboro, North Carolina, leaving said town and all other towns on the road in the new Conference; thence with the Piedmont railroad to the Virginia line, leaving all towns on the said road in the Western North Carolina Conference.

A. M. SHIPP,
H. A. C. WALKER.

The items referring to the boundaries of the Holston Conference were then adopted.

On motion of T. Reed, it was ordered that when we adjourn we adjourn to meet this afternoon, at half-past three o'clock.

The item referring to the boundaries of the North Carolina Conference was taken up and the following amendment, on motion of N. F. Reid, to wit:

Resolved, That the boundaries between the North Carolina and South Carolina Conferences remain as heretofore.

A. M. SHIPP,
W. SMITH.

Leave of absence was granted for the remainder of the session to John M. Swinford.

The committee to arrange the programme for the Sunday School Convention, ordered Wednesday, May 18, was announced as follows: T. J. Magruder; John Mathews, W. H. Foster, W. M. Leftwich, A. Snyder.

Conference then adjourned with the doxology and benediction by the Bishop.

AFTERNOON SESSION.

Conference met according to adjournment. Bishop Paine in the chair.

Religious exercises were conducted by W. G. E. Cunningham. The minutes were read and approved.

Bishop Pierce took the chair.

D. Sullins, clerical delegate from the Holston Conference, on account of family affliction, and T. P. Thomas, of the same Conference, on account of personal affliction, asked and obtained leave of absence.

The report on boundaries, on which Conference adjourned this morning, was then taken up.

The items referring to the boundaries of the North Carolina, South Carolina, North Georgia, South Georgia and Florida Conferences were adopted.

The item referring to the boundaries of the Alabama Conference was read. Its adoption was opposed by J. Hamilton and J. E. Groce, and advocated by W. B. Wood, O. R. Blue and M. S. Andrews.

A motion by M. S. Andrews to amend by putting Oak Bowery circuit into the Alabama Conference, and a substitute offered by J. P. Ralls proposing to leave the names and boundaries of the Mobile and Montgomery Conferences as they now are, did not prevail. The item was adopted.

The item referring to the boundaries of the North Alabama Conference was adopted.

S. P. Whitten moved the adoption of the following proviso:

Provided the foregoing change in the boundaries of the Tennessee Conference shall not take effect, unless it shall be approved by the said Conference at its next session.

On motion of A. H. Mitchell, this was laid on the table.

The items referring to the boundaries of the Louisiana, Mississippi and North Mississippi Conferences were adopted.

The following resolution was then offered, read and adopted:

Resolved, That the Mississippi and North Mississippi Conferences be and are hereby authorized, if deemed expedient by those Conferences respectively in the next four years, to so change the boundaries of said Conferences as to make three Conferences out of the territory now included in these two.

R. ABBEY,
C. K. MARSHALL.

The items referring to the boundaries of the Memphis, Tennessee, Kentucky, Louisville, St. Louis and Missouri Conferences were adopted.

On motion of A. Menroe and C. I. Vandeventer:

Resolved, That the Missouri Conference have liberty to divide in the line of the main Chariton river, if it find it necessary to do so before the next session of the General Conference.

The item referring to the boundaries of the Kansas and Nebraska Conferences was adopted. A motion of T. M. Finney, to change the name to the Western Conference, did not prevail.

The items referring to the Indian Mission, Arkansas, White river, Little Rock, Trinity, East Texas and Texas Conferences, were adopted.

The following resolution was offered, read, and on motion of R. Alexander was laid on the table:

Resolved, That the report of the Committee on Boundaries be so amended as to make the Colorado river the southwestern boundary of the Texas Conference, including also, that part of the shore of Matagorda Bay extending from the mouth of said river to Pass Cavallo.

O. A. FISHER,
D. A. T. WOODS,
W. H. HEADES.

The items referring to the boundaries of the Northwest Texas, West Texas, Los Angeles, Pacific, Columbia and Illinois Conferences were adopted.

The following resolution was offered, read and adopted:

Resolved, That the North Carolina Conference is hereby authorized to form a Western North Carolina Conference *ad interim*, if, in their judgment, the interests of the church require it in the next four years, the presiding Bishop concurring.

F. M. KESSEY,
N. F. REID.

A motion of J. P. Ralls to reconsider this vote did not prevail. W. Smith, J. P. Garvin and J. W. Harris asked and obtained leave of absence.

On motion of J. B. McFerris Conference adjourned, with benediction by the Bishop.

BOOKS AND STATIONERY.
STANDARD EDUCATIONAL WORKS.
PUBLISHED BY
CHARLES SCHUBNER & COMPANY,
654 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.
"Incomparably superior to anything published."
Introduction to the Study of Geography. Elementary Geography. Intermediate Geography. Common School Geography.
Guyot's System is approved and endorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as at home.
The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive an introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc. in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering thousands of schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.
Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by it the pupils of this generation will obtain a clearer, more definite and exact knowledge of the world on which they live, and that it is so systematically arranged as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

MEDICINE—MEDICINE.
KOSKOO.
THE GREAT REPUTATION
which Koskoo has attained in all parts of the country
AS A GREAT AND GOOD MEDICINE,
AND THE LARGE NUMBERS OF TESTIMONIALS
which are constantly being received from physicians, and persons who have been cured by its use, is conclusive proof of its remarkable value.
As a Blood Purifier it has no Equal,
BRING POSITIVELY
THE MOST POWERFUL VEGETABLE ALTERATIVE YET DISCOVERED.
DISEASES OF THE BLOOD.

**"The life of the flesh is in the blood," is a Scriptural maxim that science proves to be true. The people talk of bad blood as the cause of many diseases, and like many popular opinions this of bad blood is founded in truth.
The symptoms of bad blood are usually quite plain. Bad Digestion causes imperfect nutrition, and consequently the circulation is feeble, the soft tissues lose their tone and elasticity, and the tongue becomes pale, broad, and frequently covered with a pasty, white coat. This condition soon shows itself in roughness of the skin, then in eruptions and ulcerative diseases, and when long continued results in serious lesions of the Brain, Liver, Lungs or Urinary apparatus. Much, very much, suffering is caused by impure blood. It is estimated by some that one-fifth of the human family are affected with Scrofula in some form.
When the Blood is pure you are not so liable to any disease. Many impurities of the blood arise from impure diseases of large cities. Eradicate every impurity from the fountain of life, and good spirits, fair skin and vital strength will return to you.**

KOSKOO AS A LIVER INVIGORATOR
STANDS UNQUALIFIED.
BEING THE ONLY KNOWN MEDICINE
that efficiently stimulates and corrects the hepatic secretions and functional derangement of the Liver, without debilitating the system. While it acts vigorously upon the Liver, instead of causing purging, it gradually changes the discharges to a perfectly natural state.
